What is this Product?

The Fund is a sub fund of Brooks Macdonald International Multi Strategy Fund Limited, a non UCITS open ended investment company. There is no fixed term or maturity date. It is classified as a fund of funds which is a fund that invests in a number of other funds. Fund launch date: 14/09/2004.

Objective and Policy

The objective is to seek to provide a modest return achieved through investment in a range of funds which invest in various asset classes.

The policy is to invest in collective investment funds and multimanager funds managed by a range of fund managers including, but not limited to, Brooks Macdonald International Fund Managers Limited and other subsidiaries of Brooks Macdonald Group plc ("Brooks Macdonald Group" or "Group"). These funds, in turn, invest in a number of asset classes. These could include, but are not limited to bonds, equities, properties and cash.

This Fund may be suitable for you if you are willing to risk a loss to your capital and are looking for a medium to long term investment. The Fund can be terminated without the agreement of shareholders, if the value of the Fund is less than £5,000,000 or currency equivalent for a period of four consecutive weeks. Shareholders will be given at least three weeks' written notice of any such action.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk and volatility of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or the type of underlying assets in which the Fund invests.

The risk indicator assumes you keep the product for a minimum of five years.

The actual risk can vary significantly if you sell your shares at an early stage and you may get back less.

We have classified this product as 3, which is a medium low risk class. This rates the potential losses from future performance at a medium low level, and poor market conditions are unlikely to impact the amount you could get back.

The base currency of the Fund is sterling. It can invest in securities denominated in currencies other than sterling so can be affected by currency fluctuations which may affect the return. The return from investing in a fund denominated in a currency other than the currency of your residence or domicile may be affected by currency fluctuations. Dividends, which will be automatically reinvested in shares of the Fund, are not guaranteed and the amount you receive may fluctuate.

The value of investments and the income from them can go down as well as up and cannot be guaranteed. This product does not include any protection from future market performance so you could lose some or all of your investment. Past performance is not an indicator of future performance.

Additional risk information is included in the Risk Warnings section of the prospectus.

What are the risks and what could I get in return? (continued)

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest £10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past and are not an exact indicator. What you get will depend on how the market performs and for how long you keep the investment. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

Investment £10,000				
Scenarios		1 year	3 years	5 years (Recommended holding period)
Stress scenario	What you might get back after costs	£5,833	£7,739	£7,205
	Average return each year	-41.67%	-8.19%	-6.35%
Unfavourable scenario	What you might get back after costs	£9,086	£8,623	£8,328
	Average return each year	-9.14%	-4.82%	-3.59%
Moderate scenario	What you might get back after costs	£9,833	£9,874	£9,916
	Average return each year	-1.67%	-0.42%	-0.17%
Favourable scenario	What you might get back after costs	£10,598	£11,263	£11,760
	Average return each year	5.98%	4.04%	3.30%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Brooks Macdonald International Fund Managers Limited is unable to pay out?

In the event of the default of the manager or custodian of the Fund, limited protection is provided under the Collective Investment Funds (Recognized Funds) (Compensation for Investors) (Jersey) Regulations, 1988. The maximum compensation payable to any one investor is £48,000 and is dependent upon the size of the investment. The total amount of compensation in any one year is limited to £5,000,000. Please refer to the prospectus for further information.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. The figures assume you invest £10,000. The figures are estimates and may change in the future. The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment £10,000			
Scenarios	If you cash in after 1 year	If you cash in after 3 years	If you cash in at 5 years
Total costs	£387	£751	£1,103
