What is this product?

This is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and Investment Strategy

The Sub-Fund aims to give holders of the relevant Shares access to income at wholesale Eurocurrency market interest rates in U.S. Dollars. This Sub-Fund is a short term variable net asset value money market fund and while the Sub-Fund aims to preserve capital, this is not guaranteed.

The Sub-Fund seeks to achieve its objective by investing in short-term deposits and other short-term financial instruments available on the Eurocurrency markets and on the relevant domestic markets (where interest is earned free of withholding tax). The deposits shall have a maximum maturity of six months and certificates of deposit and other short term financial instruments (including bank acceptances, commercial paper, liquid short-term debt securities including treasury bills, bonds, floating rate notes and other debt securities) shall have a maximum residual maturity of twelve months. The weighted average life and weighted average maturity of the portfolio will fluctuate according to the Investment Manager’s opinion on interest rates, but without exceeding a weighted average life of 120 days, or a weighted average maturity of 60 days. In addition, the money market instruments held by the Sub-Fund will have a legal maturity at issuance of 397 days or less or a residual maturity until the legal redemption date of 397 days or less.

For so long as the Sub-Fund remains authorised by the SFC in Hong Kong, the Investment Manager will take all reasonable steps and continue to operate the Sub-Fund in accordance with the general investment and borrowing restrictions of Chapter 8.2 of the SFC's Code on Unit Trusts and Mutual Funds.

A conservative and rigorous approach to credit assessment is adopted and specific limits are established for each bank and institution with which deposits maybe made and whose other short-term financial instruments maybe held in respect of the Sub-Fund.

Although the investments comprising the Sub-Fund are usually denominated in U.S. Dollars, investments may be made which are denominated in another currency provided that the relevant currency exposure is hedged back into U.S. dollars.

The Sub-Fund will exclusively be allowed to use derivatives for the purposes of hedging interest rate risk or exchange rate risks inherent in other investments of the Sub-Fund.

The Sub-Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Sub-Fund's objectives. The Sub-Fund uses LIBID 1 Week USD for performance comparison. The Sub-Fund cannot replicate the benchmark index (LIBID 1 week USD is an interbank lending rate). The Investment Manager is free to choose the investments of the Sub-Fund and these will not resemble the components of the benchmark index.

The Sub-Fund currently do not intend to enter into any securities lending transactions. The prior approval of the SFC will be sought and at least one month's prior notice would be given to shareholders should there be a change in such intention.

Use of derivatives / investment in derivatives

The Sub-Fund's net derivative exposure may be up to 50% of its net asset value.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

- **Investment risk** – The underlying investments of the Sub-Fund may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. The Sub-Fund has no guaranteed dividend payment.
- **Not a deposit** – The purchase of a Share in the Sub-Fund is not the same as placing funds on deposit with a bank or deposit-taking company, and the Investment Manager has no obligation to redeem Shares in the Sub-Fund at the offer value. The Sub-Fund is not subject to the supervision of the Hong Kong Monetary Authority.
- **Money market instruments risk** – Money market instruments in which the Sub-Fund invests are subject to the solvency of the underlying issuer. The buying and selling of money market instruments is exposed to liquidity constraints in the market. While every effort will be made to maintain the capital value of the Sub-Fund, there is no guarantee that this will be the case as a loss made on an instrument held by the Sub-Fund could reduce the capital value of the Sub-Fund.
- **Inflation risk** – Inflation erodes the real value of all investments and changes in the anticipated rate of inflation could lead to capital losses in the Sub-Fund's investments.
- **Derivatives usage risk** – The Sub-Fund may use derivatives for the purposes of hedging. In adverse situations, the Sub-Fund's use of derivatives may become ineffective in hedging and the Sub-Fund may suffer significant losses.
- **Interest rate risk** – The earnings or market value of the Sub-Fund may be affected by changes in interest rates. Any such changes may have a direct effect on the income received by the Fund and its capital value.
