Authorised Corporate Director's Report

The Authorised Corporate Director (ACD) of M&G Investment Funds (3) presents its annual report and audited financial statements for the year ended 30 June 2023.

The audited financial statements of M&G Investment Funds (3), the Authorised Corporate Director's Reports including the portfolio statements, financial highlights and the audited financial statements and notes of each sub-fund are presented in their individual sections of this report as set out in the contents page.

Please note that we have included an explanation of key investment terminology in the 'Glossary' (at the back of this report).

Company information

M&G Investment Funds (3) is an umbrella Open-Ended Investment Company (OEIC) and contains six sub-funds*, hereinafter referred to as 'funds' in the rest of this report. Each fund is a UK UCITS (Undertakings for Collective Investment in Transferable Securities) scheme as defined in the Collective Investment Schemes sourcebook, as issued (and amended) by the Financial Conduct Authority (FCA). This OEIC is an Investment Company with Variable Capital (ICVC) incorporated under the Open-Ended Investment Companies Regulations 2001. It is authorised and regulated by the FCA under the Financial Services and Markets Act 2000.

The Company was authorised on 8 August 2001 and was launched on 7 March 2002, following the conversion of a series of authorised unit trusts.

The Company's principal activity is to carry on business as an OEIC. The Company is structured as an umbrella company, and different funds may be established by the ACD from time to time with the agreement of the Depositary and approval from the FCA. The funds are operated separately and the assets of each fund are managed in accordance with the investment objective and policy applicable to that fund.

As at 30 June 2023 none of the funds held shares of the other funds within this OEIC.

A shareholder is not liable for the debts of the Company and will never be liable to make any further payment to the Company after paying the purchase price of the shares.

* In Switzerland, four of the six sub-funds are currently authorised for public distribution in and from Switzerland by FINMA.

Annual value assessment

An annual assessment report is available which shows the value provided to investors in each of M&G's UK-based funds. The assessment report evaluates whether M&G's charges are justified in the context of the overall service delivered to its investors. The latest report to 31 March 2023 can be found on our website at mandg.co.uk/valueassessment

Climate-related Financial Disclosures (TCFD)

We have produced TCFD reports in compliance with the FCA's rules on climate-related financial disclosures. The TCFD Fund Reports are designed to help you understand the impact these funds have on the climate and equally how climate change could influence the performance of the fund. The reports will also give you the ability to compare a range of climate metrics with other funds. To understand the governance, strategy and risk management that M&G has in place to manage

the risks and opportunities related to climate change, please refer to the M&G Investments Management TCFD report.

These reports are available via the Sustainability Disclosures page on our website mandg.com/footer/sustainability-disclosures

Important information

The events in Ukraine continue to bring uncertainty. The ACD continues to monitor the associated risks that are posed to the Company.

As of January 2023 the operating charge figure includes the underlying charges for closed-ended funds, such as investment trusts and REITs (real estate investment trusts). There is no change to what you are currently being charged; this is a presentational change to align with the latest industry guidance issued by the Investment Association.

At the shareholder meeting on 17 May 2023, the merger of the M&G European Corporate Bond Fund into the M&G Strategic Corporate Bond Fund was approved by shareholders. The effective date of the merger was 9th June 2023. Termination of the M&G European Corporate Bond Fund has been completed with an effective date of 29 June 2023.

Please refer to the 'Investment review' section for further details on significant events during the period. Investment reviews may become quickly outdated in relation to ongoing economic and geopolitical events.

Authorised Corporate Director's Report

Authorised Corporate Director's Responsibilities

The Authorised Corporate Director (ACD) is required to prepare annual and interim reports for the Company. The ACD must ensure that the financial statements contained in this report for each of the funds, are prepared in accordance with the Investment Association Statement of Recommended Practice for Financial Statements of UK Authorised Funds (SORP) and UK Financial Reporting Standards, and give a true and fair view of the net revenue or expenses and net capital gains or losses for the accounting period, and the financial position at the end of that period.

The ACD is required to keep proper accounting records, and to manage the Company in accordance with the Collective Investment Schemes sourcebook, as issued (and amended) by the FCA, the Instrument of Incorporation and the Prospectus, and to take reasonable steps for the prevention and detection of fraud or other irregularities. Additionally, the ACD is responsible for preparing the financial statements on a going concern basis unless it is appropriate to presume that the Company will not continue in operation.

Note to Swiss investors

The following funds of M&G Investment Funds (3) are currently approved by FINMA for public distribution in and from Switzerland:

M&G Corporate Bond Fund

M&G Emerging Markets Bond Fund

M&G Global Government Bond Fund

M&G Recovery Fund

This version of the report and accounts has been specially prepared for the Swiss market to only show the currently registered funds. The above report was based on the original English version of the full report and accounts including all funds. Therefore, the opinion is not based on the extracted contents of this version of the report and accounts.

Directors' statement

This report has been prepared in accordance with the requirements of the Collective Investment Schemes sourcebook, as issued and amended by the Financial Conduct Authority.

M&G Securities Limited

Depository's Responsibilities and Report

Statement of the Depository's Responsibilities and Report of the Depository to the Shareholders of M&G Investment Funds (3) ('the Company') for the year ended 30 June 2023

The Depository must ensure that the Company is managed in accordance with the Financial Conduct Authority's Collective Investment Schemes sourcebook, the Open-Ended Investment Companies Regulations 2001 (SI2001/1228) (the OEIC Regulations), as amended, the Financial Services and Markets Act 2000, as amended, (together 'the Regulations'), the Company's Instrument of Incorporation and Prospectus (together 'the Scheme documents') as detailed below.

The Depository must in the context of its role act honestly, fairly, professionally, independently and in the interests of the Company and its investors.

The Depository is responsible for the safekeeping of all custodial assets and maintaining a record of all other assets of the Company in accordance with the Regulations.

The Depository must ensure that:

- the Company's cashflows are properly monitored and that cash of the Company is booked into the cash accounts in accordance with the Regulations;
- the sale, issue, redemption and cancellation of shares are carried out in accordance with the Regulations;
- the value of shares in the Company is calculated in accordance with the Regulations;
- any consideration relating to transactions in the Company's assets is remitted to the Company within the usual time limits;
- the Company's income is applied in accordance with the Regulations; and
- the instructions of the Authorised Fund Manager ('the AFM') are carried out (unless they conflict with the Regulations).

The Depository also has a duty to take reasonable care to ensure that the Company is managed in accordance with the Regulations and the Scheme documents in relation to the investment and borrowing powers applicable to the Company.

Having carried out such procedures as we consider necessary to discharge our responsibilities as Depository of the Company, it is our opinion, based on the information available to us and the explanations provided, that in all material respects the Company, acting through the AFM:

- i) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Company's shares and the application of the Company's income in accordance with the Regulations and the Scheme documents of the Company, and
- ii) has observed the investment and borrowing powers and restrictions applicable to the Company.

Depository Services Limited

Independent Auditor's Report

Independent Auditor's Report to the shareholders of M&G Investment Funds (3)

Opinion

We have audited the financial statements of M&G Investment Funds (3) ("the Company") comprising each of its sub-funds for the year ended 30 June 2023, which comprise the Statement of Total Return, the Statement of Change in Net Assets Attributable to Shareholders, the Balance Sheet, the related notes and the Distribution Tables, and the accounting policies of the Company, which include a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including FRS 102 'The Financial Reporting Standard applicable to the UK and Republic of Ireland' (United Kingdom Generally Accepted Accounting Practice).

In our opinion, the financial statements:

- give a true and fair view of the financial position of the Company comprising each of its sub-funds as at 30 June 2023, and of the net revenue and the net capital gains/losses on the scheme property of the Company comprising each of its sub-funds for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report below. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the "FRC") Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the Authorised Corporate Director's ("the ACD") use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of 12 months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the ACD with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's ability to continue as a going concern.

Other information

The other information comprises the information included in the Annual Report other than the financial statements and our auditor's report thereon. The ACD is responsible for the other information contained within the Annual Report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

Independent Auditor's Report

We have nothing to report in this regard.

Opinions on other matters prescribed by the rules of the Collective Investment Schemes Sourcebook of the Financial Conduct Authority (the "FCA")

In our opinion:

- the financial statements have been properly prepared in accordance with the Statement of Recommended Practice relating to Authorised Funds, the rules of the Collective Investment Schemes Sourcebook of the FCA and the Instrument of Incorporation; and
- there is nothing to indicate that adequate accounting records have not been kept or that the financial statements are not in agreement with those records; and
- the information given in the ACD's report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matter in relation to which the rules of the Collective Investment Schemes Sourcebook of the FCA require us to report to you if, in our opinion:

- we have not received all the information and explanations which, to the best of our knowledge and belief, are necessary for the purposes of our audit.

Responsibilities of the ACD

As explained more fully in the ACD's responsibilities statement set out on page 4, the ACD is responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the ACD determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the ACD is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the ACD either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

Independent Auditor's Report

Our approach was as follows:

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the Company and determined that the most significant are United Kingdom Generally Accepted Accounting Practice (UK GAAP), the Investment Association's Statement of Recommended Practice (IA SORP), the FCA Collective Investment Schemes Sourcebook, the OEIC Regulations, the Company's Instrument of Incorporation and the Prospectus.
- We understood how the Company is complying with those frameworks through discussions with the ACD and the Company's administrator and a review of the Company's documented policies and procedures.
- We assessed the susceptibility of the Company's financial statements to material misstatement, including how fraud might occur by considering the risk of management override, specifically management's propensity to influence revenue and amounts available for distribution. We identified a fraud risk with respect to the incomplete or inaccurate income recognition through incorrect classification of special dividends and the resulting impact to amounts available for distribution. We tested the appropriateness of management's classification of material special dividends as either a capital or revenue return.
- Based on this understanding we designed our audit procedures to identify non-compliance with such laws and regulations. Our procedures involved review of the reporting to the ACD with respect to the application of the documented policies and procedures and review of the financial statements to test compliance with the reporting requirements of the Company.
- Due to the regulated nature of the Company, the Statutory Auditor considered the experience and expertise of the engagement team to ensure that the team had the appropriate competence and capabilities, which included the use of specialists

where appropriate, to identify non-compliance with the applicable laws and regulations.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Use of our report

This report is made solely to the Company's shareholders, as a body, pursuant to Paragraph 4.5.12 of the rules of the Collective Investment Schemes sourcebook of the FCA. Our audit work has been undertaken so that we might state to the Company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

Edinburgh
1 September 2023

Ernst & Young LLP
Statutory Auditor

The Annual report contained in this document has been extracted from the Accounts of the Company and on which Ernst & Young LLP expressed the opinion reproduced above.

Ernst & Young LLP express no opinion as to whether the contents have been properly extracted from the accounts on which they expressed their opinion.

Financial statements and notes

The financial statements for M&G Investment Funds (3) comprise the individual financial statements for each fund and the notes below.

Notes to the financial statements

1 Statement of compliance

The financial statements of M&G Investment Funds (3) have been prepared in compliance with UK Financial Reporting Standard 102 (FRS 102) and in accordance with the Statement of Recommended Practice (SORP) for Authorised Funds issued by the Investment Association in May 2014 and amended in June 2017, except in relation to the separate disclosure in note 13.

2 Summary of significant accounting policies

a. Basis of preparation

There are no material events that have been identified that may cast significant doubt on the Company's ability to continue as a going concern for the next twelve months from the date these financial statements are authorised for issue. The ACD believes that the Company has adequate resources to continue in operational existence for the foreseeable future and they continue to adopt the going concern basis in preparing the financial statements. The ACD has made an assessment of each fund's ability to continue as a going concern which is made as at the date of issue of these financial statements and considers liquidity, declines in global capital markets, investor intention, known redemption levels, expense projections and key service provider's operational resilience.

The financial statements of M&G Investment Funds (3) are prepared on a going concern basis, under the historical cost convention as modified by the revaluation of certain financial assets and liabilities measured at fair value through profit or loss.

b. Functional and presentational currency

Where the functional and presentational currency of a fund is not UK sterling this is disclosed in the Financial statements and notes' of that fund.

c. Exchange rates

Transactions in currencies other than each fund's functional currency are translated at the rate of exchange ruling on the date of the transaction and where applicable assets and liabilities are translated into the fund's functional currency at the rate of exchange ruling as at 12 noon on 30 June 2023 being the last business day of the accounting period.

d. Investments – recognition and valuation

The provisions of both Section 11 and Section 12 of FRS 102 have been applied in full. All investments have been classified as fair value through profit and loss and recognised initially at fair value, which is normally the transaction price (excluding transaction costs and accrued interest).

At the end of the reporting period all investments have been measured at their fair value using the prices and the portfolio holdings determined at 12 noon on 30 June 2023, being the last valuation point of the accounting period, as this is not materially different from a valuation carried out at close of business on the balance sheet date.

Where separate bid and offer prices are available, the bid price is used for investment assets and the offer price for investment liabilities. Otherwise, the single price or most recent transaction price is used. Interest accrued is not included in the fair value. The methods of determining fair value for the principal classes of investment are:

- Equities and debt securities which are traded on an active market are included at the quoted price, which is normally the bid price, excluding any accrued interest in respect of bonds.

Financial statements and notes

- Equities traded on the Alternative Investment Market (AIM), whose liquidity cannot be guaranteed, are included at their quoted bid price as this represents the most objective and appropriate method of valuation.
- Collective investment schemes operated by the ACD are included at either their cancellation price for dual priced funds or their single price for single priced funds.
- Collective investment schemes operated by another manager are included at either their bid price for dual priced funds or their single price for single priced funds.
- Other equities and debt securities which are unquoted or not actively traded on a quoted market are included at a value estimated by the ACD using an appropriate valuation technique, excluding any accrued interest in respect of bonds.
- Exchange traded futures and options are included at the cost of closing out the contract at the balance sheet date.
- Over the counter equity options, credit default swaps, interest rate swaps, asset swaps and inflation swaps are included at a value provided by Markit Valuations Limited, an independent credit derivative price provider. Their fair value excludes any accrued interest in respect of derivatives where the income is revenue in nature.
- Forward currency contracts, for share class hedging and investment, are included at a value determined by reference to current forward exchange rates for contracts with similar maturity profiles.

e. Recognition of income and expenses

- Dividends, including ordinary stock dividends, from equity investments are recognised when the security is quoted ex-dividend.

- Distributions from collective investment schemes are recognised when the scheme is priced ex-distribution.
- Interest on debt securities is recognised on an effective interest rate basis. Bank interest is recognised on an accruals basis.
- Underwriting commission is recognised when the issue takes place.
- Revenue from derivatives is recognised on an accruals basis.
- Fee rebates from investing in other collective investment schemes are recognised on an accruals basis.
- Expenses are recognised on an accruals basis.

f. Treatment of income and expenses

- Any increases or decreases in the fair value of investments and gains and losses realised on sales of investments are treated as capital and recognised in net capital gains/(losses).
- The value of any enhancement to a stock dividend is treated as capital.
- Ordinary equity dividends, including ordinary stock dividends are treated as revenue.
- Special dividends, share buy backs or additional share issues may be treated as revenue or capital depending on the facts of each particular case.
- Distributions from collective investment schemes are treated as revenue in nature, except for any element of equalisation, which represents the average amount of income included in the price paid for the collective investment scheme, which is treated as capital.

Financial statements and notes

- Debt security interest comprises the coupon interest and the difference between the purchase price and the expected maturity price spread over its expected remaining life. This is treated as revenue with the difference adjusting the cost of the shares and treated as capital.
- Other interest income, such as bank interest is treated as revenue.
- Underwriting commission is treated as revenue, except where the fund is required to take up all or some of the shares underwritten, in which case a proportion of the commission received is deducted from the cost of the shares and treated as capital.
- The treatment of the income on derivative contracts depends upon the nature of the transaction. Both motive and circumstances are used to determine whether the returns should be treated as capital or revenue. Where positions are undertaken to protect or enhance capital, and the circumstances support this, the returns are recognised in net capital gains; similarly where the motives and circumstances are to generate or protect revenue, and the circumstances support this, the returns are included within net revenue before taxation. Where positions generate total returns it will generally be appropriate to apportion such returns between capital and revenue to properly reflect the nature of the transaction.
- Expenses relating to the purchase and sale of investments are treated as capital; all other expenses are treated as revenue.
- Rebates of charges from holdings in collective investment schemes are treated as revenue or capital in accordance with the underlying scheme's distribution policy.

g. Operating charges

Operating charges include payments made to M&G and to providers independent of M&G:

- **Annual charge:** Charge paid to M&G covering the annual cost of M&G managing and administering the fund and the costs of third parties providing services to the fund. For every £1 billion of a fund's net asset value, a discount of 0.02% will be applied to that fund's annual charge (up to a maximum of 0.12%).
- **Extraordinary legal and tax expenses:** Costs that specifically relate to legal or tax claims that are both exceptional and unforeseeable. Such expenses are uncommon, and would not be expected in most years. Although they result in a short-term cost to the fund, generally they can deliver longer term benefits for investors.
- **Ongoing charges from underlying funds:** Ongoing charges from underlying funds (excluding Investment Trust Companies and Real Estate Investment Trusts) will be rebated.

These charges do not include portfolio transaction costs or any entry and exit charges (also known as initial and redemption charges). The charging structures of share classes may differ, and therefore the operating charges may differ.

Operating charges are in line with the ongoing charges shown in the Key Investor Information Document, other than where there have been extraordinary legal or tax expenses, or an estimate has been used for the ongoing charge because a material change has made the operating charges unreliable as an estimate of future charges.

h. Portfolio transaction costs

Portfolio transaction costs are incurred by funds when buying and selling investments. These costs vary depending on the types of investment, their market capitalisation, country of exchange and

Financial statements and notes

method of execution. They are made up of direct and indirect portfolio transaction costs:

- **Direct portfolio transaction costs:** Broker execution commission and taxes.
- **Indirect portfolio transaction costs:** 'Dealing spread' – the difference between the buying and selling prices of the fund's investments; some types of investment, such as fixed interest securities, have no direct transaction costs and only the dealing spread is paid.

Investments are bought or sold by a fund when changes are made to the investment portfolio and in response to net flows of money into or out of the fund from investors buying and selling shares in the fund.

To protect existing investors, portfolio transaction costs incurred as a result of investors buying and selling shares in the fund are recovered from those investors through a 'dilution adjustment' to the price they pay or receive.

i. Tax

Dividends and similar income receivable are recognised at an amount that includes any withholding tax but excludes irrecoverable tax credits. Any withholding tax suffered is shown as part of the tax charge.

Tax is accounted for at the appropriate rate of corporation tax with relief for double taxation taken where appropriate. The tax accounting treatment follows the principal amounts involved.

Deferred tax is recognised in respect of temporary timing differences that have originated but not reversed by the balance sheet date. Deferred tax is measured on a non-discounted basis, at the average rate of tax expected to apply in the period in which it expects the deferred tax to be realised or settled. A deferred tax asset is only recognised to the extent that it is more likely than not that the asset will be recovered.

Marginal tax relief has not been taken into account in respect of expenses offset against capital.

j. Allocation of returns to share classes

The annual charge is directly attributable to individual share classes. All other returns are apportioned to each fund's share classes pro-rata to the value of the net assets of the relevant share class on the day that the income or expenses are recognised.

All available net revenue accounted for in accordance with the above policies and adjusted where relevant by any specific distribution policies set out in the notes to that fund's financial statements, is distributed to holders of Income shares or retained and reinvested for holders of Accumulation shares. Should expenses and taxation together exceed revenue, there will be no distribution and the shortfall will be met from capital.

Distributions which have remained unclaimed by shareholders for more than six years are credited to the capital property of the fund.

3 Risk management policies

The ACD is responsible for establishing, implementing and maintaining an adequate and documented risk management policy for identifying, measuring and managing all risks to which funds are or might be exposed.

The Company's investment activities expose it to various types of risk which are associated with the financial instruments and markets in which it invests; market risk, credit risk and liquidity risk.

These financial statements are designed to enable users to evaluate the nature and extent of those risks and how they are managed.

The following risk management policies are applicable to the funds, with specific risk disclosures set out in the notes to the financial statements of each fund.

Financial statements and notes

a. Market risk

Market risk is the risk of loss resulting from fluctuations in the market value of positions in a fund's portfolio attributable to changes in market variables, such as interest rates, exchange rates, equity and commodity prices or an issuer's creditworthiness.

In relation to market risk, processes are applied that take account of the investment objective and policy of each fund. All funds are subject to an investment oversight process in accordance with the type and nature of the fund. In addition all funds are monitored for compliance within regulatory limits.

In measuring and monitoring market risk, the global exposure of a fund may be calculated using a 'commitment' approach or 'Value at Risk' (VaR) approach.

b. Commitment approach

The commitment approach is applied for funds investing only in traditional asset classes, namely equities, fixed income, money market instruments and collective investment schemes.

In addition, the approach is applied for funds which use or intend to use derivatives or instruments embedding derivatives, but only for efficient portfolio management purposes, or in a simple way not necessarily restricted to efficient portfolio management.

Under the commitment approach the global exposure of funds is measured and monitored using a commitment (adjusted notional) methodology.

Market risk is considered on a daily basis and forms the foundation of investment oversight analysis. This can include for each fund (but is not limited to) the analysis of factors such as fund concentration; style, geographical, industry and market capitalisation biases; active, systematic and

specific risk measurements; active money; and beta characteristics.

c. Value at Risk approach

The Value at Risk (VaR) approach is a methodology for estimating the maximum potential loss due to market risk based on historic market volatilities and correlations. More particularly, the VaR approach gives a broad indication of the maximum potential loss at a given confidence level (probability), over a specific time period under normal market conditions.

Instrument and portfolio modelling techniques are based on market accepted practices and are subject to regular audit (back-testing). Market risk factors that are analysed include swap rates, government yield curves, equity prices, exchange rates, market volatility, credit spreads and credit default swap (CDS) spreads.

The VaR model is based on a Monte Carlo process with actual VaR being reported on the basis of a 99% confidence interval over a one month period (20 business days). Risk factor history used in the Monte Carlo process is based on 250 business days. From the variance/covariance matrices, a parametric Monte Carlo scenario set of 5,000 simulations is derived and applied to the fund.

VaR does have limitations in its ability to present valid levels of risk in extreme market conditions. Accordingly, the Risk Analysis team also carries out monthly stress testing and scenario based analysis. Stress testing allows for extreme sets of market circumstances which may not be reflected in historical data sets thereby enabling further assessment of combinations of market movements which may cause serious damage to portfolio values. The key element to the scenario based analysis is challenging the correlation assumptions implicit within statistical based models such as VaR.

Financial statements and notes

The stress test and scenario based analysis is customised for each fund type and the VaR analysis is produced on a daily basis.

The table below shows funds using the 'commitment' approach and those using the 'Value at Risk (VaR)' approach:

Fund	Global exposure approach
M&G Corporate Bond Fund	VaR
M&G Emerging Markets Bond Fund	VaR
M&G Global Government Bond Fund	VaR
M&G Recovery Fund	Commitment

d. Liquidity risk

Liquidity risk is the risk that a fund's holdings cannot be sold, liquidated or closed out at limited cost in an adequately short time frame and that the ability of the scheme to comply at any time with its obligation to sell and redeem shares is thereby compromised.

The overall liquidity profile for each fund is reviewed and updated regularly. The liquidity profile takes into account investment, cashflow and market liquidity considerations.

Investment liquidity considerations include an assessment of asset class liquidity conditions, liquidity of underlying holdings, portfolio construction and concentration, the scale of individual stock ownership and the nature of the investment strategy.

Cashflow liquidity is managed in each fund on a daily basis using reports that include subscription and redemption information as well as the impact of trading, derivative lifecycle events and corporate action activity. In addition to the daily reporting, the fund managers are provided with reporting that highlights the impact of reasonably predictable events in the portfolio, including an allowance for the potential future exposures that might result from derivative exposures.

Market (or distribution-related) considerations include an assessment of asset demand, fund growth, client concentration and the persistency of the client base. Supplementary to this, market liquidity stress tests are carried out on a monthly basis for all funds.

Liquidity in funds is independently assessed and challenged through the internal governance process at M&G. Fund liquidity is modelled and compared against potential liability scenarios such as severe redemption or collateral calls and any funds with liquidity issues are flagged to the internal committee. Funds flagged to the internal committee are escalated and remedial action agreed. None of the funds have been escalated for remedial action.

e. Credit risk

For funds exposed to credit risk, the credit rating, yield and maturity of each interest bearing security is considered to determine if the yield fully reflects the risk. The capital value of interest-bearing securities within the funds will fall in the event of the default or perceived increased credit risk of an issuer.

The capital value of interest-bearing securities within a fund may also be affected by interest rate fluctuations such that when interest rates rise, the capital value of the interest-bearing securities is likely to fall and vice versa.

Funds investing in derivatives are exposed to counterparty risk. This is the risk that the other party to the transaction fails to fulfil their obligations, either by failing to pay or failing to deliver securities. To minimise this risk, carefully selected, financially strong and well-established counterparties are selected following a thorough due diligence review and collateral is posted daily (in the form of cash or high-quality government bonds). Derivative positions are valued on a mark-to-market basis (revalued to reflect prevailing market prices) daily and collateral moves from one

Financial statements and notes

counterparty to the other to reflect movements in the unrealised profit or loss. As a result, the maximum loss to the fund would be limited to that day's price movements in affected derivatives contracts.

For funds in which they are used, credit default swaps are bought and sold in response to detailed credit research to take advantage of anticipated movements in credit spreads on individual stocks and baskets of securities. When a fund buys a credit default swap the default risk associated with the underlying security transfers to the counterparty. When a fund sells a credit default swap the fund assumes the credit risk of the underlying security.

Authorised Corporate Director's Report

For the purposes of these financial statements, the Prospectus dated 9 June 2023 has been used.

Investment objective

The fund aims to provide a higher total return (the combination of capital growth and income), net of the ongoing charge figure, than the average return of the iBoxx Sterling Corporates GBP Index over any five-year period.

Investment policy

At least 70% of the fund is invested, directly or indirectly through derivatives, in investment grade corporate debt securities including investment grade asset-backed securities. These securities can be issued by companies from anywhere in the world, including emerging markets. These securities are denominated in sterling or hedged back to sterling.

Other investments may include:

- debt securities issued or guaranteed by governments and their agencies, public authorities, quasi-sovereigns and supranational bodies and denominated in any currency;
- below investment grade and unrated debt securities;
- below investment grade and unrated asset-backed securities; and
- other transferable securities, cash, and near cash, directly or via collective investment schemes (including funds managed by M&G).

Investments in asset-backed securities are limited to 20% of the fund.

Derivatives may be used for investment purposes, efficient portfolio management and hedging.

Investment approach

The fund is diversified across a range of investment grade debt securities from a variety of sectors and geographies. The fund's investment approach is based on the principle that returns from corporate bond markets are driven by a combination of macroeconomic, asset class, sector, geographic and stock-level factors. As different factors dominate returns at different stages of the economic cycle, the fund manager applies a flexible investment approach, changing the blend of duration and credit exposure in the portfolio to weight them appropriately. Individual credit selection is carried out with the assistance of an in-house team of credit analysts to complement the fund manager's views.

Benchmark

Benchmark: iBoxx Sterling Corporates GBP Index.

The benchmark is a target which the fund seeks to outperform. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction.

The fund is actively managed.

The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund.

For unhedged share classes, the benchmark is shown in the share class currency.

Authorised Corporate Director's Report

Risk profile

For details of the risks associated with this fund, please refer to the Prospectus. For details of the risk management policies, please refer to pages 12 to 15.

The following table shows the risk number associated with the fund and is based on Sterling Class 'A' shares.

The above number:

- is based on the rate at which the value of the fund has moved up and down in the past and is based on historical data so may not be a reliable indicator of the future risk profile of the fund.
- is not guaranteed and may change over time and the lowest risk number does not mean risk free.
- has not changed during this period.

Investment review

For the year ended 30 June 2023

Performance against objective

Over the reporting period the fund delivered negative returns across all share classes, but outperformed its benchmark, which fell by 5.0% over the same period.

Prior to 6th March 2023 the benchmark was the IA Sterling Corporate Bond Sector. Thereafter it is the iBoxx Sterling Corporates GBP Index. The performance of the sector and that of the index have been linked to reflect the change.

The fund's objective is to provide a higher total return (the combination of capital growth and income), net of the ongoing charge figure, than the average of the iBoxx Sterling Corporates GBP Index over any five-year period. Two of the fund's five share classes did not achieve the objective, while three were above the benchmark over five years.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Performance review

The period under review saw heightened volatility across global bond markets, with the majority of fixed income assets (also known as bonds) posting negative returns. The joint effort by major central banks to curb inflationary pressure pushed the rate central banks lend to other commercial banks in the UK and the US up to 5% from a low of 1% at the start of the review period.

This high interest rate environment caused bond yields (which move inversely to bond prices) to soar, most notably at the front end of the yield curve, which plots the yield of government bonds with different maturities.

Among the asset classes, developed market government bonds fared poorly, as persistently high core inflation led to expectations of continued interest rate rises. Investment grade corporate bonds fared better. However, the UK market lagged its US and European counterparts as the Bank of England (BoE) adopted a more restrictive monetary policy to address high inflation rates in the UK.

Against this backdrop, the fund delivered a negative return but outperformed its benchmark. The biggest driver of outperformance was the fund's yield curve positioning, particularly in the UK market. One of the key drivers of a bond fund's performance is its ability to adjust the portfolio's sensitivity to changes in interest rates, known as 'duration' and measured in years. Being shorter duration means that a fund is relatively less sensitive to changes in interest rates than longer duration funds. The fund, on average, had a shorter duration position compared to the iBoxx Sterling Corporate Index, a corporate bond index comprising liquid bonds developed by financial information provider Markit. Given that major government bond yields increased substantially during the period under review, the fund's shorter duration positioning benefited relative fund performance.

Sector allocation and security selection were also modestly beneficial for relative performance. In terms

Authorised Corporate Director's Report

of the latter, our picks in UK non-financial investment grade bonds contributed the most.

Investment activities

We started the review period with a more cautious approach toward credit risk, especially in UK corporate bonds. We sold some sterling and euro denominated bonds and rotated into their US dollar-denominated equivalents, as valuations looked more compelling. The fund is predominantly invested in sterling-denominated investment grade corporate bonds, however it has the flexibility to seek opportunities outside the sterling market. When it does so, the currency exposure will typically be fully hedged.

During the period, we also added some asset-backed securities (ABS), namely Gatwick, Heathrow and Manchester airports. ABS are bonds backed by assets that produce regular cashflows, such as credit card receivables, car and mortgage loans. They are mostly floating rate in nature and may benefit when interest rates rise.

At the start of the year, we participated in a number of well-priced new issues in utilities (EDF, NW Electric) and banks (Lloyds, Barclays, Crédit Agricole). In March, we added several new issues from the utilities sector (Severn Trent, Wessex Water and National Gas) and UK financials (Coventry Building Society and Nationwide).

In the secondary market (where already issued bonds are traded between market participants), we bought European financials Bank of Ireland, Santander, ING and Zurich Insurance and firms such as Amgen, Oracle, Yorkshire Water and Land Securities. In February, we reduced our credit risk by trimming our exposure to energy companies BP and Total, telecommunications firm AT&T and real estate developer Hammerson. Later, we also reduced exposure to names such as Goldman Sachs, Altria, Walgreens, Next and Axa on valuation grounds.

Towards the end of the period, we focused on more defensive names with purchases in utilities (EDF, E.ON, Northern Water) and high-quality banks and insurers. In June, we reduced exposure to Thames Water, favouring other water companies (Anglian, Yorkshire, Severn

Trent). We moved some US dollar exposure (financials, telecommunications and utilities) into sterling-denominated Wells Fargo, EDF and Deutsche Telekom.

Outlook

After one of the fastest series of rate hikes in history, the market is now predicting rates are likely to come down gradually over the next 12 months. However, it's important to note that the market's forecast is based on an average of two very different outcomes – on the one hand, where the US economy keeps growing and rates rise to perhaps 6% or beyond; and on the other, where we see further banking problems and a steep recession causing the Federal Reserve to slash rates back towards 2%.

In the US, inflationary pressures are easing. The question though is how fast inflation components (rent and wage-sensitive items) will fall from here. Given the tight labour market and the undersupplied housing market, disinflation in these components might not be as fast as some are predicting. As a result, the road to 2% inflation might prove more difficult than what is currently priced in.

The UK inflation report for May surprised the market, remaining stubbornly high for a second consecutive month. This will add further pressure on the BoE to maintain a hawkish stance. The UK seems to be facing a greater risk of stagflation (stagnant economic growth and high inflation) at the moment compared to other developed markets.

Nevertheless, we believe most of the bad news are already reflected in the price, making the UK investment grade corporate bond market compelling and relatively cheap versus the US and eurozone markets.

Richard Woolnough & Ben Lord

Purchases and sales exclude the cost and proceeds of 'AAA' rated money market funds.

Financial highlights

Fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the fund price to fall as well as rise and you may not get back the original amount you invested.

As different share classes have different attributes, for example charging structures and minimum investments, please be aware that their performance may be different.

For additional information, including monthly fund commentaries, fund facts, performance information (including a range of performance graphs) and other documents, please visit our website at mandg.com/investments

Long-term performance by share class

To give an indication of the performance of the fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. Please refer to 'Specific share class performance' tables for the share class launch dates.

Share class	One year % ^a	Three years % pa	Five years % pa	Ten years % pa
Sterling				
Class 'A' Income	-4.3	-4.8	-1.0	+1.7
Class 'A' Accumulation	-4.3	-4.9	-1.0	+1.7
Class 'I' Income	-3.9	-4.4	-0.5	+2.1
Class 'I' Accumulation	-3.9	-4.5	-0.5	+2.1
Class 'PP' Income	-3.8	-4.3	n/a	n/a
Class 'PP' Accumulation	-3.8	-4.4	n/a	n/a
Class 'R' Income	-4.1	-4.7	-0.8	+1.9
Class 'R' Accumulation	-4.1	-4.7	-0.8	+1.9
Benchmark	-5.0	-5.1	-1.0	+2.1

^a Not annualised.

Specific share class performance

The following comparative tables show the performance of each share class. All 'Performance and charges' percentages represent an annual rate except for the 'Return after operating charges' which is calculated as a percentage of the opening net asset value per share (NAV per share). 'Dilution adjustments' are only in respect of direct portfolio transaction costs.

'Operating charges' and 'Direct portfolio transaction costs' are calculated as a percentage of average net asset value. Where there is a change in the charging structure, you may see variances in the 'operating charges' between the comparative and current year figures.

The closing NAV per share shown may diverge from the highest and lowest share prices (used for dealing purposes) as at the balance sheet date due to accounting and valuation adjustments.

Financial statements and notes

Notes to the financial statements

1 Accounting policies

The financial statements have been prepared in accordance with the 'Summary of significant accounting policies' set out on pages 9 to 12.

2 Distribution policy

In determining the amount available for distribution to Income shares, the annual charge is offset against capital, increasing the amount available for distribution whilst restraining capital performance to an equivalent extent.

3 Net capital gains/(losses)

for the year to 30 June	2023 £'000	2022 £'000

Sales awaiting settlement	8,835	1,888
Total debtors	32,856	23,273

10 Cash and bank balances

as at 30 June	2023	2022
	£'000	£'000
Amounts held at futures clearing houses and collateral manager	16,882	19,188
Cash held as bank balances	6,575	6,003
Total cash and bank balances	23,457	25,191

Financial statements and notes

11 Other creditors

as at 30 June	2023 £'000	2022 £'000
Amounts payable on cancellation of shares	2,069	2,709
Annual charge payable	423	405
Currency deals outstanding	2,326	0
Derivative expense payable	655	655
Purchases awaiting settlement	7,383	7,121
Total other creditors	12,856	10,890

12 Contingent assets, liabilities and outstanding commitments

There were no contingent assets, liabilities or outstanding commitments at the balance sheet date (2022: same).

13 Shares in issue

The following table shows each class of share in issue during the year. Each share class has the same rights on winding up however they may have different charging structures as set out in note 14.

Share class	Opening 01.07.22	Issued	Movements Cancelled	Converted	Closing 30.06.23
Sterling					
Class 'A' Income	1,013,603,915	16,049,999	(131,881,011)	0	897,772,903
Class 'A' Accumulation	286,662,143	16,059,059	(71,418,564)	0	231,302,638
Class 'I' Income	1,063,459,984	47,187,637	(153,696,377)	0	956,951,244
Class 'I' Accumulation	486,164,547	71,324,917	(50,095,254)	0	507,394,210
Class 'PP' Income	217,097,447	11,966,165	(39,734,739)	0	189,328,873
Class 'PP' Accumulation	7,470,241	1,340,001	(1,064,329)	0	7,745,913
Class 'R' Income	9,397,396	951,614	(578,169)	0	9,770,841
Class 'R' Accumulation	12,959,047	98,762	(1,266,401)	0	11,791,408

It is not possible to separately identify all share class conversions. As a result, the share class movements (issued/cancelled) as disclosed in the table above may also include share class conversions.

Financial statements and notes

14 Charging structure

The table below sets out the charging structure for each class of share. The charging structure is the same for both Income and Accumulation shares of each class. The amounts shown are the maximum annual charge. M&G will apply a discount of 0.02% for every £1 billion of a fund's net asset value. This is assessed quarterly and implemented on a forward basis no later than 13 business days after quarter end.

Share class	Annual charge %
Sterling	
Class 'A'	0.85
Class 'I'	0.45
Class 'PP'	0.35
Class 'R'	0.70

15 Related parties

M&G Securities Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal on all the transactions of shares in the fund except with in specie transactions, where M&G Securities Limited acts as an agent. The aggregate monies received through issues, and paid on cancellations, are disclosed in the 'Statement of change in net assets attributable to shareholders' and note 8. Amounts due to/from M&G Securities Limited in respect of share transactions at the year end are disclosed in notes 9 and 11 where applicable.

Amounts paid to M&G Securities Limited in respect of the annual charge are disclosed in note 6. Amounts due at the year end in respect of the annual charge are disclosed in note 11.

Amounts paid to M&G Securities Limited in respect of rebate arrangements for the annual charge are disclosed in notes 3 and 5. Amounts due at the year end from the ACD, and/or associate, in respect of these rebates are disclosed in note 9.

At the balance sheet date, shareholders from within M&G plc, of which M&G Securities Limited is a wholly owned subsidiary, have holdings totalling 7.22% (2022: 7.07%) of the fund's shares.

16 Fair value analysis

Financial instruments have been measured at their fair value and have been classified below using a hierarchy that reflects the significance of the inputs used in measuring their fair value:

Level 1: Unadjusted quoted price in an active market for an identical instrument

This includes instruments such as publicly traded equities, highly liquid bonds (eg Government bonds) and exchange traded derivatives (eg futures) for which quoted prices are readily and regularly available.

Level 2: Valuation technique using observable market data

This includes instruments such as over-the-counter (OTC) derivatives, debt securities, convertible bonds, mortgage-backed securities, asset-backed securities and open-ended funds which have been valued using models with observable market data inputs.

Financial statements and notes

Level 3: Valuation technique using unobservable inputs

This refers to instruments which have been valued using models with unobservable data inputs. This includes single broker-priced instruments, suspended/unquoted securities, private equity, unlisted closed-ended funds and open-ended funds with restrictions on redemption rights.

as at 30 June	Assets 2023 £'000	Liabilities 2023 £'000	Assets 2022 £'000	Liabilities 2022 £'000
Basis of valuation				
Level 1	87,673	(249)	101,142	(6,132)
Level 2	1,123,476	(1,982)	1,368,863	(4,122)
Level 3	626	0	579	0
	1,211,775	(2,231)	1,470,584	(10,254)

Level 3 assets comprise solely of INTU Metrocentre 1% 04/12/2024 (2022: INTU Metrocentre 1% 23/12/2023) which is a unlisted.

17 Risk management policies

The general risk management policies for the fund are set out in note 3 to the financial statements on pages 12 to 15.

18 Market risk sensitivity and exposure

VaR is the risk measurement methodology used to assess the fund's leverage and market risk volatility.

The VaR limit set during the period to 5 March 2023 was 15% (2022: 15%).

The VaR limit set during the period from 6 March 2023 was two times the benchmark.

The lowest, highest and average VaR, as well as utilisation of VaR with reference to the limit above, are calculated during the financial years ended 30 June 2023 and 30 June 2022.

	from 6 March 2023 to 30 June 2023 % of VaR	from 6 March 2023 to 30 June 2023 Utilisation of VaR %	from 1 July 2022 to 5 March 2023 % of VaR	from 1 July 2022 to 5 March 2023 Utilisation of VaR 15%	2022 % of VaR	2022 Utilisation of VaR 15%
for the year ended 30 June						
Lowest	5.67	49.74	3.51	23.40	2.55	17.00
Highest	6.61	49.11	7.96	53.07	3.75	25.00
Average	6.13	49.80	6.00	40.00	2.97	19.81

19 Credit risk

The fund is exposed to credit risk both through the credit quality of the investments it holds and through the derivative positions with counterparties. The table below shows the credit quality of the investments held in the portfolio.

as at 30 June	2023 £'000	2022 £'000
Investment grade securities	1,178,805	1,405,928
Below investment grade securities	31,652	60,217
Other investments	(913)	(5,815)
Total	1,209,544	1,460,330

Financial statements and notes

The tables below show the exposure to counterparties. Collateral is posted daily, in the form of cash or high-quality government bonds, to minimise this exposure.

as at 30 June 2023	Swaps £'000	Forward currency contracts £'000	Futures £'000
Bank of America Merrill Lynch	0	5	312
Barclays Bank	312	(4)	0
Citigroup	0	(260)	0
HSBC	0	(1,273)	0
JPMorgan	0	(5)	0
Total	312	(1,537)	312

as at 30 June 2022	Swaps £'000	Forward currency contracts £'000	Futures £'000
Barclays Bank	(671)	0	0
JPMorgan	238	0	0
Merrill Lynch	0	0	(3,871)
National Australia Bank	0	120	0
Standard Chartered Bank	0	12	0
State Street Bank	0	(1,643)	0
Total	(433)	(1,511)	(3,871)

20 Leverage risk

Funds using VaR approaches are required to disclose the level of leverage employed during the financial reporting period.

Derivatives can be used by the fund to generate market exposure to investments exceeding the net asset value. As a result of this exposure, the size of any positive or negative movement in markets may have a more significant effect on the net asset value of the fund.

The lowest, highest and average level of leverage employed and utilisation of the leverage level calculated during the financial years ended 30 June 2023 and 30 June 2022 are disclosed in the table below. Leverage has been calculated using the Gross Sum of Notional Approach for derivative positions only (including forward currency contracts) and excludes all physical holdings. Percentages are expressed with reference to fund valuation.

for the year to 30 June	2023 £'000	2023 %	2022 £'000	2022 %
Lowest	282,710	21.56	270,329	12.73
Highest	866,050	62.45	846,600	55.83
Average	438,657	31.35	429,131	22.66

Financial statements and notes

21 Interest distribution tables

This fund pays quarterly interest distributions and the following table sets out the distribution periods.

Quarterly distribution periods

	Start	End	Xd	Payment
First interim	01.07.22	30.09.22	03.10.22	30.11.22
Second interim	01.10.22	31.12.22	03.01.23	28.02.23
Third interim	01.01.23	31.03.23	03.04.23	31.05.23
Final	01.04.23	30.06.23	03.07.23	31.08.23

The following tables set out for each distribution the rates per share for both Group 1 and Group 2 shares.

Group 1 shares are those purchased prior to a distribution period and therefore their income rate is the same as the distribution rate.

Group 2 shares are those purchased during a distribution period and therefore their distribution rate is made up of income and equalisation. Equalisation is the average amount of income included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to Income Tax. Instead, it must be deducted from the cost of shares for Capital Gains Tax purposes. The tables below show the split of the Group 2 rates into the income and equalisation components.

Sterling Class 'A' Income shares

Interest distributions for the year to 30 June	Income	Group 2 Equalisation	Group 1 & 2 Distribution	
	2023 UK p	2023 UK p	2023 UK p	2022 UK p

Authorised Corporate Director's Report

For the purposes of these financial statements, the Prospectus dated 9 June 2023 has been used.

Investment objective

The fund aims to provide a higher total return (the combination of capital growth and income), net of the ongoing charge figure, than that of a composite index* over any five-year period.

* The composite index is made up of one third JPM EMBI Global Diversified Index, one third JPM CEMBI Broad Diversified Index and one third JPM GBI-EM Global Diversified Index.

Investment policy

At least 80% of the fund is invested, directly or indirectly through derivatives, in emerging market debt securities. These securities can be issued or guaranteed by emerging market governments and their agencies, public authorities, quasi-sovereigns, supranational bodies and companies that are incorporated, domiciled, listed or do most of their business in emerging markets. These securities can be denominated in any currency, including emerging market currencies.

Other investments may include:

- asset-backed securities; and
- other transferable securities, cash, and near cash, directly or via collective investment schemes (including funds managed by M&G).

There are no credit quality restrictions applicable to the fund's investments.

Derivatives may be used for investment purposes, efficient portfolio management and hedging.

Investment approach

The fund is globally diversified across a range of emerging market debt securities and issuers from a variety of sectors and geographies. The fund's investment approach is flexible and begins with an assessment of macroeconomic factors such as global risk appetite and the catalysts of global economic growth.

On a regional and country-specific level, factors such as monetary and fiscal policies, capital flows, and political and regulatory environments are assessed. The result of this analysis will help inform the country, currency allocations and duration of the portfolio.

Individual credit selection is carried out with the assistance of an in-house team of credit analysts to complement the fund manager's views.

Benchmark

A composite index comprising:

- 1/3 JPM EMBI Global Diversified Index.
- 1/3 JPM CEMBI Broad Diversified Index.
- 1/3 JPM GBI-EM Global Diversified Index.

The benchmark is a target which the fund seeks to outperform. The composite index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark does not constrain the fund's portfolio construction.

The fund is actively managed.

The fund manager has complete freedom in choosing which assets to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

For unhedged and hedged share classes, the benchmark is shown in the share class currency.

Authorised Corporate Director's Report

Risk profile

For details of the risks associated with this fund, please refer to the Prospectus. For details of the risk management policies, please refer to pages 12 to 15.

The following table shows the risk number associated with the fund and is based on Sterling Class 'A' shares.

The above number:

- is based on the rate at which the value of the fund has moved up and down in the past and is based on historical data so may not be a reliable indicator of the future risk profile of the fund.
- is not guaranteed and may change over time and the lowest risk number does not mean risk free.
- has not changed during this period.

Investment review

For the year ended 30 June 2023

Performance against objective

Between 1 July 2022 and 30 June 2023, the fund delivered a strong positive total return (the combination of income and growth of capital) across its sterling share classes. The fund outperformed its benchmark, which returned 3.4% over the same period.

The fund's benchmark is a composite index consisting of 1/3 JPM Emerging Markets Bond (EMBI) Global Diversified Index, 1/3 JPM Corporate EMBI (CEMBI) Broad Diversified Index, and 1/3 JPM GBI-EM Global Diversified Index.

Over five years, the fund's unhedged share classes achieved the objective of providing a combination of capital growth and income, net of the ongoing charge figure, higher than the benchmark composite index over any five-year period. The hedged share classes posted

a return below that of the benchmark composite index, which was 1.9% pa over five years.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Performance review

In the first half of the review period, the outlook for emerging market debt continued to worsen due to sharp rises in interest rates. Higher food and energy prices in developing countries weighed on inflation expectations, putting upward pressure on the prices of other goods and services. A strong US dollar exacerbated the situation, resulting in a flight of capital from emerging markets.

However, emerging market bonds rebounded strongly in the fourth quarter of 2022. This strong performance continued into the new year amid optimism about the reopening of the Chinese economy and expectations that major central banks would end their interest-rate hiking cycle in 2023. Moreover, major emerging market currencies such as the Mexican peso and Brazilian real rallied against the US dollar. Nonetheless, the US banking crisis in March created heightened volatility among lower-rated financial issuers.

Towards the end of the period, the asset class benefited from an improved inflation outlook and continued weakness in the US dollar. The high yield segment (bonds rated below investment grade by credit rating agencies, as they are considered to carry more risk) benefited the most from broad positive sentiment towards riskier assets.

Emerging market debt registered positive returns over the review period, with local currency sovereign debt outperforming hard currency sovereign bonds and hard currency corporate bonds. (Hard currency are highly traded, relatively stable international currencies, such as the US dollar and euro). Within local currency sovereign debt, FX returns have been particularly strong with the Colombian Peso and Mexican Dollar being standout performers over the period. Whilst Latin American currencies have generally performed strongly, Asia currencies have relatively underperformed.

Authorised Corporate Director's Report

Against this backdrop, the fund delivered a strong positive return and significantly outperformed its benchmark.

Fund outperformance was driven largely by country allocation decisions. The fund's above-benchmark positioning in Uruguay, Ivory Coast and Morocco aided relative performance. However, our underweight positioning in Macau and Chile detracted.

Investment activities

At the start of the review period, we reduced our position in Armenia due to concerns over the country's fundamentals. Other sovereign bond holdings we trimmed included Bahrain, Romania and Bolivia.

In hard currency bonds, we increased our exposure to larger economies in Latin America and Eastern Europe. Despite a lacklustre market for new issuance (also known as primary market) we managed to participate in new sovereign issues from Bulgaria and Romania in September as well as US dollar sovereign bonds from Panama, Columbia and Poland at the end of the year.

At the beginning of 2023, we were once again active in the primary market, participating in new dollar issuances from a number of countries including Mexico, Hungary, Indonesia and the United Arab Emirates. In the secondary market (where existing bonds are traded between market participants), we added sovereign bonds from Jamaica, but trimmed exposures to Peru, and Uruguay on valuation concerns.

In spring, we focused on new issues from Eastern European countries such as Poland and Slovakia as these offered new-issue premiums. We also bought hard currency bonds from Cyprus, Romania and Hungary. Towards the end of the period, we added new euro issues from San Marino, Albania and Lithuania and a US dollar-denominated bond from Guatemala.

Within local currency assets, we exited a position in Chinese government bonds given our concerns over economic growth. Following a sharp sell-off in South Korean domestic bonds, we added several high-quality Asian financials at what we saw as attractive valuations. Elsewhere, we increased our positions in Brazil, South

Africa, Hungary and India, but reduced exposure to Chile. We remain overweight in local currency sovereigns.

Within corporate bonds, we trimmed our exposure to Enfragen Energia (Colombia), VTR (Chile) and KOS (Ghana) in August. Later we reduced our holdings in Brazilian car rental operator Simpar and investment management company XP. In March, we bought a few names including Bharti Airtel, Natura and Hunt Oil, as these bonds were trading at attractive valuations.

Towards the end of the period, we bought new bonds issued by Hungary's OTP Bank, Hungarian Development Bank, UAE property developer Aldar Investments, South Korea's SK Telecom, Romanian lender Banca Transilvania, Mexican financial firm BBVA and Israeli energy company Energean.

Outlook

Looking ahead, we continue to see value in emerging market bonds. While it is important to be selective in this space, emerging market countries generally offer the strongest long-term growth potential, in our view, and benefit from young populations and low debt/gross domestic product (GDP) ratios. Valuations also look attractive to us, with the asset class offering yields well in excess of inflation.

Emerging market central banks generally acted ahead of the curve in this interest rate tightening cycle and aggressively hiked rates early. We believe this means inflation should start to come down quite rapidly and provide a further tailwind to the asset class. While not without risks we are currently finding attractive opportunities in a number of areas, especially in Latin America and South East Asia, based on valuation grounds.

Purchases and sales exclude the cost and proceeds of 'AAA' rated money market funds.

Financial highlights

Fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the fund price to fall as well as rise and you may not get back the original amount you invested.

As different share classes have different attributes, for example charging structures and minimum investments, please be aware that their performance may be different.

For additional information, including monthly fund commentaries, fund facts, performance information (including a range of performance graphs) and other documents, please visit our website at mandg.com/investments

Long-term performance by share class

To give an indication of the performance of the fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. Please refer to 'Specific share class performance' tables for the share class launch dates.

Share class	One year % ^a	Three years % pa	Five years % pa	Ten years % pa
Sterling				
Class 'A' Income	+9.9	-1.1	+2.5	+4.9
Class 'A' Accumulation	+9.9	-1.1	+2.6	+4.9
Class 'I' Income	+10.3	-0.7	+3.0	+5.4
Class 'I' Accumulation	+10.4	-0.7	+3.1	+5.4
Class 'I-H' Income	+13.0	-0.7	+0.8	n/a
Class 'I-H' Accumulation	+13.0	-0.7	+0.8	n/a
Class 'PP' Income	+10.4	-0.6	n/a	n/a
Class 'PP' Accumulation	+10.5	-0.5	n/a	n/a
Class 'PP-H' Income	+13.2	n/a	n/a	n/a
Class 'PP-H' Accumulation	+13.1	n/a	n/a	n/a
Class 'R' Income	+10.1	-0.9	+2.7	+5.1
Class 'R' Accumulation	+10.1	-0.9	+2.8	+5.2
Benchmark	+3.4	-2.6	+1.9	+3.8

^a Not annualised.

Specific share class performance

The following comparative tables show the performance of each share class. All 'Performance and charges' percentages represent an annual rate except for the 'Return after operating charges' which is calculated as a percentage of the opening net asset value per share (NAV per share). 'Dilution adjustments' are only in respect of direct portfolio transaction costs.

'Operating charges' and 'Direct portfolio transaction costs' are calculated as a percentage of average net asset value. Where there is a change in the charging structure, you may see variances in the 'operating charges' between the comparative and current year figures.

The closing NAV per share shown may diverge from the highest and lowest share prices (used for dealing purposes) as at the balance sheet date due to accounting and valuation adjustments.

Financial statements and notes

Notes to the financial statements

1 Accounting policies

The financial statements have been prepared in accordance with the 'Summary of significant accounting policies' set out on pages 9 to 12.

The fund's functional and presentational currency is US dollars as this better reflects the currency of its primary economic environment.

2 Distribution policy

In determining the amount available for distribution to Income shares, the annual charge is offset against capital, increasing the amount available for distribution whilst restraining capital performance to an equivalent extent.

3 Net capital gains/(losses)

for the year to 30 June	2023 \$'000	2022 \$'000
Non-derivative securities	72,846	(345,094)

as at 30 June	2023 \$'000	2022 \$'000
Amounts payable on cancellation of shares	4,773	256
Annual charge payable	651	316
Currency deals outstanding	5,260	22
Purchases awaiting settlement	3,704	0
Total other creditors	14,388	594

12 Contingent assets, liabilities and outstanding commitments

There were no contingent assets, liabilities or outstanding commitments at the balance sheet date (2022: same).

13 Shares in issue

The following table shows each class of share in issue during the year. Each share class has the same rights on winding up however they may have different charging structures as set out in note 14.

Share class	Opening 01.07.22	Issued	Movements Cancelled	Converted	Closing 30.06.23
Sterling					
Class 'A' Income	9,258,716	595,751	(2,043,417)	0	7,811,050
Class 'A' Accumulation	3,191,035	617,624	(812,679)	0	2,995,980
Class 'I' Income	129,609,526	62,217,842	(36,154,200)	0	155,673,168
Class 'I' Accumulation	167,003,534	51,171,826	(60,751,913)	0	157,423,447
Class 'I-H' Income	29,710,788	181,501,781	(6,707,576)	0	204,504,993
Class 'I-H' Accumulation	119,130,278	47,747,376	(25,578,608)	0	141,299,046
Class 'PP' Income	6,808,109	9,856,358	(3,202,003)	0	13,462,464
Class 'PP' Accumulation	200,985,919	35,830,128	(26,695,183)	0	210,120,864
Class 'PP-H' Income	4,433,694	406,866,054	(974,673)	0	410,325,075
Class 'PP-H' Accumulation	5,633,158	6,484,052	(292,935)	0	11,824,275
Class 'R' Income	1,164,896	339,745	(76,995)	0	1,427,646
Class 'R' Accumulation	1,405,335	302,397	(419,240)	0	1,288,492

It is not possible to separately identify all share class conversions. As a result, the share class movements (issued/cancelled) as disclosed in the table above may also include share class conversions.

Financial statements and notes

14 Charging structure

The table below sets out the charging structure for each class of share. The charging structure is the same for both Income and Accumulation shares of each class. The amounts shown are the maximum annual charge. M&G will apply a discount of 0.02% for every £1 billion of a fund's net asset value. This is assessed quarterly and implemented on a forward basis no later than 13 business days after quarter end.

Share class	Annual charge %
Sterling	
Class 'A'	1.10
Class 'I'	0.70
Class 'I-H'	0.73
Class 'PP'	0.60
Class 'PP-H'	0.63
Class 'R'	0.95

15 Related parties

M&G Securities Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal on all the transactions of shares in the fund except with in specie transactions, where M&G Securities Limited acts as an agent. The aggregate monies received through issues, and paid on cancellations, are disclosed in the 'Statement of change in net assets attributable to shareholders' and note 8. Amounts due to/from M&G Securities Limited in respect of share transactions at the year end are disclosed in notes 9 and 11 where applicable.

Amounts paid to M&G Securities Limited in respect of the annual charge are disclosed in note 6. Amounts due at the year end in respect of the annual charge are disclosed in note 11.

Amounts paid to M&G Securities Limited in respect of rebate arrangements for the annual charge are disclosed in notes 3 and 5. Amounts due at the year end from the ACD, and/or associate, in respect of these rebates are disclosed in note 9.

At the balance sheet date, shareholders from within M&G plc, of which M&G Securities Limited is a wholly owned subsidiary, have holdings totalling 13.33% (2022: 25.66%) of the fund's shares.

16 Fair value analysis

Financial instruments have been measured at their fair value and have been classified below using a hierarchy that reflects the significance of the inputs used in measuring their fair value:

Level 1: Unadjusted quoted price in an active market for an identical instrument

This includes instruments such as publicly traded equities, highly liquid bonds (eg Government bonds) and exchange traded derivatives (eg futures) for which quoted prices are readily and regularly available.

Level 2: Valuation technique using observable market data

This includes instruments such as over-the-counter (OTC) derivatives, debt securities, convertible bonds, mortgage-backed securities, asset-backed securities and open-ended funds which have been valued using models with observable market data inputs.

Financial statements and notes

Level 3: Valuation technique using unobservable inputs

This refers to instruments which have been valued using models with unobservable data inputs. This includes single broker-priced instruments, suspended/unquoted securities, private equity, unlisted closed-ended funds and open-ended funds with restrictions on redemption rights.

as at 30 June	Assets 2023 \$'000	Liabilities 2023 \$'000	Assets 2022 \$'000	Liabilities 2022 \$'000
Basis of valuation

Level 2	1,647,922	(2,090)	913,778	(4,080)
Level 3	0	0	12,665	0
	1,671,722	(2,090)	926,443	(4,080)

17 Risk management policies

The general risk management policies for the fund are set out in note 3 to the financial statements on pages 12 to 15.

18 Market risk sensitivity and exposure

VaR is the risk measurement methodology used to assess the fund's leverage and market risk volatility.

The VaR limit set during the period to 5 March 2023 was 20% (2022: 20%).

The VaR limit set during the period from 6 March 2023 was two times the benchmark.

The lowest, highest and average VaR, as well as utilisation of VaR with reference to the limit above, are calculated during the financial years ended 30 June 2023 and 30 June 2022.

	from 6 March 2023 to 30 June 2023 % of VaR	from 6 March 2023 to 30 June 2023 Utilisation of VaR %	from 1 July 2022 to 5 March 2023 % of VaR	from 1 July 2022 to 5 March 2023 Utilisation of VaR 20%	2022 % of VaR	2022 Utilisation of VaR 20%
for the year ended 30 June						
Lowest	5.41	57.37	6.29	31.45	4.63	23.15
Highest	6.75	67.64	7.92	39.60	6.66	33.30
Average	6.13	64.99	6.91	34.57	5.17	25.87

19 Credit risk

The fund is exposed to credit risk both through the credit quality of the investments it holds and through the derivative positions with counterparties. The table below shows the credit quality of the investments held in the portfolio.

as at 30 June	2023 \$'000	2022 \$'000
Investment grade securities	627,439	294,535
Below investment grade securities	1,006,528	609,897
Unrated securities	31,574	18,473
Other investments	4,091	(542)
Total	1,669,632	922,363

Financial statements and notes

The tables below show the exposure to counterparties. Collateral is posted daily, in the form of cash or high-quality government bonds, to minimise this exposure.

as at 30 June 2023	Forward currency contracts \$'000
BNP Paribas	441
Goldman Sachs	90
HSBC	971
JPMorgan	(572)
Standard Chartered Bank	(263)
State Street Bank	4,587
UBS	(1,163)
Total	4,091

as at 30 June 2022	Forward currency contracts \$'000
Barclays Bank	(76)
BNP Paribas	(419)
Citigroup	(632)

National Australia Bank	250
State Street Bank	(2,072)
UBS	(92)
Total	(542)

20 Leverage risk

Funds using VaR approaches are required to disclose the level of leverage employed during the financial reporting period.

Derivatives can be used by the fund to generate market exposure to investments exceeding the net asset value. As a result of this exposure, the size of any positive or negative movement in markets may have a more significant effect on the net asset value of the fund.

The lowest, highest and average level of leverage employed and utilisation of the leverage level calculated during the financial years ended 30 June 2023 and 30 June 2022 are disclosed in the table below. Leverage has been

Financial statements and notes

calculated using the Gross Sum of Notional Approach for derivative positions only (including forward currency contracts) and excludes all physical holdings. Percentages are expressed with reference to fund valuation.

for the year to 30 June	2023 \$'000	2023 %	2022 \$'000	2022 %
Lowest	488,074	49.26	524,792	40.80
Highest	2,857,677	182.95	1,829,660	177.30
Average	799,296	70.27	807,590	66.13

21 Exchange rate risk for hedged share classes

This fund contains hedged share classes. These share classes operate currency hedges designed to reduce the impact of exchange rates in certain circumstances. As a result, profit and loss on the currency hedges may impact the liquidity of the overall fund. On a day to day basis this is monitored using reporting from the outsourced provider of the hedged share class service. On an ongoing basis the size of the hedged share classes is monitored to ensure that unforeseen exchange rate volatility can be adequately managed without significantly impacting all shareholders. The exposure to forward currency contracts for share class hedging at the year-end accounting date is disclosed in the portfolio statement on page 92.

22 Interest distribution tables

This fund pays semi-annual interest distributions and the following table sets out the distribution periods.

Semi-annual distribution periods

	Start	End	Xd	Payment
Interim	01.07.22	31.12.22	03.01.23	28.02.23
Final	01.01.23	30.06.23	03.07.23	31.08.23

The following tables set out for each distribution the rates per share for both Group 1 and Group 2 shares.

Group 1 shares are those purchased prior to a distribution period and therefore their income rate is the same as the distribution rate.

Group 2 shares are those purchased during a distribution period and therefore their distribution rate is made up of income and equalisation. Equalisation is the average amount of income included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to Income Tax. Instead, it must be deducted from the cost of shares for Capital Gains Tax purposes. The tables below show the split of the Group 2 rates into the income and equalisation components.

Sterling Class 'A' Income shares

23 Events after the balance sheet date

There were no events after the balance sheet date to disclose.

Authorised Corporate Director's Report

For the purposes of these financial statements, the Prospectus dated 9 June 2023 has been used.

Investment objective

The fund aims to provide a higher total return (the combination of capital growth and income), net of the ongoing charge figure, than the average return of the Bloomberg Global Treasury Index Unhedged USD over any five-year period.

Investment policy

At least 70% of the fund is invested, directly or indirectly through derivatives, in investment grade debt securities. These securities can be issued or guaranteed by governments and their agencies, public authorities, quasi-sovereigns, and supranational bodies from anywhere in the world, including emerging markets. These securities can be denominated in any currency.

Other investments may include:

- below investment grade debt securities, issued or guaranteed by governments and their agencies, public authorities, quasi-sovereigns and supranational bodies;
- asset backed securities; and
- other transferable securities, cash, and near cash, directly or via collective investment schemes (including funds managed by M&G).

Derivatives may be used for investment purposes, efficient portfolio management and hedging.

Investment approach

The fund is globally diversified across a range of government debt securities and issuers from a variety of sectors and geographies. The fund's investment approach is flexible and begins with an assessment of macroeconomic factors such as expectations on interest rates, inflation and economic growth.

On a regional and country-specific level, factors such as monetary and fiscal policies, capital flows, and political and regulatory environments are assessed. The result of this analysis helps to inform the country, currency allocations and duration of the portfolio.

Individual credit selection is carried out with the assistance of an in-house team of credit analysts to complement the fund manager's views.

Benchmark

Benchmark: Bloomberg Global Treasury Index Unhedged USD.

The benchmark is a target against which the fund seeks to outperform. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction.

The fund is actively managed.

The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund.

For unhedged and hedged share classes, the benchmark is shown in the share class currency.

Authorised Corporate Director's Report

Risk profile

For details of the risks associated with this fund, please refer to the Prospectus. For details of the risk management policies, please refer to pages 12 to 15.

The following table shows the risk number associated with the fund and is based on Sterling Class 'A' shares.

The above number:

- is based on the rate at which the value of the fund has moved up and down in the past and is based on historical data so may not be a reliable indicator of the future risk profile of the fund.
- is not guaranteed and may change over time and the lowest risk number does not mean risk free.
- has not changed during this period.

Investment review

For the year ended 30 June 2023

Performance against objective

Between 1 July 2022 (the start of the review period) and 30 June 2023, the M&G Global Government Bond Fund delivered negative performance across its sterling share classes. Returns were ahead of the fund's benchmark.

Prior to 19 April 2021 the benchmark was the IA Global Bond Sector average. From 19 April 2021 to 5th March 2023 it was the IA Global Government Bond Sector average. Thereafter it is Bloomberg Global Treasury Index Unhedged USD.

For the five-year period, the fund met its objective, which is to provide a combination of capital growth and income, net of the ongoing charge figure, higher than that of the average return of the benchmark over any five-year period. Across all share classes, the fund

delivered annualised returns surpassing the negative 0.78% pa return of the benchmark over the five-year period.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Performance review

Bonds generally produced negative returns across the reporting period because central banks raised interest rates to cool rampant inflation. Rate increases depress the value of fixed-rate assets, such as bonds, because buyers demand higher yields as compensation. (Bond prices move in the opposite direction to yields.)

Government bonds mainly fell in the second half of 2022, extending declines from the first six months of the year, as the fallout from the war in Ukraine and pent-up demand from COVID-19 stoked price increases. US inflation reached a multi-decade high of 9.1% in June. Inflation surpassed 10% in the UK and eurozone in subsequent months.

Central banks ratcheted up interest rates in a bid to stem price rises. The US Federal Reserve (Fed) raised rates seven times in 2022, including four hikes in the second half of the year. The European Central Bank began tightening in July 2022, ending about eight years of negative borrowing costs. The Bank of England (BoE) lifted its benchmark rate eight times in 2022.

The BoE also stepped into the gilt market in late September following a market collapse sparked by then-Prime Minister Liz Truss's government announcing unfunded spending plans. The pound touched a record-low \$1.03 as part of the upheaval. Truss resigned less than two months after replacing Boris Johnson as prime minister. She was succeeded by Rishi Sunak.

Toward the end of 2022, inflation cooled in the US and attention turned to when the Fed would end rate hikes. This helped to boost bonds through the first half of 2023. US bank failures in March also bolstered government debt as investors rushed into safer assets.

Authorised Corporate Director's Report

The Fed ultimately paused hikes in June 2023, while in Europe and the UK, rate increases continued amid still-high price rises.

The Fed's rate increases over the course of the year weighed on emerging market debt because higher returns in the US dent the appeal of riskier assets elsewhere in the world. Higher rates bolstered the US dollar in 2022. The currency was more stable in 2023 as rate expectations cooled – the euro gained in 2022, while sterling fell. Both rose in the first half of 2023 amid expectations of further rate increases.

The fund's outperformance during the year was largely driven by asset allocation. Overweight (above-benchmark) positions in emerging market debt, including bonds from Uruguay, Argentina and Morocco, were notably beneficial. Security selection also contributed positively, particularly in Mexico and Indonesia, while our choices among US bonds were the biggest drag on performance. The yield curve impact was beneficial for returns. Throughout the year, the fund maintained less sensitivity to interest rate changes (known as duration) than the benchmark, and a little more sensitivity to changes in credit conditions (known as credit spread duration).

Investment activities

The fund exited Chinese government bonds through November amid geopolitical and trade concerns. They had previously performed well because of support from the People's Bank of China. We also exited Italian bonds by early August due to political uncertainties. We bought Bulgarian and Romanian debt in the primary market (the market for newly-issued bonds) and Serbian in the secondary (the market where already-issued bonds are traded).

Toward the end of 2022, we added non-US dollar exchange rate risk due to the US currency weakening. This included selling hard-currency debt from the likes of Paraguay, Croatia and the Philippines. We bought local currency debt in countries including Indonesia, Brazil and Peru. The fund also switched into short-dated Singapore bonds to add currency exposure.

Toward year-end, we reduced overall duration from nearly neutral to almost a year underweight.

Moving into 2023, we removed all Japanese yen duration because of potential shifts in Bank of Japan policies, as well as adding Australian exposure due to the reopening in China after COVID-19, as China is a big export market for Australia. We added duration during a February sell-off, and later reduced Latin American currency exposure after outperformance. We dipped back into Chinese yuan debt, while remaining well underweight.

The fund added a little duration moving into April on bund (German government bonds) weakness, as well as buying longer-date Spanish bonds and medium-term Portuguese and French debt. We bought into a new issue from Cyprus. In May, we closed a long position in Danish krone, and reduced our underweight US dollar position. We sold half of our exposure in Hungary before some local market stress.

Outlook

Assessing the outlook for the global economy means weighing conflicting datapoints. On the one hand, growth is low or even negative in countries including the US. Still, this is offset by a historically tight labour market, which is a boost to consumption. Provided that the labour market remains stable, a recession might be avoided.

Authorised Corporate Director's Report

The risk may come from central banks overtightening because inflation is falling faster than they realise. This could hit labour markets and cause a recession. This danger contributed to the Fed's June pause in rate increases. Inflation has started to come down in the US, while remaining more elevated in Europe, and particularly in the UK. Any slowdown in the economy would likely boost investment grade bonds due to a decline in rates.

Total sales	88,496

Purchases and sales exclude the cost and proceeds of 'AAA' rated money market funds.

Financial highlights

Fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the fund price to fall as well as rise and you may not get back the original amount you invested.

As different share classes have different attributes, for example charging structures and minimum investments, please be aware that their performance may be different.

For additional information, including monthly fund commentaries, fund facts, performance information (including a range of performance graphs) and other documents, please visit our website at mandg.com/investments

Long-term performance by share class

To give an indication of the performance of the fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. Please refer to 'Specific share class performance' tables for the share class launch dates.

Share class	One year % ^a	Three years % pa	Five years % pa	Ten years % pa
Sterling				
Class 'A' Income	-2.2	-5.8	-0.8	+1.6
Class 'A' Accumulation	-2.1	-5.8	-0.8	+1.6
Class 'I' Income	-1.8	-5.4	-0.3	+2.1
Class 'I' Accumulation	-1.8	-5.4	-0.3	+2.1
Class 'R' Income	-2.0	-5.7	-0.6	+1.8
Class 'R' Accumulation	-2.0	-5.7	-0.6	+1.8
Benchmark^b	-6.9	-4.7	-0.8	+1.4

^a Not annualised.

^b Prior to 19 April 2021 the benchmark was the IA Global Bond Sector average. From 19 April 2021 to 5th March 2023 it was the IA Global Government Bond Sector average. Thereafter it is Bloomberg Global Treasury Index Unhedged USD.

Specific share class performance

The following comparative tables show the performance of each share class. All 'Performance and charges' percentages represent an annual rate except for the 'Return after operating charges' which is calculated as a percentage of the opening net asset value per share (NAV per share). 'Dilution adjustments' are only in respect of direct portfolio transaction costs.

'Operating charges' and 'Direct portfolio transaction costs' are calculated as a percentage of average net asset value. Where there is a change in the charging structure, you may see variances in the 'operating charges' between the comparative and current year figures.

The closing NAV per share shown may diverge from the highest and lowest share prices (used for dealing purposes) as at the balance sheet date due to accounting and valuation adjustments.

Financial statements and notes

Notes to the financial statements

1 Accounting policies

The financial statements have been prepared in accordance with the 'Summary of significant accounting policies' set out on pages 9 to 12.

The fund's functional and presentational currency is US dollars as this better reflects the currency of its primary economic environment.

2 Distribution policy

In determining the amount available for distribution to Income shares, the annual charge is offset against capital, increasing the amount available for distribution whilst restraining capital performance to an equivalent extent.

3 Net capital gains/(losses)

for the year to 30 June	2023 \$'000	2022 \$'000
Non-derivative securities	1,696	(40,537)

Sales awaiting settlement	0	923
Withholding tax recoverable	53	43
Total debtors	1,410	3,430

10 Cash and bank balances

as at 30 June	2023	2022
	\$'000	\$'000
Amounts held at futures clearing houses and collateral manager	2,090	3,899
Cash held as bank balances	1,820	7,251
Total cash and bank balances	3,910	11,150

Financial statements and notes

11 Other creditors

as at 30 June	2023 \$'000	2022 \$'000
Amounts payable on cancellation of shares	0	752
Annual charge payable	33	34
Currency deals outstanding	0	835
Derivative expense payable	0	20
Total other creditors	33	1,641

12 Contingent assets, liabilities and outstanding commitments

There were no contingent assets, liabilities or outstanding commitments at the balance sheet date (2022: same).

13 Shares in issue

The following table shows each class of share in issue during the year. Each share class has the same rights on winding up however they may have different charging structures as set out in note 14.

Share class	Opening 01.07.22	Issued	Movements Cancelled	Converted	Closing 30.06.23
Sterling					
Class 'A' Income	1,877,777	232,480	(527,827)	0	1,582,430
Class 'A' Accumulation	4,525,325	500,537	(728,087)	0	4,297,775
Class 'I' Income	991,767	196,540	(132,819)	0	1,055,488
Class 'I' Accumulation	7,640,174	625,266	(2,728,716)	0	5,536,724
Class 'R' Income	465,494	55,377	(79,775)	0	441,096
Class 'R' Accumulation	680,088	29,491	(124,733)	0	584,846

It is not possible to separately identify all share class conversions. As a result, the share class movements (issued/cancelled) as disclosed in the table above may also include share class conversions.

14 Charging structure

The table below sets out the charging structure for each class of share. The charging structure is the same for both Income and Accumulation shares of each class. The amounts shown are the maximum annual charge. M&G will apply a discount of 0.02% for every £1 billion of a fund's net asset value. This is assessed quarterly and implemented on a forward basis no later than 13 business days after quarter end.

Share class	Annual charge %
Sterling	
Class 'A'	0.90
Class 'I'	0.50
Class 'R'	0.75

Financial statements and notes

15 Related parties

M&G Securities Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal on all the transactions of shares in the fund except with in specie transactions, where M&G Securities Limited acts as an agent. The aggregate monies received through issues, and paid on cancellations, are disclosed in the 'Statement of change in net assets attributable to shareholders' and note 8. Amounts due to/from M&G Securities Limited in respect of share transactions at the year end are disclosed in notes 9 and 11 where applicable.

Amounts paid to M&G Securities Limited in respect of the annual charge are disclosed in note 6. Amounts due at the year end in respect of the annual charge are disclosed in note 11.

Amounts paid to M&G Securities Limited in respect of rebate arrangements for the annual charge are disclosed in notes 3 and 5. Amounts due at the year end from the ACD, and/or associate, in respect of these rebates are disclosed in note 9.

At the balance sheet date, there were no material shareholders from within M&G plc, of which M&G Securities Limited is a wholly owned subsidiary (2022: same).

16 Fair value analysis

Financial instruments have been measured at their fair value and have been classified below using a hierarchy that reflects the significance of the inputs used in measuring their fair value:

Level 1: Unadjusted quoted price in an active market for an identical instrument

This includes instruments such as publicly traded equities, highly liquid bonds (eg Government bonds) and exchange traded derivatives (eg futures) for which quoted prices are readily and regularly available.

Level 2: Valuation technique using observable market data

This includes instruments such as over-the-counter (OTC) derivatives, debt securities, convertible bonds, mortgage-backed securities, asset-backed securities and open-ended funds which have been valued using models with observable market data inputs.

Level 3: Valuation technique using unobservable inputs

This refers to instruments which have been valued using models with unobservable data inputs. This includes single broker-priced instruments, suspended/unquoted securities, private equity, unlisted closed-ended funds and open-ended funds with restrictions on redemption rights.

as at 30 June	Assets 2023	Liabilities 2023	Assets 2022	Liabilities 2022
Basis of valuation	\$'000	\$'000	\$'000	\$'000
Level 1	43,849	(287)	44,207	(344)
Level 2	57,127	(382)	84,639	(1,060)
Level 3	0	0	125	0
	100,976	(669)	128,971	(1,404)

17 Risk management policies

The general risk management policies for the fund are set out in note 3 to the financial statements on pages 12 to 15.

18 Market risk sensitivity and exposure

VaR is the risk measurement methodology used to assess the fund's leverage and market risk volatility.

The VaR limit set during the period to 5 March 2023 was 20% (2022: 20%).

Financial statements and notes

The VaR limit set during the period from 6 March 2023 was two times the benchmark.

The lowest, highest and average VaR, as well as utilisation of VaR with reference to the limit above, are calculated during the financial years ended 30 June 2023 and 30 June 2022.

for the year ended 30 June	from 6 March 2023 to 30 June 2023 % of VaR	from 6 March 2023 to 30 June 2023 Utilisation of VaR %	from 1 July 2022 to 5 March 2023 % of VaR	from 1 July 2022 to 5 March 2023 Utilisation of VaR 20%	2022 % of VaR	2022 Utilisation of VaR 20%
Lowest	6.29	56.26	5.13	25.65	3.14	15.70
Highest	7.30	57.75	7.72	38.60	5.50	27.50
Average	6.78	56.79	6.38	31.88	3.84	19.19

19 Credit risk

The fund is exposed to credit risk both through the credit quality of the investments it holds and through the derivative positions with counterparties. The table below shows the credit quality of the investments held in the portfolio.

as at 30 June	2023 \$'000	2022 \$'000
Investment grade securities	80,229	99,012
Below investment grade securities	18,165	25,883
Unrated securities	1,966	3,058
Other investments	(53)	(386)
Total	100,307	127,567

The tables below show the exposure to counterparties. Collateral is posted daily, in the form of cash or high-quality government bonds, to minimise this exposure.

as at 30 June 2023	Swaps \$'000	Forward currency contracts \$'000	Futures \$'000
Bank of America Merrill Lynch	0	0	(281)
Barclays Bank	372	0	0

National Australia Bank	0	13	0
State Street Bank	0	(369)	0
UBS	(353)	(101)	0
Total	161	(203)	(344)

20 Leverage risk

Funds using VaR approaches are required to disclose the level of leverage employed during the financial reporting period.

Derivatives can be used by the fund to generate market exposure to investments exceeding the net asset value. As a result of this exposure, the size of any positive or negative movement in markets may have a more significant effect on the net asset value of the fund.

Financial statements and notes

The lowest, highest and average level of leverage employed and utilisation of the leverage level calculated during the financial years ended 30 June 2023 and 30 June 2022 are disclosed in the table below. Leverage has been calculated using the Gross Sum of Notional Approach for derivative positions only (including forward currency contracts) and excludes all physical holdings. Percentages are expressed with reference to fund valuation.

for the year to 30 June	2023 \$'000	2023 %	2022 \$'000	2022 %
Lowest	73,659	68.34	83,829	48.62
Highest	285,182	272.18	342,782	152.67
Average	118,133	109.35	151,553	76.12

21 Interest distribution tables

This fund pays semi-annual interest distributions and the following table sets out the distribution periods.

Semi-annual distribution periods

	Start	End	Xd	Payment
Interim	01.07.22	31.12.22	03.01.23	28.02.23
Final	01.01.23	30.06.23	03.07.23	31.08.23

The following tables set out for each distribution the rates per share for both Group 1 and Group 2 shares.

Group 1 shares are those purchased prior to a distribution period and therefore their income rate is the same as the distribution rate.

Group 2 shares are those purchased during a distribution period and therefore their distribution rate is made up of income and equalisation. Equalisation is the average amount of income included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to Income Tax. Instead, it must be deducted from the cost of shares for Capital Gains Tax purposes. The tables below show the split of the Group 2 rates into the income and equalisation components.

Sterling Class 'A' Income shares

Interest distributions for the year to 30 June	Income	Group 2 Equalisation	Group 1 & 2 Distribution

22 Events after the balance sheet date

There were no events after the balance sheet date to disclose.

Authorised Corporate Director's Report

For the purposes of these financial statements, the Prospectus dated 9 June 2023 has been used.

Investment objective

The fund aims to provide a higher total return (the combination of capital growth and income), net of the ongoing charge figure, than that of the FTSE All-Share Index over any five-year period.

Investment policy

At least 80% of the fund is invested directly in equity securities and equity-related securities of companies across any sectors and market capitalisations that are incorporated, domiciled, listed or do most of their business in the United Kingdom.

The fund may also invest in other transferable securities directly and via collective investment schemes (including funds managed by M&G).

The fund may also hold cash and near cash for liquidity purposes.

Derivatives may be used for efficient portfolio management and hedging.

Investment approach

The fund employs a disciplined approach to investment which concentrates on the analysis and selection of individual companies.

Recovery investing focuses on companies that have experienced difficulties but have the potential to deliver returns for shareholders through their turnaround over the long-term.

The fund looks to benefit from the market's inefficiency in valuing companies going through short-term challenges. This enables the fund manager to identify companies whose long-term prospects have been under-appreciated by the market.

When analysing a company, the fund manager focuses on three key factors: people, strategy and cashflow.

Developing a constructive dialogue with company management is fundamental to the investment process.

The investment approach means the fund manager is prepared to take a contrarian view and consider areas that are out of favour with other investors. To take this contrarian view, the fund manager focuses on company management, their turnaround strategy and the businesses' ability to generate cashflow.

The fund manager expects individual cases of companies recovering to be the main driver of performance rather than individual sectors and the macroeconomic environment.

The fund manager takes a long-term view with a typical holding period of five years or more.

Benchmark

Benchmark: FTSE All-Share Index.

The benchmark is a target which the fund seeks to outperform. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction.

The fund is actively managed.

The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

For unhedged and hedged share classes, the benchmark is shown in the share class currency.

Authorised Corporate Director's Report

Risk profile

For details of the risks associated with this fund, please refer to the Prospectus. For details of the risk management policies, please refer to pages 12 to 15.

The following table shows the risk number associated with the fund and is based on Sterling Class 'A' shares.

The above number:

- is based on the rate at which the value of the fund has moved up and down in the past and is based on historical data so may not be a reliable indicator of the future risk profile of the fund.
- is not guaranteed and may change over time and the lowest risk number does not mean risk free.
- has not changed during this period.

Investment review

For the year ended 30 June 2023

Performance against objective

Over the reporting period, the fund delivered positive returns across all share classes, but lagged the benchmark, which returned 7.9%.

The M&G Recovery Fund's objective is to outperform the FTSE All-Share Index (net of charges) over any five-year period. The fund has underperformed the FTSE All-Share Index in total return terms (the combination of income and growth of capital) across all its share classes over five years, therefore missing its objective. The index returned 3.1% pa in sterling terms in the five years to 30 June 2023.

For the performance of each share class, please refer to the 'Long-term performance by share class' table in the 'Financial highlights' section of this report.

Performance review

UK stocks, as measured by the FTSE All-Share Index, made gains in the year under review against a backdrop of high inflation and rising interest rates.

Markets started the reporting year with gains before suffering declines later in the summer of 2022 because of interest rate hikes by the US Federal Reserve (Fed) and fears that Europe would fall into recession because of rising energy prices. Inflation surpassed 10% in the UK and reached a record in the euro area, fanned by the war in Ukraine and curtailed supplies of Russian gas.

UK assets plunged in late September following the mini budget put forward by former Prime Minister Liz Truss, with sterling collapsing. The Bank of England (BoE) intervened to ease turmoil in the gilt market and concerns about systemic risk in UK pensions. Rishi Sunak soon replaced Truss as prime minister. Her short-lived premiership had followed Boris Johnson's resignation earlier in the year.

The BoE stepped up efforts to tame surging inflation in November with a three quarters of a percentage point interest rate increase, its biggest hike since 1989. In total, the central bank raised rates eight times in the year ended June, lifting its benchmark to 5%. The rate was just 0.1% before hikes began in December 2021.

The FTSE 100 index of larger companies outperformed more domestically focused UK indices over the year, helped by increases in interest rates boosting bank profits and a historically weak pound bolstering global companies' overseas earnings. The FTSE 100 posted total returns of 9.1%, surpassing gains of 1.9% for the FTSE 250 Index of medium-sized companies and of -0.3% for the FTSE Smaller Companies (ex investment companies) Index.

The fund had a smaller allocation to the FTSE 100 than its benchmark and retained an above-market position in medium and smaller-sized companies in the UK. This has been the case for a number of years, as many of the most undervalued and challenged situations can be found in this market segment. Overall, the fund's holdings of larger companies and medium and smaller-sized UK companies outperformed due to good stock

Authorised Corporate Director's Report

selection. However, some value was lost from our above-market exposure to overseas holdings.

At a sector level, the fund's below-market exposure to real estate and consumer staples was beneficial for relative returns. Likewise, the above-benchmark stance and favourable stock selection in technology contributed positively. The fund's largest above-benchmark position was in basic materials, which also benefited performance, although security selection detracted. Stockpicking within the consumer discretionary and industrials sectors also made a negative contribution.

At a stock level, biotech firm Mesoblast was the biggest positive contributor following a successful fundraising. UK oil and gas business BP was also a strong performer after the firm announced record annual profits and increased the dividend by more than expected. Micro Focus performed well following a takeover by Canadian software firm OpenText.

Tullow Oil was the largest detractor due to weak oil prices and motor insurer Direct Line also notably cost some performance, falling sharply after issuing a profit warning and cancelling the final dividend – followed by the departure of the chief executive. However, we expect higher premiums over the next couple of years to help restore the company's balance sheet.

Investment activities

The fund initiated an above-market position in British healthcare stock GSK (formerly GlaxoSmithKline) as US litigation concerning Zantac, its heartburn treatment, opened up a rare valuation opportunity. We also established a position in gambling business Entain. The share prices of betting companies have been weak on concerns about the UK government's gambling review and the impact on earnings from a consumer slowdown. But Entain is well prepared for the review, in our opinion. In addition, Entain has previously rejected takeover approaches at much higher levels from two US rivals, DraftKings and MGM, its joint venture partner.

We exited our position in low-cost carrier EasyJet as airlines face a difficult environment, which is compounded by US dollar costs. The fund sold its stake

in Dignity as the undertaker struggled with rising costs and a trend toward cheaper funerals. In October, we sold the majority of the fund's IWG holding reflecting concerns about demand for flexible office space going into a slowdown. A large holding in Lloyds Banking was sold as we looked to reduce exposure to the banking sector.

Of the four stages of the 'recovery' process for our companies (stage 1 – unloved; stage 2 – stabilising; stage 3 – recovering well; stage 4 – mature), the proportion of companies held in stage 1 remained around the same on balance as a number of businesses progressed to stage 2 (Johnson Matthey and Moneysupermarket) and a number of new companies were bought. Several companies moved from the stabilising stage to 'recovering well' (stage 3). Only one holding – Watchstone – remained in stage 4.

Outlook

UK companies' greater financial strength means they are better able to weather an economic slowdown than before the 2008 global financial crisis. Many FTSE All-Share Index members are also heavily exposed to overseas markets, which provides a buffer against domestic economic risks. Banks, in particular, have greatly boosted capital since the financial crash, giving them more capacity to absorb bad debts. Lenders also benefit from higher interest rates.

Authorised Corporate Director's Report

Sterling has recovered from the worst of the sell-off after the Truss mini-budget. Still, it remains weaker versus the dollar than 15 months ago. This is beneficial to dollar-exposed stocks listed in the UK, notably oil companies, miners, drugmakers and tobacco producers. The domestic stockmarket's historically low valuation and a weaker pound could spur more overseas takeovers of UK companies – this possibility may now be dampened by higher borrowing costs and economic uncertainties, but UK listed corporates remain alert to opportunistic approaches.

Michael Stiasny

Fund manager

An employee of M&G FA Limited which is an associate of M&G Securities Limited.

Financial highlights

Fund performance

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the fund price to fall as well as rise and you may not get back the original amount you invested.

As different share classes have different attributes, for example charging structures and minimum investments, please be aware that their performance may be different.

For additional information, including monthly fund commentaries, fund facts, performance information (including a range of performance graphs) and other documents, please visit our website at mandg.com/investments

Long-term performance by share class

To give an indication of the performance of the fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested. Please refer to 'Specific share class performance' tables for the share class launch dates.

Share class	One year % ^a	Three years % pa	Five years % pa	Ten years % pa
Sterling				
Class 'A' Income	+6.6	+5.5	-4.0	+0.3
Class 'A' Accumulation	+6.5	+5.4	-4.0	+0.3
Class 'C' Income	+7.7	+6.7	-2.7	+1.7
Class 'C' Accumulation	+7.7	+6.6	-2.8	+1.6
Class 'I' Income	+7.0	+5.9	-3.5	+0.9
Class 'I' Accumulation	+7.0	+5.9	-3.5	+0.9
Class 'PP' Income	+7.1	+6.0	n/a	n/a
Class 'PP' Accumulation	+7.1	+6.0	n/a	n/a
Class 'R' Income	+6.7	+5.6	-3.7	+0.6
Class 'R' Accumulation	+6.7	+5.6	-3.7	+0.6
Benchmark	+7.9	+10.0	+3.1	+5.9

^a Not annualised.

Specific share class performance

The following comparative tables show the performance of each share class. All 'Performance and charges' percentages represent an annual rate except for the 'Return after operating charges' which is calculated as a percentage of the opening net asset value per share (NAV per share). 'Dilution adjustments' are only in respect of direct portfolio transaction costs.

'Operating charges' and 'Direct portfolio transaction costs' are calculated as a percentage of average net asset value. Where there is a change in the charging structure, you may see variances in the 'operating charges' between the comparative and current year figures.

The closing NAV per share shown may diverge from the highest and lowest share prices (used for dealing purposes) as at the balance sheet date due to accounting and valuation adjustments.

Financial statements and notes

Notes to the financial statements

1 Accounting policies

The financial statements have been prepared in accordance with the 'Summary of significant accounting policies' set out on pages 9 to 12.

2 Distribution policy

In determining the amount available for distribution, ordinary stock dividends have been transferred to capital, reducing the amount available.

In determining the amount available for distribution to Income shares, the annual charge is offset against capital, increasing the amount available for distribution whilst restraining capital performance to an equivalent extent.

3 Net capital gains/(losses)

for the year to 30 June	2023 £'000	2022 £'000

5 Revenue

for the year to 30 June	2023 £'000	2022 £'000
Bank interest	14	4
Dividends from equity investments: non-taxable	44,160	39,924
Dividends from equity investments: taxable	15	90
Interest distributions	330	20
Property distribution: non-taxable	27	0
Property distribution: taxable	19	0
Rebate of ongoing charges from underlying funds	8	2
Stock dividends	695	1,758
Underwriting commission	0	50
Total revenue	45,268	41,848

6 Expenses

for the year to 30 June	2023 £'000	2022 £'000
Payable to the ACD or associate		
Annual charge	9,318	11,450
Total expenses	9,318	11,450

Audit fees for the financial year ending 2023 were £11,000 (2022: £11,000) (including VAT), which are covered by the annual charge.

Financial statements and notes

7 Taxation

for the year to 30 June	2023 £'000	2022 £'000
a) Analysis of charge in the year		
Corporation tax	0	0
Withholding tax	35	2
Deferred tax (note 7c)	0	0
Total taxation	35	2
b) Factors affecting taxation charge for the year		
Net revenue/(expense) before taxation	35,950	30,351
Corporation tax at 20%	7,190	6,070
Effects of:		
Dividends from equity investments: non-taxable	(8,837)	(7,985)
Stock dividends: non-taxable	(139)	(351)
Current year expenses not utilised	1,786	2,266
Withholding tax	35	2
Total tax charge (note 7a)	35	2
c) Provision for deferred taxation		
Provision at the start of the year	0	0
Deferred tax in profit and loss account (note 7a)	0	0
Provision at the end of the year	0	0

The fund has not recognised a deferred tax asset of £168,480,000 (2022: £166,694,000) arising as a result of having excess management expenses. We do not expect this asset to be utilised in the foreseeable future.

Financial statements and notes

8 Distributions

For each distribution period, the distributions payable on Income shares (Inc) and distributions retained on Accumulation shares (Acc) are disclosed.

for the year to 30 June	2023		2022	
	Inc	Acc	Inc	Acc
Dividend distributions	£'000	£'000	£'000	£'000

Financial statements and notes

11 Other creditors

as at 30 June	2023 £'000	2022 £'000
Amounts payable on cancellation of shares	1,291	1,396
Annual charge payable	504	451
Purchases awaiting settlement	165	0
Total other creditors	1,960	1,847

12 Contingent assets, liabilities and outstanding commitments

There were no contingent assets, liabilities or outstanding commitments at the balance sheet date (2022: same).

13 Shares in issue

The following table shows each class of share in issue during the year. Each share class has the same rights on winding up however they may have different charging structures as set out in note 14.

Share class	Opening 01.07.22	Issued	Movements Cancelled	Converted	Closing 30.06.23
Sterling					
Class 'A' Income	277,349,793	6,657,045	(33,523,202)	0	250,483,636
Class 'A' Accumulation	132,774,405	10,000	(36,521,487)	0	96,262,918
Class 'C' Income	44,481,934	1,802,257	(2,439,270)	0	43,844,921
Class 'C' Accumulation	52,320,851	189,000	(7,847,599)	0	44,662,252
Class 'I' Income	57,341,121	11,685,891	(6,176,236)	0	62,850,776
Class 'I' Accumulation	76,261,438	19,873,000	(12,060,472)	0	84,073,966
Class 'PP' Income	2,598,416	1,182,168	(638,905)	0	3,141,679
Class 'PP' Accumulation	1,361,472	1,584,027	(566,538)	0	2,378,961
Class 'R' Income	9,187,333	444,619	(940,899)	0	8,691,053
Class 'R' Accumulation	50,169,225	1,156,021	(4,698,853)	0	46,626,393

It is not possible to separately identify all share class conversions. As a result, the share class movements (issued/cancelled) as disclosed in the table above may also include share class conversions.

Financial statements and notes

14 Charging structure

The table below sets out the charging structure for each class of share. The charging structure is the same for both Income and Accumulation shares of each class. The amounts shown are the maximum annual charge. M&G will apply a discount of 0.02% for every £1 billion of a fund's net asset value. This is assessed quarterly and implemented on a forward basis no later than 13 business days after quarter end.

Share class	Annual charge %
Sterling	
Class 'A'	1.10
Class 'C'	0.00
Class 'I'	0.70
Class 'PP'	0.60
Class 'R'	0.95

15 Related parties

M&G Securities Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal on all the transactions of shares in the fund except with in specie transactions, where M&G Securities Limited acts as an agent. The aggregate monies received through issues, and paid on cancellations, are disclosed in the 'Statement of change in net assets attributable to shareholders' and note 8. Amounts due to/from M&G Securities Limited in respect of share transactions at the year end are disclosed in notes 9 and 11 where applicable.

Amounts paid to M&G Securities Limited in respect of the annual charge are disclosed in note 6. Amounts due at the year end in respect of the annual charge are disclosed in note 11.

Amounts paid to M&G Securities Limited in respect of rebate arrangements for the annual charge are disclosed in notes 3 and 5. Amounts due at the year end from the ACD, and/or associate, in respect of these rebates are disclosed in note 9.

At the balance sheet date, shareholders from within M&G plc, of which M&G Securities Limited is a wholly owned subsidiary, have holdings totalling 11.87% (2022: 12.57%) of the fund's shares.

16 Fair value analysis

Financial instruments have been measured at their fair value and have been classified below using a hierarchy that reflects the significance of the inputs used in measuring their fair value:

Level 1: Unadjusted quoted price in an active market for an identical instrument

This includes instruments such as publicly traded equities, highly liquid bonds (eg Government bonds) and exchange traded derivatives (eg futures) for which quoted prices are readily and regularly available.

Level 2: Valuation technique using observable market data

This includes instruments such as over-the-counter (OTC) derivatives, debt securities, convertible bonds, mortgage-backed securities, asset-backed securities and open-ended funds which have been valued using models with observable market data inputs.

Financial statements and notes

Level 3: Valuation technique using unobservable inputs

This refers to instruments which have been valued using models with unobservable data inputs. This includes single broker-priced instruments, suspended/unquoted securities, private equity, unlisted closed-ended funds and open-ended funds with restrictions on redemption rights.

as at 30 June	Assets 2023 £'000	Liabilities 2023 £'000	Assets 2022 £'000	Liabilities 2022 £'000
Basis of valuation				
Level 1	1,141,992	0	1,193,133	0
Level 2	0	0	0	0
Level 3	445	0	2,477	0
	1,142,437	0	1,195,610	0

Level 3 assets comprise of Watchstone (2022: Watchstone) which is AQSE listed.

17 Risk management policies

The general risk management policies for the fund are set out in note 3 to the financial statements on pages 12 to 15.

18 Market risk sensitivity

A five per cent increase in the value of the fund's investment portfolio would have the effect of increasing the return and net assets by £57,122,000 (2022: £59,781,000). A five per cent decrease would have an equal and opposite effect.

19 Currency risk sensitivity and exposure

A five per cent increase in the value of the fund's currency exposure would have the effect of increasing the return and net assets by £4,270,000 (2022: £4,428,000). A five per cent decrease would have an equal and opposite effect.

as at 30 June	2023 £'000	2022 £'000
Currency exposure		
Australian dollar	36,435	30,666
Canadian dollar	18,077	24,405
Euro	9,153	6,372
Sterling	1,057,455	1,120,320
US dollar	21,734	27,120
Total	1,142,854	1,208,883

20 Interest rate risk sensitivity and exposure

As the majority of the fund's financial assets are non-interest bearing, the risk is not considered significant and is therefore not disclosed.

Financial statements and notes

21 Credit risk

Credit risk with regards to derivative balances is not considered significant and is therefore not disclosed.

22 Dividend distribution tables

This fund pays semi-annual ordinary distributions and the following table sets out the distribution periods.

Semi-annual distribution periods

	Start	End	Xd	Payment
Interim	01.07.22	31.12.22	03.01.23	28.02.23
Final	01.01.23	30.06.23	03.07.23	31.08.23

The following tables set out for each distribution the rates per share for both Group 1 and Group 2 shares.

Group 1 shares are those purchased prior to a distribution period and therefore their income rate is the same as the distribution rate.

Group 2 shares are those purchased during a distribution period and therefore their distribution rate is made up of income and equalisation. Equalisation is the average amount of income included in the purchase price of all Group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to Income Tax. Instead, it must be deducted from the cost of shares for Capital Gains Tax purposes. The tables below show the split of the Group 2 rates into the income and equalisation components.

Sterling Class 'A' Income shares

Other regulatory disclosures

Remuneration

The below disclosure is made in accordance with Undertakings for Collective Investment in Transferable Securities ("UCITS") V and the Guidelines on sound remuneration policies under the UCITS issued by the European Securities and Markets Authority ("ESMA Guidelines").

M&G Securities Limited (the "UCITS Management Company") is subject to a remuneration policy which is consistent with the principles outlined in the ESMA Guidelines.

The remuneration policy is designed to ensure that any relevant conflicts of interest can be managed appropriately at all times and that the remuneration of employees is in line with the risk policies and objectives of the UCITS funds managed by the UCITS Management Company. Further details of the remuneration policy can be found on our website: mandgplc.com/our-business/mandginvestments/mandg-investments-business-policies

The remuneration policy and its implementation is reviewed on an annual basis, or more frequently where required, and is approved by the M&G plc Board Remuneration Committee. The most recent review found no fundamental issues with no material changes made to the policy.

M&G Securities Limited is required under UCITS to make quantitative disclosures of remuneration. These disclosures are made in line with M&G's interpretation of currently available guidance on quantitative remuneration disclosures. As market or regulatory guidance evolves, M&G may consider it appropriate to make changes to the way in which quantitative disclosures are calculated.

The 'Identified Staff' of M&G Securities Limited are those who could have a material impact on the risk profile of M&G Securities Limited or the UCITS funds it manages and generally includes senior management, risk takers and control functions. 'Identified Staff' typically provide both UCITS and non-UCITS related services and have a number of areas of responsibility. Therefore, only the portion of remuneration for those

individuals' services which may be attributable to UCITS is included in the remuneration figures disclosed.

Accordingly the figures are not representative of any individual's actual remuneration. The information needed to provide a further breakdown of remuneration is not readily available and would not be relevant or reliable.

The amounts shown below reflect payments made in respect of the financial year 1 January 2022 to 31 December 2022.

	Fixed Remuneration £000	Variable Remuneration £000	Total £000	Beneficiaries
Senior Management	622	1,303	1,925	9
Other Identified Staff	4,578	18,758	23,336	37

Swiss investor information

For funds registered in Switzerland we are required by FINMA to disclose the Total Expense Ratio (TER).

For these funds the TERs are the same as the operating charges disclosed in the fund's financial highlights section under 'Performance and charges'.

Glossary

Accumulation shares A type of share where distributions are automatically reinvested and reflected in the value of the shares.

Accumulation units A type of unit where distributions are automatically reinvested and reflected in the value of the units.

Asset Anything having commercial or exchange value that is owned by a business, institution or individual.

Asset allocation Apportioning a portfolio's assets according to risk tolerance and investment goals.

Asset class Category of assets, such as cash, company shares, fixed income securities and their sub-categories, as well as tangible assets such as real estate.

Bond A loan in the form of a security, usually issued by a government or company, which normally pays a fixed rate of interest over a given time period, at the end of which the initial amount borrowed is repaid.

Bond issue A set of fixed income securities offered for sale to the public by a company or government. If the bonds are sold for the first time, it is called a 'new issue'.

Bottom-up selection Selecting stocks based on the attractiveness of a company.

Bunds Fixed income securities issued by the German government.

Capital Refers to the financial assets, or resources, that a company has to fund its business operations.

Capital growth Occurs when the current value of an investment is greater than the initial amount invested.

Capital return The term for the gain or loss derived from an investment over a particular period. Capital return includes capital gain or loss only and excludes income (in the form of interest or dividend payments).

Cash equivalents Deposits or investments with similar characteristics to cash.

Charity Authorised Investment Fund (CAIF) An investment entity that is both a registered charity and an authorised investment fund. The CAIF must comply with charity law as well as financial services laws and regulations, and is usually treated as a registered charity for tax purposes.

Comparative sector A group of funds with similar investment objectives and/or types of investment, as classified by bodies such as the Investment Association (IA) or Morningstar™. Sector definitions are mostly based on the main assets a fund should invest in, and may also have a geographic focus. Sectors can be the basis for comparing the different characteristics of similar funds, such as their performance or charging structure.

Consumer Prices Index (CPI) An index used to measure inflation, which is the rate of change in prices for a basket of goods and services. The contents of the basket are meant to be representative of products and services we typically spend our money on.

Convertible bonds Fixed income securities that can be exchanged for predetermined amounts of company shares at certain times during their life.

Corporate bonds Fixed income securities issued by a company. They are also known as bonds and can offer higher interest payments than bonds issued by governments as they are often considered more risky.

Coupon The interest paid by the government or company that has raised a loan by selling bonds.

Credit The borrowing capacity of an individual, company or government. More narrowly, the term is often used as a synonym for fixed income securities issued by companies.

Credit default swaps (CDS) Are a type of derivative, namely financial instruments whose value, and price, are dependent on one or more underlying assets. CDS are insurance-like contracts that allow investors to transfer the risk of a fixed income security defaulting to another investor.

Credit rating An independent assessment of a borrower's ability to repay its debts. A high rating indicates that the credit rating agency considers the issuer to be at low risk of default; likewise, a low rating indicates high risk of default. Standard & Poor's, Fitch and Moody's are the three most prominent credit rating agencies. Default means that a company or government is unable to meet interest payments or repay the initial investment amount at the end of a security's life.

Credit rating agency A company that analyses the financial strength of issuers of fixed income securities and attaches a rating to their debt. Examples include Standard & Poor's and Moody's.

Credit risk Risk that a financial obligation will not be paid and a loss will result for the lender.

Glossary

Credit selection The process of evaluating a fixed income security, also called a bond, in order to ascertain the ability of the borrower to meet its debt obligations. This research seeks to identify the appropriate level of default risk associated with investing in that particular bond.

Credit spread The difference between the yield of a corporate bond, a fixed income security issued by a company, and a government bond of the same life span. Yield refers to the income received from an investment and is expressed as a percentage of the investment's current market value.

Default When a borrower does not maintain interest payments or repay the amount borrowed when due.

Defaulted bond When a bond issuer does not maintain interest payments or repay the amount borrowed when due.

Default risk Risk that a debtholder will not receive interest and full repayment of the loan when due.

Derivatives Financial instruments whose value, and price, are dependent on one or more underlying assets. Derivatives can be used to gain exposure to, or to help protect against, expected changes in the value of the underlying investments. Derivatives may be traded on a regulated exchange or traded over the counter.

Developed economy/market Well-established economies with a high degree of industrialisation, standard of living and security.

Dilution adjustments The dilution adjustment is used to protect ongoing investors against the transaction charges incurred in investing or divesting in respect of creations and cancellations. The dilution adjustment is made up of the direct and indirect transaction charges. In the financial statements the direct transaction charges as a percentage of average NAV will be disclosed. This percentage will take account of those direct transaction charges that have been recovered through the dilution adjustment leaving a percentage that just represents the costs incurred in portfolio management.

Distribution Distributions represent a share in the income of the fund and are paid out to Income shareholders or reinvested for Accumulation shareholders at set times of the year (monthly, quarterly, half-yearly or annually). They may either be in the form of interest distributions or dividend distributions.

Distribution yield Expresses the amount that is expected to be distributed by the fund over the next 12 months as a percentage of the share price as at a certain date. It is based on the expected gross income less the ongoing charges.

Diversification The practice of investing in a variety of assets. This is a risk management technique where, in a well-diversified portfolio, any loss from an individual holding should be offset by gains in other holdings, thereby lessening the impact on the overall portfolio.

Dividend Dividends represent a share in the profits of a company and are paid out to the company's shareholders at set times of the year.

Duration A measure of the sensitivity of a fixed income security, also called a bond, or bond fund to changes in interest rates. The longer a bond or bond fund's duration, the more sensitive it is to interest rate movements.

Duration risk The longer a fixed income security, also called a bond, or bond fund's duration, the more sensitive and therefore at risk it is to changes in interest rates.

Emerging economy or market Economies in the process of rapid growth and increasing industrialisation. Investments in emerging markets are generally considered to be riskier than those in developed markets.

Equities Shares of ownership in a company.

Exchange traded Usually refers to investments traded on an exchange, such as company shares on a stock exchange.

Ex-dividend, ex-distribution or XD date The date on which declared distributions officially belong to underlying investors.

Exposure The proportion of a fund invested in a particular share/fixed income security, sector/region, usually expressed as a percentage of the overall portfolio.

Fixed income security A loan in the form of a security, usually issued by a government or company, which normally pays a fixed rate of interest over a given time period, at the end of which the initial amount borrowed is repaid. Also referred to as a bond.

Floating rate notes (FRNs) Securities whose interest (income) payments are periodically adjusted depending on the change in a reference interest rate.

Foreign exchange The exchange of one currency for another, or the conversion of one currency into another currency. Foreign exchange also refers to the global market where currencies are traded virtually around the clock. The term foreign exchange is usually abbreviated as 'forex' and occasionally as 'FX'.

Glossary

Foreign exchange (FX) strategy Currencies can be an asset class in its own right, along with company shares, fixed income securities, property and cash. Foreign exchange strategy can therefore be a source of investment returns.

Forward contract A contract between two parties to buy or sell a particular commodity or financial instrument at a pre-determined price at a future date. Examples include forward currency contracts.

Fundamentals (company) A basic principle, rule, law, or the like, that serves as the groundwork of a system. A company's fundamentals pertain specifically to that company, and are factors such as its business model, earnings, balance sheet and debt.

Fundamentals (economic) A basic principle, rule, law, or the like, that serves as the groundwork of a system. Economic fundamentals are factors such as inflation, employment, economic growth.

Futures A futures contract is a contract between two parties to buy or sell a particular commodity or financial instrument at a predetermined price at a future date. Futures are traded on a regulated exchange.

Gilts Fixed income securities issued by the UK government.

Government bonds Fixed income securities issued by governments, that normally pay a fixed rate of interest over a given time period, at the end of which the initial investment is repaid.

Hedging A method of reducing unnecessary or unintended risk.

High water mark (HWM) The highest level that a fund's NAV (net asset value) has reached at the end of any 12-month accounting period.

High yield bonds Fixed income securities issued by companies with a low credit rating from a recognised credit rating agency. They are considered to be at higher risk of default than better quality, ie higher-rated fixed income securities but have the potential for higher rewards. Default means that a company or government is unable to meet interest payments or repay the initial investment amount at the end of a security's life.

Historic yield The historic yield reflects distributions declared over the past 12 months as a percentage of the share price, as at the date shown.

Income yield Refers to the income received from an investment and is usually expressed annually as a percentage based on the investment's cost, its current market value or face value.

Index An index represents a particular market or a portion of it, serving as a performance indicator for that market.

Income shares A type of share where distributions are paid out as cash on the payment date.

Income units A type of unit where distributions are paid out as cash on the payment date.

Index tracking A fund management strategy that aims to match the returns from a particular index.

Index-linked bonds Fixed income securities where both the value of the loan and the interest payments are adjusted in line with inflation over the life of the security. Also referred to as inflation-linked bonds.

Inflation The rate of increase in the cost of living. Inflation is usually quoted as an annual percentage, comparing the average price this month with the same month a year earlier.

Inflation risk The risk that inflation will reduce the return of an investment in real terms.

Initial public offering (IPO) The first sale of shares by a private company to the public.

Interest rate risk The risk that a fixed income investment will lose value if interest rates rise.

Interest rate swap An agreement between two parties to swap a fixed interest payment with a variable interest payment over a specified period of time.

Investment Association (IA) The UK trade body that represents fund managers. It works with investment managers, liaising with government on matters of taxation and regulation, and also aims to help investors understand the industry and the investment options available to them.

Investment grade bonds Fixed income securities issued by a company with a medium or high credit rating from a recognised credit rating agency. They are considered to be at lower risk from default than those issued by companies with lower credit ratings. Default means that a company or government is unable to meet interest payments or repay the initial investment amount at the end of a security's life.

Issuer An entity that sells securities, such as fixed income securities and company shares.

Glossary

Leverage When referring to a company, leverage is the level of a company's debt in relation to its assets. A company with significantly more debt than capital is considered to be leveraged. It can also refer to a fund that borrows money or uses derivatives to magnify an investment position.

Liquidity A company is considered highly liquid if it has plenty of cash at its disposal. A company's shares are considered highly liquid if they can be easily bought or sold since large amounts are regularly traded.

Long position Refers to ownership of a security held in the expectation that the security will rise in value.

Macroeconomic Refers to the performance and behaviour of an economy at the regional or national level. Macroeconomic factors such as economic output, unemployment, inflation and investment are key indicators of economic performance. Sometimes abbreviated to 'macro'.

Maturity The length of time until the initial investment amount of a fixed income security is due to be repaid to the holder of the security.

Modified duration A measure of the sensitivity of a fixed income security, called a bond, or bond fund to changes in interest rates. The longer a bond or bond fund's duration, the more sensitive it is to interest rate movements.

Monetary easing When central banks lower interest rates or buy securities on the open market to increase the money in circulation.

Monetary policy A central bank's regulation of money in circulation and interest rates.

Monetary tightening When central banks raise interest rates or sell securities on the open market to decrease the money in circulation.

Morningstar™ A provider of independent investment research, including performance statistics and independent fund ratings.

Near cash Deposits or investments with similar characteristics to cash.

Net asset value (NAV) A fund's net asset value is calculated by taking the current value of the fund's assets and subtracting its liabilities.

Ongoing Charge Figure The ongoing charge figure represents the operating costs investors can reasonably expect to pay under normal circumstances.

Open-ended investment company (OEIC) A type of managed fund, whose value is directly linked to the value of the fund's underlying investments.

Options Financial contracts that offer the right, but not the obligation, to buy or sell an asset at a given price on or before a given date in the future.

Over-the-counter (OTC) Whereby financial assets are traded directly between two parties. This is in contrast to exchange trading, which is carried out through exchanges set up specifically for the purpose of trading. OTC is also known as off-exchange trading.

Overweight If a fund is 'overweight' a stock, it holds a larger proportion of that stock than the comparable index or sector.

Payment date The date on which distributions will be paid by the fund to investors, usually the last business day of the month.

Physical assets An item of value that has tangible existence, for example, cash, equipment, inventory or real estate. Physical assets can also refer to securities, such as company shares or fixed income securities.

Portfolio transaction cost The cost of trading, such as brokerage, clearing, exchange fees and bid-offer spread as well as taxes such as stamp duty.

Preference shares Preference shares are a loan to a company that may be traded in the same way as ordinary shares, but generally have a higher yield and pay dividends on fixed dates. Preference shares have varying characteristics as to the treatment of the principal and the dividend payment, which includes ranking them above ordinary shares when it comes to dividend payments.

Principal The face value of a fixed income security, which is the amount due back to the investor by the borrower when the security reaches the end of its life.

Private placement An offer of sale of securities to a relatively small number of investors selected by the company, generally investment banks, mutual funds, insurance companies or pension funds.

Property Expense Ratio (PER) Property expenses are the operating expenses that relate to the management of the property assets in the portfolio. These include: insurance and rates, rent review and lease renewal costs and maintenance and repairs, but not improvements. They depend on the level of activity taking place within the fund. The Property Expense Ratio is the ratio of property expenses to the fund's net asset value.

Glossary

Real yield The return of an investment, adjusted for changes in prices in an economy.

Retail Prices Index (RPI) A UK inflation index that measures the rate of change in prices for a basket of goods and services in the UK, including mortgage payments and council tax.

Risk The chance that an investment's return will be different to what is expected. Risk includes the possibility of losing some or all of the original investment.

Risk management The term used to describe the activities the fund manager undertakes to limit the risk of a loss in a fund.

Risk premium The difference between the return from a risk-free asset, such as a high-quality government bond or cash, and the return from an investment in any other asset. The risk premium can be considered the 'price' or 'pay-off' for taking on increased risk. A higher risk premium implies higher risk.

Risk-free asset An asset that notionally carries no risk of non-payment by the borrower such as a high-quality fixed income security issued by a government or cash.

Risk/reward ratio A ratio comparing the expected returns of an investment with the amount of risk undertaken.

Safe-haven assets Refers to assets that investors perceive to be relatively safe from suffering a loss in times of market turmoil.

Security Financial term for a paper asset – usually a share in a company or a fixed income security also known as a bond.

Share class Each M&G fund has different share classes, such as A, R and I. Each has a different level of charges and minimum investment. Details on charges and minimum investments can be found in the Key Investor Information Documents.

Share class hedging Activities undertaken in respect of hedged shares to mitigate the impact on performance of exchange rate movements between the fund's currency exposure and the investor's chosen currency.

Short position A way for a fund manager to express his or her view that the market might fall in value.

Short selling This often refers to the practice whereby an investor sells an asset they do not own. The investor borrows the asset from someone who does own it and pays a fee. The investor must eventually return the borrowed asset by buying it in the open market. If the asset has fallen in price, the investor buys it for less than they sold it for, thus making a profit. The contrary may also occur.

Short-dated corporate bonds Fixed income securities issued by companies and repaid over relatively short periods.

Short-dated government bonds Fixed income securities issued by governments and repaid over relatively short periods.

Sovereign debt Debt of a government. Also referred to as government bonds.

Sub-investment grade bonds Fixed income securities issued by a company with a low rating from a recognised credit rating agency. They are considered to be at higher risk from default than those issued by companies with higher credit ratings. Default means that a company or government is unable to meet interest payments or repay the initial investment amount at the end of a security's life.

Suspended Temporarily halting the trading of a listed security on the stock exchange. It can be voluntary (requested by the issuing company) or imposed by regulators. Typically, trading suspensions are introduced ahead of important news announcements, following technical glitches, or due to regulatory concerns.

Swing pricing Swing pricing is a method of protecting long-term shareholders in the fund from bearing the costs of transactions carried out by shorter-term investors. When investors buy or sell shares in the fund, the fund manager has to buy or sell underlying securities to either invest the cash obtained from investors, or to provide them with cash in exchange for their shares. Swing pricing essentially adjusts the fund shares' daily price to take into account the costs of buying or selling the underlying securities held by the fund. This ensures that transaction costs such as brokerage fees and administrative charges are borne by those investors who trade shares in the fund, not by those who remain invested in the fund. (Also see dilution adjustment).

Top-down investing An investment approach that analyses economic factors, ie surveys the 'big picture', before selecting which companies to invest in. The top-down investor will look at which industries are likely to generate the best returns in certain economic conditions and limit the search to that area.

Total return The term for the gain or loss derived from an investment over a particular period. Total return includes income (in the form of interest or dividend payments) and capital gains.

Treasuries Fixed income securities issued by the US government.

Glossary

Triple A or AAA rated The highest possible rating a fixed income security, also called a bond, can be assigned by credit rating agencies. Bonds that are rated AAA are perceived to have the lowest risk of default. Default means that a company or government is unable to meet interest payments or repay the initial investment amount at the end of a security's life.

UCITS Stands for Undertakings for Collective Investment in Transferable Securities. This is the European regulatory framework for an investment vehicle that can be marketed across the European Union and is designed to enhance the single market in financial assets while maintaining high levels of investor protection.

Unconstrained The term used to describe the mandate of a fund whereby the manager has the freedom to invest according to his or her own strategy, not being obliged to allocate capital according to the weightings of any index, for example.

Underlying value The fundamental value of a company, reflecting both tangible and intangible assets, rather than the current market value.

Underlying yield Refers to the income received by a managed fund, and is usually expressed annually as a percentage based on the fund's current value.

Underweight If a portfolio is 'underweight' a stock, it holds a smaller proportion of that stock than the comparable index or sector.

Unit trust A type of managed fund, whose value is directly linked to the value of the fund's underlying investments.

Unit/share type Type of units/shares held by investors in a trust or fund (unit/share types differ by features such as whether income is to be paid out as cash or reinvested on the payment date).

Unlisted/unquoted stocks Shares of ownership in companies that are not listed on a public exchange, known as private companies.

Valuation The worth of an asset or company based on its current price.

Volatile When the value of a particular share, market or sector swings up and down fairly frequently and/or significantly, it is considered volatile.

Volatility The degree to which a given security, fund, or index rapidly changes. It is calculated as the degree of deviation from the norm for that type of investment over a given time period. The higher the volatility, the riskier the security tends to be.

Warrant A security issued by a company that gives the holder the right to buy shares in that company at a specified price and within a certain timeframe.

Yield This refers to either the interest received from a fixed income security or to the dividends received from a share. It is usually expressed as a percentage based on the investment's costs, its current market value or its face value. Dividends represent a share in the profits of the company and are paid out to a company's shareholders at set times of the year.

Yield (equity) Refers to the dividends received by a holder of company shares and is usually expressed annually as a percentage based on the investment's cost, its current market value or face value. Dividends represent a share in the profits of the company and are paid out to a company's shareholders at set times of the year.

Yield (bonds) This refers to the interest received from a fixed income security and is usually expressed annually as a percentage based on the investment's cost, its current market value or its face value.

Yield (income) Refers to the income received from an investment and is usually expressed annually as a percentage based on the investment's cost, its current market value or face value.
