What is the product?

This is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier ("CSSF").

Investment Objectives

To achieve long-term total return by investing at least two-thirds of the Fund's assets in equities and equity-related securities of:

- 1) Smaller Companies with their registered office in the United States of America; and/or
- 2) Smaller Companies which have the preponderance of their business activities in the United States of America; and/or
- 3) holding companies that have the preponderance of their assets in Smaller Companies with their registered office in the United States of America.

For the purpose of this Fund, Smaller Companies are defined as companies with a market capitalisation in the base currency of the Fund, as at the date of investment, of under US\$5 billion.

Strategy

The Investment Manager is of the view that given the inefficiency of markets, long-term returns are achieved by identifying good quality stocks at a reasonable price and holding them for the long term. An estimate of a company's worth is analysed in two stages, assessing quality then price. Quality is defined with reference to management, business focus, balance sheet and corporate governance. Price is calculated relative to key financial ratios, market, peer group and business prospects. Generally, the Fund is run with an emphasis on traditional buy-and-hold investment resulting in low turnover.

The Fund may use derivatives for the purpose for hedging but will not use financial derivative instruments for investment purposes.

The Fund will not invest more than 10% of its net asset value in securities issued or guaranteed by any single country (including its government, a public or local authority or nationalised industry of that country) with a credit rating below investment grade. In this case, credit ratings in general refer to those from an internationally recognised credit agency.

The Fund is actively managed. The Fund aims to outperform the Russell 2000 Index (USD) benchmark before charges. The benchmark is also used as a reference point for portfolio construction and as a basis for setting risk constraints.

In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark or invest in securities which are not included in the benchmark. The investments of the Fund may deviate significantly from the components of and their respective weightings in the benchmark. Due to the active nature of the management process, the Fund's performance profile may deviate significantly from that of the benchmark over the longer term.

Use of derivatives/investment in derivatives

The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.

What are the key risks?

Investment involves risks. Please refer to the offering document of Aberdeen Standard SICAV I for details including the risk factors.

1. Equity risk

- The value of the Fund that invests in equity and equity-related securities will be affected by economic, political, market, and issuer specific changes. Such changes may adversely affect securities, regardless of company specific performance.

2. Risk of investing in Smaller Companies

- Smaller Companies are subject to the risk of greater vulnerability to the release of unfavourable market news and information and the risk of being adversely affected by poor economic or market conditions. The stock of Smaller Companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger companies in general.

3. Concentration risk

- The Fund invests in a single country market (i.e. the United States of America) and is likely to be more volatile than a more widely invested fund.
- Lack of liquidity may adversely affect the value or ease of disposal of assets.

4. Risk of using financial derivative instruments

- Risks associated with financial derivative instruments include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a financial derivative instrument can result in a loss significantly greater than the amount invested in the financial derivative instrument by the Fund. Exposure to financial derivative instrument may lead to a high risk of significant loss by the Fund.

5. Exchange rates risk

- The Fund may invest in securities denominated in a number of different currencies other than the base currency in which the Fund is denominated. Changes in foreign currency exchange rates may adversely affect the value of the Fund's investments and the income thereon.

6. Risk of Foreign Account Tax Compliance Act ("FATCA")

- The Fund will attempt to satisfy any obligations imposed on it to avoid the imposition of FATCA withholding tax. However, no assurance can be given that the Fund will be able to satisfy these obligations. If the Fund becomes subject to a withholding tax as a result of the FATCA regime, the value of the shares held by the shareholders may suffer material losses.

7. General risk

- The value of shares and the income from them can go down as well as up and you may not get back the amount invested.

How has the fund performed?

% Returns

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year-end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the Class A Acc USD increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay (if any).
- Where no past performance is shown there was insufficient data available in that year to provide performance.
- The Investment Manager views Class A Acc USD being the most appropriate representative share class as this share class is opened for investment by Hong Kong retail investors and broadly indicative of the Fund's performance characteristics.
- The benchmark is Russell 2000 Index (USD).
- Fund launch date: 01/2011
- Class A Acc USD launch date: 10/2013

Is there any guarantee?

This Fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?

Investors should refer to the offering document of Aberdeen Standard SICAV I for details regarding the fees and expenses of the Fund.

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Fund.

Other fees

You may have to pay other fees and charges when dealing in the shares of the Fund. For details, please refer to the offering document of Aberdeen Standard SICAV I.

Additional Information

- You generally buy and redeem shares at the Fund's next-determined net asset value after the Hong Kong Representative receives your request in good order before 5:00pm (Hong Kong time) on the Hong Kong business day (being a day, other than Saturday, on which banks in Hong Kong are open for business). Before placing your subscription or redemption orders, please check with your distributor for the distributor's internal cut-off time (which may be earlier than the Fund's dealing cut-off time).
- The net asset value of the Fund is calculated and the price of shares is published daily at www.aberdeenstandard.com.hk. This website has not been reviewed by the SFC and may contain information of funds not authorised by the SFC.
- Investors may obtain the past performance information of other share classes offered to Hong Kong investors (if any) from www.aberdeenstandard.com.hk.
- Investors may obtain information on the distributor(s) by referring to Client Services Team of Aberdeen Standard Investments (Hong Kong) Limited.
