----------------------	-------------------------	-----------------------	-------------------	--------------------------	----------------------

## Fund overview

**Objective:** To grow your investment over and provide an average annual net return greater than the MSCI® All Country World Index over a 5-year rolling period by investing in shares of global companies responding to climate change by orientating their business models to be resilient in a warmer climate and a lower carbon economy; or providing solutions to mitigate climate change or help communities adapt to the adverse impacts of climate change.

**Core investment:** At least 90% of the Fund will be invested in shares of Global Companies responding to climate change. "Global Companies" means companies in any country across the globe, including emerging markets. The Fund may also invest in other funds, cash and deposits. The Fund may use derivatives for efficient portfolio management or reducing risk.

**Strategy and Environmental Social and Governance (ESG) criteria:** The Fund is actively managed. Companies will be identified as eligible for core investment if they satisfy the "Solutions" or "Transition" criteria and are not excluded on the basis of their fossil fuel activities. "Solutions" - the Investment Manager identifies themes related to mitigating the risk of climate change or helping communities to adapt to the adverse physical impacts of climate change, these companies assessed in offering "solutions" if they derive at least 20% of their revenue from such themes. "Transition" - the Investment Manager identifies companies positively aligning to and orientating their business models to be resilient in a warmer climate and a low carbon economy. Companies will be assessed using the Investment Manager's proprietary Transition Risk model. Which identifies the climate change risk for certain sub-industries "Transition Risk" ranking the risk as high, medium or low, and combines this with a score which provides a measure of the quality of climate risk management processes in place at individual companies, calculated using ratings provided by external industry recognised bodies the "Climate Risk Management Score". The combination of these two elements determines whether a company satisfies the "Transition" criteria. Fossil fuel exclusions - companies deriving certain levels of revenue from producing or generating electricity from certain fossil fuels will be excluded from the Fund's core investment. Further details on the fossil fuel exclusions, the "Solutions" and "Transitions" criteria can be found in the Prospectus.

## Key facts

Fund Managers	<b>Max Burns</b> since 13/07/2021 <b>Andrea Carzana</b> since 15/03/2022
Legal Form	<b>Open Ended Investment Company</b>
Domicile	<b>United Kingdom</b>

Fund launch date	<b>08/06/2020</b>
Hedged Share Class Flag	<b>No</b>
Entry Fees (max.)	<b>None</b>
Exit Charge	<b>None</b>
Ongoing Charges	<b>1.00% (as at 31/12/2022)</b>
Fund Management Fee	<b>1.00%</b>
Performance Fee (max.)	<b>None</b>
Historic yield	<b>0.99%</b>

## Risk measurement (As at 11th Aug 2023)

The indicator is based on historical data and may not be a reliable indication of the future risk profile. The category shown may change over time. The lowest category does not mean 'risk free'.

## Performance

	Cumulative (%)					Annualised (%)		
	1M	3M	6M	YTD	1Y	3Y	5Y	Since inception
<b>Fund</b>	-0.44	2.06	2.74	6.04	2.54	8.18	-	9.16
<b>Benchmark</b>	-1.26	4.40	5.68	9.37	5.17	9.73	-	9.86

### Past performance is not a guide to future performance.

Performance basis: Month end returns, Mid to mid, net income reinvested, net of ongoing charges and fees, in the share class currency and net of tax payable by the fund. The figures do not include the effect of any exit or entry charge. The Fund's performance is measured against the MSCI® All Country World Index.

## Calendar year returns

	2018	2019	2020	2021	2022
<b>Fund net</b>	-	-	-	13.48%	-10.13%
<b>Benchmark</b>	-	-	-	20.13%	-7.63%

## Cumulative performance (%) (last 5 years, if applicable)

## Rolling annual net performance (%)

## Tracking error (%)\*

Period	Tracking Error (%)
Jun 18 - 19	-
Jun 19 - 20	-
Jun 20 - 21	7.10
Jun 21 - 22	6.37
Jun 22 - 23	7.33

### Past performance is not a guide to future performance.

\*The Fund is expected to have an average yearly tracking error of between 2% and 6% when compared to the MSCI All Countries World Index GBP.

## Fund breakdown by sector

Sector	Fund (%)	Relative to benchmark (%)
Industrials	29.03	+16.11
Technology	25.77	+0.86
Health Care	9.50	-1.96
Financials	8.86	-4.65
Utilities	7.51	+4.69
Consumer Discretionary	4.75	-9.38
Basic Materials	4.22	+0.54
Consumer Staples	3.65	-2.46
Telecommunications	0.98	-2.06
Other	0.63	-6.76

Source: Aviva Investors, all other data is Morningstar unless stated otherwise.

The fund breakdown by sector shown in the factsheet excludes cash and equivalents.

## Market cap

Rather than using a fixed number of cap stocks, Morningstar uses a flexible system that isn't adversely affected by overall movements in the market. Stocks are divided into seven regions based on their country of domicile, organised in descending order by size and the cumulative capitalisation as a percentage of the total is calculated for each stock. Giant-cap stocks refer to the top 40% of the cumulative capitalisation of each region, large-cap represents the next 30%, mid-cap represents the next 20%, small-cap the next 7% with micro covering the balance.

## Climate Indicators

	Fund	Benchmark
Fossil Fuels Germany	0.00	7.80
Solutions Companies deriving >20% revenues from sustainability solutions	11.20	8.60
Transitions Companies with Science Based Targets set or committed	68.90	53.50
Transitions Companies with a CDP score >B	75.60	32.60

Data as at December 2022. Source: MSCI unless otherwise stated. 1) Science based Targets Initiative. 2)CDP

## Fund targets

The Index has been selected as a benchmark for performance and risk measurement because it provides a measure of global equity market performance and it is therefore an appropriate measure for the Fund's performance.

## Fund risks

### Investment risk & currency risk

The value of an investment and any income from it can go down as well as

up and can fluctuate in response to changes in currency and exchange rates. Investors may not get back the original amount invested.

#### **Emerging market risk**

Investments can be made in emerging markets. These markets may be volatile and carry higher risk than developed markets.

#### **Illiquid securities risk**

Some investments could be hard to value or to sell at a desired time, or at a price considered to be fair (especially in large quantities). As a result their prices can be volatile.

Full information on risks applicable to the Fund are in the Prospectus and the Key Investor Information Document (KIID).

#### **Ongoing Charges**

This Share Class integrates Economies of Scale discounts to the Fund Management Fee ("FMF") which is a component of the Ongoing Charge Figure. Consequently, when a Fund reaches a certain size (a pre-defined "trigger point") a discount will automatically apply to the FMF. However, at all other times the FMF will be charged at the rate as set out in the Fund's prospectus. For further details on the Economies of Scale discounts and the trigger points at which they apply, please refer to the Fund's prospectus.

#### **Glossary**

##### **Alpha**

Indicates the excess return provided by the Fund over the benchmark.

##### **Annualised performance**

An annualised total return is the geometric average amount of money earned by an investment each year over a given time period.

##### **Volatility (%)**

A measure of the fund's dispersion of returns. A higher volatility implies that a fund's return is spread over a larger range of values whilst a lower volatility implies that a fund's return is spread over a smaller range of values.

##### **Beta**

A measure of the fund volatility in comparison to the market. A beta of less than 1 implies that the fund will be less volatile than the market whilst a beta greater than 1 implies the fund is more volatile than the market. As an example, a fund with a beta of 1.2 would be expected to rise to 1.2 if there was a 1 unit rise of the benchmark, or to fall 1.2 units if there was a 1 unit fall in the benchmark.

##### **Correlation (%)**

Measures the extent to which the Fund and the benchmark move together, a correlation of 1 indicates the Fund matched the benchmark exactly.

##### **Entry fee**

A one-off charge may be taken from your money before it is invested. The charge is usually a percentage of the amount invested and is additional to the price paid for the units/shares. The entry charge is deducted from the investment before units/shares are bought and is also known as the "initial charge".

##### **Exit charge**

A one-off charge levied on redemption of units/shares before the proceeds of your investment are paid out. This is also known as a "redemption charge".

##### **Historic yield**

The Historic Yield reflects distributions declared over the past 12 months as a percentage of the share / unit price, on the date shown. This does not include entry charges and investors may be subject to further tax on their distributions.

##### **Information ratio**

A measure of the manager's ability to generate excess and consistent returns relative to the funds benchmark. The greater the IR, the more consistent a manager is.

##### **Ongoing charge**

The ongoing charge figure represents the costs you can expect to pay annually based on last year's expenses. The ongoing charges figure is made up of various elements such as the fund management fee, professional fees, audit fees and custody fees. Performance fees (if payable) are not included in this figure.

##### **Performance fee**

The percentage of any outperformance of the hurdle rate and/or benchmark that will be taken as a performance fee.

##### **Sharpe ratio**

A measure of the fund's risk-adjusted performance. The greater the fund's Sharpe ratio, the better its historical risk-adjusted performance has been.

This ratio is best used to compare a number of funds rather than used in isolation for a single fund.

#### **Tracking error (%)**

A measure of how closely the fund follows its benchmark. A passive fund should have a tracking error close to zero, while an actively managed fund would normally have a higher tracking error.

#### **NAV**

NAV is typically an End Of Day valuation using close of market prices to value the individual securities with the portfolio or fund, rolling up to a total portfolio or fund level.

#### **Important information**

##### **THIS IS A MARKETING COMMUNICATION**

The source for all performance, portfolio and fund breakdown data is Morningstar unless indicated otherwise. For share classes that have not yet completed 5 years, the cumulative performance chart will start from the first full month. All data is as at the date of the Factsheet, unless indicated otherwise.
