#### Introduction

This Interim Report and Unaudited Financial Statements covers the period from 1 May 2019 to 31 October 2019 and reviews the performance and market outlook for the Barings Korea Trust (the "Trust") which is managed by Baring Fund Managers Limited (the "Manager").

As an investor in the Trust, your money is pooled with that of other investors and invested by the Manager in the securities of South Korean companies listed on the Korean Stock Exchange. The Trust will also participate in investments such as convertible bonds, fixed interest stocks and mutual funds. As with all funds managed by the Manager, the risk assumed in this portfolio is carefully monitored.

#### Investment objective and policy

The investment objective of the Trust is to achieve long-term capital growth by investing in Korea.

The Trust will seek to achieve its investment objective by investing at least 70% of its total assets directly and indirectly in equities and equity-related securities of companies incorporated in, or exercising the predominant part of their economic activity in Korea, or quoted or traded on the stock exchanges in Korea.

For the remainder of its total assets, the Trust may invest outside of Korea as well as in fixed-income and cash.

In order to implement the investment policy, the Trust may gain exposure through American depositary receipts, global depositary receipts and other equity-related securities including participation notes, structured notes, equity-linked notes and debt securities convertible into equities. The Trust may also invest in collective investment schemes and other transferable securities. It may also use derivatives including futures, options, swaps, warrants and forward contracts for efficient portfolio management (including hedging).

Please refer to the Prospectus for the full investment objective and policy.

#### **Performance Comparator**

The Trust is not managed to a benchmark, however the Manager uses the Korea Composite Stock Price Index (KOSPI) to assess the Trust's performance.

The Manager considers the performance comparator to be an appropriate assessment tool because it tracks the performance of the largest companies in the South Korean stock market.

#### How the Trust is managed

The Trust is invested in the South Korean equity market, and managed using a Growth at a Reasonable Price ("GARP") approach. This means that when researching candidates for the portfolio, just as much emphasis is placed on the likely growth in corporate earnings of a company as is placed on the share price valuation before deciding whether to invest or not. It is believed that this approach combines the best features of both "growth" and "value" investment styles, to the benefit of investors. A significant emphasis is placed on fundamental research, looking for companies which it is believed to have the potential to deliver better-than-expected earnings growth. Over the long term, the aim is to deliver the majority of returns through active stock picking and we expect to achieve most of our added value from stock selection.

The Investment Manager also considers that the best way of finding unrecognised growth is to identify quality companies with visibility of earnings over a longer time period of three to five years especially as market consensus data tends to be only available for shorter term periods.

#### Risk profile

Please see detailed below the key risks applicable to the Trust:

- Changes in exchange rates between the base currency of the Trust and the currencies in which the assets of the Trust are valued can have the effect of increasing or decreasing the value of the Trust and any income generated.
- One of the main risk factors associated with South Korean investments is the proximity to North Korea and the possibility of increased political tension which may mean your money is at greater risk.
- Country-specific funds have a narrower focus than those which invest broadly across markets and are therefore
  considered to be more risky.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract
  will achieve its intended outcome. The use of derivatives can increase the amount by which the Trust's value
  rises and falls and could expose the Trust to losses that are significantly greater than the cost of the derivative
  as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. Coupled with less developed regulation, this means your money is at greater risk.
- Liquidity risk exists when a particular security or instrument is difficult to purchase or sell. If the amount of a transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated derivatives, structured products, etc), it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.

Please refer to the Prospectus for the full risk profile.

### The Trust at a glance on 31 October 2019

Total Fund size		£70.75 million
OCF*	31/10/2019	30/04/2019

<sup>\*</sup>Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Unitholders should note that there are other additional transaction costs such as dealing spread and underlying costs with regard to Investment Fund holdings which will also have reduced the Trust and unit class returns before operating charges.

<sup>\*\*</sup> High/low prices included in the table above are for the accounting period from 1 May 2019 to 31 October 2019 and the accounting years from 1 May 2018 to 30 April 2019 and 9 August 2017 to 30 April 2018, respectively.

#### Report of the Investment Manager

#### **Performance**

Barings Korea Trust (the "Trust") registered an absolute net return in GBP terms on Class A GBP Acc of -9.98% against the performance comparator return of -4.36% during the reporting period. Over three years and five years to 31 August 2019, the returns on the Class A GBP Acc were -7.40% and 0.04% respectively compared with the return of the performance comparator over the same periods of -4.26% and 8.60% respectively.

Korean equities retreated in absolute terms on the back of re-elevated uncertainties from trade friction rhetoric and subdued macro data, while the recovering sentiment in the semiconductor industry and upbeat outlook in the IT sector recovery after pro-longed trade tensions helped cushion market performance. During the reporting period, the share price of Samsung Electronics performed strongly on the back of hopes for semiconductor cycle recovery next year, yet the structural underweight position of the Trust in the stock due to one of the UCITS constraints (the 5/10/40 rule) negatively contributed to relative performance. As at end of October 2019, the weight of Samsung Electronics accounted for over 20% in the performance comparator (the KOSPI Index), but due to such constraint the Trust could only hold up to 10% of its total assets in the stock. Despite the short-term detraction from the relative performance due to the share price rally, the Trust was adequately positioned to capture Samsung Electronics' outperformance, as it held a few mid-cap stocks as the Samsung's "proxies" and/or companies under Samsung's supply chain, which were expected to benefit from the growth of Samsung Electronics. The Trust also allocated sizeable exposure to the tech sector, which could also benefit along with Samsung's improving global competitiveness and opportunity in 5G-network-related capital expenditure.

In addition, some small/mid-cap names in consumer staples such as Korea Kolmar detracted from relative performance amidst continued uncertainties over political tensions between Korea and China as well as weakened earnings visibility partly due to intensified competitions. We have exited our positions in the stock by the end of the reporting period. Also, there has been short-term profit taking activities for some names in quality consumption sectors such as cosmetics makers and botox producers among our weak performing holdings over the reporting period. Despite that we stayed convicted to these quality names, the near-term concerns have caused large volatilities in the share prices regardless of the fundamental industry drivers and the competitive position of the companies. We continue to believe in the long-term structural theme of "Aging Beauty", especially the surging demand for medical injectable and equipment to stay young in appearance. Meanwhile, we maintain our stringent investing disciplines and exit the positions when fundamentals have deteriorated or when the investment thesis has changed.

On the other hand, stock selection in consumer discretionary and financials contributed positively to the Trust. Liquor manufacturer Hite Jinro was a notable contributor to relative performance, as the share price was bolstered by the positive expectation of resilient soju growth and potential turnaround in beer segment thanks to its new product launched earlier this year. AfreecaTV appreciated and contributed to the Trust, driven by the strong revenue growth outlook from increasing number of paying users and advertisement demand.

The top ten purchases and sales during the period were as follows:

Purchases	Costs £'000	Sales	Proceeds £'000
KT&G	2,288	Hite Jinro	2,074
NAVER	2,228	Shinsegae	2,033
SK Telecom	2,153	Lotte Chemical	1,446
SK Hynix	1,970	Samsung Electronics	1,437

Woongjin Coway	1,615	KT&G	1,211
Hana Financial	1,574	SKC	1,177
Korea Investment Holdings	1,551	ВН	1,157

#### Report of the Investment Manager (continued)

#### **Market outlook**

The uncertainty of outlook for China-US trade frictions, coupled with Korea-Japan export disputes and global economic growth slowdown concerns have put downward pressures on Korea's near-term growth profile due to its export market concentration. Having said that, with the prolonged trade frictions between the US and China showing some temporary relief and the short-term market reactions to negative surprises are turning briefer, we're starting to see signs of earnings momentum recovery recently, particularly in the information technology sector fueled by the upbeat demand outlook going into next year. Furthermore, the long-term strategic gains could come along during the ongoing trade frictions, especially within manufacturing and technology sectors where the relationships between Korea and China have evolved to be more competitive.

Korea's unique domestic elements and "niches" of economic drivers are likely to continue to benefit from the evolving secular growth dynamics, and help place the nation ahead of its peers. The near-term market volatility should provide a favourable window for getting exposure to investment opportunities with long-term attractive fundamentals. Korea is in a key position in terms of its economic development and technological level. Korea usually stands at the top of the list of R&D investment versus GDP as investment in new technologies and manufacturing areas always stays in the spotlight for pioneering Korean enterprises. It is in these leading edge sectors and companies where majority of Korea's growth will come through.

#### Baring Asset Management (Asia) Limited, appointed as Sub-Investment by

#### **Baring Asset Management Limited**

Baring Asset Management Limited (the "Investment Manager") gives its portfolio managers full authority to manage their funds as they see fit, within the established guidelines set down. This includes the views that managers may take of the markets and sectors they invest in, which may differ from the views of other Barings portfolio managers.

## **Directors' statement**

The financial statements on pages 13 to 14 were approved by Baring Fund Managers Limited (the "Manager") and signed on its behalf by:

#### Note to the financial statements

for the period ended 31 October 2019

The interim financial statements have been prepared on the same basis as the annual audited financial statements for the year ended 30 April 2019. They are in accordance with the historical cost convention, as modified by the revaluation of investments and the Statement of Recommended Practice for Authorised Funds issued by the Investment Association in May 2014 (the "IMA SORP 2014"). The financial statements have been prepared on a going-concern basis.

#### The risk and reward profile

	SRRI risk category* 31/10/2019	SRRI risk category* 30/04/2019
Class A GBP Acc	6	6
Class I GBP Acc	6	6
Class I GBP Inc	6	6
Class I USD Acc	6	6

<sup>\*</sup> The Synthetic Risk and Reward Indicator ("SRRI") is not a measure of the risk of capital loss, but a measure of the Trust's price movement over time; the higher the number, the greater the price movement both up and down. It is based on historical data and is not a reliable indication of the future risk profile of the Trust. The risk category shown is in line with the Key Investor Information Document ("KIID") at period-end, is not guaranteed and may change over time. The risk categories are measured from 1–7 (1 measuring typically lower risk/rewards and 7 measuring typically higher risk/rewards). The lowest category does not mean a risk-free investment. The Trust is classified in the category indicated due to past movements in the Trust's price. There is no capital guarantee. The value of investments and the income from them may go down as well as up and investors may not get back the amount they invest. The SRRI figures shown have not changed during the period.

#### **Important Information**

#### Constitution

The Barings Korea Trust (the "Trust") is constituted by a Trust Deed between Baring Fund Managers Limited (the "Manager") and NatWest Trustee and Depositary Services Limited (the "Trustee").

The Trust is an authorised unit trust scheme as defined in section 243 of the Financial Services and Markets Act 2000 and has been established as an Undertakings for Collective Investments in Transferable Securities ("UCITS"). This document has been issued by the Manager, which is authorised by the Financial Conduct Authority.

#### **Performance**

Past performance is no indication of current or future performance. Investment involves risk. The value of any investments and any income generated may go down as well as up and is not guaranteed. Any references in the report to other investments held within the Trust should not be read as a recommendation to the investor to buy or sell the same, but are included as illustration only.

#### Key changes during the period

- B. Greene resigned as a Director of the Manager on 23 May 2019.
- J. Armstrong was appointed as a non-executive Director of the Manager on 22 May 2019.
- K. Troup was appointed as a non-executive Director of the Manager on 22 May 2019.
- The investment strategy of the Trust is clarified to mention the Trust intends to meet the requirements to be classified as being an "equity fund" under the Investmentsteuergesetz (2018) and will invest at least 51% of its assets in direct equities

#### **Market timing**

Repeatedly purchasing and selling units in the Trust in response to short-term market fluctuations – known as 'market timing' – can disrupt the Manager's investment strategy and increase the Trust's expenses to the prejudice of all unitholders.

The Trust is not intended for market timing or excessive trading. To deter these activities, the Manager may refuse to accept an application for units from persons that it reasonably believes are engaged in market timing or are otherwise excessive or potentially disruptive to the Trust.

The Manager also reserves the right to redeem units which it reasonably believes have been purchased by unitholders engaged in market timing.

#### **Publication of prices**

The prices of units are published on the Barings website at www.barings.com. You can also obtain prices by telephone by calling +44 (0) 333 300 0372.

#### **Dealing basis**

The Manager's basis for dealing in purchases and sales of the Trust's units is "forward". This means that the price used for any deal will be calculated at the next valuation point following receipt of the investor's instruction.

#### **Important Information** (continued)

#### Fees and expenses

The Manager's periodic charge is calculated on each business day, based on the value of the property of the Trust on the immediately preceding business day, and is paid to the Manager monthly, in arrears, on the first business day of the calendar month immediately following. The current annual management fees charged to the Trust are shown on page 5.

#### Revenue allocations and reports

Revenue allocations are made on 31 July (final) of each year, where applicable, and forwarded to unitholders together with tax vouchers. The most recent annual report and audited financial statements and interim report and unaudited financial statements will be available on the Barings website at <a href="https://www.barings.com">www.barings.com</a>.

#### **Prospectus and Manager's reports**

Copies of the Prospectus, the Key Investor Information Document(s) ("KIID(s)"), and the most recent annual or interim report and financial statements are available to all persons free of charge from the Manager upon request. The annual or interim report and financial statements are also available in French.

PricewaterhouseCoopers LLP (the "Independent Auditor") expresses its opinion on the English version of the annual report and financial statements, and accepts no responsibility for any translations of those financial statements.

## General information for overseas investors (Austria, France, Germany, Sweden and Switzerland)

#### Special risks resulting from additional German tax publication requirements in Germany

A foreign investment company such as Baring Fund Managers Limited (the "Manager") must provide documentation to the German fiscal authorities upon request, e.g. in order to verify the accuracy of the additional German published tax information. German investors will use this for their tax returns. The basis upon which such figures are calculated is open to interpretation and it cannot be guaranteed that the German fiscal authorities will accept the Manager's calculation methodology in every material respect. In addition, you should be aware that if it transpires that these publications are incorrect, any subsequent correction will, as a general rule, not have retrospective effect and will, as a general rule, only take effect during the current financial period. Consequently, the correction may positively or negatively affect the investors who receive a distribution or an attribution of deemed income distributions in the current financial period.

#### Information for investors in Switzerland

The Manager has appointed BNP Paribas Securities Services, Paris, Succursale de Zurich, Selnaustrasse 16, 8002 Zurich, Switzerland as representative and paying agent for Switzerland. Units are distributed in Switzerland by BNP Paribas (Switzerland) Limited at the above address. Investors can obtain free of charge the Prospectus, KIID(s), the latest annual and interim reports, copies of the Trust Deed (and any amendments thereto) as well as a list of the purchases and sales made on behalf of the Barings Korea Trust (the "Trust"), in French, from the representative at the above address. Official publications for the Trust are found on the internet at <a href="https://www.fundinfo.com">www.fundinfo.com</a>. Unit prices (Net Asset Value with the words "plus commissions") are published daily on the internet at <a href="https://www.fundinfo.com">www.fundinfo.com</a>.

#### Important information to the performance tables on page 18

The value of an investment can fall as well as rise as a result of market fluctuations and investors may not get back the amount originally invested. Past performance is no indication of current or future performance. The performance data does not take account of the commissions and costs incurred on the issue and redemption of units, nor the effect of the Manager's preliminary charge.

In conformity with a Guideline of the Swiss Funds Association ("SFA") dated 16 May 2008, the Manager is providing the below additional information regarding performance.

## General information for overseas investors (Austria, France, Germany, Sweden and Switzerland) (continued)

#### Total Expense Ratio ("TER")

Following the Guideline of the Swiss Funds Association ("SFA") dated 16 May 2008, the Manager is required to publish a total expense ratio ("TER") for the Trust for the 12 months to 31 October 2019. The TER has been established by the Manager and draws upon the data contained in the "Statement of total return" (Manager's management fee, registration fees, trustee fees, safe custody charges, audit fees, Financial Conduct Authority ("FCA") and other regulatory fees and taxation fees as well as any further fees and costs listed in the "Statement of total return" account which do not form part of the aforementioned categories). It is calculated with reference to these numbers and in conformity with the above guideline.

The TERs for each class for the period ended 31 October 2019 and the year ended 30 April 2019 are as follows:

	TER as at 31 October 2019 %	TER as at 30 April 2018 %
Class A GBP Acc	1.69	1.69
Class I GBP Acc	0.94	0.94
Class I GBP Inc	0.94	0.94
Class I USD Acc	0.94	0.94

#### Trailer fees and reimbursements

Trailer fees (Bestandespflegekommissionen) may only be paid to the sales agents/partners indicated below:

- authorised sales agents (distributors) within the meaning of Article 19, Para 1, Collective Investment Schemes Act ("CISA");
- sales agents (distributors) exempted from the authorisation requirement within the meaning of Article 19, Para 4, CISA;
- sales partners who place trust units exclusively with institutional investors with professional treasury facilities;
   and/or:
- sales partners who place trust units with their clients exclusively on the basis of a written commission-based asset management mandate.

Reimbursements (Rückvergütungen) may only be paid to the institutional investors detailed below who from a commercial perspective are holding the trust units for third parties:

- life insurance companies (in respect of trust units held for the account of insured persons or to cover obligations towards insured persons), pension funds and other retirement provision institutions (in respect of trust units held for the account of beneficiaries);
- investment foundations (in respect of trust units held for the account of in-house funds);
- Swiss fund management companies (in respect of trust units held for the account of the trusts managed); and
- foreign fund management companies and providers (in respect of trust units held for the account of managed trusts and investing unitholders).

## General information for overseas investors (Austria, France, Germany, Sweden and Switzerland) (continued)

Performance record to 31 October 2019 (including distribution payments where applicable)
