## What is this product?

### Type

This product is a share of an investment company qualifying as an undertaking for collective investment in transferable securities (UCITS).

### Term

This sub-fund has no maturity date. However, the board of directors may decide to close the sub-fund under certain circumstances.

### Objectives

The investment objective of the sub-fund is to achieve a combination of interest income and capital appreciation by investing, directly or indirectly, in debt securities and money market securities issued predominantly by entities that are domiciled, or which exercise a significant part of their activity, in the Nordics (Sweden, Finland, Norway, Denmark and Iceland).

The sub-fund will invest predominately in debt securities issued by corporations, financial institutions, governments and their agencies, state and municipal entities and/or UCITS, other UCIs and exchange traded funds with exposure to debt securities.

The sub-fund may invest all its net assets in debt securities of any kind including below investment grade securities, unrated securities, distressed/defaulted securities and contingent convertible securities, and/or UCITS, other UCIs and exchange traded funds with exposure to debt securities. The sub-fund may invest in debt securities across the full official credit rating scale (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies or determined to be of similar creditworthiness by the Investment Manager with respect to unrated securities). The sub-fund may invest all its net assets in high yield securities.

Direct investments in contingent convertible securities will not exceed 20% of the sub-fund's net assets. Investments in distressed/default securities will not exceed 10% of the sub-fund's assets.

The sub-fund may also invest in money market securities issued by governments and their agencies, state and municipal entities, financial institutions, and corporations and/or UCITS, other UCIs and exchange traded funds with exposure to these debt securities.

The sub-fund applies ESG criteria as outlined in the sustainability related disclosure in the investment approach. See "ENVIRONMENTAL, SOCIAL AND GOVERNANCE ("ESG") AND SUSTAINABILITY RELATED DISCLOSURE" section of the Prospectus.

The sub-fund has a minimum share of investments in economic activities that qualify as environmentally sustainable under the Taxonomy Regulation of 0%. While the sub-fund does not commit to make such investments, it is nonetheless possible that the sub-fund may be exposed to underlying investments that contribute to climate change mitigation and/or climate change adaptation (including enabling and/or transitional activities).

The sub-fund may utilise financial derivative instruments for hedging purposes as well as implementing its investment objective. Use of derivatives may result in exposure beyond the assets under management of the sub-fund which may, depending on the market circumstances, increase or decrease the volatility of the Net Asset Value.

The sub-fund may hold ancillary liquid assets as defined in the "INVESTMENT

OBJECTIVES POLICIES AND RESTRICTIONS – INVESTMENT RESTRICTIONS" section of the Prospectus and under the conditions described therein. The sub-fund is also allowed to invest in bank deposits for treasury purposes. Under unfavorable market circumstances during which the above-described investment strategy would become impossible to continue implementing and the sub-fund would no longer be able to achieve its investment objective, the sub-fund may, on a temporary basis, invest up to 100% of its net assets in bank deposits. For the avoidance of doubt, investment in such assets is not part of the core investment policy of the sub-fund.

**Benchmark:** The portfolio is actively managed on a discretionary basis without reference to a benchmark.

### Intended retail investor

The sub-fund is suitable for investors who consider investment funds to be a convenient way of participating in the capital market developments. It is also suitable for more experienced investors wishing to obtain defined investment objectives. Investors are likely to use this Sub-Fund to complement an existing core bond portfolio and have a long-term investment horizon. The sub-fund is suitable for investors who can afford to set aside the capital for a minimum of 2 years.

# What are the risks and what could I get in return?

## Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

**Be aware of currency risk.** You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: Interest rate risk, liquidity risk, international investing, credit risk, market risk, sustainability risk, ESG investment risk, management risk, counterparty risk

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 10,000 EUR is invested

	If you exit after 1 year	If you exit after 2 years
<b>Total costs</b>	653 EUR	851 EUR
Annual cost impact (*)	6.5 %	4.1 % each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.7% before costs and 0.6% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
