## What is this product?

### Type:

This product is a UCITS Fund.

### Objectives:

The Fund aims to increase the value of your shares over the long-term through investment in businesses that are connected with emerging (less developed) market countries and economies.

The Fund invests in a mixture of companies of different sizes, from different industries and does not focus on any specific country.

Investment selection is the result of fundamental research and analysis in an effort to identify companies that are believed to be undervalued, have strong corporate governance, are well managed and are financially strong. The investments are mainly in publicly traded shares or related instruments.

Investments may be sold when they reach a target price, when the company's business fails to perform or when other opportunities are more attractive. The Fund may not invest greater than 20% of its Net Asset Value ("NAV") in non-emerging market countries securities. The Fund may invest up to 10% of its NAV in China A-shares or in China B shares.

China A-shares: Shares in mainland China-based companies that trade on Chinese stock exchanges such as the Shanghai Stock Exchange and the Shenzhen Stock Exchange quoted in Chinese renminbi. A-shares are generally available for purchase by mainland citizens in China; foreign investment in A-shares is subject to significant regulatory restrictions.

China B-shares: Shares in mainland China-based companies that trade on Chinese stock exchanges such as the Shanghai Stock Exchange and the Shenzhen Stock Exchange quoted in a foreign currency such as US dollar. B-shares are more widely available for purchase by foreign investors.

The Fund promotes environmental and social characteristics pursuant to Article 8 of the SFDR.

As your shares are in South African Rand and the Fund is in US Dollars, currency exchange contracts are used to reduce the effect of changes in the currency exchange rate.

Income will be rolled up into the value of your investment.

### Term:

The Fund has no fixed maturity date, however it may be terminated in certain circumstances as described in the prospectus including if the Net Asset Value of the Fund does not exceed or falls below US\$75,000,000 (or such other amount as may be approved by the Directors).

The shares may be exchanged for shares in another sub-fund in accordance with the terms of the Prospectus. Charges may apply.

Shares in the Fund can be bought or sold on any day defined as a Business Day in Prospectus.

NBIF is established as umbrella fund with segregated liability between sub-funds under Irish law.

Brown Brothers Harriman Trustee Services (Ireland) Limited (BBH) is appointed as the depositary of NBIF.

You can obtain copies of the Prospectus and the latest reports and accounts for NBIF free of charge in English, German, French, Italian and Spanish, along with the latest published prices of shares and other information on the Fund, free of charge from BBH (the "Administrator"), 30 Herbert Street, Dublin 2, Ireland.

### Intended retail investor:

This fund may be compatible with the needs of investors seeking a fund to deliver capital growth with an investment horizon of 3 years or more, as part of a diversified portfolio of investments. This is a medium to high risk product and investors should consider this when deciding the mix of portfolio investments. Investors who are unsure that they have the knowledge and experience to make informed investment decisions about this product or to construct a diversified portfolio should seek professional investment advice. The product is unlikely to be compatible with the needs of those investors seeking a single investment, or who require preservation of capital or to achieve a specified return by a particular date.

## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the ability for you to receive a positive return on your investment.

This product also carries market risk, operational risk, counterparty risk, currency risk, and other risks. Please refer to the "Risk Factor" section of the Prospectus. This product does not include any protection from future market performance so you could lose some or all of your investment.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

## Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of NBIF plc over the last 4 years.

The stress scenario shows what you might get back in extreme market circumstances.

<sup>3</sup> This type of scenario occurred for an investment between December 2016 and December 2020.

## What happens if NBAMIL is unable to pay out?

Investors may face financial losses as a result of the default of the Fund, NBIF, NBAMIL or any of the service providers appointed to the Fund, including the sub-investment managers (or their affiliates), the Administrator, the Depositary, or a trading counterparty. Any such losses are not covered by any investor compensation or guarantee scheme.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario and the investment is ZAR 10,000.

Investment: ZAR 10,000	If you exit after 1 year	If you exit after 4 years
<b>Total costs</b>	766 ZAR	1,918 ZAR
<b>Annual cost impact (*)</b>	7.7%	4.2%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.7% before costs and 6.5% after costs.

## Composition of costs
