What is this product?

Threadneedle (Lux) – American Select (the “Portfolio”) is a portfolio of Threadneedle (Lux), an investment company (i.e. a mutual fund) with variable capital constituted in Luxembourg. The home regulator of Threadneedle (Lux) is the Commission de Surveillance du Secteur Financier in Luxembourg.

Objective and Investment Strategy

The Portfolio seeks to achieve capital appreciation by investing at least two-thirds of its assets in the equity securities of companies domiciled in North America or which have significant North American operations. These may include large, medium and smaller companies. There will be no particular specialisation. The select investment approach means that the Portfolio has the flexibility to take significant stock and sector positions which may lead to increased levels of volatility.

The Portfolio will not use financial derivative instruments extensively for investment, hedging or efficient portfolio management purposes.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

Investment

There is no guarantee that the investment objective of the Portfolio can be achieved. The value of investments held by the Portfolio can fall as well as rise and investors might not get back the sum originally invested, especially if investments are not held for the long term.

Volatility

The prices of the Portfolio's investments may rise and fall sharply in the short-term and this may result in a higher volatility of the Portfolio's value.

Equity Securities

The value of equity securities held by the Portfolio may be affected by various factors. A fall in their value will affect the price of the Portfolio.

Concentration

Short-term price volatility is likely to be particularly evident in the Portfolio as it invests in a concentrated portfolio of equity securities.

Geographical Concentration

The Portfolio's investments are concentrated in North America. This may result in higher volatility than funds which comprise broad-based global investments.

Currency

Where investments are made in assets that are denominated in multiple currencies, changes in exchange rates may affect the value of the investments.

Investor Currency

Where investments in the Portfolio are in currencies other than your own, changes in exchange rates may affect the value of your investments.

Hedge/Basis

The use of financial derivative instruments for hedging and/or efficient portfolio management purposes may become ineffective in adverse situations or if the Management Company or the Sub-Advisor employs a strategy that does not correlate well with the Portfolio's investments. This may result in a significant loss to the Portfolio.

Distributions out of capital risk

Distributions may be paid out of the capital of the Share Class AUP if the net distributable income attributable to these share classes during the relevant period is insufficient to pay distributions as declared. The Directors of the Portfolio may also, at their discretion, pay dividends out of gross income while paying all or part of the share classes' expenses out of their capital, resulting in an increase in distributable income for the payment of dividends, and therefore paying dividends effectively out of capital of the relevant share classes. Investors should note that the payment of distributions out of, or effectively out of, capital represents a return or a withdrawal of part of the amount they originally invested or capital gain attributable to that amount. Any distributions involving payment of dividends out of, or effectively out of, capital of the share classes will result in an immediate decrease in the net asset value of the relevant shares.

How has the Portfolio performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the share class increased or decreased in value during the calendar year being shown. Performance data has been calculated in US\$ including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Portfolio launch date: 28 July 2000.

- Share Class AU launch date: 28 July 2000.
 - The Management Company views Share Class AU, being the retail share class denominated in the Portfolio's base currency, as the most appropriate representative share class.
- △ The performance of this year was achieved under circumstances that no longer apply. Before 16 September 2009, the Portfolio had a different Sub-Advisor, name and investment objective and policy.

Is there any guarantee?

This Portfolio does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?
