

FUND FACTSHEET

DNCA EMERGING EUROPE EQUITY FUND

JUNE 2021

FUND HIGHLIGHTS

- Invests primarily in European emerging markets' companies.
- A fundamental and long-term bottom-up approach, integrating exposure to growth and small/mid-caps.
- Conviction drives portfolio construction, which could result in a portfolio that is more concentrated than the comparative index.
- Seeks to identify companies with sustainable long-term growth prospects, demonstrated by distinctive business models and attractive valuations.

10 years	-2.14	-2.54	-1.03
Since inception	6.70	6.51	7.01

PERFORMANCE DATA SHOWN REPRESENTS PAST PERFORMANCE AND IS NOT A GUARANTEE OF FUTURE RESULTS. Some recent performance may be lower or higher. As the value of the capital and the returns change over time (notably due to currency fluctuations), the repurchase price of the shares can be higher or lower than their initial price. The performance indicated is based on the NAV (net asset value) of the share class, and is net of all charges applying to the fund but does not account for sale commissions, taxation or paying agent fees, and assumes that dividends if any are reinvested. Taking such fees or commissions into account would lower the returns. The performance of other share classes would be higher or lower based on the differences between the fees and the entry charges. In the periods where certain share classes are not subscribed or not yet created (inactive share classes), performance is calculated based on the actual performance of an active share class of the fund whose characteristics are considered by the management company as being closest to the inactive share class concerned, after adjusting it for the differences between the total expense ratios (TER), and converting any net asset value of the active share class in the currency in which the inactive share class is listed. The performance given for the inactive share class is the result of a calculation provided for information. Please read the important information given in the additional notes at the end of this document.

MANAGEMENT

Management Company
NATIXIS INVESTMENT MANAGERS S.A
Investment Manager
DNCA FINANCE

DNCA Investments* specializes in a conviction-driven investment approach. The firm's experienced team develops investment products for private and institutional clients. DNCA offers a comprehensive range of funds covering fixed income, absolute return, multi-asset, equity strategies and SRI.

* A brand of DNCA Finance.

Headquarters	Paris
Founded	1998

Assets Under Management (Billion)	US \$ 31.6 / € 26.9 (31/03/2021)
-----------------------------------	----------------------------------

Portfolio Managers

Matthieu Belondrade is an equity Portfolio Manager/Analyst and Team Leader for Emerging Market (EM) equity. He is a member of the investment team for DNCA Global Emerging Equity and co-manages DNCA Emerging Europe Equity. He began his career in 1998 and has more than 20 years' experience (State Street Global Advisors, Crédit Lyonnais, CA Indosuez, CDC IXIS AM, Ostrum AM, DNCA Finance). Matthieu holds a DEA post-graduate degree in Finance from the University Panthéon-Assas (Paris II). He is a Chartered Financial Analyst (CFA) charterholder.

Alexandre Carrier is an equity Portfolio Manager/Analyst dedicated to Emerging Markets (EM). He is an investment team member for DNCA Global Emerging Equity and DNCA Global New World and co-manager of DNCA Emerging Europe Equity. He began his career in 2006 and has over 15 years' experience (Mitsubishi UFJ Trust, Edmond de Rothschild AM, Ostrum AM, DNCA Finance). Alexandre holds a Master's in Finance from the University of Exeter (UK). He is a Chartered Financial Analyst (CFA) charterholder.

Due to active management, portfolio characteristics are subject to change. References to specific securities or industries should not be considered a recommendation.

Calculation of performance during periods of share class inactivity (if applicable)

For periods when certain share classes were unsubscribed or not yet created (the "inactive share classes"), performance is imputed using the actual performance of the fund's active share class which has been determined by the management company as having the closest characteristics to such inactive share class and adjusting it based on the difference in TERs and, where applicable, converting the net asset value of the active share class into the currency of quotation of the inactive share class. The quoted performance for such inactive share class is the result of an indicative calculation.

Illustrative Growth of 10,000

The graph compares the growth of 10,000 in a fund with that of an index. The total returns are not adjusted to reflect sales charges or the effects of taxation, but are adjusted to reflect actual ongoing fund expenses, and assume reinvestment of dividends and capital gains. If adjusted, sales charges would reduce the performance quoted. The index is an unmanaged portfolio of specified securities and cannot be invested in directly. The index does not reflect any initial or ongoing expenses. A fund's portfolio may differ significantly from the securities in the index. The index is chosen by the fund manager.

Risk Measures

The Risk & Reward Profile includes a "synthetic risk and reward indicator" (SRRI), as defined by the European Securities and Markets Authority (ESMA). This risk measure is calculated based on volatility of returns, in other words fluctuations in the net asset value (NAV) of the fund. The indicator is presented on a numerical scale of 1 to 7, where 1 is low and 7 is high.

The risk measures below are calculated for funds with at least a three-year history.

Alpha measures the difference between a fund's actual returns and its expected performance, given its level of risk (as measured by beta). Alpha is often seen as a measure of the value added or subtracted by a portfolio manager.

Beta is a measure of a fund's sensitivity to market movements. A portfolio with a beta greater than 1 is more volatile than the market, and a portfolio with a beta less than 1 is less volatile than the market. R-squared reflects the percentage of a fund's movements that are explained by movements in its benchmark index, showing the degree of correlation between the fund and the benchmark. This figure is also helpful in assessing how likely it is that alpha and beta are statistically significant.

The Sharpe ratio uses standard deviation and excess return to determine reward per unit of risk.

Standard deviation is a statistical measure of the volatility of the fund's returns.

Tracking Error is reported as a standard deviation percentage difference between the performance of the portfolio and the performance of the reference index. The lower the Tracking Error, the more the fund performance resembles to the performance of its reference index.

The Information Ratio is the difference between the fund's average annualized performance and the reference index divided by the standard deviation of the Tracking Error. The information ratio measures the portfolio manager's ability to generate excess returns relative to the reference index.

Morningstar Rating and Category

© 2021 Morningstar. All Rights Reserved. The information, data, analyses and opinions ("Information") contained herein (1) include Morningstar's confidential and proprietary information (2) may not be copied or redistributed, (3) do not constitute investment advice (4) are provided solely for informational purposes (5) are not warranted to be complete, accurate or timely and (6) are drawn from fund data published on various dates. The information is provided to you at your own risk. Morningstar is not responsible for any trading decisions, damages or other losses related to the Information or its use. Please verify all of the Information before using it and don't make any investment decision except upon the advice of a professional financial adviser. Past performance is no guarantee of future results. The value and income derived from investments can go up or down. The Morningstar rating applies to funds having at least 3 years of history. It takes into account subscription fee, the yield without risk and the standard deviation to calculate for every fund its ratio MRAR (Morningstar Risk Adjust Return). Funds are then classified in decreasing order by MRAR: first 10 per cent receive 5 stars, the following 22.5 % 4 stars, the following 35 % 3 stars, following 22.5 % 2 stars, the last 10 % receive 1 star. Funds are classified within 180 European categories.

Reference Index

For indicative purposes only, the Fund's performance may be compared to the Reference Index. The Fund is unconstrained by the index and may therefore significantly deviate from it.

Asset allocation

Cash offset for Derivatives represents the amount of cash the portfolio manager should borrow if he's Long exposed via derivatives and vice versa. The weighting of the portfolio in various asset classes, including "Other," is shown in this table. "Other" includes security types that are not neatly classified in the other asset classes, such as convertible bonds and preferred stocks. In the table, allocation to the classes is shown for long positions, short positions, and net (long positions net of short) positions. These statistics summarize what the managers are buying and how they are positioning the portfolio. When short positions are captured in these portfolio statistics, investors get a more robust description of the funds' exposure and risk.

Fund Charges

The ongoing charges figure is based on expenses for the year ending December 2020. It excludes the portfolio transaction costs, except in the case of an entry/exit charge paid by the SICAV when buying or selling units in another collective investment undertaking. CDSC (if applicable): Investors in class C Shares who redeem some or all of their Shares within one year from the date of their subscription may however be levied a contingent deferred sales charge ("CDSC") that will be retained by the financial institution through which the subscription of Shares was made by deduction from the redemption proceeds paid to the relevant investor. Investors in class CW Shares who redeem some or all of their Shares within the first 3 years from the date of their subscription may however be subject to a contingent deferred sales charge ("CDSC") that will be retained by the financial institution through which the subscription of Shares was made by deducting such charge from the redemption proceeds paid to the relevant investor.

Equity Portfolio Statistics (if applicable)

The referenced data elements below are a weighted average of the long equity holdings in the portfolio. The Price/Earnings ratio is a weighted average of the price/earnings ratios of the stocks in the underlying fund's portfolio. The P/E ratio of a stock is calculated by dividing the current price of the stock by its trailing 12-months' earnings per share. The Price/Cash Flow ratio is a weighted average of the price/cash-flow ratios of the stocks in a fund's portfolio. Price/cashflow shows the ability of a business to generate cash and acts as a gauge of liquidity and solvency. The Price/Book ratio is a weighted average of the price/book ratios of all the stocks in the underlying fund's portfolio. The P/B ratio of a company is calculated by dividing the market price of its stock by the company's per-share book value. Stocks with negative book values are excluded from this calculation. Dividend Yield is the rate of return on an investment expressed as a percent. Yield is calculated by dividing the amount you receive annually in dividends or interest by the amount you spent to buy the investment.

Fixed-Income Portfolio Statistics (if applicable)

The referenced data elements below are a weighted average of the long fixed income holdings in the portfolio. Duration measures the sensitivity of a fixed income security's price to changes in interest rates. Average maturity is a weighted average of all the maturities of the bonds in a portfolio, computed by weighting each maturity date by the market value of the security. Modified Duration is inversely related to percentage change in price on an average for a specific change in yield. The average coupon corresponds to the individual coupon of each bond in the portfolio, weighted by the nominal amount of these very same securities. The average coupon is calculated only on fixed rate bonds. The Yield to maturity (YTM) reflects the total return of a bond, if the bond is held until maturity, considering all the payments are reinvested at the same rate. This indicator can be calculated at the portfolio level, by weighting the individual YTM by the market value of each bond.

Special Risk Considerations

Emerging markets risk: Funds investing in emerging markets may be significantly affected by adverse political, economic or regulatory developments. Investing in emerging markets may not provide the same degree of investor protection or information to investors as would generally apply in major securities markets. In addition, exchanges in emerging markets may be very fluctuating. Finally, funds may not be able to sell securities quickly and easily in emerging markets.

Geographic concentration risk: Funds that concentrate investments in certain geographic regions may suffer losses, particularly when the economies of those regions experience difficulties or when investing in those regions become less attractive. Moreover, the markets in which the funds' invest may be significantly affected by adverse political, economic or regulatory developments.

Portfolio Concentration risk: Funds investing in a limited number of securities may increase the fluctuation of such funds' investment performance. If such securities perform poorly, the fund could incur greater losses than if it had invested in a larger number of securities.

Smaller Capitalization risk: Funds investing in companies with small capitalizations may be particularly sensitive to wider price fluctuations, certain market movements and less able to sell securities quickly and easily. Please refer to the full prospectus, for additional details on risks.

Sustainability risk: The Fund is subject to sustainability risks as defined in the Regulation 2019/2088 (article 2(22)) by environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment. More information on the framework related to the incorporation of sustainability risks can be found on the website of the Management Company and the Delegated Investment Manager. Please refer to the full prospectus, for additional details on risks

The fund is a sub-fund of Natixis International Funds (Lux) I which is organized as an investment company with variable capital under the laws of the Grand Duchy of Luxembourg and is authorized by the financial regulator (the CSSF) as a UCITS - 2-8 avenue Charles de Gaulle, L1653 Luxembourg - RCS Luxembourg B 53023.

Natixis Investment Managers S.A., a Luxembourg management company authorized by the CSSF, is a Société anonyme with capital of 14 000 000 euros - 2, rue Jean Monnet L-2180 Luxembourg - RCS Luxembourg B 115843.

DNCA Finance, a subsidiary of Natixis Investment Managers, is a French asset manager approved by the Autorité des Marchés Financiers (No. GP 00-030).

Distribution of this document may be restricted in certain countries. The fund is not authorized for sale in all jurisdictions and its offering and sale may be limited by the local regulator to certain types of investors. Natixis Investment Managers S.A. or its affiliates may receive or pay fees or rebates in relation to the fund. The tax treatment relating to the holding, acquisition or disposal of shares or units in the fund depend on each investor's tax status or treatment and may be subject to change. Please ask your financial advisor if you have any questions. It is the responsibility of your financial advisor to ensure that the offering and sale of fund shares complies with the relevant national law.

The fund may not be offered or sold in the USA, to citizens or residents of the USA, or in any other country or jurisdiction where it would be unlawful to offer or sell the fund.

This material is distributed for information purposes only. Additional Notes

The Fund has been recognized under the Securities and Futures Act, Chapter 289 of Singapore, and Natixis Investment Managers Singapore Limited is appointed as its Singapore Representative and agent for service of process. Past performance of the Fund or managers, and any economic and market trends or forecast, are not necessarily indicative of the future or likely performance of the Fund or the manager. The value of investments and the income accruing, if any, may go up or down and investors may lose the full amount invested. Investors investing in funds denominated in non-local currency should be aware of the risk of exchange fluctuations that may cause a loss of principal. Investments in the Fund involve risk, which are fully described in the prospectus. The Fund may use derivatives for hedging and/or investment purposes. The net asset value of the Fund may be subject to volatility as a result of its investment policy and/or use of financial derivative instruments. Investors should consider the Fund's investment objective, risks, charges, expenses and read the prospectus and Product Highlights Sheet carefully and discuss with their financial adviser to determine if the investment is appropriate for them before investing. However if an investor chooses not to seek advice from a financial adviser, he/she should consider whether the product is suitable for him/her. The Prospectus is available for collection from Natixis Investment Managers Singapore Limited at 5 Shenton Way, #22-05 UIC Building, Singapore 068808 or any appointed Singapore distributor. This document is provided by Natixis Investment Managers Singapore Limited (company registration no. 199801044D).

This document is published for information and general circulation only and it does not constitute an offer to anyone or a solicitation by anyone to subscribe for shares of the Fund as it does not have any regard to the specific investment objectives, financial situation and the particular needs of any specific person who may receive this document. Nothing in the document should be construed as advice or a recommendation to buy or sell shares. This advertisement has not been reviewed by the Monetary Authority of Singapore.
