### WHAT ARE THE RISKS & WHAT COULD I GET IN RETURN?

#### Risk indicator

**The risk indicator assumes you keep the product for 5 year(s). This product has no maturity date.**

We have classified this product as 4 out of 7, which is a medium risk class. The actual risk can vary considerably if you redeem your investment earlier. Be aware of currency risk. If your currency is different from the currency of the fund, the final return you will get depend on the exchange rate between the two

currencies. This risk is not considered in the indicator shown above. The Fund's return risk and capital risk are typical of equity markets. Return risk and capital risk mean that the investor may lose the capital that they have invested as well as the returns in part or in full.

The risk-reward profile and risk category of the fund are subject to change. Not even the lowest risk category mean that the investment is completely risk-free. This product does not include any protection against future market developments, therefore you may lose some or all of your investment.

## WHAT HAPPENS IF MANDATUM FUND MANAGEMENT S.A. IS UNABLE TO PAY OUT?

The assets of the investment fund are kept in its depositary. The insolvency of the fund company does not affect the fund's assets kept by the depositary, but in the event of insolvency of the depositary or the entity acting on its behalf, the fund may suffer a financial loss. This loss is not covered by any investor compensation or guarantee system. However, the risk is reduced to some extent by the fact that the depositary is legally required to keep its own assets separate from the investment fund's assets. The depositary is also, with certain limitations, responsible for the losses incurred by the fund and the unit owners, which are caused by the depositary's negligence, fraud or willful neglect of duties.

## WHAT ARE THE COSTS?

The tables show the amounts that are used to cover different types of costs. These amounts depend on the amount of the investment and the duration of the investment period. The amounts presented here are estimates based on the investment amount and different possible investment periods. The assumption is that in the first year the investor would get back the amount they invested (0% annual return). With regard to other investment periods, the assumption is that the investor will receive a return on the product in accordance with a reasonable outlook. Investment 10,000 euros per year.

**Table I: Costs over time**
