This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

LF Canlife Sterling Liquidity Fund, Class I Accumulation, a fund within LF Canada Life Investments Fund (ISIN: GB00BYW8XV16)

The fund is managed by Link Fund Solutions Limited, part of the Asset Services Division of Link Administration Holdings Limited.

Objective and investment policy

Objective

The fund aims to provide a return in line with sterling money market rates combined with a high degree of capital security.

Investment Policy

The fund invests in high quality sterling denominated money-market instruments, transferable securities and deposits which comply with the regulatory requirements for investment within a Regulated Money Market fund that is a standard Money Market fund. High quality sterling denominated money-market instruments may include, but not be limited to commercial paper, certificates of deposit, floating rate notes and short dated bonds.

The fund may also invest in other Regulated Money Market Funds that are either standard or short-term money market funds as well as cash.

Essential features of the fund:

- The fund is a standard, variable net asset value Money Market Fund.
- The fund has the discretion to invest in a range of investments as described above with no need to adhere to a particular benchmark.
- You can buy and sell shares in the fund on each business day.
- Income from the fund will be added to the value of your investment.
- Derivatives may be used to manage the risk profile of the fund, reduce costs or generate additional capital or income.
- Recommendation: This fund is suitable for professional investors looking for a return in line with sterling money market rates from investment in sterling denominated money-market instruments and require a highly liquid investment.

Risk and reward profile

- 1 2 3 4 5 6 7
- This indicator shows how much a fund may have risen and fallen in the past, and therefore how much a fund's returns may have varied. It is a measure of a fund's volatility. As the fund has less than 5 years price history, this calculation incorporates the volatility of an appropriate benchmark index. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
 - The fund has been classed as 1 because its volatility has been measured as low.
 - This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
 - The risk and reward profile shown is not guaranteed to remain the same and may shift over time.

- Though this fund only has exposure to high quality counterparties, there is a risk that these counterparties may fail to meet their obligations. This may lead to the fund suffering income and capital losses.
- In low or negative interest rate environments, there may be occasions where the charges incurred by the fund could reduce the income to zero and even erode capital.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

Charges for this fund

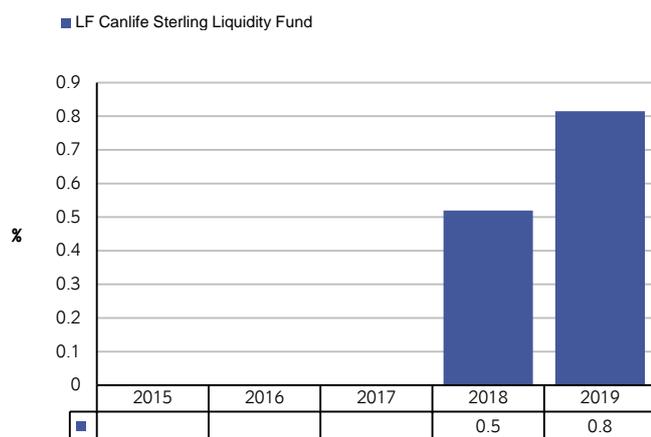

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
Charges taken from the fund over the year	
Ongoing Charges	0.15%
Charges taken from the fund under certain specific conditions
