## Schroder Asian Growth Fund

A Distribution USD | Data as at 30.06.2021

### Fund objectives and investment policy

The Schroder Asian Growth Fund (the "Fund") aims to achieve long term capital growth primarily through investing in securities of companies quoted on some or all of the stock markets in countries in Asia, including Australia and New Zealand but excluding Japan. The portfolio of the Fund will be broadly diversified with no specific industry or sectoral emphasis. The net asset value ("NAV") of the Fund is likely to have high volatility due to its investment policy or portfolio management techniques.

This fund may use financial derivative instruments as a part of the investment process. Derivatives carry a high degree of risk and should only be considered by sophisticated investors.

**Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.**

### Performance over 5 years (%)

**Past performance and any forecasts are not necessarily a guide to the future or likely performance.**

**The value of investments and income from them can go down as well as up and is not guaranteed.** Returns of more than 1 year are annualised. The distributions are not guaranteed and might be changed at the Manager's discretion in accordance with the Trust Deed. Ordinarily, they will be reviewed annually. In the event of the Fund's income and realised gains being less than indicated distribution amount per unit per annum, distributions will be made from capital, subject to trustee approval. Investors should be aware that the distributions may exceed the income and realised gains of the Fund at times and lead to a reduction of the amount originally invested, depending on the date of initial investment. Some performance differences between the fund and the benchmark may arise as the benchmark returns are not adjusted for non-dealing days of the fund. The performance of the previous benchmark performance has been chainlinked to the new one. On 01.03.2016 MSCI All Country Asia ex Japan Index (Net Dividend Reinvested) replaced the MSCI All Country Far East ex Japan Index (Net Dividend Reinvested). The full track record of the previous index has been kept and chainlinked to the new one. The performance returns shown above are calculated based on the NAV after dilution adjustments (if any) have been applied. Where 'since inception' performance figures are stated, please note that the inception date is the same as the share class launch date under 'Fund Facts'.
