- BEA Union Investment Asia Pacific Multi Income Fund (the "Fund") is subject to general investment risk, equity market risk, asset allocation risk, Asian market concentration risk, emerging market risk and currency risk.
- The Fund invests in debt securities and are subject to risks in interest rates, credit/counterparty, downgrading, below investment grade or non-rated securities, volatility and liquidity, valuation and sovereign debt and credit rating risks which may adversely affect the price of the debt securities.
- The manager may at its discretion make distributions from income and/or capital in respect of the distributing classes of the Fund. Distributions paid out of capital amount to a return or withdrawal of part of the unitholder's original investment or from any capital gains attributable to that original investment. Such distribution may result in an immediate reduction of the net asset value per unit.
- In terms of currency hedged class units, adverse exchange rate fluctuations between the base currency of the Fund and the class currency of the currency hedged class units may result in a decrease in return and/or loss of capital for unitholders. Over-hedged or under-hedged positions may arise and there can be no assurance that the currency hedged class units will be hedged at all times or that the manager will be successful in employing the hedge.
- RMB is currently not a freely convertible currency as it is subject to exchange controls and restrictions. Non-RMB based (e.g. Hong Kong) investors are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the investors' base currencies (for example HKD) will not depreciate. Any depreciation of the RMB could adversely affect the value of investors' investments.
- The Fund may use financial derivative instruments for hedging and investment purposes which may not achieve the intended purpose and may result in significant losses. Risks associated with derivative instruments include counterparty/ credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk.
- Investors should not make an investment decision based solely on this material.

OBJECTIVE
