What is this product?

Invesco Japanese Equity Dividend Growth Fund (the "Fund") is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is the CSSF, Luxembourg supervisory authority.

Objectives and Investment Strategy

The Fund aims to achieve long term capital growth together with a sustained level of income, measured in Yen.

The Fund seeks to achieve its objective by investing primarily (at least 70% of the net asset value of the Fund) in equities of companies (i) domiciled or (ii) listed or (iii) carrying out business activities predominantly in Japan or (iv) holding companies, the interests of which are predominantly invested in subsidiary companies with a registered office in Japan.

The Fund will invest in companies that, in the opinion of the Investment Manager, are attractively valued and demonstrate sustainable dividend growth, along with a strong business model and sound balance sheet.

Up to 30% of the net asset value of the Fund may be invested in cash and cash equivalents, money market instruments, convertible debt and other transferable securities not meeting the above requirements. For the avoidance of doubt, less than 30% of the net asset value of the Fund may be invested in convertible debt.

Not more than 10% of the net asset value of the Fund may be invested in securities issued by or guaranteed by a country which is unrated (debt securities which are not rated by any international rating agency such as Moody's, Standard & Poor's and Fitch) and/or whose credit rating is below investment grade (below investment grade is defined as credit rating that is below BBB- from Standard & Poor's and Fitch, or below Baa3 from Moody's or an equivalent rating from an internationally recognized rating agency).

The Fund may use derivatives (including but not limited to futures, forwards, non-deliverable forwards, swaps and complex options structures) for hedging and efficient portfolio management purposes. Such derivatives may also incorporate derivatives on derivatives (i.e. forward dated swaps, swap options). However, financial derivative instruments will not be extensively used for investment purposes (i.e. entering into financial derivative instruments to achieve the investment objectives).

The Fund may engage in securities lending. The expected proportion of the net asset value of the Fund subject to securities lending is 20%. Under normal circumstances, the maximum proportion of the net asset value of the Fund subject to securities lending is 29%.

Use of derivatives / investment in derivatives

The Fund's net derivative exposure[1] may be up to 50% of the net asset value of the Fund.

What are the key risks?

Investment involves risks. Please refer to the Prospectus for details including the risks factors.

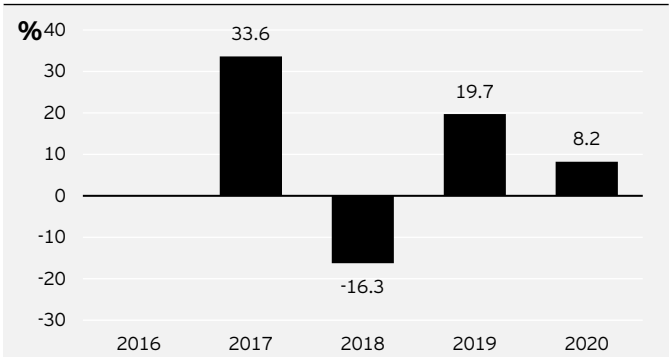

- **General investment risk** - There can be no assurance that the Fund will achieve its investment objective. The instruments invested by the Fund may fall in value due to any of the key risk factors below and therefore your investment in the Fund may suffer losses. There is no guarantee of the repayment of principal.
- **Currency exchange risk** - The Fund's assets may be invested in securities denominated in currencies other than the base currency of the Fund. Also, a class of shares may be designated in a currency other than the base currency of the Fund. The net asset value of the Fund may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.
- **Volatility risk** - Investors should note that volatility in the Fund's investment portfolio may result in large fluctuations in the net asset value of the Fund which may adversely affect the net asset value per share of the Fund and investors may as a result suffer losses.
- **Equities risk** - The value of, and income derived from, equity securities held may fall as well as rise and the Fund may not recoup the original amount invested in such securities. The prices of and the income generated by equity securities may decline in response to certain events, including the activities and results of the issuer, general

political, economic and market conditions, regional or global economic instability and currency and interest rate fluctuations. Thus, this may adversely impact the Fund and/or the interests of investors.

- **Concentration risk**
  - As the Fund will invest primarily in equities with exposure to Japanese markets, such concentration may exhibit a higher than usual degree of risk and the Fund may be subject to above average volatility. The diversification benefits that would ordinarily accrue from investment in a fund having a more diverse portfolio of investments, may not apply to this Fund.
  - The value of the Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event and natural disaster affecting the Japanese market.
- **Risk of investing in financial derivative instruments ("FDI") for efficient portfolio management and hedging purposes** - Investments of the Fund may be composed of FDI used for efficient portfolio management or to attempt to hedge or reduce the overall risk of its investments. Risks associated with FDI include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a FDI can result in a loss significantly greater than the amount invested in the FDI by the Fund. Exposure to FDI may lead to a high risk of significant loss by the Fund.

How has the Fund performed?

- The Fund Manager views Class A annual distribution - USD (the "Share Class"), being the focus share class of the Fund available to the public of Hong Kong, as the most appropriate representative share class.
- Fund launch date: 07 December 2016.
- Share Class launch date: 07 December 2016.
- The base currency of the Fund is JPY.
- Past performance of the Share Class is calculated in USD.
- Performance is calculated after deduction of ongoing charges and is inclusive of gross income reinvested. Any entry/exit charges shown are excluded from the calculation.
- Past performance is not a guide to future performance.
- Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the Share Class increased or decreased in value during the calendar year being shown.
- Where no past performance is shown, there was insufficient data available in that year to provide performance.

Is there any guarantee?

The Fund does not have any guarantees. You may not get back the full amount of money you invest.
