E Fund (HK) China Equity Dividend Fund

Data as of 31 Aug 2020

Important Note:

Fund Facts

Important Note:

1. E Fund Selection Investment Series – E Fund (HK) China Equity Dividend Fund (the "Sub-Fund") is an investment fund and not a bank deposit. There is no guarantee of the repayment of principal. There is also no guarantee of dividend or distribution payments during the period you hold the units of the Sub-Fund. The instruments invested by the Sub-Fund may fall in value and therefore your investment in the Sub-Fund may suffer losses.

2. Investment in equity securities is subject to market risk. The prices of such securities may also be volatile and a number of factors may affect stock prices, including but not limited to, investment sentiment, political environment, regional or global economic instability, currency and interest rate fluctuations. If the market value of equity securities in which the Sub-Fund invests in goes down, its Net Asset Value may be adversely affected, and investors may suffer substantial losses.

3. Distributions of the Sub-Fund may be paid out of the capital of the Sub-Fund. Investors should note that payment of distributions out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment and such distributions may result in an immediate reduction of the net asset value of the relevant units.

4. The price at which securities may be purchased or sold by the Sub-Fund and the net asset value of the Sub-Fund may be adversely affected if trading markets for China A-Shares are limited or absent. The China A-Share market may be more volatile and unstable (for example, due to the risk of suspension of a particular stock or government intervention) than those in more developed markets. Market volatility and settlement difficulties in the China A-Share markets may also result in significant fluctuations in the prices of the securities traded on such markets and thereby may affect the value of the Sub-Fund. Trading band limits are imposed by the stock exchanges in China on China A-Sh

significant losses. Further, when the suspension is subsequently lined, it may not be possible for the substance of the subst

Note 1: Annualized dividend rate = [(1 + Dividend per Unit / Sub-Fund NAV as of Ex-Date) ^ (365 Days or 366 Days (if applicable) / Days in distribution period) - 1] x

The Manager currently intends to make monthly dividend distribution in respect of the Class A (distribution) and Class I (distribution); actual dividend payout will be subject to the Manager's discretion. The compositions of the dividends (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) for the last 12 months are available by the Manager on request and on the website of the Manager at www.efunds.com.hk. Dividend rate is not indicative of fund performance. A positive dividend yield does not imply a positive return. Past dividend rate is not indicative of future dividend rate. Net asset value of the funds may volatile subject to market factors.
