

Aberdeen Standard SICAV I - Latin American Equity Fund

A Acc USD

31 December 2020

Important Information

- The Fund invests in equities and equity-related securities of companies registered in or conducting the bulk of their business activities in Latin America.
- The Fund invests in emerging markets which tend to be more volatile and is subject to higher political, regulatory, credit and liquidity risks.
- The Fund's net derivative exposure may be up to 50% of the Fund's net asset value and subject to counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk.
- Investment in this Fund may involve a high degree of risk and may not be suitable for all investors. It is possible that the entire value of the investment could be lost.
- Investors are responsible for their investment decisions and should ensure that the intermediary has advised on Fund's suitability and consistency with their investment objective. If in doubt, please seek independent financial and professional advice.
- Investors should not invest in this Fund based solely on this document and should read the relevant offering documents (particularly the investment policies and risk factors) for more details before investing.

Objective

To achieve long-term total return by investing at least two-thirds of the Fund's assets in equities and equity-related securities of companies with their registered office in a Latin American country; and/or, companies which have the preponderance of their business activities in a Latin American country; and/or, holding companies that have the preponderance of their assets in companies with their registered office in a Latin American country.

Source: Aberdeen Standard Investments, total return, Gross of Fees, BPSS, Datastream, USD, as of 30/11/2020. Please note the risk analytics figures are calculated on gross returns whereas the performance figures are based on net asset value (NAV) returns. In addition, the risk analytics figures lag the performance figures by one month. It should be noted that the figures provided regarding risk would be adjusted if fund fees and expenses were included.^ 3 and 5 year annualised. Beta is a measure of the volatility of a portfolio in comparison to a benchmark index. Fund volatility measures historical volatility. Information ratio measures the portfolio returns beyond the returns of a benchmark, usually an index, compared to the volatility of those returns. R-squared measures the percentage of a fund or securitys movements that can be explained by movements in a benchmark index. Sharpe ratio measures risk-adjusted performance. Tracking error measures the divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark.

To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Product Key Facts Statement and Prospectus which are available on our website www.aberdeenstandard.com.hk. The Prospectus also contains a glossary of key terms used in this document.

¹The Historic Yield as at 30/11/2020 reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

²These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

³The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 1.75% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.
