

- The fund seeks to increase the value of its assets over the medium term by investing primarily in European emerging equities.
- The fund may use financial derivative instruments extensively for investment and/or hedging purposes, which may involve material additional risks, for example counterparty default risk or insolvency, volatility risk, liquidity risk, leverage risk and valuation risk, and may expose the fund to significant losses.
- The fund has significant exposure to a geographical region (Europe) and emerging markets and is likely to be subject to a greater concentration risk and higher volatility than a more diversified investment. Emerging markets may have higher legal, regulatory and political risk.
- The management company may at its discretion pay dividends out of the capital of the fund. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the fund's capital may result in an immediate reduction of the net asset value per share.
- Investors should not solely rely on this document to make any investment decision. Please refer to the Hong Kong offering document for further information (including the risk factors) about the fund.
