

Z Income GBP | Data as at 31.03.2024

Fund objectives and investment policy

The fund aims to provide capital growth by investing in equity and equity related securities of companies worldwide which help to advance the development of the global digital infrastructure and which the investment manager deems to be sustainable investments. On 07.02.2022 the Schroder Global Cities Real Estate Income changed its name to Schroder Digital Infrastructure, and changed the investment objective and investment policy.

Above is the Investment Objective of the fund. For details on the full fund's Investment Policy please see the KIID. The Fund is actively managed and invests at least 80% of its assets in a concentrated range of equity and equity related securities of companies worldwide (including emerging markets and less developed markets), which the Investment Manager deems to be sustainable investments, which are investments that contribute towards more environmentally resilient, socially inclusive and / or innovative digital infrastructure.

Relevant risks associated with an investment in this fund are shown below and should be carefully considered before making any investment. Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

Z Income GBP | Data as at 31.03.2024

10 year return of GBP 10,000

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

Risk considerations

Concentration risk: - The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

Currency risk: - The fund may lose value as a result of movements in foreign exchange rates.

Derivatives risk: - Derivatives may be used to manage the portfolio efficiently. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Emerging markets & frontier risk: - Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Operational risk: - Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: - Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Real estate and property risk: - Real estate investments are subject to a variety of risk conditions such as economic conditions, changes in laws (e.g. environmental and zoning) and other influences on the market.

Sustainable Investing Risk: - The fund applies sustainability criteria in its selection of investments. This investment focus may limit the fund's exposure to companies, industries or sectors and the fund may forego investment opportunities that do not align with its sustainability criteria chosen by the investment manager. As investors may differ in their views of what constitutes sustainability, the fund may invest in companies that do not reflect the values of any particular investor.

IBOR risk: - The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Liquidity risk: - In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Counterparty risk: - The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Higher volatility risk: - The price of this fund may be volatile as it may take higher risks in search of higher rewards.

Market risk: - The value of investments can go up and down and an investor may not get back the amount initially invested.

Synthetic risk & reward indicator (SRRRI)

LOWER RISK

Potentially lower reward

HIGHER RISK

Potentially higher reward

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed. Please see the Key Investor Information Document for more information.

Climate dashboard

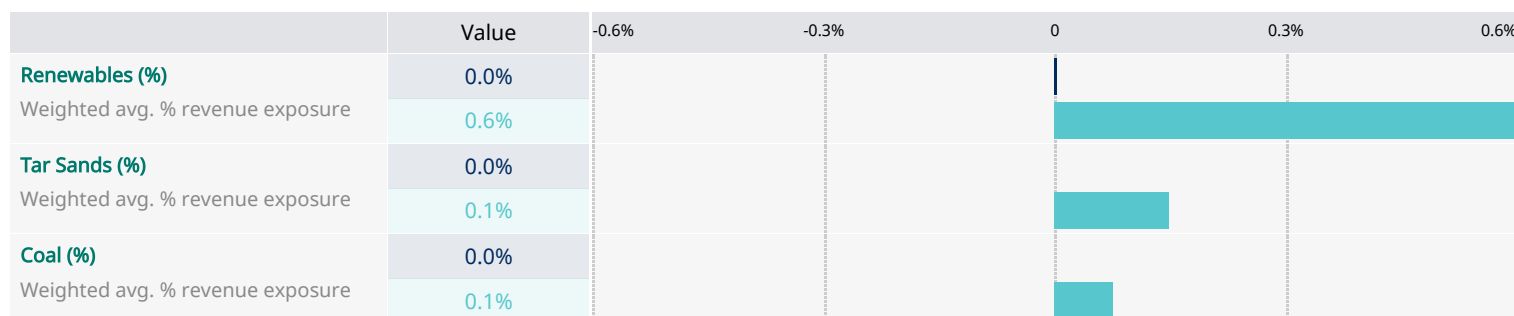

Carbon Metrics

● Fund ● Benchmark

Energy Exposure

● Fund ● Benchmark

Source: MSCI. Carbon Intensity is based on reported scope 1 & 2 emissions. Fossil Fuel Exposure charts for sub-funds apply a revenue-based exclusion on companies operating in the coal sector. Please refer to the fund prospectus for more details on exclusions. Benchmark used is the MSCI All Country World Index (Net Total Return) index. Source: MSCI. The graphs above include the Weighted Average Carbon Intensity (WACI), carbon footprint and energy exposure of the fund and its benchmark, where applicable. WACI and carbon footprint are based on Scope 1, 2 and 3 emissions. WACI measures the carbon-intensity of the portfolio by assessing the ratio of emissions to revenue generated from underlying investee companies. Carbon footprint normalises the total carbon emissions of the portfolio to its market value. When calculating carbon metrics, Schroders will exclude neutral assets (such as cash) and other non-eligible assets. This means that Schroders aggregates company-level GHG emissions based on the portfolio's eligible assets only (which are listed equity and credit holdings, where applicable). The energy exposure metrics are calculated based on the revenue generated from these activities by the underlying investee companies and weighted by the fund's holdings. Fund exposure to 'Coal' represents Thermal Coal mining and reflects investments in companies whose coal-related revenues are below the accepted threshold. Please refer to the fund sustainability disclosures for more details on exclusions. All metrics use reported company data. Where data may not be available, then MSCI may use estimates. Benchmark used is the MSCI All Country World Index (Net Total Return) index.

Adverse Impacts

The table below shows some adverse impacts of this fund and its benchmark, where applicable. The indicators referred to below aim to show the negative effects that investment decisions, made in respect of the fund's portfolio, have on certain sustainability factors, such as environmental, social and employee matters. We also identify the coverage, which refers to the percentage of indicator data available at month-end for the underlying holdings of the fund and the benchmark, where applicable.

Category	Indicator	Description	Units	Fund	Benchmark
People	Board Gender Diversity	Average ratio of female to male board members in investee companies	Ratio (%)	51.6% Coverage*: 95.6%	53.6% Coverage*: 99.7%
	UNGC and OECD principle policies	Share of investment in companies without policies to monitor compliance with UNGC and OECD principles	Ratio (%)	51.2% Coverage*: 95.6%	54.2% Coverage*: 99.7%
	UNGC and OECD principle violators	Share of investments in companies that have been involved in violations of UNGC and OECD principles	Ratio (%)	0.0% Coverage*: 95.6%	0.5% Coverage*: 99.7%
Planet	Non-renewable energy exposure	Share of non-renewable energy consumption and production	Ratio (%)	67.8% Coverage*: 64.3%	66.8% Coverage*: 64.9%
	Exposure to companies without carbon emissions reduction initiatives	Investing in companies without carbon emission reduction initiatives aligned with the Paris Agreement	Ratio (%)	2.6% Coverage*: 95.6%	29.7% Coverage*: 99.5%

Important information

Costs:

Certain costs associated with your investment in the fund may be incurred in a different currency to that of your investment. These costs may increase or decrease as a result of currency and exchange rate fluctuations.

If a performance fee is applicable to this fund, details of the performance fee model and its computation methodology can be found in the fund’s prospectus. This includes a description of the performance fee calculation methodology, the dates on which the performance fee is paid and details of how the performance fee is calculated in relation to the fund’s performance fee benchmark, which may differ from the benchmark in the fund’s investment objective or investment policy.

For further information regarding the costs and charges associated with your investment, please consult the funds’ offering documents and annual report.

General:

The fund is an authorised unit trust. A Key Investor Information Document and Supplementary Information Document are available. These can be requested via our website at www.Schroders.co.uk or call one of our Investor Services Team on 0800 182 2399 for a printed version.
