**IMPORTANT:**

- Use of environmental, social and governance (“ESG”) criteria as the investing principles may impact the Fund’s performance. Reliance on third party data may lead to incorrect evaluation of a security or issuer based on ESG criteria. There may also be a risk of incorrectly applying the relevant ESG criteria on the Fund. The Fund may invest in debt securities that are subject to actual or perceived ratings downgrade. The Fund may invest in assets denominated in various currencies. Changes in exchange rates and currency controls may affect the value of the Fund’s assets. An increase in interest rates may adversely affect the value of the bonds held by the Fund. The Fund invests in bonds issued or guaranteed by governments or authorities, which may involve political, economic, default or other risks.
- The Fund is subject to non-Investment grade and unrated bond risks, securities lending counterparty risk, risks relating to Total Return Swap, risks relating to Contracts for Differences, liquidity risk and contingent convertible bonds risk.
- Class 8 Shares pay dividends gross of expenses and/or from capital at the Directors’ discretion and include interest rate differentials arising from share class currency hedging. Negative interest rate differentials may decrease the dividends paid. Paying dividends gross of expenses may result in more income being available for distribution; however these shares may effectively pay dividends from capital – may amount to a partial return or withdrawal of an investor’s original investment or capital gains. All declared dividends result in an immediate reduction in the NAV price of the share class on the ex-dividend date.
- The Fund may use derivatives for hedging and extensively for investment purposes. Risks associated with derivatives include counterparty/credit, liquidity, valuation, volatility and market risks. The Fund’s volatility may increase or decrease from its derivative usage, and may suffer losses.
- The value of the Fund can be volatile and can go down substantially within a short period of time. It is possible that a certain amount of your investment could be lost.
- Investors should not make investment decisions based on this document alone. Investors should refer to the Prospectus and Key Facts Statement for details including risk factors

## SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics can help investors integrate non-financial, sustainability considerations into their investment process. These metrics enable investors to evaluate funds based on their environmental, social, and governance (ESG) risks and opportunities. This analysis can provide insight into the effective management and long-term financial prospects of a fund.

The metrics below have been provided for transparency and informational purposes only. The existence of an ESG rating is not indicative of how or whether ESG factors will be integrated into a fund. The metrics are based on MSCI ESG Fund Ratings and, unless otherwise stated in fund documentation and included within a fund's investment objective, do not change a fund's investment objective or constrain the fund's investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund. For more information regarding a fund's investment strategy, please see the fund's prospectus.

MSCI ESG Fund Rating (AAA-CCC)	A	MSCI ESG Quality Score (0-10)	6.90
MSCI ESG Quality Score - Peer Percentile	86.76%	MSCI ESG % Coverage	81.95%
Fund Lipper Global Classification	Mixed Asset EUR Bal - Global	MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES)	61.00
Funds in Peer Group	657		

All data is from MSCI ESG Fund Ratings as of **07-Jan-2021**, based on holdings as of **31-Jul-2020**. As such, the fund's sustainable characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% of the fund's gross weight must come from securities covered by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund's gross weight; the absolute values of short positions are included but treated as uncovered), the fund's holdings date must be less than one year old, and the fund must have at least ten securities. For newly launched funds, sustainability characteristics are typically available 6 months after launch.

## ESG GLOSSARY:

**MSCI ESG Fund Rating (AAA-CCC):** The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

**MSCI ESG Quality Score - Peer Percentile:** The fund's ESG Percentile compared to its Lipper peer group.

**Fund Lipper Global Classification:** The fund peer group as defined by the Lipper Global Classification.

**Funds in Peer Group:** The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

**MSCI ESG Quality Score (0-10):** The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. The Score also considers ESG Rating trend of holdings and the fund exposure to holdings in the laggard category. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

**MSCI ESG % Coverage:** Percentage of a fund's holdings that have MSCI ESG ratings data.

**MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES):** Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per \$1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.
