## **What is this product?**

Emerging Markets Local Currency Bond Fund (the “Fund”) is a sub-fund of BlackRock Global Funds (“BGF”), an open-ended investment company incorporated in Luxembourg. Its home regulator is the Commission de Surveillance du Secteur Financier (CSSF).

## **Objectives and Investment Strategy**

To maximise total return by investing at least 70% of the Fund’s total assets in local currency-denominated bonds (including non-investment grade\*) issued by governments/authorities of, and companies based in, or with the majority of their business in, emerging markets such as Brazil, South Africa and South Korea.

The Fund may invest up to 20% of its net asset value in debt securities issued by and/or guaranteed by governments in each of Brazil, Hungary, Indonesia, Russia, Republic of South Africa and Turkey, which are currently rated non-investment grade\*. Such investments are based on (i) reference to the weighting that the relevant country’s bond market represents of the emerging market bond universe within the Fund’s benchmark, the JP Morgan GBI-EM Global Diversified Index (although this Fund is not an index-tracking fund, the Investment Adviser will take into account the constituent weighting of the benchmark when making investment decisions); and/or (ii) the professional judgment of the Investment Adviser, whose reasons for investment may include a favourable/positive outlook on the relevant sovereign issuer, potential for ratings upgrade and the expected changes in the value of such investments due to ratings changes. Currently, the government bond markets of Brazil, Hungary, Indonesia, Russia, Republic of South Africa and Turkey each account for a significant weight within this index.

Due to market movements, as well as credit/investment rating changes, the exposure may change over time. The above countries are for reference only and may change without prior notice to the investors.

Subject to applicable regulatory restrictions and internal guidelines, the remaining 30% may be invested in financial instruments of companies or issuers of any size in any sector of the economy globally such as debt and other securities consistent with the Fund’s objective, subject to the restriction that no more than 10% of the Fund’s assets will be invested in equities.

The Fund’s expected total maximum investment in debt instruments with loss-absorption features, including but not limited to contingent convertible bonds, will be less than 30% of its net asset value. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s). The Fund’s exposure to contingent convertible bonds is limited to 5% of its total assets.

The Fund may use derivatives for hedging, efficient portfolio management and investment purposes. The Fund may employ currency management and hedging techniques which may include hedging the currency exposure on the Fund’s portfolio and/or using more active currency management techniques such as currency overlays. Any active management techniques implemented by the Fund through the currency derivatives such as forward exchange contracts, currency futures and options may not be correlated with the primary underlying securities held by the Fund.

The proportion of the Fund’s net asset value that is expected to be subject to securities lending transactions from time to time ranges from 0% to 40% and will be consistent with the overall investment policy of the Fund.

## **Use of Derivatives/Investment in Derivatives**

The Fund’s net derivative exposure may be more than 100% of the Fund’s net asset value.

---

\* Debt securities which are unrated or rated, at the time of purchase, BB+ (Standard & Poor’s or equivalent rating) or lower by at least one recognised rating agency or, in the opinion of the Management Company, and, where applicable, based on the internal credit quality assessment procedure of the Management Company, are of comparable quality.

## What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

### 1. Investment Risks

The Fund is an investment fund. The Fund's investment portfolio may fall in value due to any of the risk factors below and therefore your investment in the Fund may suffer losses.

### 2. Credit Risks

The Fund may be exposed to the credit/default risk of bonds that it invests in. In the event of bankruptcy or default of an issuer, the Fund may experience losses and incur costs.

The actual or perceived downgrading of a rated debt security or its issuers could decrease its value and liquidity, and may have an adverse impact on the Fund, however, the Fund may continue to hold it to avoid a distressed sale.

### 3. Emerging Market Risks

Investment in emerging markets may be subject to a higher than average volatility than more developed markets due to greater political, tax, economic, social, and foreign exchange risks.

The size and trading volume of securities markets in emerging markets may be substantially smaller than developed markets. This may subject the Fund to higher liquidity and volatility risks.

Custody and registration of assets in emerging markets may be less reliable than in developed markets, which may subject the Fund to higher settlement risk.

The Fund may be subject to higher regulatory risks due to low level of regulation, enforcement of regulations and monitoring of investors' activities in emerging markets.

### 4. Non-Investment Grade / Unrated Bonds Risks

Investment in non-investment grade or unrated bonds, including sovereign debts, may subject the Fund to higher credit/default risks. If the issuer of the non-investment grade or unrated bonds defaults, or if the non-investment grade or unrated bonds fall in value, investors may suffer significant losses.

Non-investment grade or unrated bonds tend to be less liquid and more volatile, and the market for these bonds is generally less liquid and more volatile, than higher rated fixed-income securities. Adverse events or market conditions may have a larger negative impact on the prices of non-investment grade or unrated bonds than on higher rated fixed-income securities. Such securities are also subject to a greater risk of loss of principal and interest than higher rated fixed-income securities.

### 5. Sovereign Debt Risks

Investment in bonds issued or guaranteed by governments or authorities may involve political, economic, default, or other risks, which may in turn have an adverse impact on the Fund. Due to these factors, the sovereign issuers may not be able or willing to repay the principal and/or interest when due.

Holders of defaulting sovereign debt may be requested to participate in the restructuring of such debt. In addition, there may be limited legal recourses available against the sovereign issuer in case of failure of or delay in repayment.

The Fund may have exposure to Eurozone sovereign debts. In light of the fiscal conditions of certain European countries, the Fund may be subject to a number of increased risks arising from a potential crisis in the Eurozone (such as volatility, liquidity, price and currency risks). The performance of the Fund could deteriorate should there be any adverse events in the Eurozone (e.g. downgrade of sovereign credit ratings, default of one or more European countries, or even break-up of the Eurozone).

The Fund may have greater exposure (up to 20% per country) of its assets in debt securities issued by and/or guaranteed by non-investment grade countries i.e. Brazil, Hungary, Indonesia, Russia, Republic of South Africa and Turkey, which may result in higher credit/default risk and concentration risk.

**6. Currency Risks**

The Fund may invest in assets denominated in a currency other than the base currency of the Fund. Changes in exchange rates between such currency and the base currency and changes in exchange rate controls may adversely affect the value of the Fund's assets.

The Investment Adviser may utilise techniques and instruments (e.g. currency overlays) in relation to currencies other than the base currency with the aim of generating positive returns. Any active currency management techniques implemented by the Fund may not be correlated with the underlying securities held by the Fund. As a result, the Fund may suffer significant losses even if there is no loss to the value of the underlying securities held by the Fund.

**7. Derivatives Risks**

Risks associated with derivatives include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and market risk. The leverage effect of derivatives can result in a loss significantly greater than the amount invested and extensive exposure to derivatives may lead to a significant loss by the Fund.

The Fund may have a net derivative exposure of more than 100% of its net asset value. This may magnify any potential impact of any negative change in the value of the underlying assets on the Fund and may also increase the volatility of the Fund's price and may lead to significant losses.

Certain derivatives such as derivatives on currencies not included in the benchmark may be uncorrelated with the underlying securities held by the Fund. In this regard the Fund may suffer significant losses notwithstanding that there may be no loss in respect of the underlying securities positions (predominantly fixed income securities) held by the Fund.

**8. Foreign Investments Restrictions Risks**

Some countries and currencies (such as Renminbi, which is subject to foreign exchange restrictions,) prohibit or restrict investment, or the repatriation of income, capital or the proceeds from sale of securities. The Fund may incur higher costs investing in these countries or currencies. Such restrictions may delay the investment or repatriation of capital of the Fund.

**9. Interest Rate Risks**

An increase in interest rates may adversely affect the value of the bonds held by the Fund.

**10. Liquidity Risks**

The size and trading volume of securities in the markets relevant to the Fund may be substantially smaller than developed markets. This may lead to investments in such securities becoming less liquid, making it difficult to dispose of them which may reduce the Fund's returns/lead to losses for investors.

**11. Capital Growth Risks***Risks associated with Fees and/or Dividends Paid Out of Capital*

Any distributions involving payment of dividends out of capital (Classes 6 and 8), payment of dividends out of gross income (i.e. payment of fees and expenses out of capital) (Classes 6 and 8) or payment of implied interest rate differentials arising from share class currency hedging as dividends (Class 8) amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Whilst all dividends paid result in an immediate reduction of the net asset value per share, these share classes may pay larger dividends (i.e. by paying dividends out of capital, gross income or interest rate differentials arising from share class currency hedging gains (if any)), which may therefore result in a larger reduction in the net asset value per share.

*Payment of Dividends From Implied Interest Rate Differentials*

For Distributing (R) Shares (Class 8), any dividends payable may include interest rate differentials arising from share class currency hedging gains/losses which may increase/decrease dividends paid. Shareholders of such Distributing (R) Shares will forego capital gains as any currency hedging gains are distributed rather than added to capital. Conversely, currency hedging losses may decrease the dividends paid, and in extreme cases may deduct from capital.

**12. Securities Lending Risks**

When engaging in securities lending, the Fund will have a credit risk exposure to the counterparties to any securities lending contract. Fund investments can be lent to counterparties over a period of time. A default by the counterparty combined with a fall in the value of the collateral below that of the value of the securities lent may result in a reduction in the value of the Fund.

**13. Contingent Convertible Bonds Risks**

A contingent convertible bond may be converted into the issuer's equity or be partly or wholly written off (a "write-down") if a pre-specified trigger event occurs. Trigger levels differ and the exposure to conversion risk depends on the distance of the capital ratio to the trigger level. In case of conversion into equity, the Fund might be forced to sell these new equity shares. Such a forced sale might have an effect on market liquidity as there may not be sufficient demand for these shares. In the event of a write-down, which may be either temporary or permanent, the Fund may suffer a full, partial or staggered loss of the value of its investment. It might be difficult for the Fund to anticipate the trigger events or how the securities will behave upon conversion.

Investment in contingent convertible bonds may suffer a loss of capital. Further, contingent convertible bonds are usually subordinated to comparable non-convertible securities, and thus are subject to higher risks than other debt securities. Coupon payments on certain contingent convertible bonds may be entirely discretionary and may be cancelled by the issuer, in which event the Fund may experience losses. Investment in contingent convertible bonds may also lead to increased industry concentration risk and thus counterparty risk as such securities are issued by a limited number of banks.

## How has the fund performed?

Historic performance to 31 December 2019

||| During this period the performance of the Fund was achieved under circumstances that no longer apply. The Fund changed its investment policy in March 2013 and in December 2019, the Fund updated its use of derivatives which may allow for a more extensive and flexible use of derivatives by the Fund.

### Notes:

Past performance information is not indicative of future performance. You may not get back the full amount invested. The computation of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested expressed as a % change. These figures show by how much the share class increased or decreased in value during the calendar year shown. Performance data has been calculated in USD, including ongoing charges and taxes and excluding subscription and redemption fees, if applicable. The past performance information reflects the performance of the A2 base currency share class which the Investment Adviser views as the most appropriate representative share class. Please refer to the website [www.blackrock.com/hk](http://www.blackrock.com/hk) for performance information regarding other share classes. This website has not been reviewed by the SFC.

† The benchmark of the Fund is JP Morgan GBI-EM Global Diversified Index.

\* The benchmark changed on 21 March 2013 as the current benchmark is considered more representative of the Fund's investment strategy.

Fund launch date: 1997

Share class launch date: 2007

## Is there any guarantee?

This Fund does not have any guarantees. You may not get back the full amount of money you invest.

## What are the fees and charges?

### Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Fund:

Fee	What you pay
<b>Subscription Fee (Initial Charge)</b>	Class A and Class D Shares: up to 5% of the price of shares Class C Shares: Nil
<b>Switching Fee (Conversion Charge)</b>	Nil <sup>^</sup> , except a delayed Initial Charge of up to 5% of the price of Class A or Class D Shares may be payable upon switching newly acquired Shares in a Reserve Fund into this Fund
<b>Redemption Fee</b>	Nil <sup>^</sup>
<b>Contingent Deferred Sales Charge</b>	Class A and Class D Shares: Nil Class C Shares: 1% of the lower of the original investment amount or redemption proceeds if the Shares are held for less than one year

<sup>^</sup> A 2% charge on redemptions/conversions may be levied where excessive trading by a shareholder is suspected.

### Ongoing fees payable by the Fund

The following expenses paid by the Fund affect you because they reduce the return on your investments:

Fee	Annual rate
<b>Management Fee</b>	1.00% of the net asset value of the relevant Class A and Class C Shares respectively* 0.50% of the net asset value of the relevant Class D Shares*
<b>Depository Fees<sup>#</sup></b>	Safekeeping fees: 0.0024% to 0.45% of the value of the securities Transactional fees: US\$5.5 to US\$124 per transaction
<b>Performance Fee</b>	Nil
<b>Administration Fee</b>	Up to 0.25% of the net asset value of the relevant share class*
<b>Distribution Fee</b>	Class A and Class D Shares: Nil      Class C Shares: 1.25% of the net asset value of the relevant share class

\* May be increased to a combined 2.25% maximum upon giving three months' prior notice to shareholders

<sup>#</sup> Subject to change without prior notice

### Other fees

You may have to pay other fees and charges when dealing in the shares of the Fund.

## Additional Information

- ▶ You generally buy and redeem shares at the Fund's next-determined price as long as the Hong Kong Representative receives your request in good order before the 6:00p.m. cut-off (HK time). Please check whether your distributor has an internal cut-off time which is earlier than this.
- ▶ The net asset value of the Fund is calculated daily. Prices of shares are published each business day on [www.blackrock.com/hk](http://www.blackrock.com/hk). This website has not been reviewed by the SFC.
- ▶ The updated list of currently available shares is available from the Hong Kong Representative.
- ▶ The composition of the latest dividends (i.e. relative amounts paid from (i) net distributable income and (ii) capital) for the last 12 months are available from the Hong Kong Representative upon request and on [www.blackrock.com/hk](http://www.blackrock.com/hk). This website has not been reviewed by the SFC.
