

### Important Information

The fund invests primarily in equity and equity related securities of small-sized Japanese companies.

•The fund invests in equity would subject to equity investment risk.

•The fund invests in concentrated region and subjects to higher level of risks than a fund investing in a more diversified portfolio/strategy.

•The fund may invest in smaller companies which are relatively less liquid and more volatile than larger companies.

•The fund may use derivatives to meet its investment objective. Derivatives exposure may involve higher counterparty, liquidity and valuation risks. In adverse situations, the fund may suffer significant losses from their derivative usage for hedging.

•For share classes with a general dividend policy, expenses will be paid out of capital rather than out of gross income. The amount of distributable income therefore increases and the amount so increased may be considered to be dividend paid out of capital. Share classes with a fixed dividend policy may pay out both income and capital in distributions. Where distributions are paid out of capital, this amounts to a return or withdrawal of part of your original investment or capital gains attributable to that and may result in an immediate decrease in the net asset value of shares.
