

Invesco Belt and Road Bond Fund

31 August 2020

Important Information

- The Fund invests primarily in debt securities whose issuers, guarantors and/or domiciled countries could or would directly or indirectly benefit from China's Belt and Road vision of increasing land and sea paths to connect Asia, Europe, Middle East and Africa and their adjacent seas for closer economic co-operation.
- Investors should note the general investment risk, risk of misalignment between the Fund's investment theme and the Belt and Road vision, risks of investing in companies related to the Belt and Road Initiative, emerging markets risk, liquidity risk, sovereign debt risk, portfolio turnover risk, Eurozone risk, hedged unit classes risk, RMB class(es) related risk, counterparty risk, currency and foreign exchange risk, concentration risk/China market risk, and investments in debt instruments with loss-absorption features including senior non-preferred debts, contingent convertible bonds which are subject to the risk of being written down or converted to ordinary shares upon the occurrence of pre-defined trigger events and may result in a significant or total reduction in the value of such instruments.
- Debt Securities is subject to (a) interest rate risk; (b) credit risk (including default risk, credit rating risk, credit rating downgrading risk and liquidity risk); (c) risks relating to below investment grade and unrated securities; and (d) valuation risk.
- Financial derivative instruments may be used for hedging. The use of derivatives may become ineffective and the Fund may suffer significant losses.
- For Monthly Distribution-1 unit class (MD1), (a) the Fund Manager may at discretion pay distributions out of the capital and/or effectively out of capital, which amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction of the net asset value per unit in respect of such unit class after the distribution date; (b) Investments in MD1 are not an alternative to a savings account or fixed-interest paying investment, investors may not be able to get back the original investment amount; and (c) The fixed amount of distributions per month is subject to risk of exchange rate fluctuations. (Note 1)
- In addition, investors of MD-1 that are currency hedged (MD1 hedged) should be aware of the uncertainty of relative interest rates. The net asset value of the MD1 hedged may fluctuate and may significantly differ from other unit class due to fluctuation of the interest rate differential between the currency in which the MD1 hedged is denominated and the base currency of the Fund and may result in a greater erosion of capital than other non-hedged unit class. (Note 2)
- The value of the Fund can be volatile and could go down substantially.
- Investors should not base their investment decision on this material alone.

Objectives and investment strategy

The Fund is a thematic product which aims to achieve long-term total returns in terms of both income and capital growth by investing primarily in debt securities whose issuers, guarantors and/or domiciled countries could or would directly or indirectly benefit from China's Belt and Road vision of increasing land and sea paths to connect Asia, Europe, Middle East and Africa and their adjacent seas (the 'Belt and Road Region') for closer economic cooperation (the 'Belt and Road Initiative').
