Risk Considerations

- Templeton BRIC Fund invests primarily in equity securities of companies in Brazil, Russia, India or China (including Hong Kong and Taiwan).
- The Fund is subject to market risk, equity risk, emerging markets risk, foreign currency risk, liquidity risk, regional market risk, non-regulated markets risk, value stocks risk and counterparty risk.
- Emerging markets may involve increased risks and special considerations not typically associated with investment in more developed markets. The risks of investing in emerging markets, which can adversely affect and/or result in a substantial loss to the Fund, may include: liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.
- Some markets that the Fund invests in do not qualify as regulated due to their economic, legal, or regulatory structure, exposing the Fund to greater regulatory risk compared to funds that invest only in regulated market(s). The Fund may be adversely affected as a result.
- The Fund may at its discretion pay dividends out of the capital or out of gross income of the Fund while paying all or part of the Fund's fees and expenses out of the capital of the Fund, which results in effectively paying dividends out of capital. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.
- Investment involves risks which may result in loss of part or entire amount of your investment. Before you decide to invest, you should make sure the intermediary has explained to you that the Fund is suitable to you. Investors should not only base on this marketing material alone to make investment decisions.

Negative Cash Weightings: The negative cash position reflects a temporary position that is a result of a delay in securities settlement transactions.

Top 10 Holdings: These securities do not represent all of the securities purchased, sold or recommended for clients, and the reader should not assume that investment in the securities listed was or will be profitable. The portfolio manager for the Fund reserves the right to withhold release of information with respect to holdings that would otherwise be included in the top holdings list.

Dividend Yield: Reported as a weighted average to reflect the proportion of the portfolio each stock holding represents. This is the ratio of a stock's dividend per share to the month end market price.

The dividend yield quoted here is the yield on securities within the Portfolio and should not be used as an indication of the income received from this portfolio.

Asset Allocation/Composition of Fund: Due to rounding, the sum of portfolio may not equal 100%.
