

HSBC ETFs PLC

HSBC JAPAN SUSTAINABLE EQUITY UCITS ETF

Monthly report 31 March 2024 | HSJD SW | USD

Investment objective

The Fund aims to track as closely as possible the returns of the FTSE Japan ESG Low Carbon Select Index (the Index). The Fund will invest in or gain exposure to shares of companies which make up the Index. The Fund qualifies under Article 8 of SFDR.

Investment strategy

The Index seeks to achieve a reduction in carbon emissions and fossil fuel reserves exposure, and an improvement of the FTSE Russell ESG rating.

The Index seeks to achieve a reduction in carbon emissions and fossil fuel reserves exposure, and an improvement of the FTSE Russell ESG rating against that of the Parent Index. It excludes shares of companies with exposure to: tobacco, thermal coal extraction, electricity generation, gambling, adult entertainment and controversial weapons. The Index also applies, among others, the United Nations Global Compact exclusionary criteria.

The Fund will be passively managed and will aim to invest in the shares of the companies in generally the same proportion as in the Index.

The Fund may invest up to 35% in securities from a single issuer during exceptional market conditions.

The Fund may invest up to 10% in funds and up to 10% in total return swaps and contracts for difference.

See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
