Objectives and investment policy

Objective: The Fund seeks total return through capital appreciation and current income.

Investment policy: The Fund seeks to achieve its investment objective by investing, directly or indirectly, primarily (i.e., at least 65% of its net assets) in income-paying publicly traded common stocks, preferred stocks, convertible debt and equity securities of any maturity and in those that are unrated, or would be below investment grade if rated, and other equity-related instruments of companies located in or with substantial ties to the Asia Pacific region. On an ancillary basis, the Fund may invest in other permitted assets on a worldwide basis. For the purpose of this policy, the Asia Pacific region consists of all countries and markets in Asia, as well as Australia and New Zealand including all developed, emerging and frontier countries and markets in Asia. The Fund may invest (whether directly or indirectly) in China A Shares, either directly via a Qualified Foreign Investor ("QFI") license awarded to the Company, or via the Shanghai-Hong Kong Stock Connect and/or Shenzhen-Hong Kong Stock Connect programs, or indirectly via investment in access products. The Fund may directly or indirectly invest less than 70% of its net assets in aggregate in China A and B Shares. The Fund's reference benchmark is the MSCI All Country Asia Pacific Index (GBP) and is indicated for performance comparison only. The Fund is actively managed and does not aim to replicate or track the benchmark. Consequently, the Investment Manager, Matthews International Capital Management, LLC, may freely select the securities in which it invests, and the Fund's portfolio composition and performance may deviate materially from the benchmark. The Fund may also hold cash equivalents to achieve its investment objective, for treasury purposes and in case of unfavorable market conditions. The Fund promotes environmental and social characteristics according to Article 8 of the EU Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (SFDR). Furthermore, the Fund uses both activity- and norm-based exclusions.

Dividend policy: Unlike Accumulation shares of the Fund, income generated by any of the investments is intended to be distributed quarterly out of the Fund's gross income.

Holding period: The Fund has no minimum holding period, however, the Fund has a long-term investment horizon (typically 5 years or longer). This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Share transactions: An investor can buy and sell shares of the Fund on any Business Day in Luxembourg.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk — **Typically higher rewards, higher risk**

1	2	3	4	**5**	6	7

- Interpretation of the Risk and Reward Indicator: The Risk and Reward Indicator takes into account historical data which is not a reliable indicator of the future. The risk category was calculated using related historical performance data and it may not be a reliable indicator of the Fund's future risk profile. The risk category of the Fund is neither a target nor guaranteed to remain stable over time. A risk category of 1 does not mean a risk free investment.
- Why is this Fund in this category? The Fund is in risk category 5 because it invests primarily in Asian equity securities. Many Asian markets are considered to be emerging markets and may experience higher than average changes in valuation ("volatility"). Higher changes in valuation are expected to result in higher changes in the Fund's net asset value.
- Are there other particular risks you should consider? The Risk and Reward Indicator does not provide an overall risk profile of the Fund, nor does it fully capture all the risks of investing in the Fund. Risks that you should consider include: market risk, interest rate risk, foreign exchange risk, settlement risk, valuation risk, credit risk, counterparty risk, liquidity risk, compliance risk, custody risk, operational risk, political risk, legal risk, regional and country risk, risk of investing in China A Shares, risks associated with smaller companies, and high yield risk. Investments in less developed financial markets may expose the Fund to increased operational, legal and political risk. For more details about risk, please refer to the Fund's Prospectus under "Risk Considerations," which is available at global.matthewsasia.com/prospectus.
