Class N (acc) USD: 2.79%

[#]The ongoing charges figures are based on the semi-annual financial statements for the period ended 31 December 2020. These figures may vary from year to year.

Dividend policy: *Dividends, if declared, will be reinvested unless indicated by you in the application form to be paid out. Subject to any legal and regulatory requirements, the Fund may at its discretion pay dividends out of the capital or out of gross income of the Fund while charging / paying all or part of the Fund's fees and expenses to / out of the capital of the Fund, which results in an increase in distributable income for the payment of dividends by the Fund and therefore, the Fund may effectively pay dividends out of capital. The Fund may amend such distribution policy subject to the SFC's prior approval and by giving not less than one month's prior notice to investors. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.*

What is this product?

This is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier.

Investment Objective and Policy

Templeton Latin America Fund (the "Fund") aims to increase the value of its investments over the medium to long term.

The Fund invests primarily (that is, at least two-thirds of the Fund's net assets) in:

- *equity securities issued by companies of any size located in, or doing significant business in, Latin America*

In exceptional market circumstances (such as extreme volatility) and on a temporary basis only, 100% of the Fund's net assets may be invested in liquid assets, with due regard to the principle of risk spreading.

The Fund can invest on an ancillary basis in:

- *debt securities issued by companies of any size located in, or doing significant business in, Latin America*
- *equity and debt securities issued by governments and companies of any size located in any countries other than those in the Latin American region*
- *preferred stock, securities convertible into common stock and fixed income securities which are denominated in currencies other than Latin American currencies such as US dollar or euro*

The investment team uses in-depth financial analysis to select individual securities that it believes are undervalued and will provide the best opportunities for increased value over the long term.

Use of derivatives / investment in derivatives

The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.

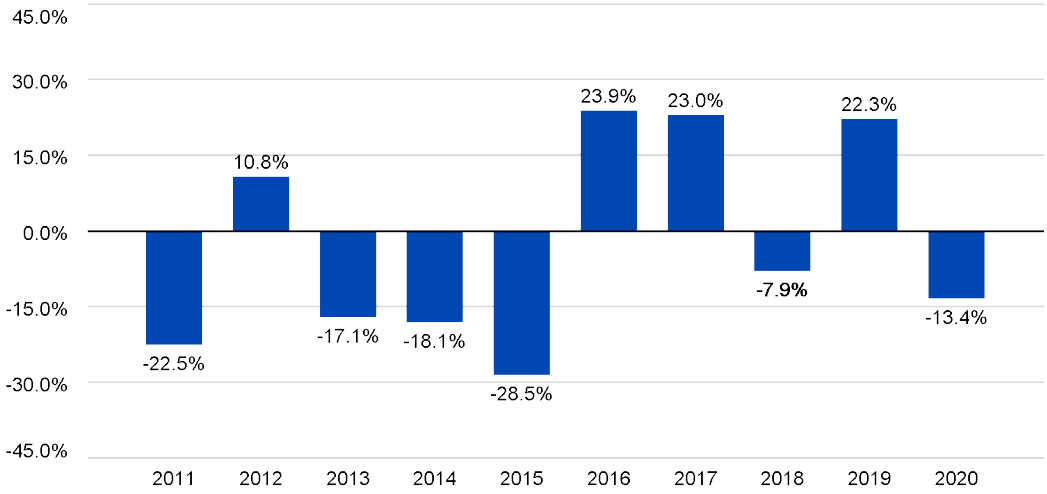

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

- ***Market risk:*** *The market values of securities owned by the Fund will tend to go up or down, sometimes rapidly or unpredictably, due to factors affecting individual issuers, particular industries or sectors within securities markets, or because of general market conditions. During a general downturn in the securities markets, multiple asset classes (including different sectors of the same asset class) may decline in value at the same time. Similarly, when markets perform well, there can be no assurance that securities held by the Fund will participate in the advance. Because the securities the Fund holds fluctuate in price in this manner, the Fund's value may go down as well as up and investors may be adversely affected.*
- ***Equity risk:*** *Equity and equity-linked securities are subject to significant price movements due to various economic, political, market and issuer-specific factors. Such changes may adversely affect the value of equities regardless of issuer-specific performance. Additionally, different industries, financial markets and securities can react differently to these changes. Such fluctuations of the Fund's value are often exacerbated in the short-term. Financial markets trends (including feared or actual failures in the banking system) may also cause large fluctuations in the prices of such securities. As a result, the Fund may be adversely affected.*
- ***Emerging markets risk:*** *The Fund may invest in, or be exposed to, emerging markets, which may involve increased risks and special considerations not typically associated with investment in more developed markets. The risks of investing in emerging markets, which can adversely affect and/or result in a substantial loss to the Fund, may include: liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.*
- ***Frontier markets risk****: Investments in frontier markets involve risks similar to investments in emerging markets but to a greater extent since frontier markets are even smaller, less developed, and less accessible than other emerging markets. Frontier markets may also experience greater political and economic instability and may have less transparency, less ethical practices, and weaker corporate governance compared to other emerging markets. Such markets are also more likely to have investment and repatriation restrictions, exchange controls and less developed custodial and settlement systems than other emerging markets. As a result, the Fund/investors may be adversely impacted.*
- ***Foreign currency risk:*** *The Fund will typically invest to a significant degree in securities that are denominated in currencies other than the base currency of the Fund, exposing its investments to changes in foreign exchange rates and the possibility of exchange control regulations. Changes in currency exchange rates may adversely affect the value of the Fund, and also may affect the income earned by the Fund and gains and losses realized by the Fund.*

- ***Liquidity risk:*** *The Fund may not be able to easily sell securities due to adverse market conditions or reduced value or creditworthiness of issuers in which it invests. The inability of the Fund to sell securities or positions may also impede the ability of the Fund to meet redemption requests in a timely manner. Certain securities may also be illiquid due to limited trading markets or contractual restrictions on their resale. Reduced liquidity due to these factors may have an adverse impact on the net asset value of the Fund.*
- ***Concentration risk:*** *By being concentrated in one region (i.e., Latin America), the Fund could suffer greater volatility compared to funds that follow a more diversified policy. The value of the Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory events affecting Latin America and the Fund/investors may be adversely impacted.*
- ***Counterparty risk:*** *The Fund may be exposed to the credit/default risks of its counterparties and the Fund/investors may be adversely impacted.*
- ***Dividend policy risk:*** *The Fund's dividend policy allows for payment of dividends out of capital or effectively out of capital. Where this is done, it amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.*
- ***Convertible securities risk:*** *The Fund may invest in convertible securities which are a hybrid between debt and equity, permitting holders to convert into shares of the issuer at a specified future date. Convertibles are exposed to equity movement and greater volatility than straight bond investments. Investments in convertible securities are subject to the same interest rate risk, credit risk, liquidity risk and prepayment risk associated with comparable straight bond investments. The value and performance of the Fund may be adversely affected as a result.*
- ***Derivative instruments risk:*** *Derivative instruments involve cost, may be volatile, and may involve a leverage effect. A small market movement may give rise to a proportionately larger impact, which may cause substantial loss to the Fund. Other risks include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. In adverse situations, the Fund's use of derivative instruments may become ineffective and the Fund may suffer significant losses.*

How has the Fund performed?

- *Past performance information is not indicative of future performance. Investors may not get back the full amount invested.*
- *The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividends reinvested.*
- *These figures show by how much class A (Ydis) USD increased or decreased in value during the calendar year being shown. Class A (Ydis) USD is the share class available in Hong Kong with the longest history in the Fund. Performance data has been calculated in USD, including ongoing charges and excluding subscription fee and redemption fee you might have to pay.*
- *Fund launch date: 28 February 1991*
- *Class A (Ydis) USD launch date: 28 February 1991*
- *Effective 25 February 2021, MSCI EM Latin America Index-NR was added as the benchmark of the Fund to adhere to European disclosure rules regarding the use of benchmark.*

Is there any guarantee?
