## What is this product?

Threadneedle (Lux) – Global Emerging Market Equities (the “Portfolio”) is a portfolio of Threadneedle (Lux), an investment company (i.e. a mutual fund) with variable capital constituted in Luxembourg. The home regulator of Threadneedle (Lux) is the Commission de Surveillance du Secteur Financier in Luxembourg.

## Objective and Investment Strategy

The Portfolio seeks to achieve long-term capital appreciation by investing at least two-thirds of its assets in the equity securities of companies domiciled in or with significant activities are in emerging market countries. The Portfolio may also invest up to one-third of its assets in other securities (including fixed income securities, other equities and money market instruments).

The Portfolio may invest up to 30% of its net asset value in China A-Shares through the Shanghai-Hong Kong stock connect and Shenzhen-Hong Kong stock connect.

The Portfolio will use financial derivative instruments for investment, hedging or efficient portfolio management purposes.

## Use of derivatives/investment in derivatives

The Portfolio’s net derivative exposure may be up to 50% of the Portfolio’s net asset value.

### What are the key risks?

**Investment involves risks. Please refer to the offering document for details including the risk factors.**

#### **Investment**

There is no guarantee that the investment objective of the Portfolio can be achieved. The value of investments held by the Portfolio can fall as well as rise and investors might not get back the sum originally invested, especially if investments are not held for the long term.

#### **Volatility**

The prices of the Portfolio's investments may rise and fall sharply in the short-term and this may result in a higher volatility of the Portfolio's value.

#### **Concentration**

Short-term price volatility is likely to be particularly evident in the Portfolio as it invests in a concentrated portfolio of equity securities.

#### **Equity Securities**

The value of equity securities held by the Portfolio may be affected by various factors. A fall in their value will affect the price of the Portfolio.

#### **Political and Financial**

The Portfolio invests in markets where economic and regulatory risk can be significant. These factors can affect liquidity, settlement and asset values. Any such event can have a negative effect on the value of your investment.

#### **Geographical Concentration**

The Portfolio's investments are concentrated in emerging markets. This may result in higher volatility than funds which comprise broad-based global investments.

#### **Risks associated with Shanghai-Hong Kong stock connect and Shenzhen-Hong Kong stock connect ("Stock Connects"):**

The Portfolio may invest and have direct access to certain eligible China A-Shares via Stock Connects. The relevant rules and regulations on Stock Connects are subject to change which may have potential retrospective effect.

Stock Connects are subject to quota limitations. Where a suspension in the trading through Stock Connects is effected, the Portfolio's ability to invest in China A-Shares or access the PRC market will be adversely affected. In such event, the Portfolio's ability to achieve its investment objective could be negatively affected.

#### **Risks associated with the Small and Medium Enterprise Board and/or ChiNext of the Shenzhen Stock Exchange ("SZSE"):**

The Portfolio may have exposure to stocks listed on Small and Medium Enterprise Board ("SME Board") and/or ChiNext of the SZSE and may be subject to the following risks:

Higher fluctuation on stock prices – Listed companies on the SME Board and/or ChiNext are usually of emerging nature with smaller operating scale. Hence, they are subject to higher fluctuation in stock prices and liquidity and have higher risks and turnover ratios than companies listed on the Main Board of the SZSE ("**Main Board**").

Over-valuation risk – Stocks listed on SME Board and/or ChiNext may be overvalued and such exceptionally high valuation may not be sustainable. Stock price may be more susceptible to manipulation due to fewer circulating shares.

Differences in regulation – The rules and regulations regarding companies listed on ChiNext are less stringent in terms of profitability and share capital than those in the Main Board and SME Board.

Delisting risk – It may be more common and faster for companies listed on the SME Board and/or ChiNext to delist. This may have an adverse impact on the Portfolio if the companies that it invests in are delisted.

Investments in the SME Board and/or ChiNext may result in significant losses for the Portfolio and its investors.

#### **Currency**

Where investments are made in assets that are denominated in multiple currencies, changes in exchange rates may affect the value of the investments.

#### **Investor Currency**

Where investments in the Portfolio are in currencies other than your own, changes in exchange rates may affect the value of your investments.

#### **Hedge/Basis**

The use of financial derivative instruments for hedging and/or efficient portfolio management purposes may become ineffective in adverse situations or if the Management Company or the Sub-Advisor employs a strategy that does not correlate well with the Portfolio's investments. This may result in a significant loss to the Portfolio.

## How has the Portfolio performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
  - The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
  - These figures show by how much the share class increased or decreased in value during the calendar year being shown. Performance data has been calculated in US\$ including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
  - Portfolio launch date: 2 April 2002.
  - Share Class AU launch date: 2 April 2002.
  - The Management Company views Share Class AU, being the retail share class denominated in the Portfolio's base currency, as the most appropriate representative share class.
- Δ The performance of these years were achieved under circumstances that no longer apply. Before 23 September 2009, the Portfolio had a different Sub-Advisor and investment objective and policy. The Portfolio also changed its investment policy on 1 August 2018.

## Is there any guarantee?

This Portfolio does not have any guarantees. You may not get back the full amount of money you invest.

## What are the fees and charges?

### Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Portfolio.

<b>Performance fee</b>	Not applicable
<b>Administration fee</b>	Included in Operating Expenses below
<b>Operating Expenses</b>	Share Classes AEH, and AU: 0.30% of the class's value Share Classes DEH and DU: 0.30% of the class's value Share Classes 1E and 1U: 0.21% of the class's value

### Other fees

You may have to pay other fees when dealing in the shares of the Portfolio.

## Threadneedle (Lux) – Global Emerging Market Equities

### Additional Information

- You generally buy and redeem shares at the Portfolio's next-determined net asset value after the Registrar and Transfer Agent receives your request in good order on or before 3.00 p.m. (Luxembourg time) on each valuation day being the dealing cut-off time. The Hong Kong Representative/your distributor may impose different deadlines for receiving requests from investors. Please check with your distributor regarding its internal dealing cut-off time.
- The net asset value of this Portfolio is calculated on each Luxembourg "business day" and the price of shares is published daily on the website [www.columbiathreadneedle.com](http://www.columbiathreadneedle.com)<sup>1</sup>.
- You may obtain the past performance information of other share classes offered to Hong Kong investors from [www.columbiathreadneedle.com](http://www.columbiathreadneedle.com)<sup>1</sup>.
