
are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 27%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 35%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Sustainable Food and Water
Legal Entity Identifier : 549300KTYV51C0X44G74

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 50%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: 44%	<input type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

Until 30 June 2023 the Fund invested at least 75% of its assets, and from 1 July 2023 at least 90% of its assets, in sustainable investments. The Fund invested in companies worldwide that the Investment Manager expected to contribute towards the provision of sustainable food and water including water management, agricultural equipment, agricultural inputs, food production, processing, packaging and distribution, food and water retail and recycling. All companies held by the Fund were deemed to be sustainable investments by the Investment Manager.

The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which was cash.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

• *How did the sustainability indicators perform?*

The Fund invested 94% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager assessed whether a certain percentage of the relevant issuer's revenues, capital expenditure, operating expenditure or market share contributed to an environmental and/or social objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the contribution at an investee company level. In particular, the Investment Manager used a quantitative screening tool to identify companies that derive a minimum of 50% of their revenues from whose main activity is associated and are directly contributing to the provision of food and water. The Fund invested in companies involved in making the global food and water system more sustainable, as defined by companies driving positive change across at least one of the five key sustainability areas (GHG emissions, water usage, biodiversity, physical pollution and waste, and health and nutrition). The Investment Manager manually added companies that met certain criteria with revenue exposure below 50% to the Fund's investment universe. Examples of indicators used to assess sustainability included GHG emissions reduction targets, water usage assessments, records of environmental damage or water usage and product exposure to sustainable food and water solutions.

Subsequently, the Investment Manager used a number of indicators to derive a sustainability score out of ten for each company. Based on this score, each company was placed within one of the following categories: (1) Best-in-class, (2) Neutral and (3) Laggard. The indicators used to determine the score included but were not limited to metrics such as biodiversity and deforestation targets, carbon intensity, board gender diversity and management remuneration. The information was drawn from company management meetings, publicly available corporate information as well as the Investment Manager's internal proprietary tools. The Investment Manager invested 60% of the portfolio in issuers classified as Best-in-class and 34% of the portfolio in issuers classified as Neutral. These figures were calculated as the average of the reference period based on quarter-end data. The Fund did not invest in

any companies classified as laggards during the reference period.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within this exclusionary criteria.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	94
Jan 2022 - Dec 2022	94

Best-in-class

This table details the percentage of assets invested in Best-in-class and Neutral, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	Best-in-class – 60 Neutral – 34
Jan 2022 - Dec 2022	Best-in-class – 61 Neutral – 31

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager’s approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portfolio, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions. Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portfolio. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-)

blueprint.pdf). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

Schroders exclusions regarding

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

The Fund's exclusions:

- Fossil fuels: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions) were considered via the application of an

exclusion screen where companies that are deemed by the investment manager to contribute significantly to climate change are excluded from the investible universe.

During the reference period, PAIs were also considered through integration in the investment process.

The Fund considered greenhouse gas emissions, carbon footprint, greenhouse gas intensity of investment companies and activities negatively affecting biodiversity-sensitive areas (PAI 1, 2, 3 & 7) in its analysis as part of the 'environmental management' component of the stakeholder analysis.

As part of our analysis, we consider how a firm is managing its environmental footprint (including its impact on the climate), its negative impact on biodiversity, as well as its potential exposure to the effects of long-term climate change. While no single metric determines the overall assessment of a company's environmental management score, the Fund evaluated a variety of different metrics – from both internal and external data sources (including a Schroders' proprietary tool) – to determine whether a company is adequately managing its climate and environmental risks.

PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were considered as part of our investment process using data from a Schroders' proprietary tool.

All PAI indicators were monitored via Schroders' PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

During the reference period, we engaged with investee companies within our universe to understand how companies are responding to the challenges climate change may pose to their long-term financial position. In reference to PAI 1, 2, 3, 7 & PAI 4 from Annex 1 Table 2, we are continuing our efforts to encourage companies to set clear emissions reduction targets for all three scopes of emissions and where targets are already set, to confirm these targets are properly integrated into company remuneration policies. We also continue to encourage companies to eliminate commodity-driven deforestation activities by 2025.

Over the period, the investment team in collaboration with the sustainable investment team, engaged with salmon farmers about managing their local biodiversity impact and decarbonising their supply chains, most closely related to PAI 2 & 7.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	21
Natural Capital and Biodiversity	12
Corporate Governance	5
Human Capital Management	2
Human Rights	2
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers. The investment manager meets with companies on a regular basis to discuss market dynamics, company fundamentals and sustainability issues. Alongside these regular company engagements, where sustainability is usually

discussed but not always the sole reason for contact, the investment manager also undertakes dedicated sustainability engagements in collaboration with the Sustainable Investment Team. These engagements are dedicated solely to ESG issues. The number of engagements in the table above refer to the dedicated sustainability engagements where sustainability issues are either the entire focus of the company meeting or discussed for a significant portion of the meeting.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
YARA INTERNATIONAL ASA NOK1.70	Materials	4.20	Brazil
CARREFOUR SA EUR2.50	Consumer Staples	4.11	France
HELLOFRESH SE NPV	Consumer Staples	3.52	Germany
KEMIRA OYJ NPV	Materials	3.23	Finland

MOWI ASA NOK7.50	Consumer Staples	2.31	Norway

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation

• *What was the asset allocation?*

describes the share of investments in specific assets.

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in companies worldwide that the Investment Manager expected to contribute towards the provision of sustainable food and water including water management, agricultural equipment, agricultural inputs, food production, processing, packaging and distribution, food and water retail and recycling.

The Fund invested 94% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. Within this, 50% was invested in sustainable investments with an environmental objective and 44% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Consumer Staples	Food, Beverage & Tobacco	29.46
Consumer Staples	Consumer Staples Distribution & Retail	15.25
Consumer Staples	Household & Personal Products	0.58
Materials	Materials	30.30
Industrial	Capital Goods	15.93
Cash	Cash	5.77
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	2.70

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

greenhouse gas emission levels corresponding to the best performance.

• **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 50%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 44%.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

Minimum safeguards were applied where relevant to investments by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social

and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to attain the sustainable investment objective of the Fund were the following:

- Until 30 June 2023 the Fund invested at least 75% of its assets, and from 1 July 2023 at least 90% of its assets, in companies worldwide that the Investment Manager expected to contribute towards the provision of sustainable food and water including water management, agricultural equipment, agricultural inputs, food production, processing, packaging and distribution, food and water retail and recycling.
- The Fund invested in companies that did not cause significant environmental or social harm.
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies.
- The Investment Manager engaged with issuers held in the portfolio and on average aimed to meet or speak with company management once every six months. During these meetings sustainability topics were regularly discussed alongside business trends and financial performance.
- During 2023 the Investment Manager conducted 43 dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to climate change, biodiversity and corporate governance.
- In particular the Investment Manager engaged with companies that have the greatest exposure to commodity-driven deforestation. In line with firm wide policies the fund is seeking to eliminate commodity-driven deforestation activities from the fund's portfolio by 2025.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

- *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

This question is not applicable.

• How did this financial product perform compared with the reference benchmark?

This question is not applicable.

• How did this financial product perform compared with the broad market index?

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Sustainable Growth
Legal Entity Identifier : ONL7S0Z6XT6U55O6U359

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 66% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 4.3% and the benchmark's sustainability score for the reference period was -2.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Contraception
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI AC World (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI AC World (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 66% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 50% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	66
Aug 2022 - Dec 2022	59

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	4.3	-2.9
Jan 2022 - Dec 2022	4.1	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of

contraceptives. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration of these metrics in our analysis of companies’ stakeholder relationships which is central to our stock selection for this fund. As part of the investment process, output from our proprietary stakeholder framework was used which incorporates several PAIs as a component of our evaluation of companies’ sustainability characteristics. For example, PAIs 2, 3, 4, 5, 6 (Greenhouse gas emissions) and PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company’s overall environmental assessment. These PAIs, amongst others, are embedded within our investment process, informing our view on business risk and long-term growth drivers. PAI 13 (Board gender diversity) was also considered as part of our assessment of Good Governance, management quality and company strategy.

During the reference period, PAI 7 (Activities negatively affecting biodiversity-sensitive areas) and PAI 14 from Annex 1 Table 3 (Number of identified cases of severe human rights issues and incidents) were considered and poor performance issuers on these metrics/ indicators frequently contributed to companies being deemed uninvestible for this strategy. In carbon-intense industries, our assessment of PAI 6 and PAI 4 from Annex 1 Table 2 were important contributors to our overall evaluation and inclusion in our investible universe.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies across a number of sectors on climate commitments and biodiversity targets related to PAI 1, 2, 3 and PAI 4 from Annex 1 Table 2. We also engaged with a number of companies domiciled in Japan on Human Capital Management.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	28
Corporate Governance	11
Human Rights	8
Human Capital Management	5
Natural Capital and Biodiversity	4
Diversity and Inclusion	4

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
MICROSOFT CORPORATION COMMON STOCK USD0.0000125	Information Technology	7.18	United States
ALPHABET INCORPORATED CL A NPV	Communication Services	4.46	United States

MASTERCARD INCORPORATED CLASS A COMMON STOCK USD0.0001	Financial	2.44	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

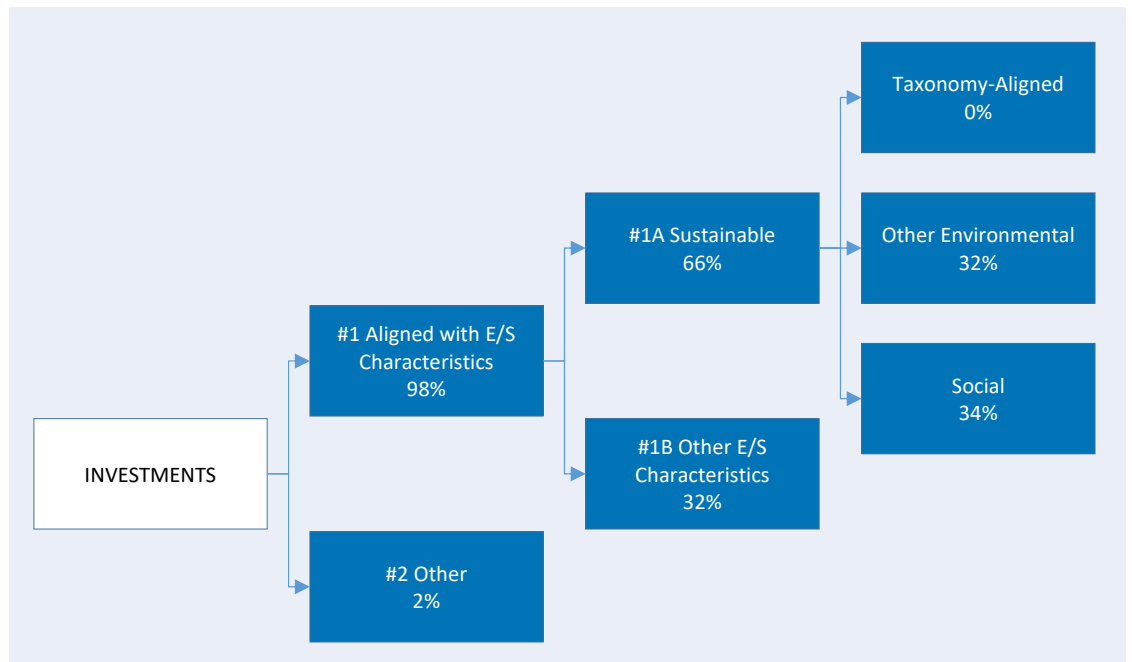

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that

was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 66% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 32% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	14.00
Information Technology	Semiconductors & Semiconductor Equipment	8.25
Information Technology	Technology Hardware & Equipment	1.96
Financial	Banking	8.98
Financial	Financial Services	5.96
Financial	Insurance	2.62
Industrial	Capital Goods	11.62
Industrial	Commercial & Professional Services	5.24
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	9.08
Health Care	Health Care Equipment & Services	5.99
Consumer Discretionary	Consumer Discretionary Distribution & Retail	7.50
Consumer Discretionary	Consumer Durables & Apparel	1.88
Consumer Discretionary	Consumer Staples Distribution & Retail	1.32
Consumer Staples	Household & Personal Products	4.12
Consumer Staples	Consumer Staples Distribution & Retail	1.82
Consumer Staples	Food, Beverage & Tobacco	1.37
Communication Services	Media & Entertainment	4.46
Cash	Cash	2.21
Materials	Materials	1.62

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 32%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 34%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Sustainable Value

Legal Entity Identifier : 549300F4GDD1IL4MMG90

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 79% of sustainable investments

<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI World (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 3.0% and the benchmark's sustainability score for the reference period was -2.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Donations
- High Salaries
- Innovation
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI World (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI World (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 79% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 50% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	79
Aug 2022 - Dec 2022	78

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	3.0	-2.9
Jan 2022 - Dec 2022	4.0	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage;

- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment via the sustainability framework that sits at the heart of the investment process. This framework uses a “triple lens” approach that uses Schroders’ proprietary tools, external third-party data and qualitative on-desk analysis to incorporate several PAIs in our sustainability analysis of each stock. As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 13 (Board gender diversity) was included as part of a company’s overall governance assessment and we considered the ratio of female to male board members in investee companies, expressed as a percentage of all board members.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on gender diversity at board level and discussed appropriate progress that they should be making and what our expectations are, related to PAI 13. We also engaged with several companies on biodiversity, related to PAI 7 involving discussions around biodiversity and both water and waste reduction targets and the initiatives behind these. We also engaged with a medical company around their biodiversity, circular economy and deforestation activities; asking for policies and targets to be set,

in line with their targets on plastic waste reduction and recycling. Over the period, our engagements covered a range of topics and related to PAI 1, 2, 3 and 5 related to climate, emissions and carbon footprint, PAI 8 related to emissions to water and PAI 12 related to gender pay.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme:

Engagement Theme	# Issuers
Climate Change	25
Corporate Governance	22
Natural Capital and Biodiversity	13
Diversity and Inclusion	10
Human Rights	9
Human Capital Management	7

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
GLAXOSMITHKLINE GBP0.3125	Health Care	3.55	United States
HENKEL AG AND CO KGAA NPV (BEARER)	Consumer Staples	3.38	Germany
SANOFI EUR2	Health Care	3.28	United States
CARREFOUR SA EUR2.50	Consumer Staples	3.22	France
PANASONIC HOLDINGS CORPORATION NPV	Consumer Discretionary	3.17	Japan

INTERNATIONAL DISTRIBUTIONS SE PLC ORDINARY 1P	Industrial	2.66	United Kingdom

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

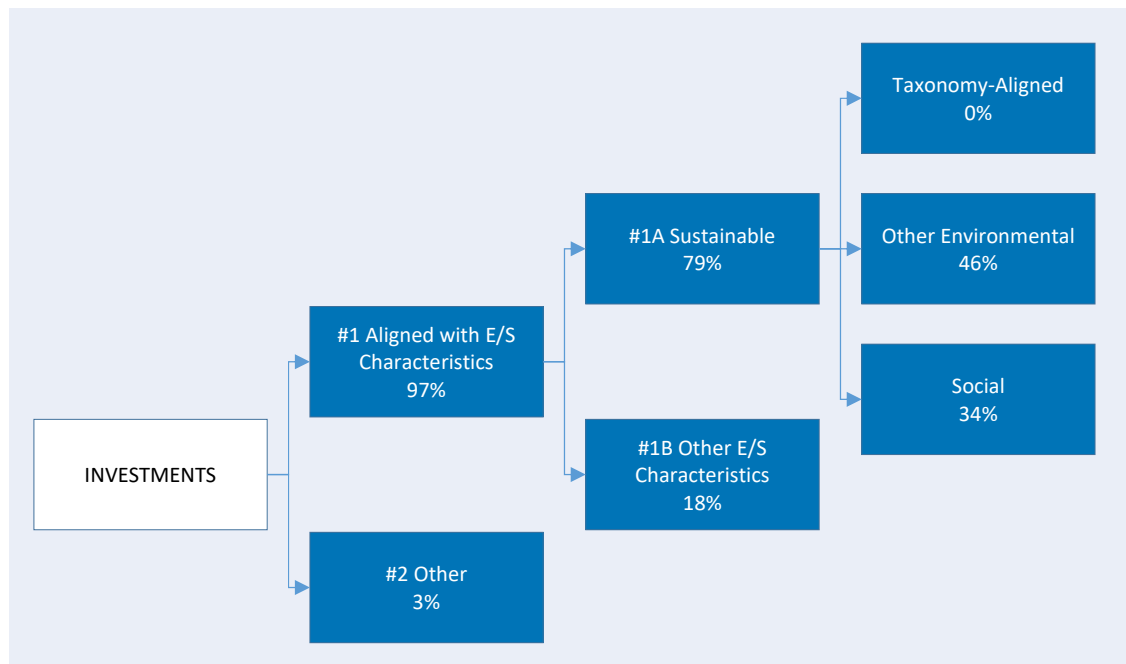

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a higher overall sustainability score than the MSCI World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period,

based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 79% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 46% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	12.54
Communication Services	Telecommunication Services	10.69
Financial	Banking	9.70
Financial	Insurance	6.43
Financial	Financial Services	2.16
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	9.62
Health Care	Health Care Equipment & Services	4.06
Consumer Discretionary	Consumer Durables & Apparel	6.06
Consumer Discretionary	Consumer Discretionary Distribution & Retail	5.28
Consumer Discretionary	Consumer Services	1.18
Consumer Staples	Consumer Staples Distribution & Retail	7.29
Consumer Staples	Household & Personal Products	3.38
Information Technology	Technology Hardware & Equipment	3.85
Information Technology	Software & Services	3.62
Information Technology	Semiconductors & Semiconductor Equipment	3.10
Industrial	Transportation	2.66
Industrial	Commercial & Professional Services	2.39
Cash	Cash	3.47
Real Estate	Equity Real Estate Investment Trusts (REITs)	2.52

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 46%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 34%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Indian Equity
Legal Entity Identifier : EBELRBOUMD6RMWOVEX67

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 70% of sustainable investments

<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI India (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 3.3% and the benchmark's sustainability score for the reference period was -5.3%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Power Provision

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the MSCI India (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI India (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 70% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

• ...and compared to previous periods?

As this is our first reporting period, this question is not applicable.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to

be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations)
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). PAI indicators were also reviewed as appropriate via the Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1,2,3,5 (Greenhouse gas emissions) and 13 (Board gender diversity).

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	10
Corporate Governance	4
Human Rights	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
ICICI BANK LIMITED SPONSORED ADR (EACH REPRESENTS 2 ORDINARY INR10)	Financial	7.60	India
RELIANCE INDUSTRIES LIMITED INR10 (DEMAT)	Energy	7.21	India
HDFC BANK LIMITED INR1	Financial	5.83	India
LARSEN AND TOUBRO LIMITED INR2	Industrial	5.42	India
BHARTI AIRTEL LIMITED INR5	Communication Services	4.26	India
INFOSYS LIMITED INR5 (DEMAT)	Information Technology	4.12	India
AXIS BANK LIMITED INR2	Financial	3.62	India
HOUSING DEVELOPMENT FINANCE CORPORATION INR2 (DEMAT)	Financial	3.61	India
BAJAJ FINANCE LIMITED INR2	Financial	3.40	India
SBI LIFE INSURANCE COMPANY LIMITED NPV	Financial	3.18	India
NATIONAL HYDROELECTRIC POWER CORP LTD INR10	Utilities	3.16	India
ABB INDIA LIMITED INR2	Industrial	2.82	India
KOTAK MAHINDRA BANK LIMITED INR5	Financial	2.72	India
POWER GRID CORPORATION OF INDIA LIMITED INR10	Utilities	2.45	India
MAHINDRA AND MAHINDRA LIMITED INR5 (DEMAT)	Consumer Discretionary	2.15	India

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation
describes the share
of investments in
specific assets.

• ***What was the asset allocation?***

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99.8%. The Fund maintained a higher overall sustainability score than the MSCI India (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 70% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 19% was invested in sustainable investments with an environmental objective and 51% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	24.06
Financial	Financial Services	8.22
Financial	Insurance	3.29
Industrial	Capital Goods	14.36
Industrial	Transportation	1.12
Consumer Discretionary	Automobiles & Components	4.60
Consumer Discretionary	Consumer Durables & Apparel	2.27
Consumer Discretionary	Consumer Services	2.26
Consumer Discretionary	Consumer Discretionary Distribution & Retail	0.20
Consumer Staples	Food, Beverage & Tobacco	5.12
Consumer Staples	Household & Personal Products	2.82
Consumer Staples	Consumer Staples Distribution & Retail	0.93
Energy	Oil & Gas Refining & Marketing	7.21
Information Technology	Software & Services	6.19
Utilities	Utilities	5.60
Health Care	Health Care Equipment & Services	3.25
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	2.20
Communication Services	Telecommunication Services	4.26
Communication Services	Media & Entertainment	0.27
Real Estate	Real Estate Management & Development	1.32
Materials	Materials	0.96
Cash	Cash	-0.49

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

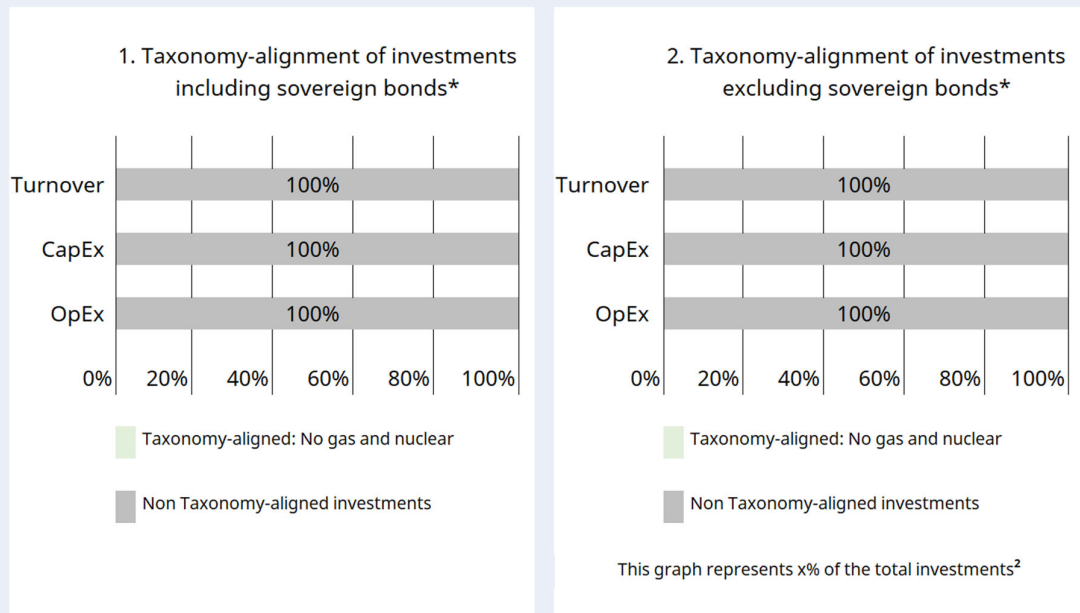

Taxonomy-aligned activities are expressed as a share of:

- **turnover**
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 19%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 51%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Indian Opportunities

Legal Entity Identifier : 549300ISB6Y5VVS1WQ05

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 X No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI India (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -1.9% and the benchmark's sustainability score for the reference period was -5.3%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Donations
- High Salaries
- Medicine
- Training

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI India (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI India (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 62% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

• ***...and compared to previous periods?***

As this is our first reporting period, this question is not applicable.

• ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Training: the estimated societal benefit associated with a more highly skilled workforce, both to the company and society. Assigned based on company spending on employee training.

The above examples of the objectives of the sustainable investments that the Fund made during the

reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We

identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations)
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). PAI indicators were also reviewed as appropriate via the Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1,2,3,5 (Greenhouse gas emissions) and 13 (Board gender diversity).

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	8
Human Rights	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
BAJAJ FINANCE LIMITED INR2	Financial	8.00	India
AVENUE SUPERMARTS LIMITED NPV	Consumer Staples	7.22	India
TATA CONSULTANCY SERVICES LIMITED INR1	Information Technology	7.07	India
INFO EDGE INDIA LIMITED INR10	Communication Services	5.38	India
NESTLE INDIA LIMITED INR10 (DEMAT)	Consumer Staples	5.33	India
PIDILITE INDUSTRIES LIMITED INR1	Materials	4.55	India

ASTRAL LTD INR1	Industrial	3.17	India
APOLLO HOSPITALS ENTERPRISE LIMITED INR5	Health Care	3.01	India
MAHINDRA AND MAHINDRA LIMITED INR5 (DEMAT)	Consumer Discretionary	2.95	India

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI India (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 62% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 14% was invested in sustainable investments with an environmental objective and 48% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Financial Services	23.34
Financial	Banking	5.31
Materials	Materials	14.01
Consumer Discretionary	Automobiles & Components	10.13
Consumer Discretionary	Consumer Services	2.03
Consumer Discretionary	Consumer Durables & Apparel	0.54
Consumer Discretionary	Consumer Discretionary Distribution & Retail	0.05
Consumer Staples	Consumer Staples Distribution & Retail	7.22
Consumer Staples	Food, Beverage & Tobacco	5.33
Information Technology	Software & Services	9.60
Health Care	Health Care Equipment & Services	3.73
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	3.49
Communication Services	Media & Entertainment	5.38
Communication Services	Telecommunication Services	0.26
Industrial	Capital Goods	5.10
Utilities	Utilities	4.13
Cash	Cash	0.33

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 14%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 48%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Japanese Opportunities

Legal Entity Identifier : GGI5GYUNQ0FQ074VII96

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 48% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Tokyo Stock Exchange 1st Section (TOPIX) (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.2% and the benchmark's sustainability score for the reference period was -3.2%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Financial Inclusion
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Tokyo Stock Exchange 1st Section (TOPIX) (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Tokyo Stock Exchange 1st Section (TOPIX) (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 48% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	48
Sep 2022 - Dec 2022	44

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	0.2	-3.2
Jan 2022 - Dec 2022	0.3	-3.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;

- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.
- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. PAIs were considered through our ESG integrated process in both the analysis of individual companies and portfolio construction. Individual analysts were primarily responsible for financial forecasts and ESG assessment through the use of Schroders proprietary tools. The analysts' views on ESG factors covering multiple PAIs were quantified by our analysts, alongside fundamental financial factors.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, Tokyo based Japanese equity team including fund managers and analysts engaged with investee companies on their plans around and disclosure of net zero targets which relates to PAIs 1, 2 and 3. This is our Climate Changes

focused engagement targeting higher emission companies within our investee companies, and collaborated with Sustainable Investment team. We also engaged with companies to discuss social and governance issues, and the topics discussed with management of investee companies included board gender diversity, related to PAI 13.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	25
Corporate Governance	12
Human Capital Management	6
Natural Capital and Biodiversity	4

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
SUMITOMO MITSUI FINANCIAL GROUP INCORPORATED NPV	Financial	3.40	Japan
ITOCHU CORPORATION NPV	Industrial	3.34	Japan
T&D HOLDINGS INCORPORATED NPV	Financial	3.22	Japan
ORIX CORPORATION NPV	Financial	2.55	Japan
TOYOTA INDUSTRIES CORPORATION JPY50	Industrial	2.55	Japan
C. UYEMURA & CO LTD NPV	Materials	2.40	Japan
TOKIO MARINE HOLDINGS INCORPORATED NPV	Financial	2.39	Japan
SMC CORPORATION NPV	Industrial	2.03	Japan
TDK CORPORATION	Information Technology	1.99	Japan
ASTELLAS PHARMA INCORPORATED NPV	Health Care	1.88	Japan
STARTS CORPORATION INCORPORATED NPV	Real Estate	1.73	Japan
TAKEUCHI MANUFACTURING COMPANY LIMITED NPV	Industrial	1.73	Japan
FUKUOKA FINANCIAL GROUP INCORPORATED NPV	Financial	1.73	Japan
OTSUKA CORPORATION NPV	Information Technology	1.72	Japan
AIR WATER INCORPORATED NPV	Materials	1.71	Japan

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

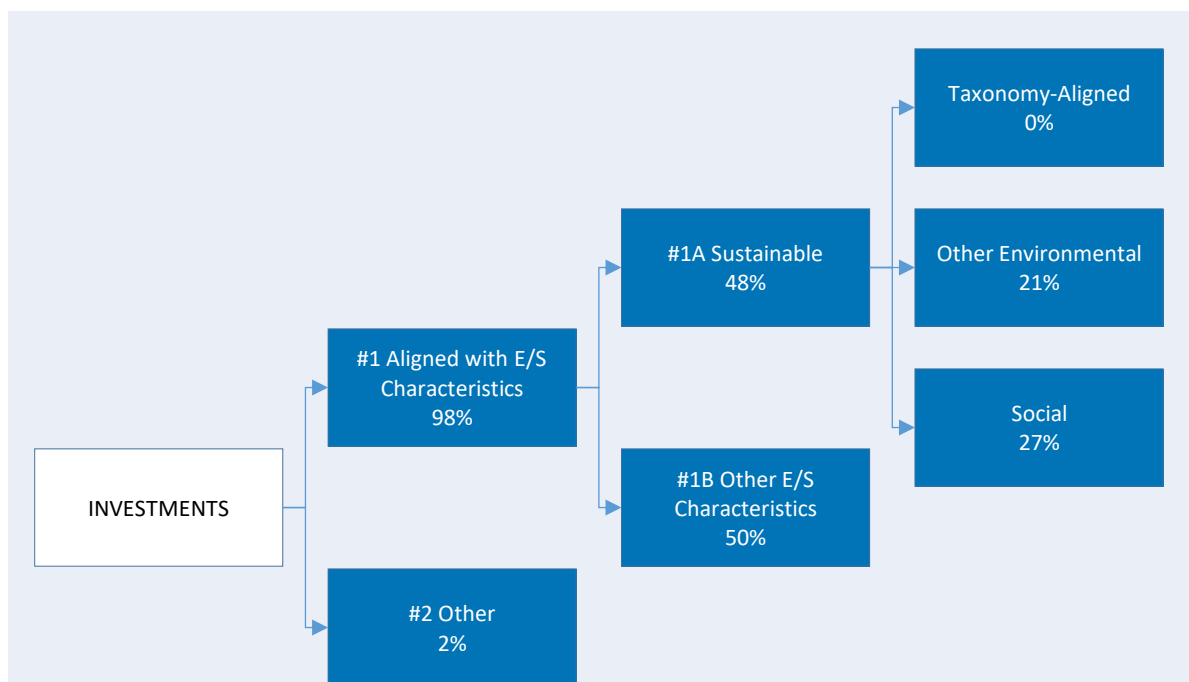

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the Tokyo Stock Exchange 1st Section (TOPIX) (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 48% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 21% was invested in sustainable investments with an environmental objective and 27% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	25.14
Industrial	Transportation	1.85
Industrial	Commercial & Professional Services	1.17
Financial	Insurance	5.72
Financial	Banking	5.46
Financial	Financial Services	3.61
Consumer Discretionary	Automobiles & Components	9.62
Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.44
Consumer Discretionary	Consumer Durables & Apparel	2.37
Consumer Discretionary	Equity Real Estate Investment Trusts (REITs)	0.21
Consumer Discretionary	Consumer Services	0.12
Information Technology	Semiconductors & Semiconductor Equipment	3.92
Information Technology	Software & Services	3.77
Information Technology	Technology Hardware & Equipment	3.10
Materials	Materials	7.94
Materials	Industrial Gases	1.71
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	3.93
Health Care	Health Care Equipment & Services	2.99
Communication Services	Telecommunication Services	3.02
Communication Services	Media & Entertainment	1.69
Real Estate	Real Estate Management & Development	4.47
Consumer Staples	Consumer Staples Distribution & Retail	3.02
Consumer Staples	Food, Beverage & Tobacco	0.92
Cash	Cash	1.03
Cash	Margin Cash	0.05
Energy	Oil & Gas Refining & Marketing	0.75

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
reflecting the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• ***What was the share of investments made in transitional and enabling activities?***

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• ***What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?***

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 21%.

• ***What was the share of socially sustainable investments?***

The share of sustainable investments with a social objective was 27%.

• ***What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?***

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

what

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Japanese Smaller Companies

Legal Entity Identifier : S39CY7QBBMJNLVU5NJ44

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 54% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Russell Nomura Small Cap (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.7% and the benchmark's sustainability score for the reference period was -1.2%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Medicine
- Sanitation
- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Russell Nomura Small Cap (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schrodgers' proprietary tool compared against the weighted average sustainability score of the Russell Nomura Small Cap (Net TR) Index in Schrodgers' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 54% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schrodgers' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	54
Aug 2022 - Dec 2022	53

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.7	-1.2
Jan 2022 - Dec 2022	1.7	-1.9

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schrodgers' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue;
- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.
- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. PAIs were considered through our ESG integrated process in both the analysis of individual companies and portfolio construction. Individual analysts were primarily responsible for financial forecasts and ESG assessment through the use of Schroders proprietary tools. The analysts' views on ESG factors covering multiple PAIs were quantified by our analysts, alongside fundamental financial factors.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, Tokyo based Japanese equity team including fund managers and analysts engaged with investee companies on their plans around and disclosure of net zero targets which relates to PAIs 1, 2 and 3. This is our Climate Changes

focused engagement targeting higher emission companies within our investee companies, and collaborated with Sustainable Investment team. We also engaged with companies to discuss social and governance issues, and the topics discussed with management of investee companies included board gender diversity, related to PAI 13.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	11
Corporate Governance	5
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
HAMAKYOREX COMPANY LIMITED NPV	Industrial	2.44	Japan
FUKUSHIMA GALILEI CO LTD NPV	Industrial	2.32	Japan
NIFCO INCORPORATED NPV	Consumer	2.27	Japan
AI HOLDINGS CORPORATION NPV	Discretionary Information Technology	2.23	Japan
MIMASU SEMICONDUCTOR INDUSTRY COMPANY LIMITED NPV	Information Technology	2.16	Japan
NICHIHA CORPORATION NPV	Industrial	2.02	Japan
MARUWA COMPANY LIMITED NPV	Information Technology	2.02	Japan
EGUARANTEE INCORPORATED NPV	Financial	1.95	Japan
RORZE CORPORATION NPV	Information Technology	1.90	Japan
PARK24 COMPANY LIMITED NPV	Industrial	1.89	Japan
METAWATER COMPANY LIMITED NPV	Industrial	1.87	Japan
OKAMURA CORPORATION NPV	Industrial	1.84	Japan
KUREHA CORPORATION NPV	Materials	1.83	Japan
NIPPON SHINYAKU CO ORDINARY SHARES NPV	Health Care	1.82	Japan
NIPPON AQUA COMPANY LIMITED NPV	Industrial	1.81	Japan

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a higher overall sustainability score than the Russell Nomura Small Cap (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 54% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 20% was invested in sustainable investments with an environmental objective and 33% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	21.93
Industrial	Commercial & Professional Services	6.43
Industrial	Transportation	2.44
Information Technology	Software & Services	12.45
Information Technology	Technology Hardware & Equipment	10.27
Information Technology	Semiconductors & Semiconductor Equipment	6.27
Consumer Discretionary	Consumer Discretionary Distribution & Retail	3.65
Consumer Discretionary	Automobiles & Components	3.17
Consumer Discretionary	Consumer Services	2.36
Consumer Discretionary	Consumer Durables & Apparel	1.18
Consumer Discretionary	Equity Real Estate Investment Trusts (REITs)	0.29
Materials	Materials	8.48
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	4.46
Health Care	Health Care Equipment & Services	3.84
Financial	Financial Services	3.98
Communication Services	Media & Entertainment	2.55
Communication Services	Telecommunication Services	1.24
Real Estate	Real Estate Management & Development	3.58
Consumer Staples	Consumer Staples Distribution & Retail	0.93
Cash	Cash	0.49

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
reflecting the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• ***What was the share of investments made in transitional and enabling activities?***

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• ***What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?***

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 20%.

• ***What was the share of socially sustainable investments?***

The share of sustainable investments with a social objective was 33%.

• ***What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?***

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Nordic Micro Cap
Legal Entity Identifier : 549300LG1HXZURKG0379

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 89% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Nordic Micro Cap (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.9% and the benchmark's sustainability score for the reference period was 0.7%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Innovation
- Medicine
- Training

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI Nordic Micro Cap (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI Nordic Micro Cap (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 89% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	89
Aug 2022 - Dec 2022	88

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	2.9	0.7
Jan 2022 - Dec 2022	2.5	0.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development

(R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

- Training: the estimated societal benefit associated with a more highly skilled workforce, both to the company and society. Assigned based on company spending on employee training.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain

(suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural

capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on

such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

Schroders exclusions regarding:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including biodiversity challenges in the Energy sector, and climate & Net Zero commitments for held companies within the Utilities sector. These engagements related to PAIs 7 (Negatively affecting

biodiversity-sensitive areas) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

Engagement Theme	# Issuers
Corporate Governance	2
Human Capital Management	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
BONESUPPORT HOLDING SEK0.625	Health Care	3.46	Sweden
CARASENT NOK0.333	Health Care	2.93	Norway
SMARTOPTICS GROUP NOK0.02	Information Technology	2.76	Norway
BITTIUM OYJ NPV	Information Technology	2.75	Finland
MICRO SYSTEMATION CLASS B SEK0.2	Information Technology	2.74	Sweden
SWEDISH ORPHAN BIOVITRUM AB NPV	Health Care	2.69	Sweden
MEDCAP SEK0.04	Health Care	2.52	Sweden
GENTIAN DIAGNOSTICS NOK0.1	Health Care	2.40	Norway
I.A.R. SYSTEMS GROUP SEK10	Information Technology	2.39	Sweden
RAYSEARCH LABORATORIES AB SERIES 'B' NPV	Health Care	2.38	Sweden
PREVAS CLASS B SEK2.5	Information Technology	2.35	Sweden
TOBII DYNAVOX SEK0.0047687	Information Technology	2.33	Sweden
EFFECTE	Information Technology	2.27	Finland
MEDISTIM NOK0.25	Health Care	2.26	Norway
LUMENRADIO SEK0.05	Information Technology	2.21	Sweden

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 94%. The Fund maintained a higher overall sustainability score than the MSCI Nordic Micro Cap (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 89% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 80% was invested in sustainable investments with an environmental objective and 8% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	27.55
Information Technology	Technology Hardware & Equipment	14.46
Information Technology	Semiconductors & Semiconductor Equipment	0.31
Health Care	Health Care Equipment & Services	25.43
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	15.97
Communication Services	Media & Entertainment	6.86
Industrial	Capital Goods	3.25
Industrial	Commercial & Professional Services	1.32
Cash	Cash	3.44
Consumer Discretionary	Consumer Discretionary Distribution & Retail	0.98
Consumer Staples	Household & Personal Products	0.39
Materials	Materials	0.03

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

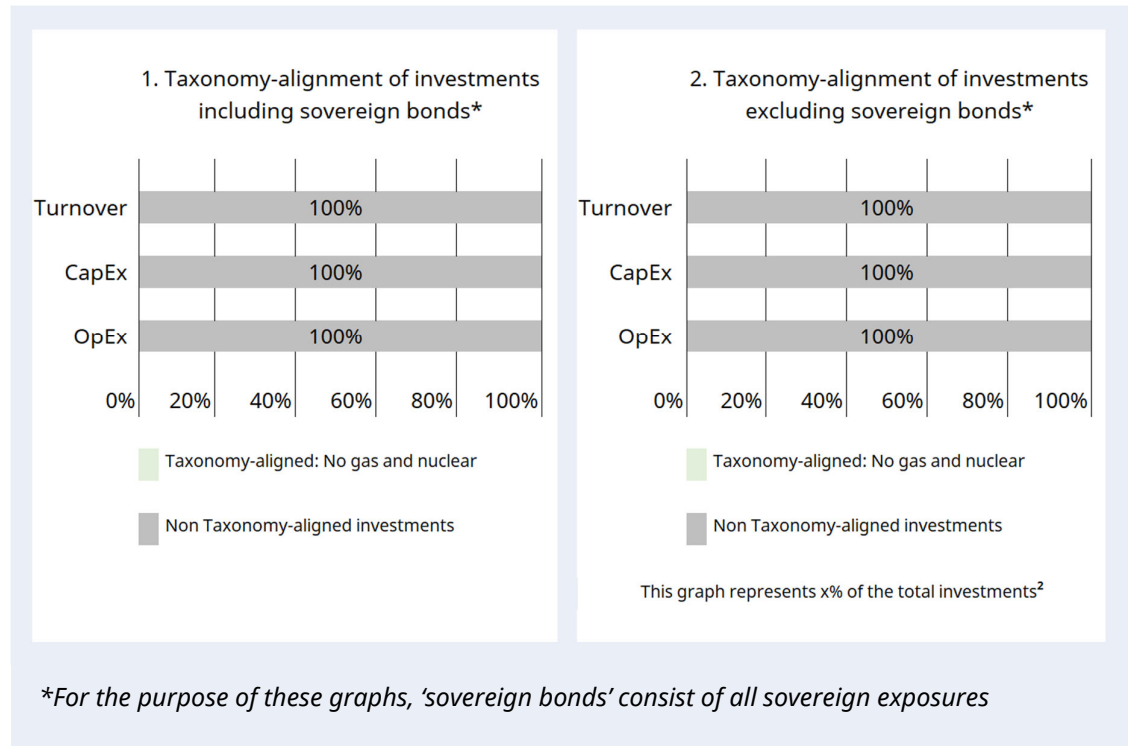

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 80%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 8%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Nordic Smaller Companies

Legal Entity Identifier : 5493006ZHNOXP7Z2DS89

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 X No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 85% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Nordic Smaller Companies (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.6% and the benchmark's sustainability score for the reference period was -1.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Innovation
- Medicine
- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI Nordic Smaller Companies (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI Nordic Smaller Companies (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 85% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	85
Aug 2022 - Dec 2022	83

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	2.6	-1.9
Jan 2022 - Dec 2022	1.7	-2.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.
- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

Schroders exclusions regarding:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics,

including biodiversity challenges in the Energy sector, and climate & Net Zero commitments for held companies within the Utilities sector. These engagements related to PAIs 7 (Negatively affecting biodiversity-sensitive areas) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
TOBII DYNAVOX SEK0.0047687	Information Technology	4.46	Sweden
CONCENTRIC AB NPV	Industrial	3.14	United Kingdom
OSSUR HF ISK1	Health Care	3.04	Iceland
ROYAL UNIBREW A/S DKK2	Consumer Staples	3.03	Denmark
VAISALA OYJ SERIES 'A' NPV	Information Technology	2.99	Finland
QT GROUP	Information Technology	2.98	Finland
AFRY AB-B SHS SEK5	Industrial	2.93	Sweden
NORDNET SEK0.005	Financial	2.64	Sweden
TRELLEBORG AB SERIES B NPV	Industrial	2.59	Sweden
BIOGAIA CLASS B SEK0.2	Health Care	2.56	Sweden
VALMET CORPORATION NPV	Industrial	2.48	Finland
METSO CORPORATION NPV	Industrial	2.47	Finland
DOMETIC GROUP AB NPV	Consumer Discretionary	2.32	Sweden
MEDISTIM NOK0.25	Health Care	2.19	Norway
ELEKTA AB SERIES 'B' SEK2	Health Care	2.14	Sweden

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 93%. The Fund maintained a higher overall sustainability score than the MSCI Nordic Smaller Companies (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 85% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 47% was invested in sustainable investments with an environmental objective and 38% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	13.51
Information Technology	Technology Hardware & Equipment	8.56
Information Technology	Semiconductors & Semiconductor Equipment	1.29
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	13.05
Health Care	Health Care Equipment & Services	10.15
Industrial	Capital Goods	17.59
Industrial	Commercial & Professional Services	3.58
Consumer Discretionary	Consumer Discretionary Distribution & Retail	6.84
Consumer Discretionary	Consumer Durables & Apparel	3.99
Consumer Discretionary	Automobiles & Components	2.32
Communication Services	Media & Entertainment	5.94
Cash	Cash	5.75
Consumer Staples	Food, Beverage & Tobacco	3.03
Financial	Financial Services	2.64
Materials	Materials	1.75

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 47%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 38%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Smart Manufacturing
Legal Entity Identifier : 549300DYPXYJ7UC4NK03

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 63% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.7% and the benchmark's sustainability score for the reference period was -2.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI AC World (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI AC World (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 63% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	63
Aug 2022 - Dec 2022	59

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	0.7	-2.9
Jan 2022 - Dec 2022	-0.6	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage;

- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain

(suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural

capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on

such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment research, stock selection and portfolio construction parts of the investment process. For example, in assessing an issuer's overall environmental score, PAIs 1, 2, 3, 4, 5 and 6 were included. In assessing an issuer's overall social score, PAIs 12 and 13 were included.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with an investee company on their commitment to mitigating climate change, which relates to PAIs 1, 2 and 3.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	19
Corporate Governance	11
Human Capital Management	3
Human Rights	2
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
MICROSOFT CORPORATION COMMON STOCK USD0.0000125	Information Technology	6.22	United States
SIEMENS AG NPV (REGISTERED)	Industrial	2.90	Germany
OTIS WORLDWIDE CORP USD0.01	Industrial	2.60	United States
SCHNEIDER ELECTRIC SE EUR4	Industrial	2.59	United States
HITACHI LIMITED NPV	Industrial	2.59	Japan
JOHNSON CONTROLS INTERNATIONAL PUBLIC LIMITED COMPANY CHF0.5	Industrial	2.50	United States

SAP SE NPV	Information Technology	2.47	Germany
ASSA ABLOY AB SERIES B NPV	Industrial	2.46	Sweden
TECHTRONIC INDUSTRIES COMPANY LIMITED HKD0.10	Industrial	2.46	Hong Kong
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	2.35	Taiwan
SHENZHEN INOVANCE TECHNOLO-A	Industrial	2.31	China
SANDVIK AB NPV	Industrial	2.29	Sweden
KEYENCE CORPORATION NPV	Information Technology	2.27	Japan
SPIRAX-SARCO ENGINEERING PLC ORDINARY 26.9231P	Industrial	2.27	United Kingdom

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the

administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

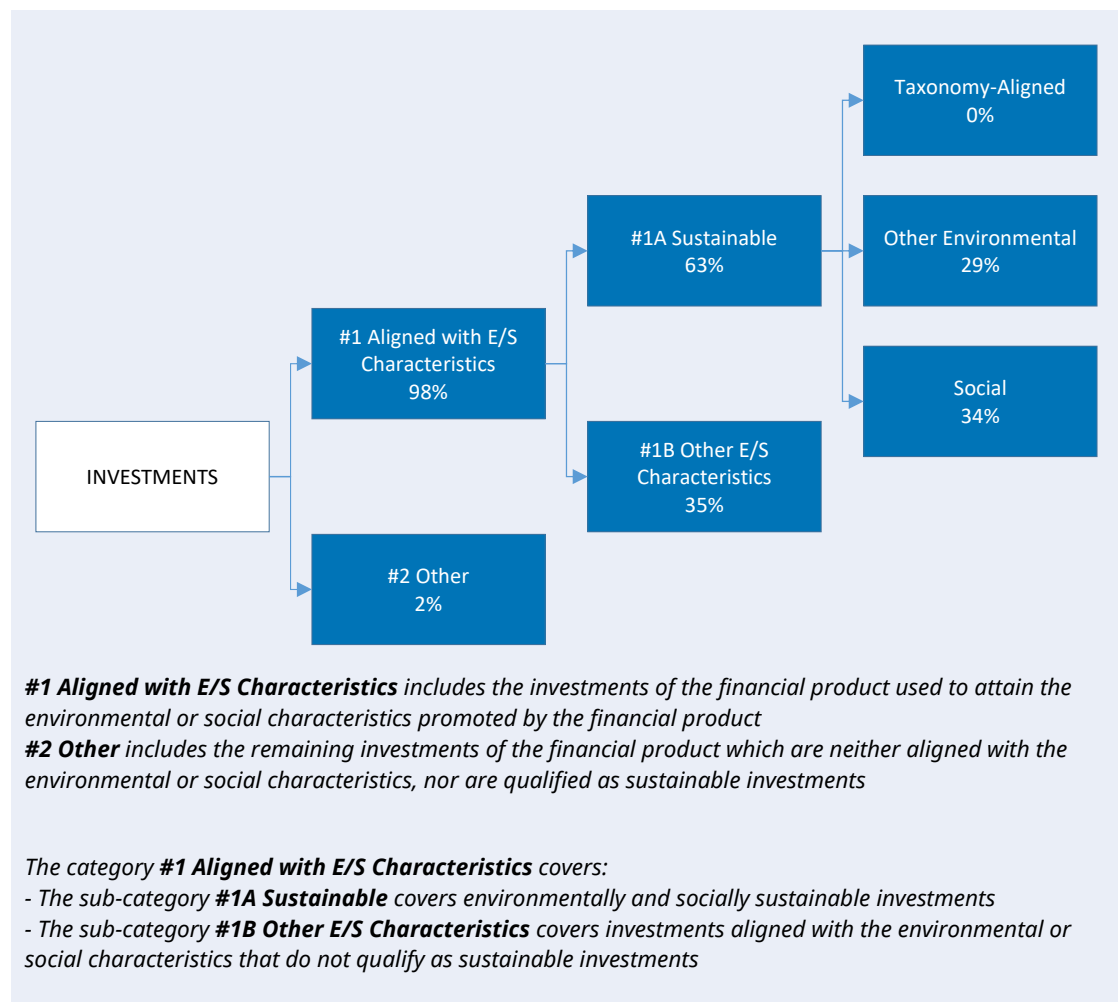

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 63% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 29% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	59.12
Industrial	Transportation	1.88
Information Technology	Software & Services	16.60
Information Technology	Technology Hardware & Equipment	9.16
Information Technology	Semiconductors & Semiconductor Equipment	5.87
Materials	Materials	2.19
Materials	Industrial Gases	2.06
Cash	Cash	1.81
Health Care	Financial Services	1.30

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

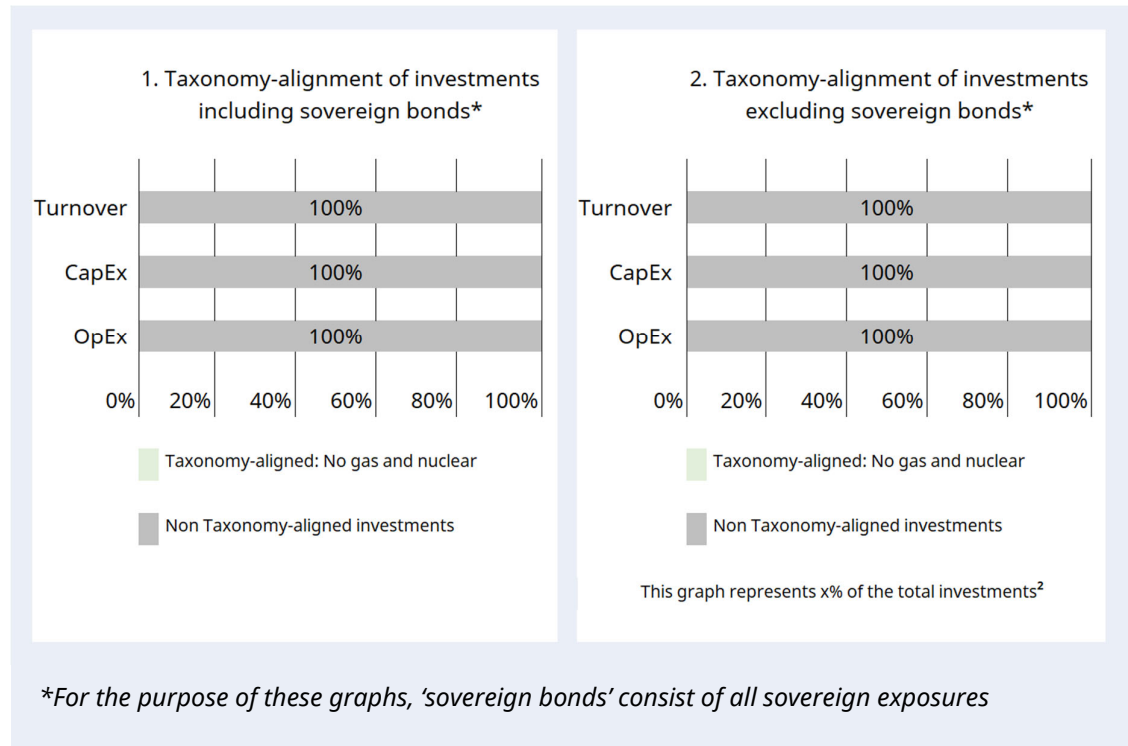

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 29%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 34%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Sustainable Asian Equity
Legal Entity Identifier : 549300B7ECKLDTN5I839

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 4.1% and the benchmark's sustainability score for the reference period was -2.6%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Power Provision

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI AC Asia Pacific ex Japan (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 62% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 40% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	61

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	4.1	-2.6
Jan 2022 - Dec 2022	4.0	-3.1

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schrodgers’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations)
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). PAI indicators were also reviewed as appropriate via the Schrodgers PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1,2,3,5 (Greenhouse gas emissions) and 13 (Board gender diversity).

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	32
Corporate Governance	14
Natural Capital and Biodiversity	9

Human Capital Management	4
Human Rights	4
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	7.40	Taiwan
SAMSUNG ELECTRONICS COMPANY LIMITED KRW100	Information Technology	4.60	South Korea
TENCENT HOLDINGS LIMITED HKD0.00002	Communication Services	3.11	China
RIO TINTO LIMITED NPV	Materials	3.11	Australia
CSL LIMITED NPV	Health Care	3.05	United States
NATIONAL HYDROELECTRIC POWER CORP LTD INR10	Utilities	2.91	India

SINGAPORE TELECOMMUNICATIONS LTD	Communication Services	1.79	Singapore
BANK MANDIRI TBK PT IDR250	Financial	1.71	Indonesia

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 62% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 21% was invested in sustainable investments with an environmental objective and 41% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	18.98
Financial	Insurance	5.12
Financial	Financial Services	0.65
Information Technology	Semiconductors & Semiconductor Equipment	9.55
Information Technology	Technology Hardware & Equipment	4.66
Information Technology	Software & Services	0.40
Consumer Discretionary	Consumer Discretionary Distribution & Retail	4.76
Consumer Discretionary	Consumer Durables & Apparel	3.58
Consumer Discretionary	Consumer Services	2.67
Consumer Discretionary	Automobiles & Components	1.37
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	5.74
Health Care	Health Care Equipment & Services	5.21
Communication Services	Telecommunication Services	4.61
Communication Services	Media & Entertainment	4.17
Materials	Materials	7.35
Utilities	Utilities	6.60
Industrial	Capital Goods	4.31
Industrial	Commercial & Professional Services	1.05
Consumer Staples	Food, Beverage & Tobacco	2.31
Consumer Staples	Consumer Staples Distribution & Retail	1.47
Cash	Cash	3.01
Real Estate	Real Estate Management & Development	2.44

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

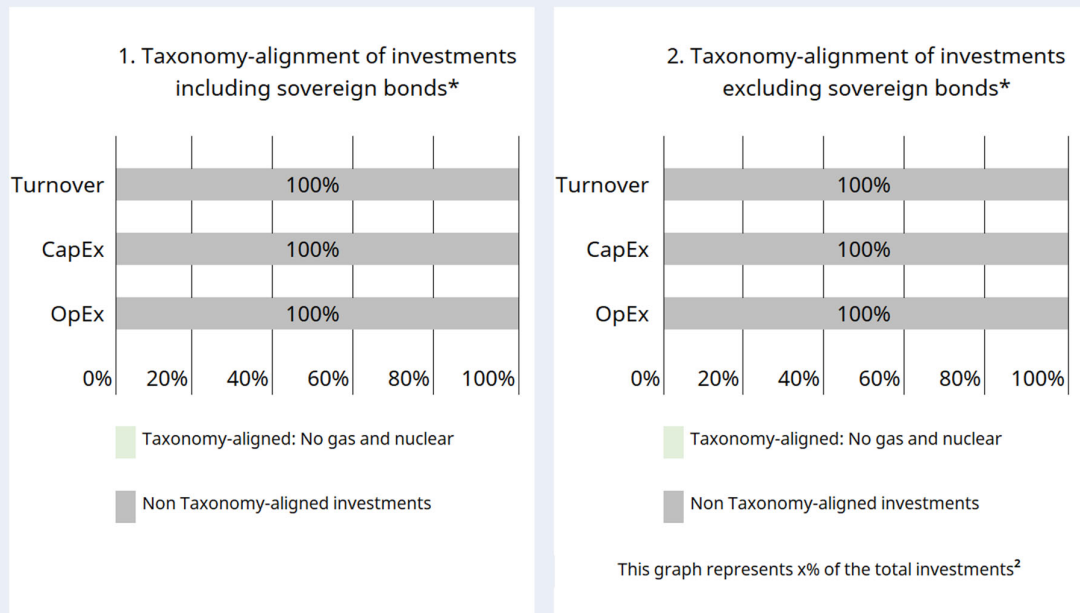

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 21%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 41%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Sustainable Global Growth and Income
Legal Entity Identifier : 549300UPXPBL5GB7UE22

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 61% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.3% and the benchmark's sustainability score for the reference period was -2.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- Donations
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI All Country World (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI All Country World (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 61% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 50% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	61
Aug 2022 - Dec 2022	55

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	2.3	-2.9
Jan 2022 - Dec 2022	1.7	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based

on the monetary value of the sum donated;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration of these metrics in our analysis of companies’ stakeholder relationships which is central to our stock selection for this fund. As part of the investment process, output from our proprietary stakeholder framework was used which incorporates several PAIs as a component of our evaluation of companies’ sustainability characteristics. For example, PAIs 2, 3, 4, 5, 6 (Greenhouse gas emissions) and PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company’s overall environmental assessment. These PAIs, amongst others, are embedded within our investment process, informing our view on business risk and long-term growth drivers. PAI 13 (Board gender diversity) was also considered as part of our assessment of Good Governance, management quality and company strategy.

During the reference period, PAI 7 (Activities negatively affecting biodiversity-sensitive areas) and PAI 14 from Annex 1 Table 3 (Number of identified cases of severe human rights issues and incidents) were considered and poor performance issuers on these metrics/ indicators frequently contributed to companies being deemed uninvestible for this strategy. In carbon-intensive industries, our assessment of PAI 6 and PAI 4 from Annex 1 Table 2 were important contributors to our overall evaluation and inclusion in our investible universe.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies across a number of sectors on climate commitments and biodiversity targets related to PAI 1, 2, 3 and PAI 4 from Annex 1 Table 2. We also engaged with a number of companies domiciled in Japan on Human Capital Management.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	35
Corporate Governance	15
Human Rights	9
Human Capital Management	7
Diversity and Inclusion	5
Natural Capital and Biodiversity	5

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
MICROSOFT CORPORATION COMMON STOCK USD0.0000125	Information Technology	6.66	United States
ALPHABET INCORPORATED CL A NPV	Communication Services	3.93	United States
MASTERCARD INCORPORATED CLASS A COMMON STOCK USD0.0001	Financial	3.23	United States
UNILEVER PLC ORDINARY 3 1/9P	Consumer Staples	3.09	United Kingdom
UNITEDHEALTH GROUP INCORPORATED COMMON STOCK USD0.01	Health Care	3.07	United States
HITACHI LIMITED NPV	Industrial	2.98	Japan
SCHNEIDER ELECTRIC SE EUR4	Industrial	2.76	United States
ADOBE INCORPORATED NPV	Information Technology	2.73	United States
INDUSTRIA DE DISENO TEXTIL SA EUR0.03	Consumer Discretionary	2.72	Spain

ASTRAZENECA PLC ORDINARY USD0.25	Health Care	2.46	United Kingdom
TEXAS INSTRUMENTS INCORPORATED COMMON STOCK USD1	Information Technology	2.43	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

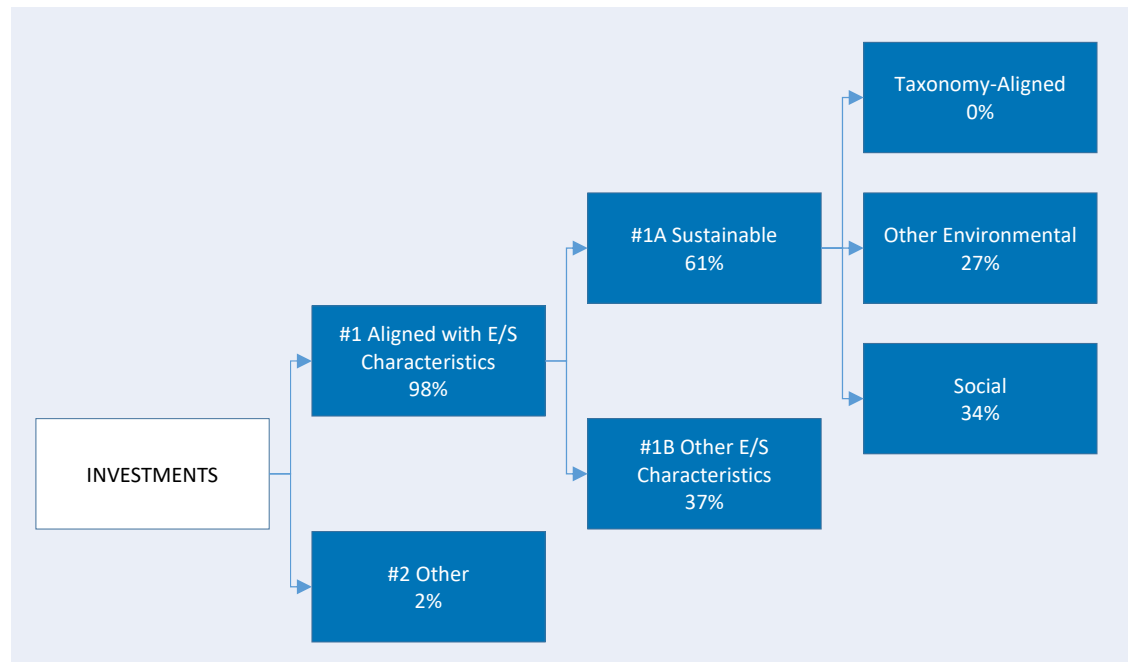

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that

was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 61% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 27% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	12.05
Financial	Financial Services	6.49
Financial	Insurance	4.13
Information Technology	Software & Services	15.12
Information Technology	Semiconductors & Semiconductor Equipment	7.15
Industrial	Capital Goods	8.71
Industrial	Commercial & Professional Services	3.75
Consumer Discretionary	Consumer Discretionary Distribution & Retail	6.88
Consumer Discretionary	Automobiles & Components	3.21
Consumer Discretionary	Consumer Durables & Apparel	1.54
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	6.54
Health Care	Health Care Equipment & Services	3.07
Communication Services	Media & Entertainment	3.93
Communication Services	Telecommunication Services	3.76
Consumer Staples	Household & Personal Products	4.85
Consumer Staples	Food, Beverage & Tobacco	1.60
Utilities	Utilities	2.38
Cash	Cash	2.23
Materials	Materials	2.09
Real Estate	Equity Real Estate Investment Trusts (REITs)	0.50

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 27%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 34%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Sustainable Multi-Factor Equity
Legal Entity Identifier : 5493007XNHSEG8Q50Z18

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained

i) a higher overall sustainability score; and

ii) at least a 50% lower carbon intensity score, relative to the MSCI AC World (Net TR) Index, based on the Investment Manager's rating system.

This means that:

(a) the Fund's weighted average sustainability score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average sustainability score over the same period, based on month-end data; and

(b) the Fund's average carbon intensity score over the reference period was at least 50% lower than the benchmark's average carbon intensity score over the same period, based on quarterly-end data.

This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

Carbon intensity is a measure of a portfolio's exposure to carbon-intensive companies. It is expressed as the carbon emissions per million dollars of revenue and displayed as tons CO₂e / \$M revenue. The carbon intensity is measured using data from a third party provider. Where a data point is not available, the provider may make use of estimated data.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Disclaimer: Certain information ©2022 MSCI ESG Research LLC. Reproduced by permission

Sustainability indicators measure how the

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 5.1% and the benchmark's sustainability

environmental or social characteristics promoted by the financial product are attained.

score for the reference period was -2.9%. In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the MSCI AC World (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI AC World (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund's carbon intensity score for the reference period was 56 CO₂e/\$M and the benchmark's carbon intensity score for the reference period was 214 CO₂e/\$M.

The Investment Manager monitored compliance with the characteristic to maintain at least a 50% lower carbon intensity score than the MSCI AC World (Net TR) Index by reference to the carbon intensity, measured on a weighted average based on quarterly holdings using data from a third party provider.

The Investment Manager invested 62% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ***...and compared to previous periods?***

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	49

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	5.1	-2.9
Jan 2022 - Dec 2022	3.3	-4.6

Carbon intensity score

This table details whether the fund maintained at least a 50% lower carbon intensity score, relative to the benchmark, year on year.

Period	Fund (CO ₂ e/\$M)	Benchmark (CO ₂ e/\$M)
Jan 2023 - Dec 2023	56	214
Jan 2022 - Dec 2022	72	159

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

For 2022 the carbon intensity value was calculated as an average over the last three months of the reference period. For 2023 the value is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector

revenue; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.
- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on

sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology.

All PAI indicators were monitored via Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on their plans around and disclosure of net zero targets which relates to PAIs 1, 2 and 3. Other topics discussed with investee companies included board gender diversity, related to PAI 13.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	141

Corporate Governance	51
Natural Capital and Biodiversity	36
Human Rights	30
Human Capital Management	27
Diversity and Inclusion	19

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
APPLE INCORPORATED COMMON STOCK NPV	Information Technology	5.17	United States
MICROSOFT CORPORATION COMMON STOCK USD0.0000125	Information Technology	3.40	United States
ALPHABET INCORPORATED CL A NPV	Communication Services	2.77	United States
META PLATFORM INCORPORATED COMMON STOCK USD0.000006	Communication Services	1.58	United States

ASML HOLDING NV EUR0.09 (POST SPLIT)	Information Technology	0.82	Netherlands

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 62% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 24% was invested in sustainable investments with an environmental objective and 38% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Technology Hardware & Equipment	9.51
Information Technology	Software & Services	7.98
Information Technology	Semiconductors & Semiconductor Equipment	5.71
Financial	Insurance	4.82
Financial	Financial Services	4.57
Financial	Banking	4.06
Consumer Discretionary	Consumer Discretionary Distribution & Retail	4.87
Consumer Discretionary	Automobiles & Components	3.16
Consumer Discretionary	Consumer Services	2.88
Consumer Discretionary	Consumer Durables & Apparel	2.08
Consumer Discretionary	Consumer Staples Distribution & Retail	0.03
Industrial	Capital Goods	8.11
Industrial	Transportation	2.71
Industrial	Commercial & Professional Services	1.74
Industrial	Consumer Discretionary Distribution & Retail	0.03
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	8.45
Health Care	Health Care Equipment & Services	2.27
Communication Services	Media & Entertainment	6.75
Communication Services	Telecommunication Services	0.96
Communication Services	Consumer Discretionary Distribution & Retail	0.09
Consumer Staples	Food, Beverage & Tobacco	3.06
Consumer Staples	Consumer Staples Distribution & Retail	2.01
Consumer Staples	Household & Personal Products	1.74
Energy	Integrated Oil & Gas	2.86
Energy	Oil & Gas Refining & Marketing	0.67
Energy	Oil & Gas Storage & Transportation	0.31
Energy	Oil & Gas Exploration & Production	0.22
Energy	Oil & Gas Equipment & Services	0.09
Materials	Materials	3.76
Materials	Industrial Gases	0.01
Real Estate	Real Estate Management & Development	1.36
Real Estate	Equity Real Estate Investment Trusts (REITs)	0.68
Utilities	Utilities	1.36
Utilities	Gas Utilities	0.44
Cash	Cash	0.61
Cash	Margin Cash	0.03

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to

economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

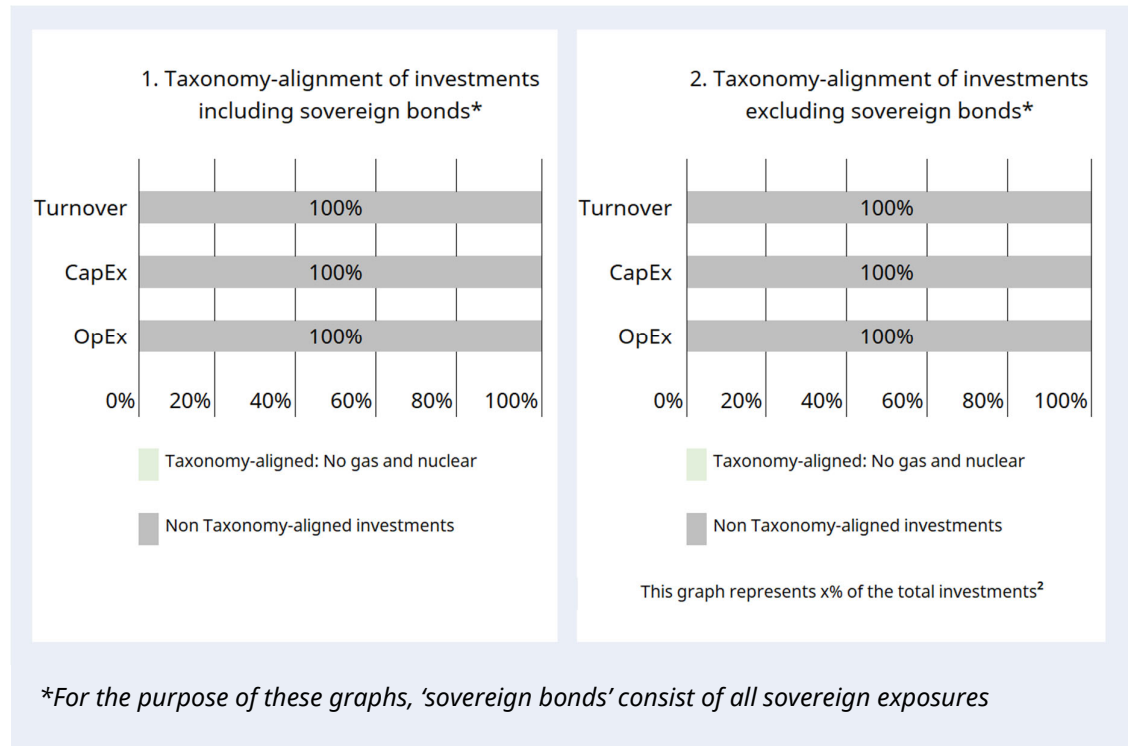

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 24%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 38%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Sustainable Swiss Equity
Legal Entity Identifier : YBFPOAEQJVJHY19U2R61

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 60% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund's characteristic to maintain a higher overall sustainability score than the benchmark changed to maintain a positive absolute sustainability score during the reference period.

Until 20 September 2023, the Fund maintained a higher overall sustainability score than the Swiss Leaders Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six-month period until 20 September 2023 was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

From 21 September 2023, the Fund maintained a positive absolute sustainability score, based on Schroders' proprietary tool. This means that the Fund's weighted average score over a rolling four-month period up to the end of the reference period was higher than zero, based on month-end data.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

Until 20 September 2023, the Fund's sustainability score was 2.2% and the benchmark's sustainability score was 1.0%.

From 21 September 2023, the positive absolute sustainability score until the end of the reference period was 2.3%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity

- Donations
- High Salaries
- Innovation
- Medicine

Until 20 September 2023, the Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Swiss Leaders Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Swiss Leaders Index in Schroders' proprietary tool over a rolling six-month period until 20 September 2023, based on month-end data.

From 21 September 2023, the Investment Manager monitored compliance with the characteristic to maintain a positive absolute sustainability score by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool over a rolling four-month period up to the end of the reference period, based on month-end data.

The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 60% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 40% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	60
Aug 2022 - Dec 2022	62

Sustainability score

This table details the Fund's sustainability score, year on year

Period	Fund (%)
Jan 2023 - Dec 2023	2.2
Jan 2022 - Dec 2022	2.8

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to

the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Schroders exclusions regarding:
 - Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
 - UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
 - Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including biodiversity challenges in the Energy sector, and climate & Net Zero commitments for held companies within the Utilities sector. These engagements related to PAIs 7 (Negatively affecting biodiversity-sensitive areas) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	11
Corporate Governance	7
Human Rights	3
Natural Capital and Biodiversity	2
Human Capital Management	2
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
NOVARTIS AG CHF0.50 (REGISTERED)	Health Care	9.92	Switzerland
NESTLE SA CHF0.10 (REGISTERED)	Consumer Staples	9.75	United States
ROCHE HOLDING AG NPV	Health Care	9.71	United States
ZURICH INSURANCE GROUP AG CHF0.10 (REGISTERED)	Financial	5.17	Switzerland
COMPAGNIE FINANCIERE RICHEMONT SA CHF1 (REGISTERED)	Consumer Discretionary	4.79	Switzerland
UBS GROUP AG CHF0.10 (REGISTERED)	Financial	3.19	Switzerland
GIVAUDAN SA CHF10	Materials	3.14	Switzerland
ALCON INC CHF0.040000	Health Care	2.74	Switzerland
SWISS LIFE HOLDING AG CHF5.10 (REGISTERED)	Financial	2.55	Switzerland
LONZA AG CHF1 (REGISTERED)	Health Care	2.51	Switzerland
SIKA AG CHF0.01	Materials	2.34	Switzerland
PARTNERS GROUP HOLDING AG CHF0.01 (REGISTERED)	Financial	1.95	Switzerland
BALOISE HOLDING AG CHF0.10 (REGISTERED)	Financial	1.92	Switzerland
BARRY CALLEBAUT AG CHF0.02 (REGISTERED)	Consumer Staples	1.88	Switzerland
KUEHNE n NAGEL INTERNATIONAL AG CHF1 (REGISTERED)	Industrial	1.88	Switzerland

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

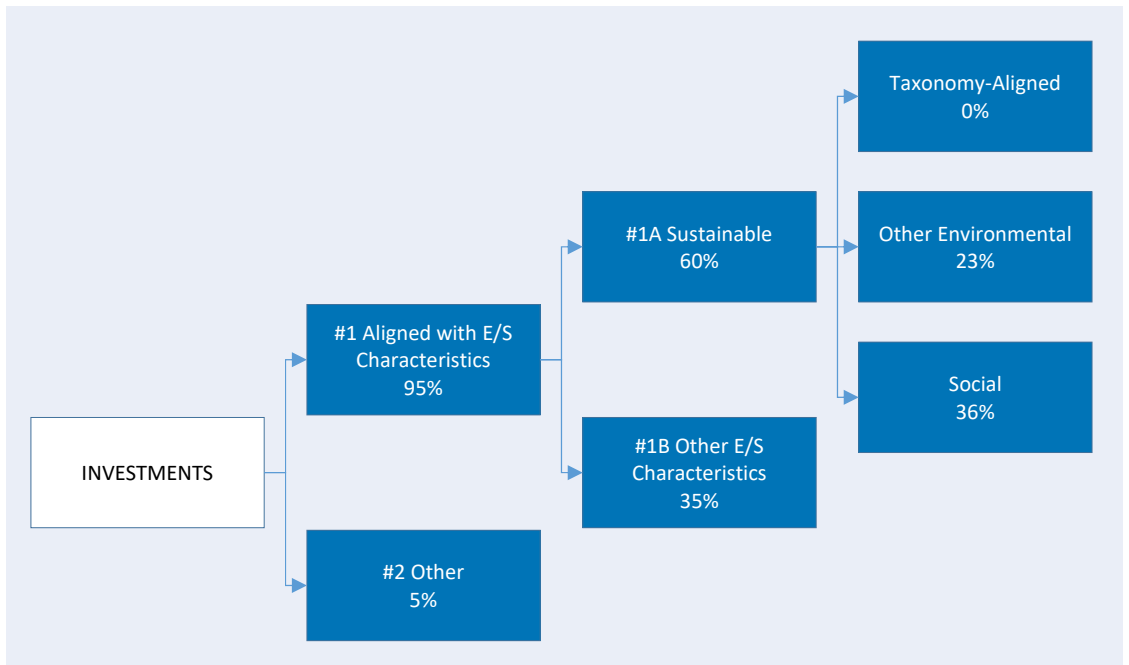

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 95%. Until 20 September 2023, the Fund maintained a higher overall sustainability score than the Swiss Leaders Index and from 21 September 2023 the Fund maintained a positive absolute sustainability score, and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that were invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net

“impact” that an issuer may create in terms of social and environmental “costs” or “benefits”. It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 60% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 23% was invested in sustainable investments with an environmental objective and 36% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund’s portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders’ proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders’ proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both “costs” and “benefits”.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	24.70
Health Care	Health Care Equipment & Services	6.27
Health Care	Financial Services	0.56
Financial	Insurance	10.52
Financial	Financial Services	8.80
Financial	Banking	0.42
Consumer Staples	Food, Beverage & Tobacco	14.87
Industrial	Capital Goods	7.62
Industrial	Transportation	1.88
Industrial	Commercial & Professional Services	0.83
Materials	Materials	7.02
Consumer Discretionary	Consumer Durables & Apparel	5.98
Consumer Discretionary	Automobiles & Components	0.10
Cash	Cash	5.33
Information Technology	Technology Hardware & Equipment	2.90
Information Technology	Semiconductors & Semiconductor Equipment	0.46
Communication Services	Telecommunication Services	1.74

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

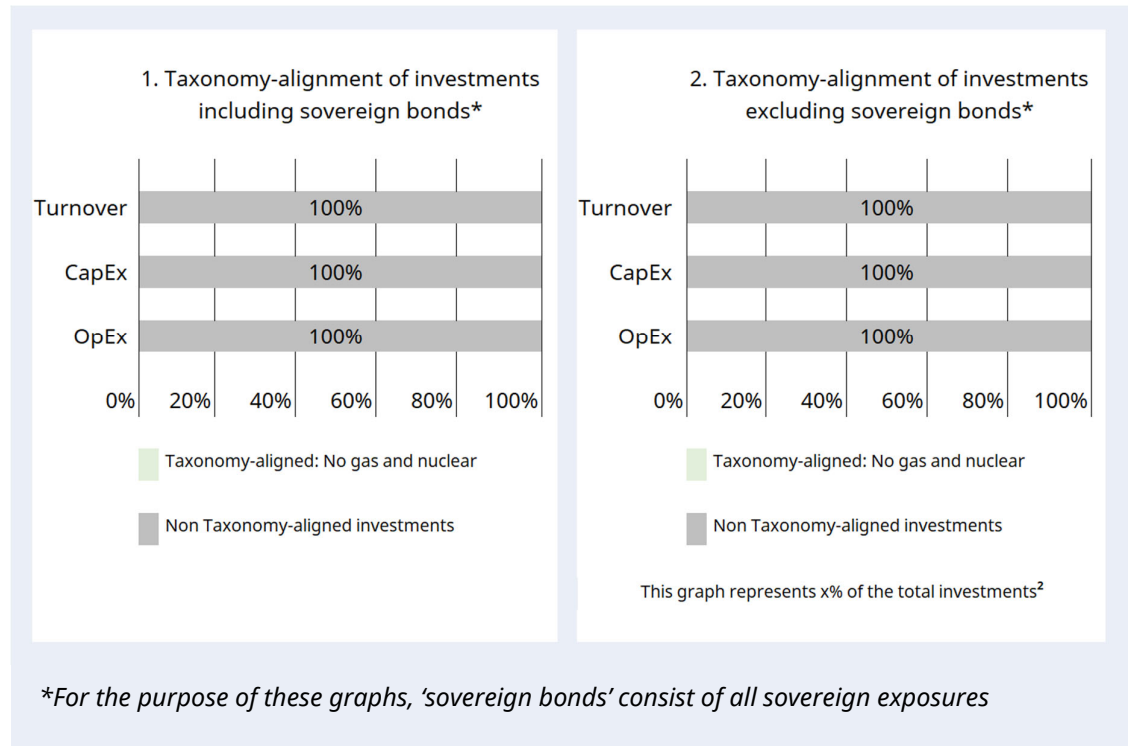

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 23%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 36%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Swiss Small & Mid Cap Equity
Legal Entity Identifier : VBUW7DMTWG11EOSYCC70

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 81% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund's characteristic to maintain a higher overall sustainability score than the benchmark changed to maintain a positive absolute sustainability score during the reference period.

Until 20 September 2023, the Fund maintained a higher overall sustainability score than the Swiss Performance Index Extra, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six-month period until 20 September 2023 was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

From 21 September 2023, the Fund maintained a positive absolute sustainability score, based on Schroders' proprietary tool. This means that the Fund's weighted average score over a rolling four-month period up to the end of the reference period was higher than zero, based on month-end data.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

Until 20 September 2023, the Fund's sustainability score was 3.2% and the benchmark's sustainability score was 3.1%.

From 21 September 2023, the positive absolute sustainability score until the end of the reference period was 2.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions

- High Salaries
- Innovation
- Medicine
- Power Provision

Until 20 September 2023, the Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Swiss Leaders Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Swiss Performance Index Extra in Schroders' proprietary tool over a rolling six-month period until 20 September 2023, based on month-end data.

From 21 September 2023, the Investment Manager monitored compliance with the characteristic to maintain a positive absolute sustainability score by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool over a rolling four-month period up to the end of the reference period, based on month-end data.

The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 81% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	81
Aug 2022 - Dec 2022	79

Sustainability score

This table details the Fund's sustainability score, year on year

Period	Fund (%)
Jan 2023 - Dec 2023	3.0
Jan 2022 - Dec 2022	3.7

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to

the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the

engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Schroders exclusions regarding:
 - Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
 - UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including biodiversity challenges in the Energy sector, and climate & Net Zero commitments for held companies within the Utilities sector. These engagements related to PAIs 7 (Negatively affecting biodiversity-sensitive areas) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	6
Corporate Governance	3
Human Capital Management	2
Natural Capital and Biodiversity	1
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
SCHINDLER HOLDING AG PARTICIPATING CERTIFICATES CHF0.10	Industrial	5.08	Switzerland
STRAUMANN HOLDING AG CHF0.01	Health Care	4.76	Switzerland
BALOISE HOLDING AG CHF0.10 (REGISTERED)	Financial	4.34	Switzerland
TECAN GROUP AG CHF0.10 (REGISTERED)	Health Care	4.21	Switzerland
LINDT & SPRUENGLI AG PARTICIPATING CERTIFICATES CHF10	Consumer Staples	3.95	Switzerland
BKW SA NPV	Utilities	3.48	Switzerland
COMET HOLDING AG CHF1 (REGISTERED)	Information Technology	3.38	Switzerland
HELVETIA HOLDING AG-REG CHF0.1	Financial	3.20	Switzerland
JULIUS BAER GROUP LIMITED CHF0.02	Financial	3.12	Switzerland
SIG COMBIBLOC GROUP	Materials	3.03	Switzerland
VZ HOLDING AG CHF0.25	Financial	3.02	Switzerland
FORBO HOLDINGS AG CHF0.10 (REGISTERED)	Industrial	2.88	Switzerland
DAETWYLER HOLDING AG CHF0.05 (BEARER)	Industrial	2.67	Switzerland
GALENICA SANTE LIMITED NPV 144A	Health Care	2.67	Switzerland
THE SWATCH GROUP AG CHF0.45 (REGISTERED)	Consumer Discretionary	2.66	Switzerland

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. Until 20 September 2023, the Fund maintained a higher overall sustainability score than the Swiss Performance Index Extra and from 21 September 2023 the Fund maintained a positive absolute sustainability score, and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that were invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net

“impact” that an issuer may create in terms of social and environmental “costs” or “benefits”. It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 81% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 30% was invested in sustainable investments with an environmental objective and 51% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both “costs” and “benefits”.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	28.40
Industrial	Transportation	2.05
Industrial	Commercial & Professional Services	1.48
Financial	Financial Services	8.39
Financial	Insurance	7.54
Financial	Banking	3.47
Health Care	Health Care Equipment & Services	8.82
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	5.72
Health Care	Financial Services	1.23
Consumer Staples	Food, Beverage & Tobacco	10.66
Information Technology	Technology Hardware & Equipment	6.01
Information Technology	Software & Services	1.54
Information Technology	Semiconductors & Semiconductor Equipment	0.88
Consumer Discretionary	Consumer Durables & Apparel	4.30
Consumer Discretionary	Automobiles & Components	0.37
Utilities	Utilities	3.48
Materials	Materials	3.03
Real Estate	Real Estate Management & Development	1.63
Cash	Cash	0.64
Communication Services	Media & Entertainment	0.34

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

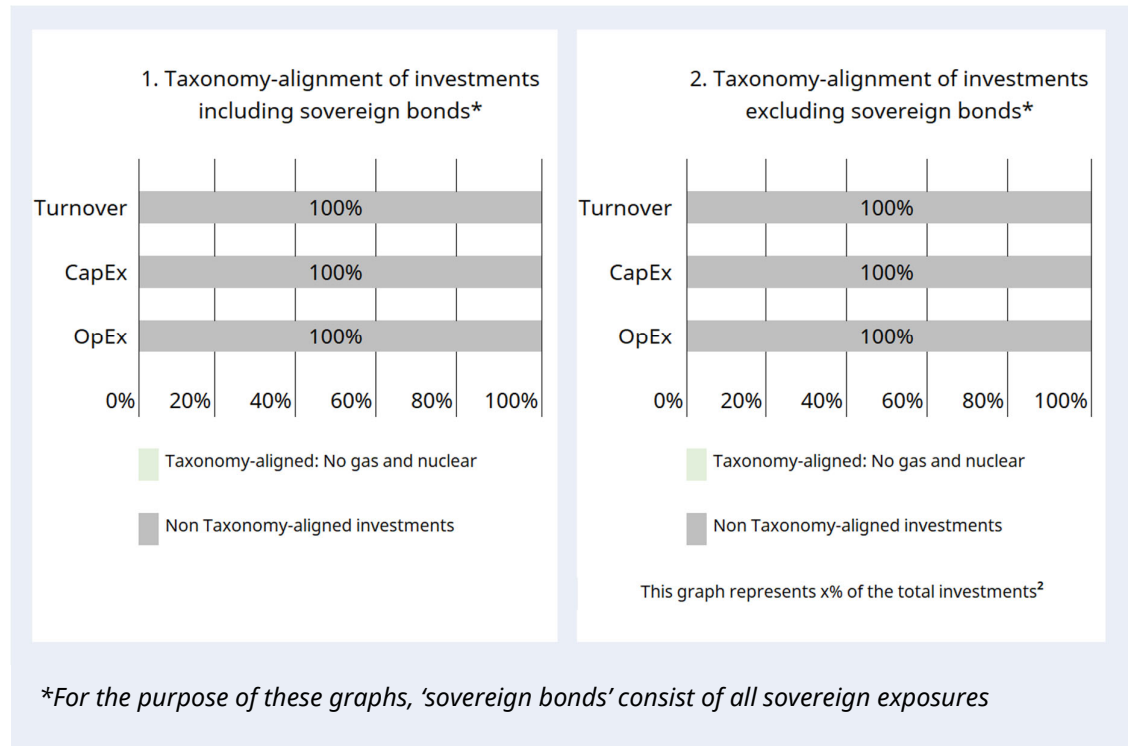

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 30%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 51%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF US Small & Mid-Cap Equity
Legal Entity Identifier : 9NVHRLTYJON1ZJWFO660

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the S&P Mid Cap 400 Lagged (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.5% and the benchmark's sustainability score for the reference period was -1.5%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Sanitation

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the S&P Mid Cap 400 Lagged (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the S&P Mid Cap 400 Lagged (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 58% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	58
Aug 2022 - Dec 2022	57

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.5	-1.5
Jan 2022 - Dec 2022	1.4	-0.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain

(suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural

capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on

such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology.

We reviewed the PAI data in the PAI dashboard on a monthly basis during the reference period and flagged adverse impacts of PAIs relevant to our strategy which may be of concern.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1,2,3,6. In reference to PAI 12 and 13, we engaged with a company in the financial sector.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	18
Corporate Governance	14
Natural Capital and Biodiversity	3
Human Rights	1
Diversity and Inclusion	1
Human Capital Management	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
MASIMO CORPORATION COMMON STOCK USD0.001	Health Care	2.01	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference

period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 96%. The Fund maintained a higher overall sustainability score than the S&P Mid Cap 400 Lagged (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 58% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 25% was invested in sustainable investments with an environmental objective and 33% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	10.92
Industrial	Commercial & Professional Services	9.26
Industrial	Transportation	1.90
Information Technology	Software & Services	6.36
Information Technology	Technology Hardware & Equipment	5.96
Information Technology	Semiconductors & Semiconductor Equipment	4.03
Health Care	Health Care Equipment & Services	8.08
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	5.61
Financial	Insurance	8.01
Financial	Banking	3.70
Financial	Financial Services	1.92
Consumer Discretionary	Consumer Discretionary Distribution & Retail	4.30
Consumer Discretionary	Consumer Services	3.39
Consumer Discretionary	Consumer Durables & Apparel	1.22
Consumer Discretionary	Automobiles & Components	1.18
Materials	Materials	5.86
Real Estate	Equity Real Estate Investment Trusts (REITs)	4.78
Energy	Oil & Gas Exploration & Production	1.73
Energy	Oil & Gas Refining & Marketing	0.71
Energy	Oil & Gas Equipment & Services	0.71
Energy	Oil & Gas Storage & Transportation	0.36
Cash	Cash	3.44
Communication Services	Media & Entertainment	2.99
Utilities	Utilities	1.63
Utilities	Gas Utilities	0.91
Consumer Staples	Food, Beverage & Tobacco	1.03

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

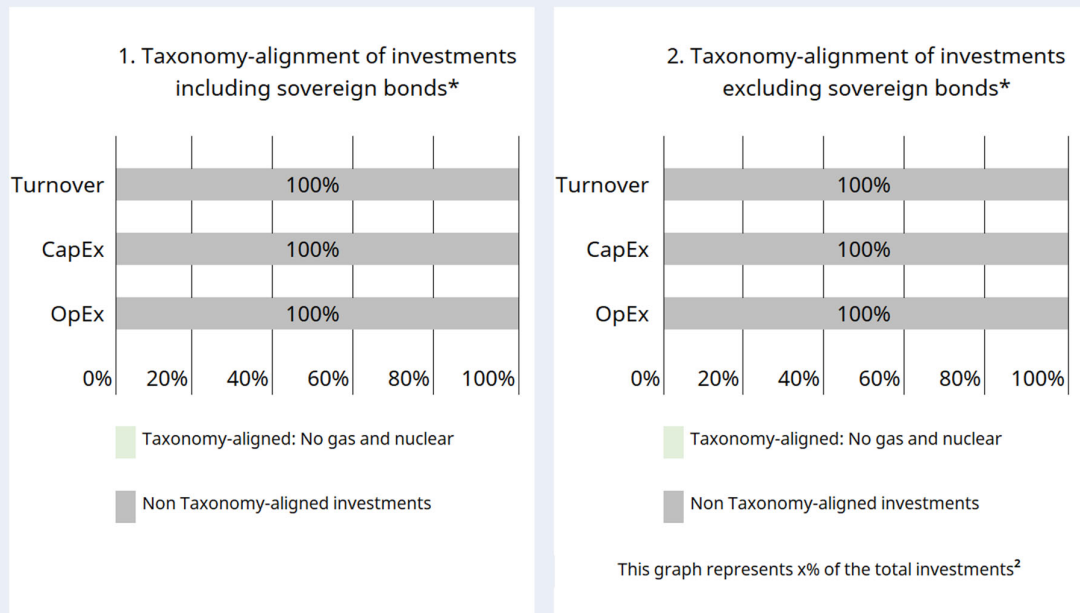

Taxonomy-aligned activities are expressed as a share of:

- **turnover**
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 25%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 33%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF US Smaller Companies Impact

Legal Entity Identifier : RHJGQ85DVCNQ0T8OGL26

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 35%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: 58%	<input type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

Until 30 June 2023 the Fund invested at least 75% of its assets, and from 1 July 2023 at least 90% of its assets, in sustainable investments. The Fund invested in small-sized US companies that the Investment Manager expected to contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs, and to deliver returns to shareholders over the long term. The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which was cash.

The Investment Manager selected companies from a universe of eligible companies that were determined as meeting the Investment Manager's impact criteria. The impact criteria included an assessment of the company's contribution to the UN SDGs. This means that the extent to which companies deliver a direct or indirect positive impact to society in order to advance the UN SDGs together with the impact that these actions could have on a company's value were considered in the assessment of companies.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

• *How did the sustainability indicators perform?*

The Fund invested 93% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used a revenue based approach in this assessment by considering whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure contributed to an environmental and/or social objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the impact contribution at an investee company level. In particular, the Investment Manager assessed a company's contribution to the UN SDGs. The Investment Manager selected companies that derived a certain amount of their revenues from activity associated with one or more UN SDGs and that were expected to have a certain amount of average daily liquidity. Companies whose financial statements did not provide a comprehensive revenue breakdown were assessed on the basis of direct engagement. A company's assessment considered a number of factors, including, but not limited to, a company's positive contributions to and negative externalities on society, how and to what degree a company's activities relate to the UN SDGs, a company's management's commitment to sustainability, and a company's actions towards its employees, customers, suppliers and the environment.

As at the end of the reference period, the companies in the Fund were aligned with the following four key impact areas; (1) 41% in health and wellness; (2) 23% in inclusion and diversity; (3) 18% in sustainable infrastructure; and (4) 18% in responsible consumption and production.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on

an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within this exclusionary criteria.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	93
Jan 2022 - Dec 2022	95

Key impact areas

This table details the alignment with the following four key impact areas, year on year.

Period	(1) Health and wellness	(2) Inclusion and diversity	(3) Sustainable infrastructure	(4) Responsible consumption
Jan 2023 - Dec 2023	41%	23%	18%	18%
Jan 2022 - Dec 2022	37%	22%	29%	12%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager’s approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portfolio, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more ‘global norms’ thereby causing significant environmental or social harm; these companies comprised Schroders’ ‘global norms’ breach list. Schroders’ determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding

Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions. Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portfolio. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 2, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption,

labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology.

We reviewed the PAI data in the PAI dashboard on a monthly basis during the reference period and flagged adverse impacts of PAIs relevant to our strategy which may be of concern.

PAIs were also considered post-investment through engagement where the investment manager

engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1,2,3,6. In reference to PAI 12 and 13, we engaged with a company in the financial sector.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	8
Climate Change	6
Diversity and Inclusion	2
Natural Capital and Biodiversity	1
Human Capital Management	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

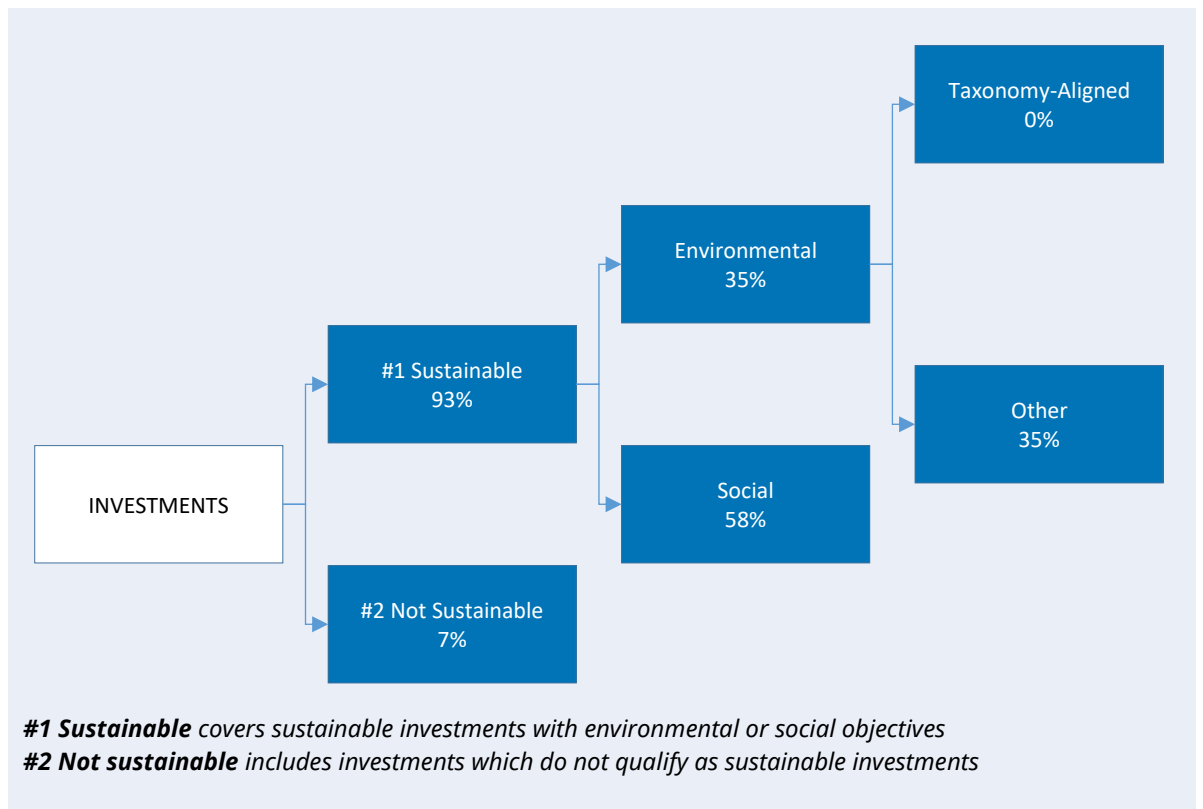

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in small-sized US companies that the Investment Manager expected to contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs, and to deliver returns to shareholders over the long term.

The Fund invested 93% of its assets in sustainable investments. This percentage represents the average

of the reference period, based on quarter-end data. Within this, 35% was invested in sustainable investments with an environmental objective and 58% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

• ***In which economic sectors were the investments made?***

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Health Care	Health Care Equipment & Services	14.18
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	9.06
Information Technology	Software & Services	7.91
Information Technology	Semiconductors & Semiconductor Equipment	6.08
Information Technology	Technology Hardware & Equipment	5.59
Industrial	Commercial & Professional Services	11.23
Industrial	Capital Goods	8.17
Materials	Materials	12.72
Financial	Insurance	4.87
Financial	Banking	3.95
Cash	Cash	5.17
Consumer Staples	Food, Beverage & Tobacco	3.92
Consumer Discretionary	Consumer Durables & Apparel	2.87
Consumer Discretionary	Automobiles & Components	0.47
Utilities	Utilities	2.39
Real Estate	Equity Real Estate Investment Trusts (REITs)	1.40

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

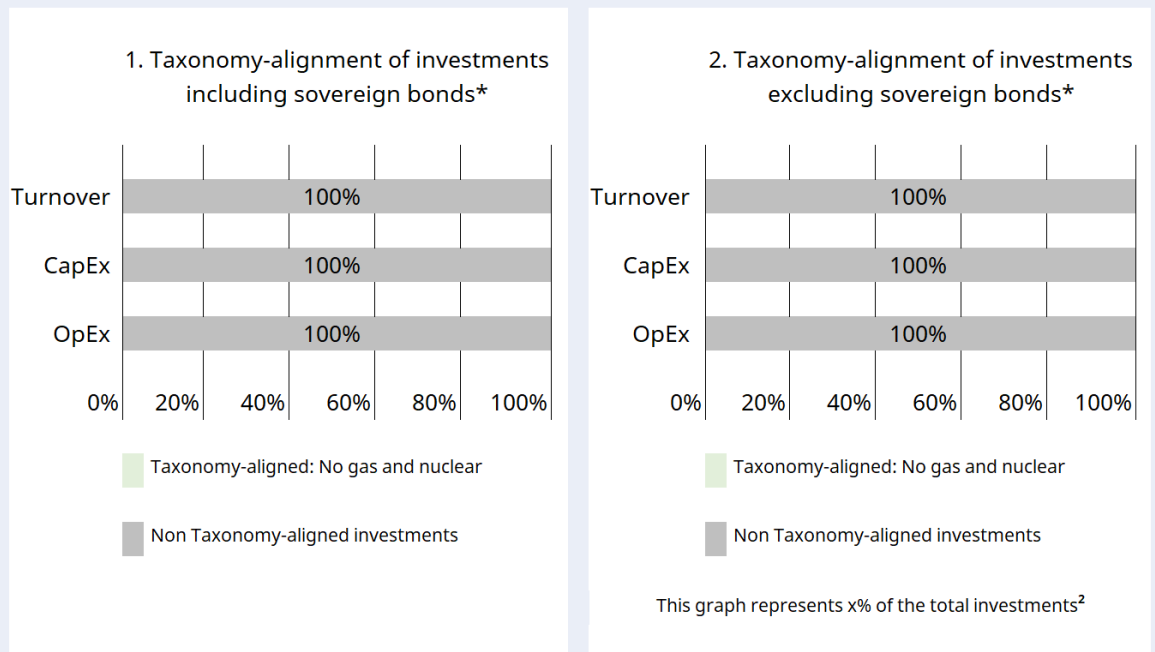

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

• **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 35%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 58%.

• **What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

Minimum safeguards were applied where relevant to investments by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to attain the sustainable investment objective of the Fund were the following:

- Until 30 June 2023 the Fund invested at least 75% of its assets, and from 1 July 2023 at least 90 of its assets in small-sized US companies that the Investment Manager expected to contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs, and to deliver returns to shareholders over the long term.
- The Fund invested in companies that did not cause significant environmental or social harm.
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies.
- The investment manager divested from a recruitment company because their Diversity, Equity & Inclusion division was not communicating separate results meaning the Investment Manager could not track this metric.
- The investment manager engaged with a sustainable timber company on the role that the company plays in upholding and expanding industry leading sustainable forestry practices. This prompted engagement with multiple stakeholders including the forest certification entity, ESG rating providers and a paper packaging company also held in the Fund.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This question is not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF QEP Global Core
Legal Entity Identifier : DKBB2F7UTNGYHT4AM790

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 52% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI World (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.7% and the benchmark's sustainability score for the reference period was -2.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Donations
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI World (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI World (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 52% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	52
Aug 2022 - Dec 2022	46

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	0.7	-2.9
Jan 2022 - Dec 2022	-1.2	-4.7

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based

on the monetary value of the sum donated;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain

(suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural

capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on

such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. Within the proprietary sustainability framework applied within the Fund's quantitative investment process, the following aspects were taken into account:

Greenhouse gas emissions, greenhouse gas intensity of investment companies (including carbon footprint), exposure to companies active in the fossil fuel sector: PAI 1,2, 3 and 4.

Activities negatively affecting biodiversity sensitive areas, emissions to water, hazardous waste: PAI 7, 8 and 9.

Unadjusted gender pay gap, board diversity: PAI 12 and 13.

All PAI indicators were monitored via Schroders' PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, engagements were carried out across a range of holdings. Investee companies were engaged with on the subject of climate change, where we sought to understand a range of companies' transition to net zero and the strategies and policies in place to manage decarbonisation efforts. These engagements relate to PAI 1, 2, 3, 4, 5 and 6.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Diversity and Inclusion	16
Climate Change	166
Corporate Governance	58
Natural Capital and Biodiversity	40
Human Rights	30
Human Capital Management	29

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
APPLE INCORPORATED COMMON STOCK NPV	Information Technology	5.00	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI World (Net TR) Index and so the Fund's investments that were scored

by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 52% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 26% was invested in sustainable investments with an environmental objective and 26% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash and derivatives, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	10.31
Information Technology	Technology Hardware & Equipment	6.50
Information Technology	Semiconductors & Semiconductor Equipment	6.16
Financial	Banking	6.30
Financial	Financial Services	5.94
Financial	Insurance	3.03
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	9.95
Health Care	Health Care Equipment & Services	2.51
Consumer Discretionary	Consumer Discretionary Distribution & Retail	5.06
Consumer Discretionary	Automobiles & Components	2.64
Consumer Discretionary	Consumer Durables & Apparel	2.01
Consumer Discretionary	Consumer Services	1.84
Industrial	Capital Goods	7.11
Industrial	Commercial & Professional Services	2.32
Industrial	Transportation	1.34
Consumer Staples	Food, Beverage & Tobacco	3.78
Consumer Staples	Household & Personal Products	3.17
Consumer Staples	Consumer Staples Distribution & Retail	0.89
Communication Services	Media & Entertainment	5.35
Communication Services	Telecommunication Services	1.17
Communication Services	Consumer Discretionary Distribution & Retail	0.29
Energy	Integrated Oil & Gas	3.59
Energy	Oil & Gas Exploration & Production	1.17
Energy	Oil & Gas Equipment & Services	0.04
Energy	Oil & Gas Refining & Marketing	0.01
Materials	Materials	3.40
Materials	Industrial Gases	0.45
Cash Equivalents	Treasury Bills	1.36
Cash	Cash	1.07
Cash	Margin Cash	0.09
Utilities	Utilities	0.92
Utilities	Gas Utilities	0.04
Real Estate	Equity Real Estate Investment Trusts (REITs)	0.20
Real Estate	Real Estate Management & Development	0.01
Derivatives	FX Derivatives	-0.01

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 26%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 26%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash and derivatives, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schrodgers' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schrodgers' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schrodgers' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schrodgers' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager applied a Schroders' proprietary governance assessment within the quantitative investment process to assess good governance practices of investee companies in the investment universe; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

SFDR Periodic Report (continued)

Reference Period: 1 January 2023 - 31 December 2023

- *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF QEP Global ESG
Legal Entity Identifier : 549300Z3MJ4K5RFG8R15

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 57% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.5% and the benchmark's sustainability score for the reference period was -2.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Contraception
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI AC World (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI AC World (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 57% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 40% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	57
Aug 2022 - Dec 2022	58

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.5	-2.9
Jan 2022 - Dec 2022	1.9	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of

contraceptives. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >0% revenue from thermal coal mining and >0% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. Within the proprietary sustainability framework applied within the Fund’s quantitative investment process, the following aspects were taken into account:

Greenhouse gas emissions, greenhouse gas intensity of investment companies (including carbon footprint), exposure to companies active in the fossil fuel sector: PAI 1,2, 3 and 4.

Activities negatively affecting biodiversity sensitive areas, emissions to water, hazardous waste: PAI 7, 8 and 9.

Unadjusted gender pay gap, board diversity: PAI 12 and 13.

All PAI indicators were monitored via Schrodgers’ PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, engagements were carried out

across a range of holdings. Investee companies were engaged with on the subject of climate change, where we sought to understand a range of companies' transition to net zero and the strategies and policies in place to manage decarbonisation efforts. These engagements relate to PAI 1, 2, 3, 4, 5 and 6.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	109
Corporate Governance	43
Natural Capital and Biodiversity	28
Human Capital Management	23
Human Rights	22
Diversity and Inclusion	13

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index and so the Fund's investments that were

scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 57% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 32% was invested in sustainable investments with an environmental objective and 25% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	11.09
Information Technology	Semiconductors & Semiconductor Equipment	6.78
Information Technology	Technology Hardware & Equipment	4.66
Financial	Financial Services	7.91
Financial	Banking	6.63
Financial	Insurance	2.53
Industrial	Capital Goods	9.34
Industrial	Commercial & Professional Services	5.13
Industrial	Transportation	0.49
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	10.31
Health Care	Health Care Equipment & Services	1.97
Consumer Discretionary	Consumer Discretionary Distribution & Retail	3.76
Consumer Discretionary	Consumer Services	2.75
Consumer Discretionary	Automobiles & Components	2.13
Consumer Discretionary	Consumer Durables & Apparel	1.19
Consumer Staples	Household & Personal Products	4.15
Consumer Staples	Food, Beverage & Tobacco	3.47
Consumer Staples	Consumer Staples Distribution & Retail	0.65
Communication Services	Media & Entertainment	2.66
Communication Services	Telecommunication Services	1.69
Communication Services	Consumer Discretionary Distribution & Retail	0.38
Energy	Integrated Oil & Gas	3.27
Energy	Oil & Gas Exploration & Production	0.87
Energy	Oil & Gas Refining & Marketing	0.43
Materials	Materials	2.42
Materials	Industrial Gases	0.08
Cash	Cash	2.37
Cash	Margin Cash	0.08
Utilities	Utilities	0.62
Utilities	Gas Utilities	0.18
Derivatives	FX Derivatives	0.01

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 32%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 25%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager applied a Schroders' proprietary governance assessment within the quantitative investment process to assess good governance practices of investee companies in the investment universe; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF QEP Global ESG ex Fossil Fuels
Legal Entity Identifier : 5493006C79R4D3IXSD97

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 59% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World ex Energy (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.9% and the benchmark's sustainability score for the reference period was -2.7%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Contraception
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI AC World ex Energy (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI AC World ex Energy (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 59% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 40% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	59
Aug 2022 - Dec 2022	60

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.9	-2.7
Jan 2022 - Dec 2022	2.4	-4.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of

contraceptives. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >0% revenue from thermal coal mining and >0% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. Within the proprietary sustainability framework applied within the Fund’s quantitative investment process, the following aspects were taken into account:

Greenhouse gas emissions, greenhouse gas intensity of investment companies (including carbon footprint), exposure to companies active in the fossil fuel sector: PAI 1,2, 3 and 4.

Activities negatively affecting biodiversity sensitive areas, emissions to water, hazardous waste: PAI 7, 8 and 9.

Unadjusted gender pay gap, board diversity: PAI 12 and 13.

All PAI indicators were monitored via Schroders’ PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, engagements were carried out

across a range of holdings. Investee companies were engaged with on the subject of climate change, where we sought to understand a range of companies' transition to net zero and the strategies and policies in place to manage decarbonisation efforts. These engagements relate to PAI 1, 2, 3, 4, 5 and 6.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	98
Corporate Governance	42
Natural Capital and Biodiversity	27
Human Capital Management	23
Human Rights	22
Diversity and Inclusion	13

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

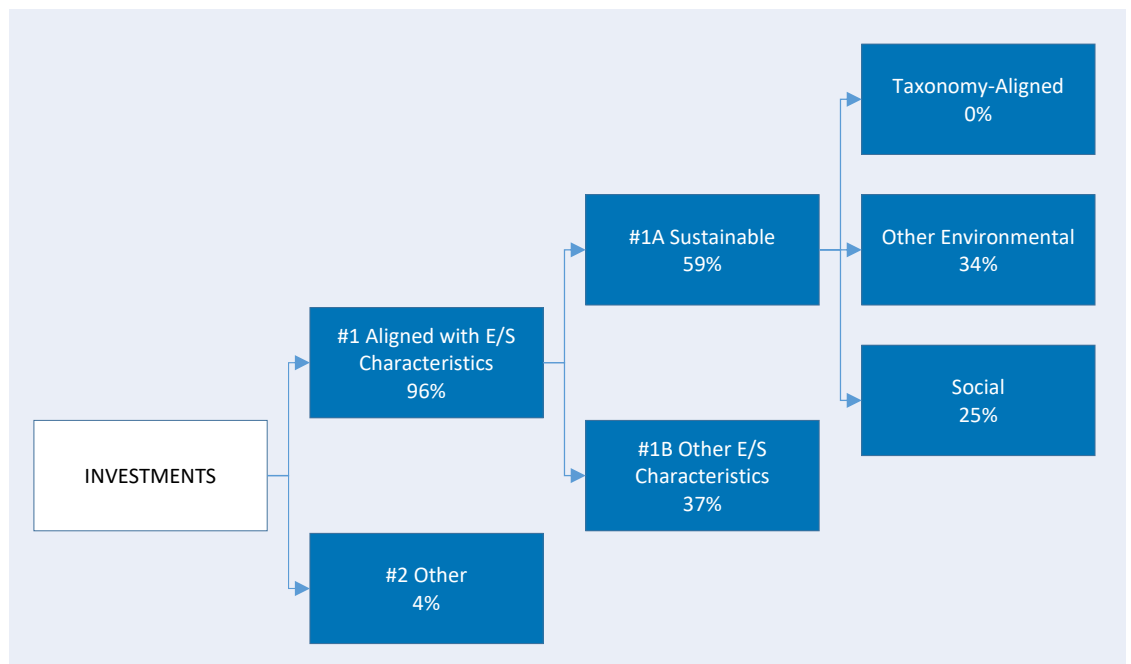

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 96%. The Fund maintained a higher overall

sustainability score than the MSCI AC World ex Energy (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 59% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 34% was invested in sustainable investments with an environmental objective and 25% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	11.68
Information Technology	Semiconductors & Semiconductor Equipment	7.09
Information Technology	Technology Hardware & Equipment	4.94
Financial	Financial Services	8.31
Financial	Banking	6.68
Financial	Insurance	2.59
Industrial	Capital Goods	9.34
Industrial	Commercial & Professional Services	5.41
Industrial	Transportation	0.53
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	10.68
Health Care	Health Care Equipment & Services	2.04
Consumer Discretionary	Consumer Discretionary Distribution & Retail	4.04
Consumer Discretionary	Consumer Services	2.79
Consumer Discretionary	Automobiles & Components	2.23
Consumer Discretionary	Consumer Durables & Apparel	1.34
Consumer Staples	Household & Personal Products	4.29
Consumer Staples	Food, Beverage & Tobacco	3.53
Consumer Staples	Consumer Staples Distribution & Retail	0.27
Communication Services	Media & Entertainment	2.74
Communication Services	Telecommunication Services	1.79
Communication Services	Consumer Discretionary Distribution & Retail	0.38
Cash	Cash	2.90
Cash	Margin Cash	0.13
Materials	Materials	2.25
Materials	Industrial Gases	0.07
Collective Investments	Exchange Traded Funds	1.33
Utilities	Utilities	0.61

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 34%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 25%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager applied a Schroders' proprietary governance assessment within the quantitative investment process to assess good governance practices of investee companies in the investment universe; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF QEP Global Quality
Legal Entity Identifier : AOE3GPC0XP7JH5DJTH02

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.0% and the benchmark's sustainability score for the reference period was -2.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Contraception
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI AC World (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI AC World (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 58% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	58
Aug 2022 - Dec 2022	57

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.0	-2.9
Jan 2022 - Dec 2022	-0.5	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of

contraceptives. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain

(suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural

capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on

SFDR Periodic Report (continued)

Reference Period: 1 January 2023 - 31 December 2023

such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. Within the proprietary sustainability framework applied within the Fund's quantitative investment process, the following aspects were taken into account:

Greenhouse gas emissions, greenhouse gas intensity of investment companies (including carbon footprint), exposure to companies active in the fossil fuel sector: PAI 1,2, 3 and 4.

Activities negatively affecting biodiversity sensitive areas, emissions to water, hazardous waste: PAI 7, 8 and 9.

Unadjusted gender pay gap, board diversity: PAI 12 and 13.

All PAI indicators were monitored via Schroders' PAI dashboard.

SFDR Periodic Report (continued)

Reference Period: 1 January 2023 - 31 December 2023

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, engagements were carried out across a range of holdings. Investee companies were engaged with on the subject of climate change, where we sought to understand a range of companies' transition to net zero and the strategies and policies in place to manage decarbonisation efforts. These engagements relate to PAI 1, 2, 3, 4, 5 and 6.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	94
Corporate Governance	36
Human Rights	25
Natural Capital and Biodiversity	23
Human Capital Management	21
Diversity and Inclusion	9

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
APPLE INCORPORATED COMMON STOCK NPV	Information Technology	0.97	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index and so the Fund's investments that were

scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 58% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 32% was invested in sustainable investments with an environmental objective and 26% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

SFDR Periodic Report (continued)

Reference Period: 1 January 2023 - 31 December 2023

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	10.96

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

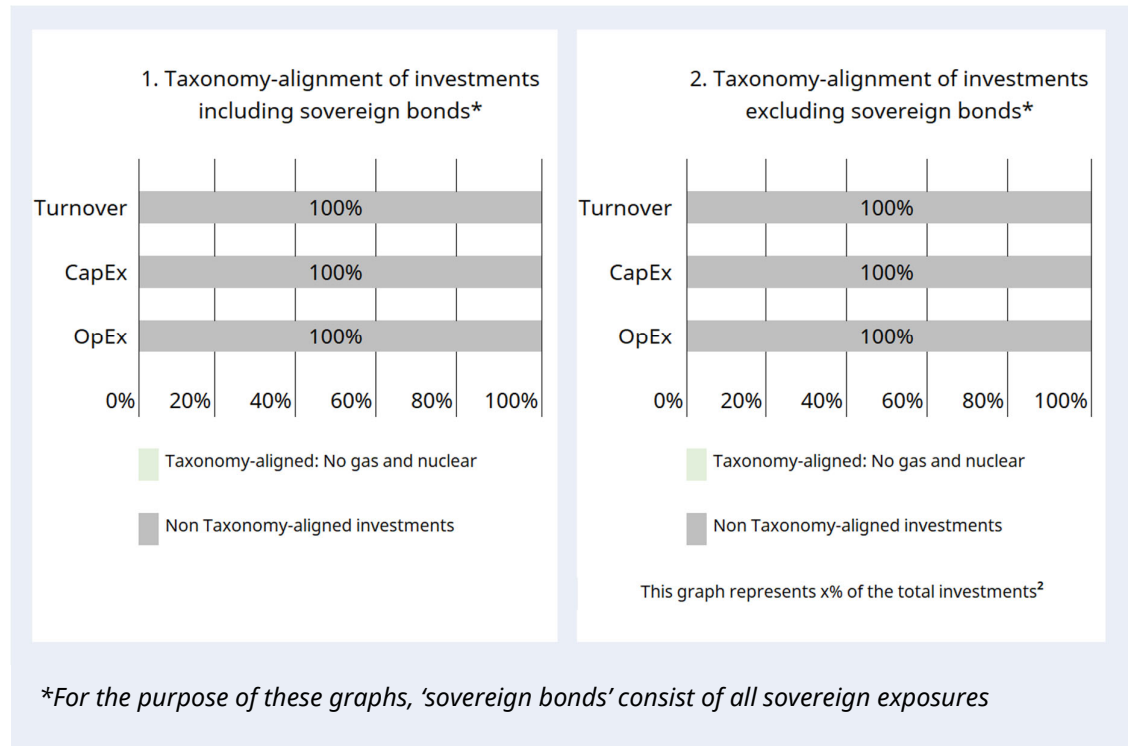

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 32%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 26%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager applied a Schroders' proprietary governance assessment within the quantitative investment process to assess good governance practices of investee companies in the investment universe; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

SFDR Periodic Report (continued)

Reference Period: 1 January 2023 - 31 December 2023

- *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Sustainable Emerging Markets ex. China Synergy
Legal Entity Identifier : 54930047EQ4A8M663C94

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 53% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets ex. China (NDR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.6% and the benchmark's sustainability score for the reference period was -3.4%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- High Salaries
- Medicine
- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI Emerging Markets ex. China (NDR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI Emerging Markets ex. China (NDR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 53% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• *...and compared to previous periods?*

As this is the first year of reporting, this question is not applicable.

• *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the

provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en-lu/lu/professional/fund-centre>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >0% revenue from thermal coal mining and >5% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We

identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. Within the proprietary sustainability framework applied within the Fund’s quantitative investment process, the following aspects were taken into account:

Greenhouse gas emissions, greenhouse gas intensity of investment companies (including carbon footprint), exposure to companies active in the fossil fuel sector: PAI 1,2, 3 and 4.

Activities negatively affecting biodiversity sensitive areas, emissions to water, hazardous waste: PAI 7, 8 and 9.

Unadjusted gender pay gap, board diversity: PAI 12 and 13.

All PAI indicators were monitored via Schroders’ PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, engagements were carried out across a range of holdings. Investee companies were engaged with on the subject of climate change,

SFDR Periodic Report (continued)

Reference Period: 1 January 2023 - 31 December 2023

where we sought to understand a range of companies' transition to net zero and the strategies and policies in place to manage decarbonisation efforts. These engagements relate to PAI 1, 2, 3, 4, 5 and 6.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	49
Corporate Governance	21
Natural Capital and Biodiversity	9
Diversity and Inclusion	7
Human Rights	5
Human Capital Management	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

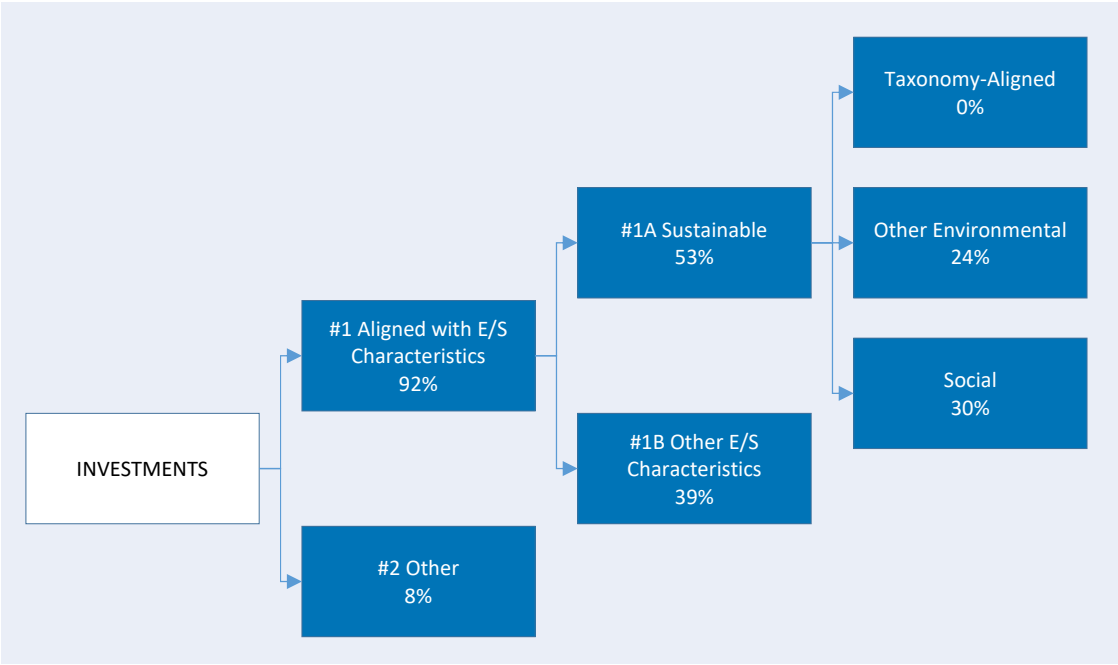

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to -92%. The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets ex. China (NDR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average

during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 53% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 24% was invested in sustainable investments with an environmental objective and 30% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

SFDR Periodic Report (continued)

Reference Period: 1 January 2023 - 31 December 2023

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Technology Hardware & Equipment	12.99
Information Technology	Semiconductors & Semiconductor Equipment	12.74
Information Technology	Software & Services	1.67
Financial	Banking	19.58
Financial	Financial Services	2.66
Financial	Insurance	1.42
Cash Equivalents	Treasury Bills	7.50
Collective Investments	Exchange Traded Funds	6.03
Communication Services	Telecommunication Services	5.00
Communication Services	Media & Entertainment	0.74
Industrial	Capital Goods	3.57
Industrial	Transportation	1.48
Industrial	Commercial & Professional Services	0.19
Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.37
Consumer Discretionary	Consumer Durables & Apparel	1.38
Consumer Discretionary	Automobiles & Components	1.25
Consumer Discretionary	Consumer Services	0.15
Consumer Staples	Food, Beverage & Tobacco	1.82
Consumer Staples	Household & Personal Products	1.35
Consumer Staples	Consumer Staples Distribution & Retail	1.21
Materials	Materials	4.16
Energy	Oil & Gas Refining & Marketing	1.82
Energy	Integrated Oil & Gas	1.06
Energy	Oil & Gas Exploration & Production	0.31
Energy	Oil & Gas Storage & Transportation	0.19
Energy	Energy	0.11
Health Care	Health Care Equipment & Services	1.84
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	1.53
Cash	Cash	1.27
Cash	Margin Cash	0.59
Utilities	Utilities	0.90
Utilities	Gas Utilities	0.24
Real Estate	Real Estate Management & Development	0.79
Real Estate	Equity Real Estate Investment Trusts (REITs)	0.10

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

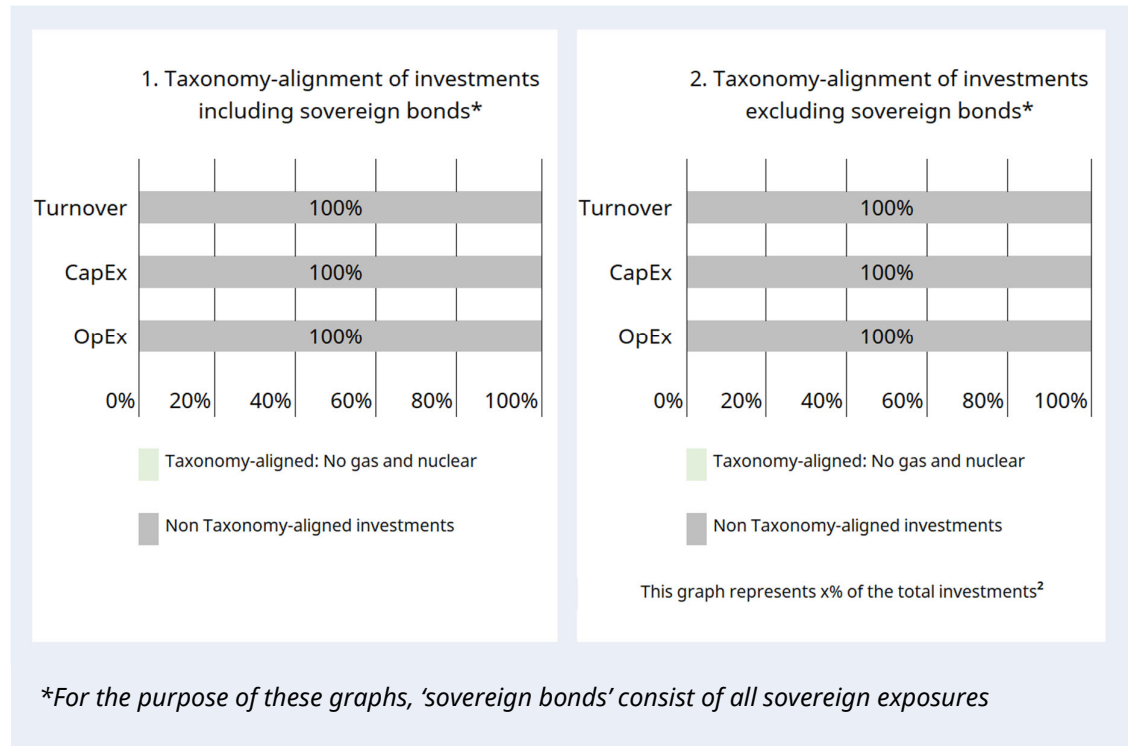

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 24%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 30%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Sustainable Emerging Markets Synergy
Legal Entity Identifier : 54930003F8X2ITJLMY54

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 55% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets (NDR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.5% and the benchmark's sustainability score for the reference period was -2.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Contraception
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI Emerging Markets (NDR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI Emerging Markets (NDR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 55% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	55
Aug 2022 - Dec 2022	51

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.5	-2.9
Jan 2022 - Dec 2022	2.8	-3.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of

contraceptives. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >0% revenue from thermal coal mining and >5% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. Within the proprietary sustainability framework applied within the Fund’s quantitative investment process, the following aspects were taken into account:

Greenhouse gas emissions, greenhouse gas intensity of investment companies (including carbon footprint), exposure to companies active in the fossil fuel sector: PAI 1,2, 3 and 4.

Activities negatively affecting biodiversity sensitive areas, emissions to water, hazardous waste: PAI 7, 8 and 9.

Unadjusted gender pay gap, board diversity: PAI 12 and 13.

All PAI indicators were monitored via Schroders’ PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, engagements were carried out

across a range of holdings. Investee companies were engaged with on the subject of climate change, where we sought to understand a range of companies' transition to net zero and the strategies and policies in place to manage decarbonisation efforts. These engagements relate to PAI 1, 2, 3, 4, 5 and 6.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	81
Corporate Governance	27
Human Rights	14
Natural Capital and Biodiversity	13
Diversity and Inclusion	8
Human Capital Management	7

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	8.46	Taiwan
SAMSUNG ELECTRONICS COMPANY LIMITED KRW100	Information Technology	6.26	South Korea

HDFC BANK LIMITED INR1	Financial	0.69	India

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

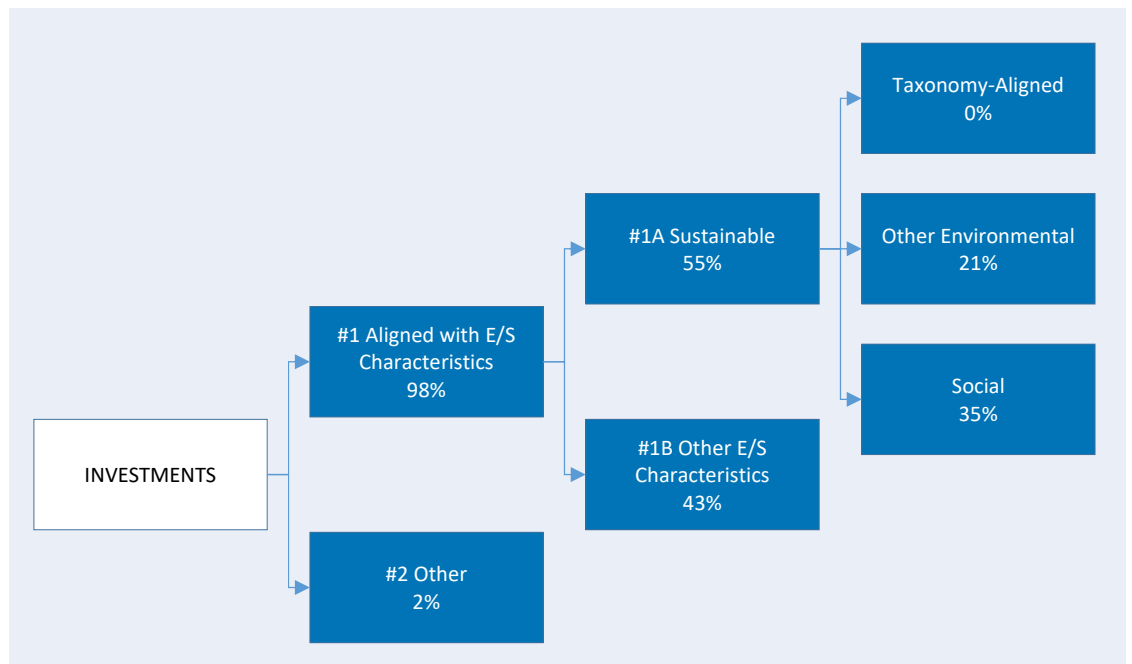

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets (NDR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the

reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 55% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 21% was invested in sustainable investments with an environmental objective and 35% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

SFDR Periodic Report (continued)

Reference Period: 1 January 2023 - 31 December 2023

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	12.15
Information Technology	Technology Hardware & Equipment	10.24
Information Technology	Software & Services	1.41
Financial	Banking	16.81
Financial	Insurance	3.76
Financial	Financial Services	1.18
Consumer Discretionary	Consumer Discretionary Distribution & Retail	7.79
Consumer Discretionary	Automobiles & Components	2.35
Consumer Discretionary	Consumer Durables & Apparel	1.78
Consumer Discretionary	Consumer Services	1.33
Communication Services	Media & Entertainment	7.80
Communication Services	Telecommunication Services	4.13
Communication Services	Consumer Discretionary Distribution & Retail	0.05
Industrial	Capital Goods	4.61
Industrial	Transportation	1.68
Industrial	Commercial & Professional Services	0.28
Consumer Staples	Food, Beverage & Tobacco	2.49
Consumer Staples	Household & Personal Products	1.64
Consumer Staples	Consumer Staples Distribution & Retail	1.12
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	2.12
Health Care	Health Care Equipment & Services	1.97
Cash Equivalents	Treasury Bills	3.90
Materials	Materials	2.99
Energy	Oil & Gas Refining & Marketing	1.41
Energy	Integrated Oil & Gas	0.74
Energy	Oil & Gas Exploration & Production	0.32
Energy	Oil & Gas Storage & Transportation	0.17
Energy	Energy	0.06
Energy	Oil & Gas Equipment & Services	0.03
Cash	Cash	1.14
Cash	Margin Cash	0.33
Utilities	Utilities	0.86
Utilities	Gas Utilities	0.41
Real Estate	Real Estate Management & Development	0.93
Real Estate	Equity Real Estate Investment Trusts (REITs)	0.02

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

SFDR Periodic Report (continued)

Reference Period: 1 January 2023 - 31 December 2023

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

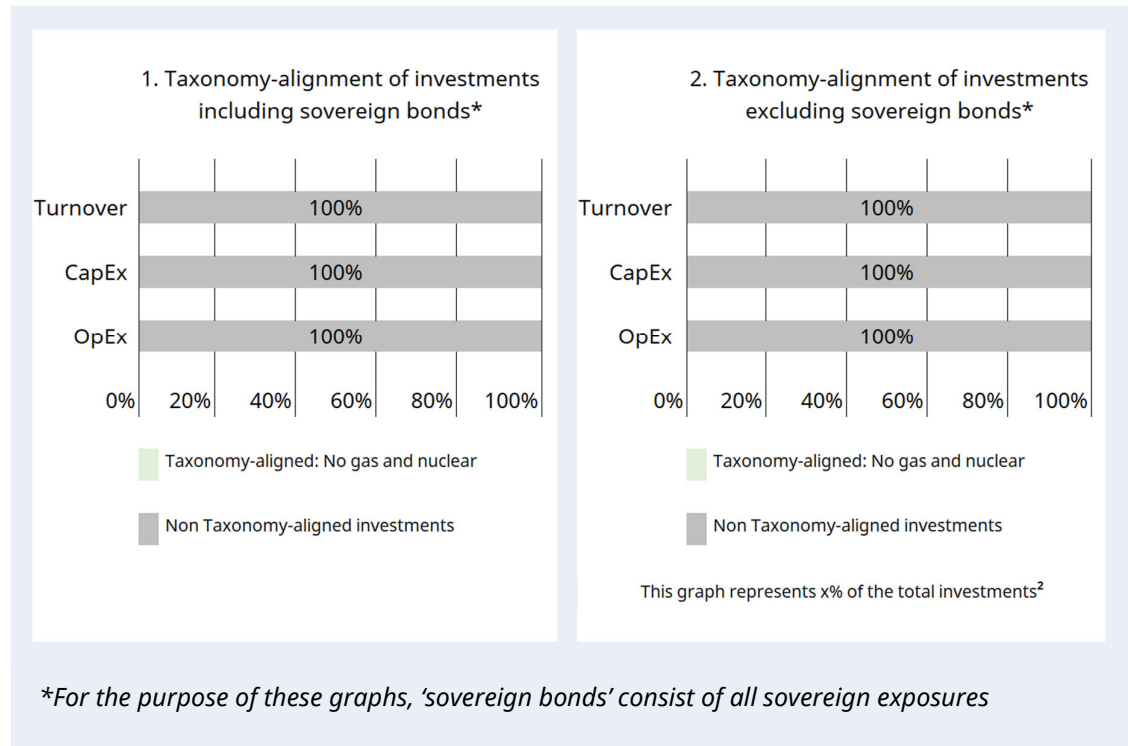

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 21%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 35%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Emerging Markets Multi Asset
Legal Entity Identifier : 549300J365DGAM4OUL36

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 36% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the 50% MSCI Emerging Market Index (USD), 16.7% JPM EMBI Index EM Hard Currency (USD), 16.7% JPM GBI Emerging Market Index - EM Local (USD), 16.7% JPM CEMB Index (USD), based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -0.9% and the benchmark's sustainability score for the reference period was -3.3%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Power Provision

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the 50% MSCI Emerging Market Index (USD), 16.7% JPM EMBI Index EM Hard Currency (USD), 16.7% JPM GBI Emerging Market Index - EM Local (USD), 16.7% JPM CEMB Index (USD) by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the 50% MSCI Emerging Market Index (USD), 16.7% JPM EMBI Index EM Hard Currency (USD), 16.7% JPM GBI Emerging Market Index - EM Local (USD), 16.7% JPM CEMB Index (USD) in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 36% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	36
Jan 2022 - Dec 2022	38

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	-0.9	-3.3
Jan 2022 - Dec 2022	-0.9	-3.5

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the

stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.
- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN

Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant investment manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations) – applied to Sustainable Investments.
- Companies that derive revenues above certain thresholds from activities related to thermal coal: (PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) – applied to relevant underlying strategies.

Compliance with these thresholds was monitored via the Investment Manager's portfolio compliance framework.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying investment managers. Where applicable, based on the underlying strategies and the relevant investment manager's own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint.

Examples of PAIs captured via this approach included PAI 1 (GHG emissions, PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

During the reference period, we engaged with a Hong Kong based regional life insurer invested by the portfolio to understand its decarbonisation strategy and targets. We noted that the life insurer had made a lot of progress to understand baseline emissions, and have set targets to be validated by SBTi. The company also recognised the importance of integrating ESG/climate factors in product underwriting and liability management, and partnered with industry working groups to study best practices. Overall, the life insurer had devoted significant efforts in understanding ESG risks, building their ESG capabilities, and setting targets to net zero across its operational and investment sides of the business.

In addition, there was a further engagement with a Latin American steel producer, to learn about their approach to the main standards being considered by steel companies, including the Science Based Targets initiative (SBTi), Responsible Steel, and the Steel Climate Standard. We were keen to understand their preference for any of these methodologies and whether their clients or stakeholders have expressed a preference for any particular standard.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	79
Corporate Governance	24
Human Rights	15
Natural Capital and Biodiversity	15
Human Capital Management	11
Diversity and Inclusion	8

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	3.85	Taiwan

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schrodgers Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

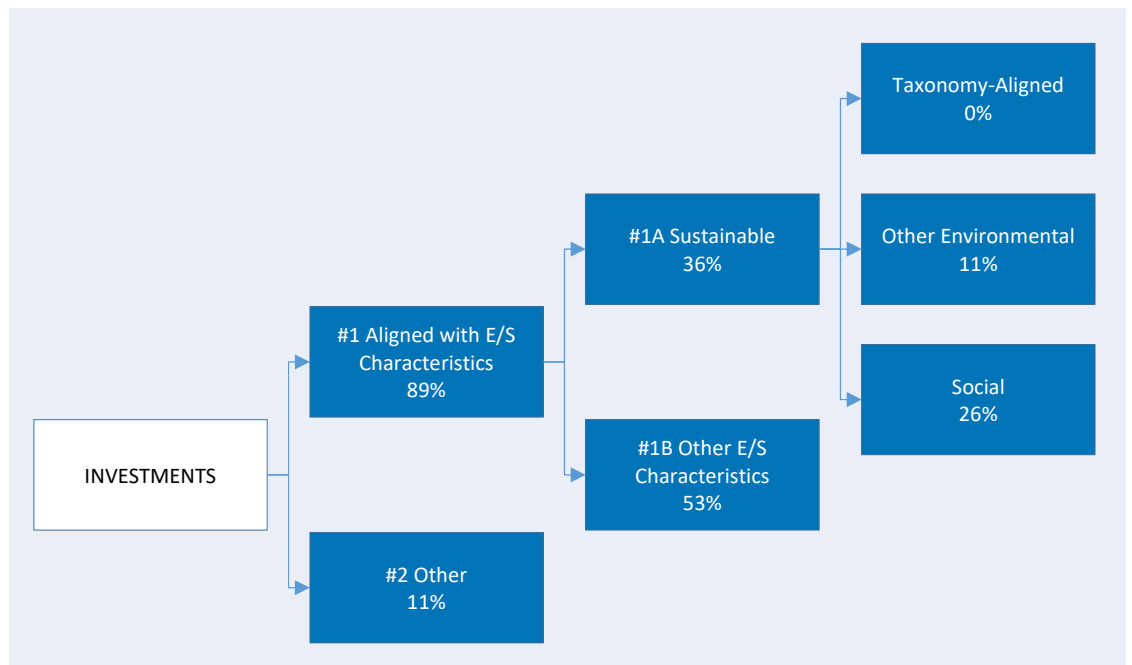

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 89%. The Fund maintained a higher overall sustainability score than the 50% MSCI Emerging Market Index (USD), 16.7% JPM EMBI Index EM Hard Currency (USD), 16.7% JPM GBI Emerging Market Index - EM Local (USD), 16.7% JPM CEMB Index (USD) and so the Fund's investments that were scored by Schrodgers' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such

individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 36% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 11% was invested in sustainable investments with an environmental objective and 26% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Technology & Electronics	3.77
Industrial	Capital Goods	3.23
Industrial	Transportation	2.85
Industrial	Leisure	1.83
Industrial	Retail	1.54
Industrial	Integrated Energy	1.50
Industrial	Automotive	0.92
Industrial	Basic Industry	0.86
Industrial	Consumer Goods	0.38
Industrial	Gas-Distribution	0.17
Industrial	Healthcare	0.08
Industrial	Oil Refining & Marketing	0.08
Industrial	Real Estate	0.07
Industrial	Commercial & Professional Services	0.06
Industrial	Telecommunications	0.04
EMD Sovereign		16.81
Foreign Sovereign		11.68
Financial	Banking	6.03
Financial	Financial Services	2.23
Financial	Insurance	1.89
Information Technology	Semiconductors & Semiconductor Equipment	4.91
Information Technology	Technology Hardware & Equipment	2.40
Information Technology	Software & Services	1.19
Collective Investments	Unit Trusts	7.85
Consumer Discretionary	Consumer Discretionary Distribution & Retail	3.33
Consumer Discretionary	Consumer Services	1.42
Consumer Discretionary	Consumer Durables & Apparel	1.32
Consumer Discretionary	Automobiles & Components	1.10
Communication Services	Media & Entertainment	2.87
Communication Services	Telecommunication Services	1.42

Sector	Sub-Sector	% Assets
Materials	Materials	3.59
Consumer Staples	Food, Beverage & Tobacco	1.59
Consumer Staples	Consumer Staples Distribution & Retail	0.88
Consumer Staples	Household & Personal Products	0.27
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	1.48
Health Care	Health Care Equipment & Services	0.70
Energy	Integrated Oil & Gas	1.45
Energy	Oil & Gas Refining & Marketing	0.46
Energy	Oil & Gas Exploration & Production	0.25

Sovereign (Developed)		0.57
Real Estate	Real Estate Management & Development	0.56
Government Guaranteed		0.27
Agency		0.24
Cash Equivalents	Treasury Bills	0.08
Derivatives	FX Derivatives	0.05

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 11%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 26%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• How does the reference benchmark differ from a broad market index?

This question is not applicable.

• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

This question is not applicable.

• How did this financial product perform compared with the reference benchmark?

This question is not applicable.

• How did this financial product perform compared with the broad market index?

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Diversified Growth
Legal Entity Identifier : UILX05PRFETP7OQYCX05

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 37% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR), Thomson Reuters Global Convertible Bonds Index (hedged to EUR), based on the Investment Manager's rating system. The component benchmarks (which are each respectively a broad market index) are not reference benchmarks for the purposes of the environmental and social characteristics promoted by the Fund. The blend evolved during the reference period in line with the actual asset allocation of the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.0% and the benchmark's sustainability score for the reference period was -3.5%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- Education
- High Salaries

- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the bespoke benchmark by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the benchmark in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 37% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	37
Jan 2022 - Dec 2022	47

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	2.0	-3.5
Jan 2022 - Dec 2022	1.8	-3.9

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

From 1 March 2023, the Fund could invest up to 100% of its assets in open ended investment Funds including other Schroder Funds. As a result, due to our calculation methodology the figures are lower for this year as they may not take into account investments in other Funds.

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of

communities through telecommunication services;

- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow

the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps

being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC

violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant investment manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) – applied to long and short exposures.
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations) – applied to Sustainable Investments.
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

Other PAIs were considered via active ownership, which was performed indirectly via the underlying investment managers. Where applicable, based on the underlying strategies and the relevant investment manager's own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint.

Examples of PAIs captured via this approach included PAI 1 (GHG emissions), PAI 2 (Carbon footprint),

PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

For example, during the reference period there was an engagement with an American pharmaceutical company held by the Fund to discuss climate alignment, decarbonisation and minimising emissions. The key topics discussed related to renewable energy procurement, Scope 3 emissions reduction, supplier targets, and offsets. As a next step, we would like to see more information on Scope 3 emissions relating to downstream activities.

In addition, there was a further engagement with an American bank, focusing on workforce diversity and inclusion. Following our letter to the company on human capital management disclosures, the company requested a follow up meeting to understand the request and discuss their approach. We noted that the company already meets many of our expectations on disclosure, appreciating that it provides information such as promotion and retention rates in a disaggregated manner. We sought to understand why some metrics around ethnicity inclusion appear to have worsened over the past year, which the company explained was largely a factor of the service side of the business, as well as poaching of senior individuals. We also questioned why the company had not set broader targets or goals publicly on D&I or HCM, beyond its aim for 100% pay equity. We agreed to have a follow up discussion with the company on financial inclusion and executive compensation. PAIs are also considered post-investment through engagement where the investment manager engages in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. We engage with an investee company on their commitment to mitigating climate change, which relates to PAIs 1, 2 and 3.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	249
Corporate Governance	103
Natural Capital and Biodiversity	54
Human Capital Management	40
Human Rights	40
Diversity and Inclusion	21

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the

environmental or social characteristics, which is equal to 80%. The Fund maintained a higher overall sustainability score than the bespoke benchmark (blend of the named benchmarks as described above) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 37% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 22% was invested in sustainable investments with an environmental objective and 15% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Collective Investments	Unit Trusts	42.08
Collective Investments	Other	7.02
Collective Investments	Exchange Traded Funds	1.20
Industrial	Healthcare	2.74
Industrial	Telecommunications	2.31
Industrial	Automotive	1.17
Industrial	Real Estate	1.10
Industrial	Capital Goods	1.07
Industrial	Services	0.90
Industrial	Transportation	0.79
Industrial	Leisure	0.77

Derivatives	Equity Derivatives	0.09
Derivatives	FX Derivatives	0.03
Energy	Oil & Gas Refining & Marketing	0.05
Energy	Oil & Gas Exploration & Production	0.01

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector

classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 22%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 15%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and, where relevant, of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Multi-Asset Balanced

Legal Entity Identifier : N7RNP3PDV1GDWKYBBM36

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 59% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR), Thomson Reuters Global Convertible Bonds Index (hedged to EUR), based on the Investment Manager's rating system. The component benchmarks (which are each respectively a broad market index) are not reference benchmarks for the purposes of the environmental and social characteristics promoted by the Fund. The blend evolved during the reference period in line with the actual asset allocation of the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.6% and the benchmark's sustainability score for the reference period was -1.8%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- Education
- Medicine

- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the bespoke benchmark by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the benchmark in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 59% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	59
Jan 2022 - Dec 2022	59

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.6	-1.8
Jan 2022 - Dec 2022	2.0	-3.1

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of

contraceptives. Assigned in proportion to company market share of global revenue;

- Education: the estimated societal benefits of a country's education spend per school age capita;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from

activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We

recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as

sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant investment manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) – applied to long and short exposures.
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations) – applied to Sustainable Investments.
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

Other PAIs were considered via active ownership, which was performed indirectly via the underlying investment managers. Where applicable, based on the underlying strategies and the relevant investment manager's own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint.

Examples of PAIs captured via this approach included PAI 1 (GHG emissions), PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

For example, during the reference period there was an engagement with an American pharmaceutical company held by the Fund to seek clarity on progress towards climate goals. We noted that the company appears to be behind on progress for its 2030 climate goals. The company's approach appears

to be focused on upgrades during normal plant lifecycle progress, rather than upfront investment, although the company has recently committed to setting a longer-term net zero goal.

In addition, there was a further engagement with an American bank, focusing on workforce diversity and inclusion. Following our letter to the company on human capital management disclosures, the company requested a follow up meeting to understand the request and discuss their approach. We noted that the company already meets many of our expectations on disclosure, appreciating that it provides information such as promotion and retention rates in a disaggregated manner. We sought to understand why some metrics around ethnicity inclusion appear to have worsened over the past year, which the company explained was largely a factor of the service side of the business, as well as poaching of senior individuals. We also questioned why the company had not set broader targets or goals publicly on D&I or HCM, beyond its aim for 100% pay equity. We agreed to have a follow up discussion with the company on financial inclusion and executive compensation.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	164
Corporate Governance	59
Natural Capital and Biodiversity	39
Human Rights	34
Human Capital Management	32
Diversity and Inclusion	17

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
US TREASURY BOND 4% 15 Nov 2052	Sovereign (Developed)	4.60	United States
TREASURY BILL SR GOVT 0% 25 Jan 2024	Cash Equivalents	3.63	United States

TREASURY NOTE SR GOVT 3.875% 30 Apr 2025	Sovereign (Developed)	1.36	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

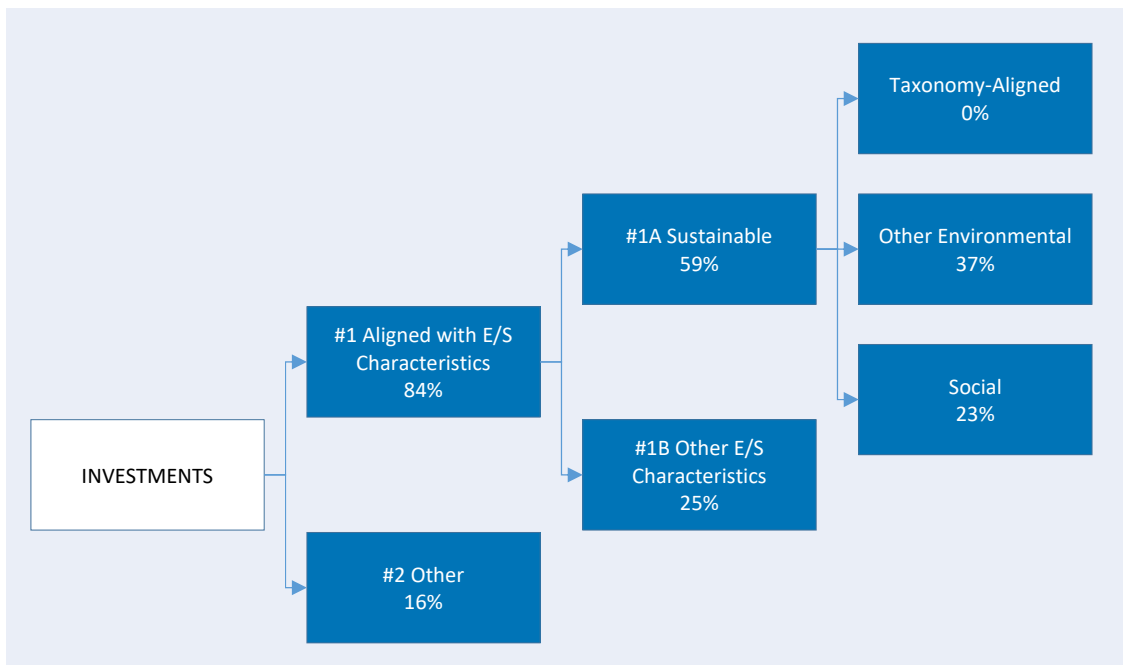

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 84%. The Fund maintained a higher overall sustainability score than the bespoke benchmark (blend of the named benchmarks as described above) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such

individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 59% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 37% was invested in sustainable investments with an environmental objective and 23% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Sovereign (Developed)		19.57
Cash Equivalents	Treasury Bills	18.01
Financial	Banking	6.72
Financial	Financial Services	5.98
Financial	Insurance	0.55
EMD Sovereign		9.77
Industrial	Capital Goods	2.48
Industrial	Healthcare	2.22
Industrial	Transportation	1.49

Derivatives	Equity Derivatives	0.04
Derivatives	Credit Derivatives	-0.02
Real Estate	Real Estate Management & Development	0.04

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

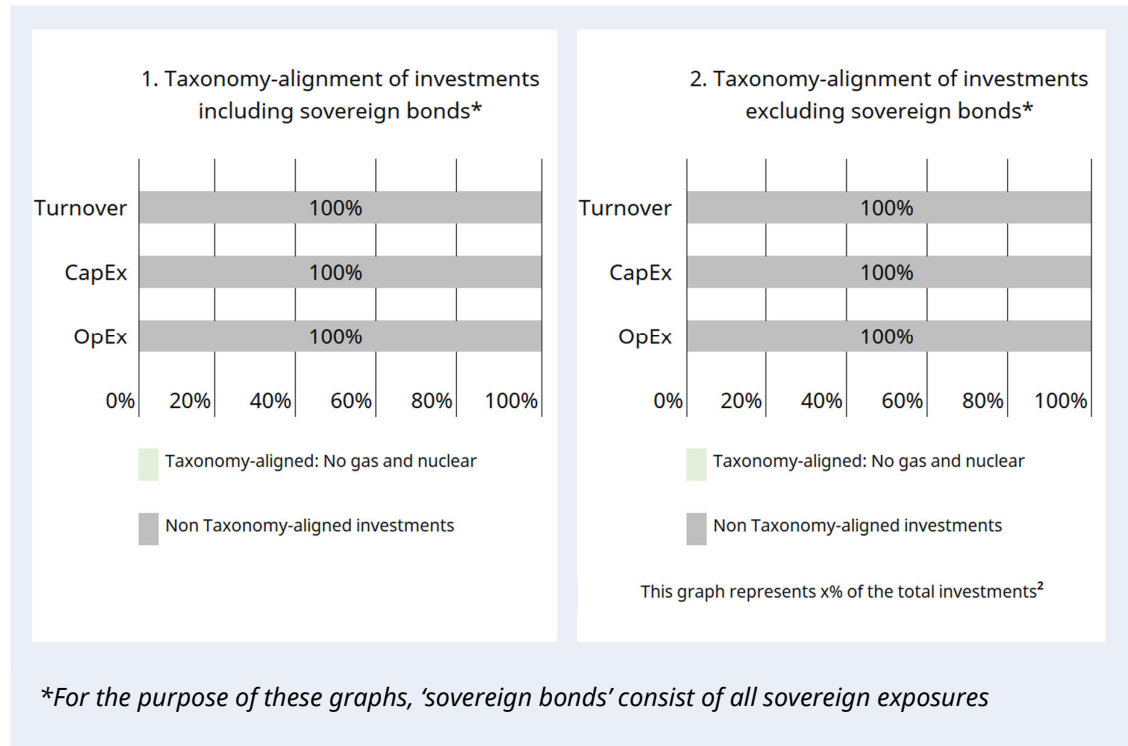

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 37%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 23%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and, where relevant, of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Multi-Asset Income

Legal Entity Identifier : 9P2R2H6H0KS8FL2XQC82

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 45% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the 30% MSCI AC World Index (USD), 40% Barclays Global Aggregate Corporate Bond Index (USD) and 30% Barclays Global High Yield excl CMBS & EMG 2% Index (USD), based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.5% and the benchmark's sustainability score for the reference period was -4.1%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- High Salaries
- Medicine
- Power Provision

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the 30% MSCI AC World Index (USD), 40% Barclays Global Aggregate Corporate Bond Index (USD) and 30% Barclays Global High Yield excl CMBS & EMG 2% Index (USD) by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the 30% MSCI AC World Index (USD), 40% Barclays Global Aggregate Corporate Bond Index (USD) and 30% Barclays Global High Yield excl CMBS & EMG 2% Index (USD) in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 45% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	45
Aug 2022 - Dec 2022	42

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	0.5	-4.1
Jan 2022 - Dec 2022	0.4	-4.5

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of

contraceptives. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not

categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption,

labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant investment manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons))
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations) – applied to Sustainable Investments.
- Companies that derive revenues above certain thresholds from activities related to thermal coal: (PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) – applied to relevant underlying strategies).

Other PAIs were considered via active ownership, which was performed indirectly via the underlying investment managers. Where applicable, based on the underlying strategies and the relevant investment manager's own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint.

Examples of PAIs captured via this approach included PAI 1 (GHG emissions), PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

For example, during the reference period there was an engagement with an American pharmaceutical company held by the Fund to seek clarity on progress towards climate goals. We noted that the company appears to be behind on progress for its 2030 climate goals. The company's approach appears to be focused on upgrades during normal plant lifecycle progress, rather than upfront investment, although the company has recently committed to setting a longer-term net zero goal.

In addition, there was a further engagement with a French pharmaceutical company focusing on corporate culture, employees and pricing. We initially had concerns with workforce turnover, but received comfort around the type of attrition, given the intended cultural change and restructuring in the organisation. The company has increased access, broadened education and are set for a 70% price cut for one of its drugs in 2024.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	246
Corporate Governance	81
Natural Capital and Biodiversity	52
Human Rights	44
Human Capital Management	40
Diversity and Inclusion	21

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

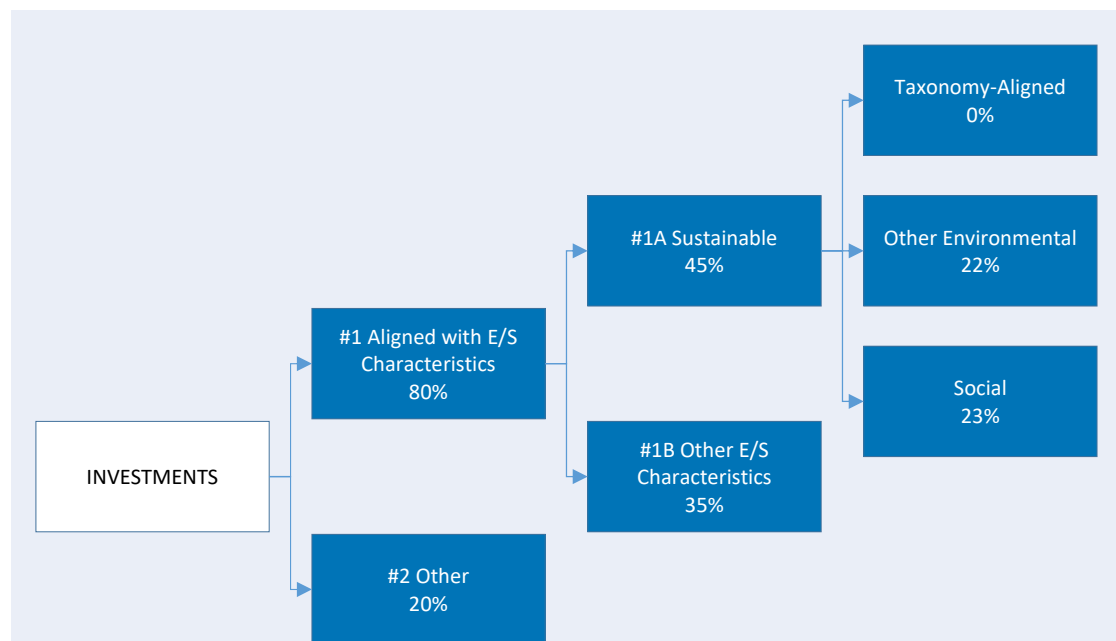

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 80%. The Fund maintained a higher overall sustainability score than the 30% MSCI AC World Index (USD), 40% Barclays Global Aggregate Corporate

Bond Index (USD) and 30% Barclays Global High Yield excl CMBS & EMG 2% Index (USD) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 45% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 22% was invested in sustainable investments with an environmental objective and 23% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	4.48
Industrial	Healthcare	4.07
Industrial	Telecommunications	3.73
Industrial	Media & Entertainment	3.02

Derivatives	FX Derivatives	-0.05

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

greenhouse gas emission levels corresponding to the best performance.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 22%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 23%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’

proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• How does the reference benchmark differ from a broad market index?

This question is not applicable.

• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics

promoted?

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Target Return
Legal Entity Identifier : 549300HN4V7MFDKU0097

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 X No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 43% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI World Index (hedged to USD), MSCI Emerging Market Index (unhedged), Bloomberg Global Aggregate Corporate Bond Index (hedged to USD), Bloomberg Global High Yield excl. CMBS & EMD 2% Index (hedged to USD), ICE BofA US Treasury Index (hedged to USD), JPM GBI Emerging Market Index - EM Local (unhedged) and JPM EMBI Index EM Hard Currency (hedged to USD), based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.3% and the benchmark's sustainability score for the reference period was -3.4%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Education
- High Salaries

- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the MSCI World Index (hedged to USD), MSCI Emerging Market Index (unhedged), Bloomberg Global Aggregate Corporate Bond Index (hedged to USD), Bloomberg Global High Yield excl. CMBS & EMD 2% Index (hedged to USD), ICE BofA US Treasury Index (hedged to USD), JPM GBI Emerging Market Index - EM Local (unhedged) and JPM EMBI Index EM Hard Currency (hedged to USD) by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI World Index (hedged to USD), MSCI Emerging Market Index (unhedged), Bloomberg Global Aggregate Corporate Bond Index (hedged to USD), Bloomberg Global High Yield excl. CMBS & EMD 2% Index (hedged to USD), ICE BofA US Treasury Index (hedged to USD), JPM GBI Emerging Market Index - EM Local (unhedged) and JPM EMBI Index EM Hard Currency (hedged to USD) in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 43% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	43
Jan 2022 - Dec 2022	43

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.3	-3.4
Jan 2022 - Dec 2022	1.4	-3.5

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by

assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.
- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate

change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

Schroders exclusions regarding:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) – applied to long and short exposures.
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations) – applied to Sustainable Investments within the portfolio.
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 4 and 5.

Compliance with these thresholds was monitored via the Investment Manager's portfolio compliance framework.

During the reference period, PAIs were also considered through integration in the investment process.

Greenhouse gas emissions, carbon footprint, Greenhouse gas intensity: PAI 1,2, &15. At the portfolio level, the Fund considered the above PAIs within their asset class valuations and return forecasts. The team incorporate climate risk in their top-down asset allocation decisioning, applying climate change adjustments to their forecasts.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying investment managers. Where applicable, based on the underlying strategies and the relevant investment manager's own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint.

Examples of PAIs captured via this approach included PAI 1 (GHG emissions, PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

For example, during the reference period, there was an engagement with a Brazilian health services company held by one of the underlying managers in the Fund on the topics of gender diversity and board diversity. There was concern about lack of female representation and independence of committees.

Management noted that there is no formal gender diversity policy, however, the company expects higher management levels naturally to become more diverse as they already have high diversity in mid-management levels and that should mature to higher levels in the mid-term.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	129
Corporate Governance	48
Natural Capital and Biodiversity	30
Human Rights	26
Human Capital Management	24
Diversity and Inclusion	12

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 77%. The Fund maintained a higher overall sustainability score than the MSCI World Index (hedged to USD), MSCI Emerging Market Index (unhedged), Bloomberg Global Aggregate Corporate Bond Index (hedged to USD), Bloomberg Global High Yield excl. CMBS & EMD 2% Index (hedged to USD), ICE BofA US Treasury Index (hedged to USD), JPM GBI Emerging Market Index - EM Local (unhedged) and JPM EMBI Index EM Hard Currency (hedged to USD) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 43% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 27% was invested in sustainable investments with an environmental objective and 16% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash and derivatives, which were treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Collective Investments	Unit Trusts	37.18
Collective Investments	Exchange Traded Funds	1.53
Cash Equivalents	Treasury Bills	6.22
Cash Equivalents	Commercial Paper	4.57

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

• **What was the share of investments made in transitional and enabling activities?**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 27%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 16%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash and derivatives, which were treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and, where relevant, of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Multi-Asset Growth and Income

Legal Entity Identifier : D57GRPRBLPPG0AOY4K34

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 48% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund's benchmark changed during the reference period.

Until 30 June 2023, the Fund maintained a higher overall sustainability score than the 25% MSCI AC World Index (USD), 25% Barclays Global High Yield excl CMBS & EMG 2% Index (USD), 12.5% Thomson Reuters Convertible Global Focus Index (USD) and 37.5% Barclays Global Aggregate Bond Index (USD), based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to 30 June 2023 was higher than the benchmark's weighted average score over the same period, based on month-end data. From 1 July 2023, the Fund maintained a higher overall sustainability score than the 30% MSCI AC World Index (USD), 30% Barclays Global High Yield excl CMBS & EMG 2% index (USD), 30% Thomson Reuters Convertible Global Focus index (USD) and 10% Barclays Global Aggregate Bond Index (USD), based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

The benchmarks (each of which is a broad market index) are not reference benchmarks for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

Until 30 June 2023, the Fund's sustainability score was 0.8% and the benchmark's sustainability score was -1.5%

From 1 July 2023, the Fund's sustainability score up to the end of the reference period was 0.5% and the benchmark's sustainability score up to the end of the reference period was -1.1%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed

positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Power Provision

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the benchmarks by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the benchmarks in Schroders' proprietary tool over a rolling six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 48% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	48
Jan 2022 - Dec 2022	49

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	0.5	-1.1
Jan 2022 - Dec 2022	-0.3	-1.5

The Fund's benchmark changed during 2023.

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each

sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises

and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant investment manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations) – applied to Sustainable Investments.
- Companies that derive revenues above certain thresholds from activities related to thermal coal: (PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) – applied to relevant underlying strategies.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying investment managers. Where applicable, based on the underlying strategies and the relevant investment manager's own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint.

Examples of PAIs captured via this approach included PAI 1 (GHG emissions, PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

For example, during the reference period there was an engagement with an American pharmaceutical company held by the Fund to seek clarity on progress towards climate goals. We noted that the company appears to be behind on progress for its 2030 climate goals. The company's approach appears to be focused on upgrades during normal plant lifecycle progress, rather than upfront investment, although the company has recently committed to setting a longer-term net zero goal.

In addition, there was a further engagement with a French pharmaceutical company focusing on corporate culture, employees and pricing. We initially had concerns with workforce turnover, but received comfort around the type of attrition, given the intended cultural change and restructuring in the organisation. The company has increased access, broadened education and are set for a 70% price cut for one of its drugs in 2024.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	169
Corporate Governance	50
Human Capital Management	32
Human Rights	31
Natural Capital and Biodiversity	24
Diversity and Inclusion	13

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 92%. Until 30 June 2023, the Fund maintained a higher overall sustainability score than the 25% MSCI AC World Index (USD), 25% Barclays Global High Yield excl CMBS & EMG 2% Index (USD), 12.5% Thomson Reuters Convertible Global Focus Index (USD) and 37.5% Barclays Global Aggregate Bond Index (USD) and from 1 July 2023 the Fund maintained a higher overall sustainability score than the 30% MSCI AC World Index (USD), 30% Barclays Global High Yield excl CMBS & EMG 2% index (USD), 30% Thomson Reuters Convertible Global Focus index (USD) and 10% Barclays Global Aggregate Bond Index (USD), and so the Fund's investments that were scored

by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 48% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 20% was invested in sustainable investments with an environmental objective and 28% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Technology & Electronics	13.65
Industrial	Leisure	7.44
Industrial	Capital Goods	5.55
Industrial	Healthcare	3.70
Industrial	Retail	3.44
Industrial	Telecommunications	3.01
Industrial	Transportation	2.66
Industrial	Basic Industry	2.45
Industrial	Automotive	2.25
Industrial	Services	2.22
Industrial	Real Estate	1.90
Industrial	Media & Entertainment	1.53
Industrial	Energy - Exploration & Production	0.98
Industrial	Gas-Distribution	0.59
Industrial	Integrated Energy	0.58
Industrial	Commercial & Professional Services	0.49
Industrial	Consumer Goods	0.32

Sovereign (Developed)		0.39
Cash Equivalents	Treasury Bills	0.12
Derivatives	Equity Derivatives	0.07
Derivatives	FX Derivatives	-0.01

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

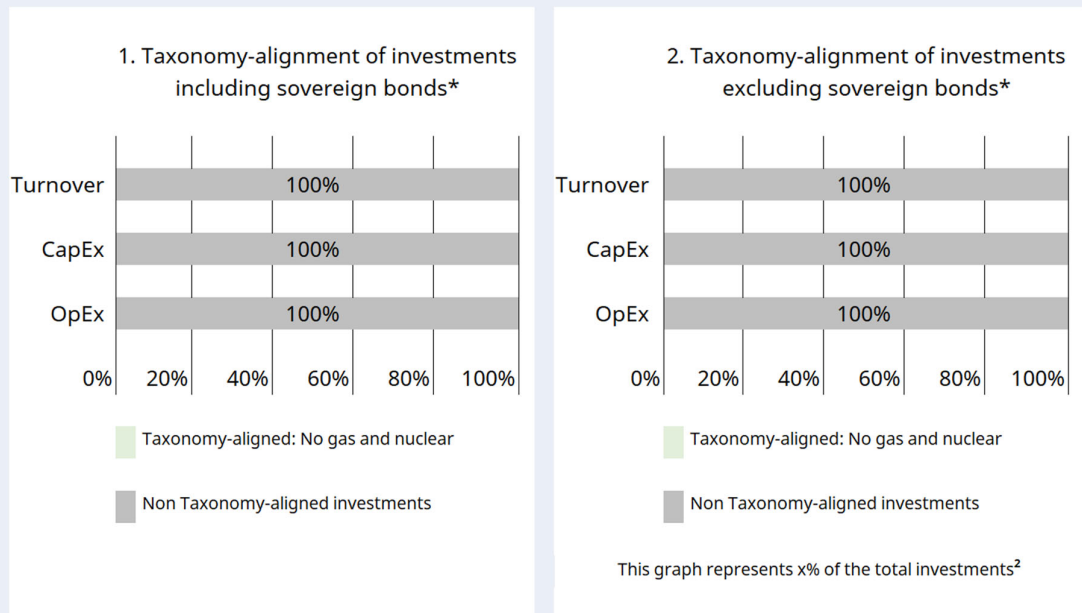

Taxonomy-aligned activities are expressed as a share of:

- **turnover**
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• ***What was the share of investments made in transitional and enabling activities?***

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• ***What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?***

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 20%.

• ***What was the share of socially sustainable investments?***

The share of sustainable investments with a social objective was 28%.

• ***What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?***

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Multi-Asset Total Return

Legal Entity Identifier : 549300NT1L407KR1IF71

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 31% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

xx

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of MSCI World Index (hedged to USD), MSCI Emerging Market Index (hedged to USD), Barclays Global Aggregate Corporate Bond Index (hedged to USD), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to USD), ICE BofA US Treasury Index (hedged to USD), JPM GBI Emerging Market Index - EM Local (hedged to USD), JPM EMBI Index EM Hard Currency (hedged to USD), Thomson Reuters Global Convertible Bonds Index (hedged to USD), based on the Investment Manager's rating system. The component benchmarks (which are each respectively a broad market index) are not reference benchmarks for the purposes of the environmental and social characteristics promoted by the Fund. The blend evolved during the reference period in line with the actual asset allocation of the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 21 September 2023 to 31 December 2023. The Fund was classified as an Article 8 fund from 21 September 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.6% and the benchmark's sustainability score for the reference period was -3.0%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Education
- High Salaries

- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the bespoke benchmark by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the benchmark in Schroders' proprietary tool over a rolling four-month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 31% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

As this is our first reporting period, this question is not applicable.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector

revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.
- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

The Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for

Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also

addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant investment manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) – applied to long and short exposures.
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational

Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations) – applied to Sustainable Investments.

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

Other PAIs were considered via active ownership, which was performed indirectly via the underlying investment managers. Where applicable, based on the underlying strategies and the relevant investment manager's own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint.

Examples of PAIs captured via this approach included PAI 1 (GHG emissions, PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

For example, during the reference period there was an engagement with an American pharmaceutical company held by the Fund to seek clarity on progress towards climate goals. We noted that the company appears to be behind on progress for its 2030 climate goals. The company's approach appears to be focused on upgrades during normal plant lifecycle progress, rather than upfront investment, although the company has recently committed to setting a longer-term net zero goal.

In addition, there was a further engagement with an American bank, focusing on workforce diversity and inclusion. Following our letter to the company on human capital management disclosures, the company requested a follow up meeting to understand the request and discuss their approach. We noted that the company already meets many of our expectations on disclosure, appreciating that it provides information such as promotion and retention rates in a disaggregated manner. We sought to understand why some metrics around ethnicity inclusion appear to have worsened over the past year, which the company explained was largely a factor of the service side of the business, as well as poaching of senior individuals. We also questioned why the company had not set broader targets or goals publicly on D&I or HCM, beyond its aim for 100% pay equity. We agreed to have a follow up discussion with the company on financial inclusion and executive compensation.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	64
Corporate Governance	17
Natural Capital and Biodiversity	14
Human Rights	8
Diversity and Inclusion	5
Human Capital Management	5

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **21 Sep 2023 to 31 Dec 2023**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schrodgers Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 87%. The Fund maintained a higher overall sustainability score than the bespoke benchmark (blend of the named benchmarks as described above) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 31% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 20% was invested in sustainable investments with an environmental objective and 11% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

xx

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Sovereign (Developed)		24.55
Industrial	Capital Goods	3.19
Industrial	Healthcare	2.69
Industrial	Media & Entertainment	1.72
Industrial	Telecommunications	1.69

Derivatives	Equity Derivatives	-0.05
Derivatives	FX Derivatives	-0.05

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:

 In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

xx

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 20%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 11%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including,

but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• How does the reference benchmark differ from a broad market index?

This question is not applicable.

• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

This question is not applicable.

• How did this financial product perform compared with the reference benchmark?

This question is not applicable.

• How did this financial product perform compared with the broad market index?

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Sustainable Conservative

Legal Entity Identifier : 5ZR2RJF583WJCCTZ8D29

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 81% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR), Thomson Reuters Global Convertible Bonds Index (hedged to EUR), based on the Investment Manager's rating system. The component benchmarks (which are each respectively a broad market index) are not reference benchmarks for the purposes of the environmental and social characteristics promoted by the Fund. The blend evolved during the reference period in line with the actual asset allocation of the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 30% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.9% and the benchmark's sustainability score for the reference period was -0.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Education
- High Salaries
- Medicine
- Sanitation

- Socio-Political Stability

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the than the bespoke benchmark by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the benchmark in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 81% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 30% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	81
Jan 2022 - Dec 2022	77

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.9	-0.9
Jan 2022 - Dec 2022	1.8	-2.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue;
- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue; and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the

stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant investment manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) – applied to long and short exposures.
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations) – applied to Sustainable Investments.
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

Other PAIs were considered via active ownership, which was performed indirectly via the underlying investment managers. Where applicable, based on the underlying strategies and the relevant investment manager's own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint.

Examples of PAIs captured via this approach included PAI 1 (GHG emissions), PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

For example, during the reference period there was an engagement with an American pharmaceutical company held by the Fund to seek clarity on progress towards climate goals. We noted that the

company appears to be behind on progress for its 2030 climate goals. The company's approach appears to be focused on upgrades during normal plant lifecycle progress, rather than upfront investment, although the company has recently committed to setting a longer-term net zero goal.

In addition, there was a further engagement with an American bank, focusing on workforce diversity and inclusion. Following our letter to the company on human capital management disclosures, the company requested a follow up meeting to understand the request and discuss their approach. We noted that the company already meets many of our expectations on disclosure, appreciating that it provides information such as promotion and retention rates in a disaggregated manner. We sought to understand why some metrics around ethnicity inclusion appear to have worsened over the past year, which the company explained was largely a factor of the service side of the business, as well as poaching of senior individuals. We also questioned why the company had not set broader targets or goals publicly on D&I or HCM, beyond its aim for 100% pay equity. We agreed to have a follow up discussion with the company on financial inclusion and executive compensation.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	151
Corporate Governance	52
Human Rights	32
Natural Capital and Biodiversity	32
Human Capital Management	26
Diversity and Inclusion	19

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
CANADA (GOVERNMENT OF) SR GOVT .5% 01 Sep 2025	Sovereign (Developed)	8.98	Canada

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

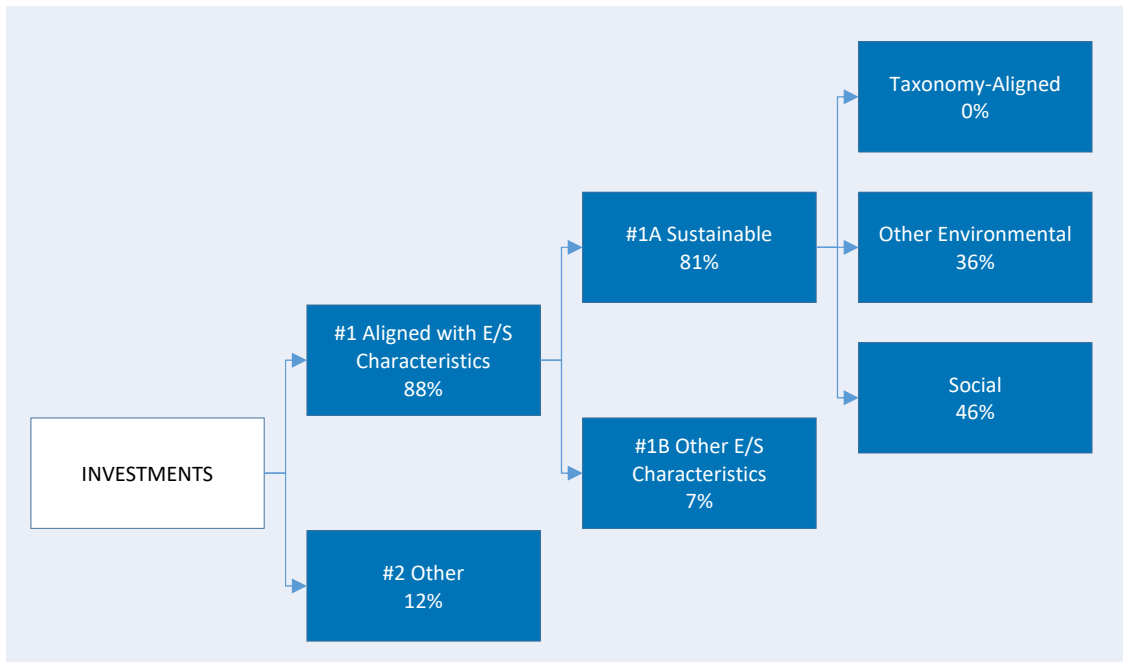

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 88%. The Fund maintained a higher overall sustainability score than the bespoke benchmark (blend of the named benchmarks as described above) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S

characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 81% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 36% was invested in sustainable investments with an environmental objective and 46% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Sovereign (Developed)		40.42
Cash Equivalents	Treasury Bills	13.12
Collective Investments	Unit Trusts	8.97
Financial	Banking	4.17
Financial	Insurance	2.38

Energy	Oil & Gas Exploration & Production	0.01
Real Estate	Real Estate Management & Development	0.07
Derivatives	FX Derivatives	-0.05

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 36%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 46%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and, where relevant, of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Sustainable Future Trends

Legal Entity Identifier : 5493002E4JUCFUL6QF10

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

|---|---|

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the 50% MSCI World EUR Hedged and 30% FTSE World Government Bond Index EUR Hedged and 20% Bloomberg Global Aggregate Corporate Index EUR Hedged, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 30% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 7.9% and the benchmark's sustainability score for the reference period was -2.2%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the 50% MSCI World EUR Hedged and 30% FTSE World Government Bond Index EUR Hedged and 20% Bloomberg Global Aggregate Corporate Index EUR Hedged by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the 50% MSCI World EUR Hedged and 30% FTSE World Government Bond Index EUR Hedged and 20% Bloomberg Global Aggregate Corporate Index EUR Hedged in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 71% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 30% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	71
Aug 2022 - Dec 2022	65

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	7.9	-2.2
Jan 2022 - Dec 2022	4.0	-2.5

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of

communities through telecommunication services;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schrodgers.com/en/sustainability/active-ownership/group-exclusions/>.
- Schrodgers became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schrodgers considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schrodgers may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from

activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We

recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as

sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant investment manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) – applied to long and short exposures.
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations) - applied to Sustainable Investments.
- Companies that derive revenues above certain thresholds from activities related to thermal coal: (PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) – applied to relevant underlying strategies.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying investment managers. Where applicable, based on the underlying strategies and the relevant investment manager's own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint.

Examples of PAIs captured via this approach included PAI 1 (GHG emissions, PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

For example, during the reference period there was an engagement with an industrial equipment company on decarbonising and minimising emissions. One area where we can help instigate further change is on the setting, mapping and disclosure of climate ambitions, and so our aim was to

encourage the company to be more bold in this regard and make a virtue out of an existing strength. The company voiced intent for progress, but they are yet to show sufficient evidence - balancing the willingness to state a target against inability to capture the data. We encouraged incremental steps on disclosures, agreed to share examples of best practice where helpful and shared our intention to check-in again in 6-12 months.

In addition, there was a further engagement with a global technology company to discuss details on the company's climate strategy. Whilst they have a number of plans to reduce Scope 3 emissions, the company appears to be in the investigation stage. On the printing side of the business, they are engaging with suppliers to push reduction strategies. However, the staffing business, where commuting is very high, is proving challenging in terms of calculating emissions. Whilst they are keen to encourage employers to offer green options, they openly admitted it will be difficult to push through and this may result in the company having to consider carbon offsets. The company was unclear on the extent or size of these offsets and we will be engaging in the future to understand more. The company short term climate goals expire in 2024 and they are due to announce some new short term goals to complements their 2030 target. They are linking management compensation to the achievement of these goals, but at this time the company is not currently disclosing to what extent this is.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	37
Corporate Governance	14
Human Rights	10
Natural Capital and Biodiversity	9
Human Capital Management	6
Diversity and Inclusion	5

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

% Assets Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

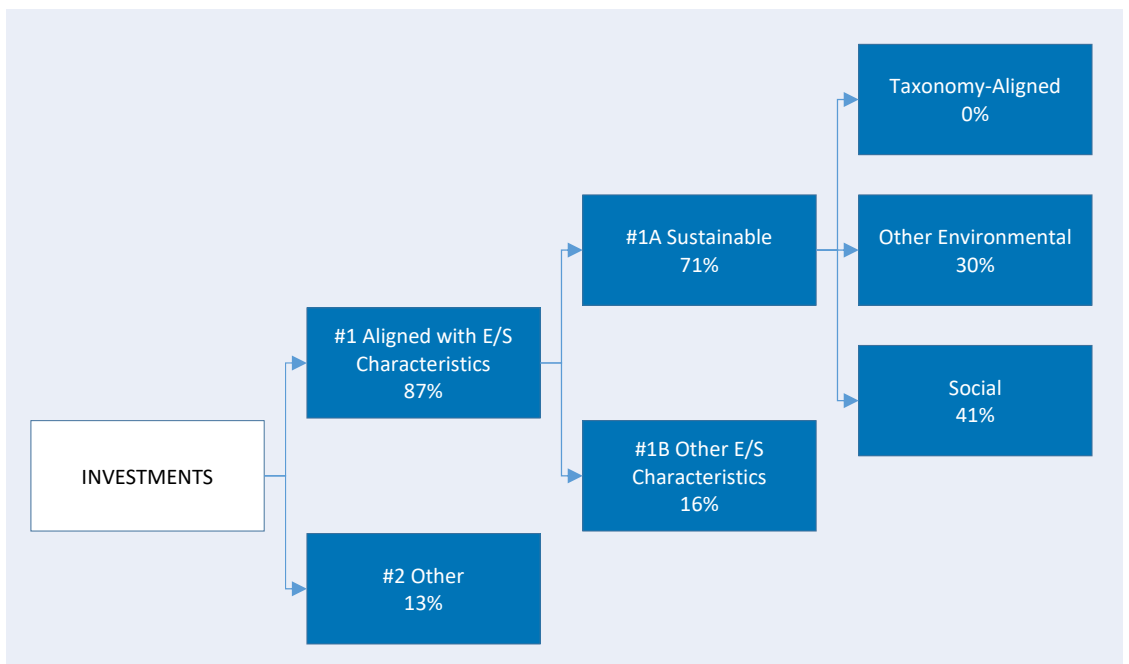

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 87%. The Fund maintained a higher overall sustainability score than the 50% MSCI World EUR Hedged and 30% FTSE World Government Bond Index EUR Hedged and 20% Bloomberg Global Aggregate Corporate Index EUR Hedged and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 71% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 30% was invested in sustainable investments with an environmental objective and 41% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Cash Equivalents	Treasury Bills	17.95
Industrial	Capital Goods	7.02
Industrial	Healthcare	3.07
Industrial	Commercial & Professional Services	2.70
Industrial	Telecommunications	0.89
Industrial	Real Estate	0.74
Industrial	Services	0.50
Industrial	Technology & Electronics	0.29
Information Technology	Software & Services	7.28
Information Technology	Semiconductors & Semiconductor Equipment	4.33
Information Technology	Technology Hardware & Equipment	0.94
Financial	Banking	5.61
Financial	Financial Services	4.64
Financial	Insurance	1.65
Sovereign (Developed)		8.89
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	4.61
Health Care	Health Care Equipment & Services	3.07
Consumer Discretionary	Consumer Discretionary Distribution & Retail	3.90
Consumer Discretionary	Consumer Durables & Apparel	1.03
Consumer Discretionary	Consumer Staples Distribution & Retail	0.69
Cash	Cash	3.41
Cash	Margin Cash	1.92
Collective Investments	Unit Trusts	4.86
Consumer Staples	Household & Personal Products	2.11
Consumer Staples	Consumer Staples Distribution & Retail	0.96
Consumer Staples	Food, Beverage & Tobacco	0.70
Utilities	Non-Electric Utilities	0.89
Utilities	Electric - Integrated	0.87
Utilities	Electric - Generation	0.53
Utilities	Electric - Distr/Trans	0.38
Communication Services	Media & Entertainment	2.36
Materials	Materials	0.80
Securitized	Asset Backed	0.39
Derivatives	FX Derivatives	0.01

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

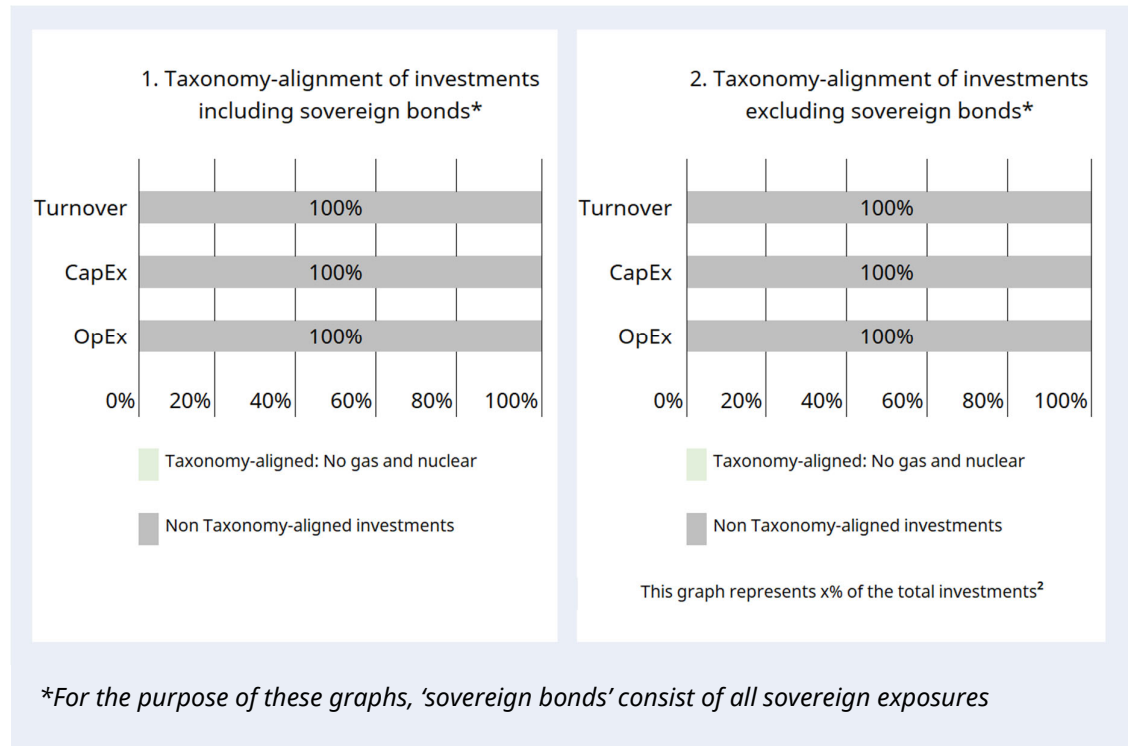

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 30%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 41%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Sustainable Multi-Asset Income
Legal Entity Identifier : 549300LDFN23PNRCYH21

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 56% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the 30% MSCI AC World Index (hedged to EUR), 40% Barclays Global Aggregate Corporate Bond Index (hedged to EUR) and 30% Barclays Global High Yield excl CMBS & EMG 2% Index (hedged to EUR), based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 30% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.8% and the benchmark's sustainability score for the reference period was -4.1%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Contraception
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the 30% MSCI AC World Index (hedged to EUR), 40% Barclays Global Aggregate Corporate Bond Index (hedged to EUR) and 30% Barclays Global High Yield excl CMBS & EMG 2% Index (hedged to EUR) by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the 30% MSCI AC World Index (hedged to EUR), 40% Barclays Global Aggregate Corporate Bond Index (hedged to EUR) and 30% Barclays Global High Yield excl CMBS & EMG 2% Index (hedged to EUR) in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 56% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 30% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	56
Aug 2022 - Dec 2022	56

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	2.8	-4.1
Jan 2022 - Dec 2022	5.4	-4.0

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of

communities through telecommunication services;

- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from

activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We

recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as

sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant investment manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations) – applied to Sustainable Investments
- Companies that derive revenues above certain thresholds from activities related to thermal coal: (PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) – applied to relevant underlying strategies

Other PAIs were considered via active ownership, which was performed indirectly via the underlying investment managers. Where applicable, based on the underlying strategies and the relevant investment manager's own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint.

Examples of PAIs captured via this approach included PAI 1 (GHG emissions), PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

For example, during the reference period there was an engagement with an American pharmaceutical company held by the Fund to seek clarity on progress towards climate goals. We noted that the company appears to be behind on progress for its 2030 climate goals. The company's approach appears

to be focused on upgrades during normal plant lifecycle progress, rather than upfront investment, although the company has recently committed to setting a longer-term net zero goal.

In addition, there was a further engagement with a French pharmaceutical company focusing on corporate culture, employees and pricing. We initially had concerns with workforce turnover, but received comfort around the type of attrition, given the intended cultural change and restructuring in the organisation. The company has increased access, broadened education and are set for a 70% price cut for one of its drugs in 2024.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	175
Corporate Governance	74
Natural Capital and Biodiversity	45
Human Capital Management	33
Human Rights	30
Diversity and Inclusion	18

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

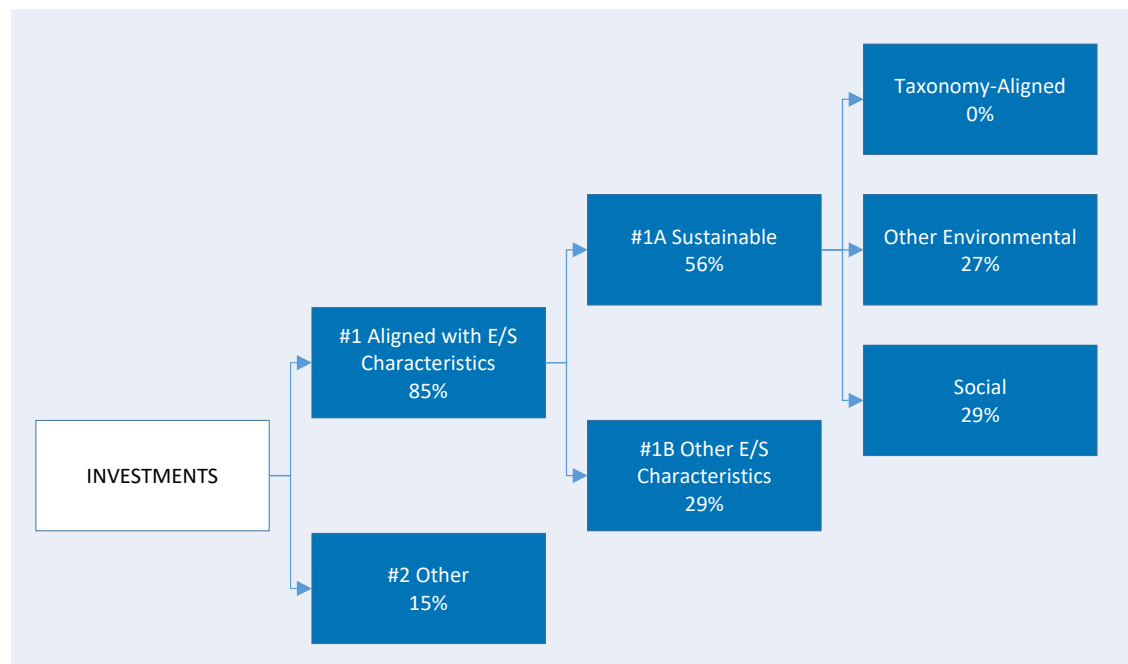

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 85%. The Fund maintained a higher overall sustainability score than the 30% MSCI AC World Index (hedged to EUR), 40% Barclays Global Aggregate Corporate Bond Index (hedged to EUR) and 30% Barclays Global High Yield excl CMBS & EMG 2% Index (hedged to EUR) and so the Fund's investments that were scored by Schroders' proprietary

sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 56% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 27% was invested in sustainable investments with an environmental objective and 29% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	4.77
Industrial	Healthcare	4.42
Industrial	Telecommunications	3.46
Industrial	Transportation	3.29
Industrial	Automotive	2.72
Industrial	Services	2.34
Industrial	Real Estate	2.00
Industrial	Basic Industry	1.39
Industrial	Technology & Electronics	1.24
Industrial	Commercial & Professional Services	0.96
Industrial	Retail	0.71
Industrial	Media & Entertainment	0.65
Industrial	Consumer Goods	0.51
Industrial	Leisure	0.10
Industrial	Financial	0.03
Financial	Banking	12.77
Financial	Financial Services	5.39
Financial	Insurance	2.45
Information Technology	Software & Services	3.14
Information Technology	Semiconductors & Semiconductor Equipment	2.61

Consumer Staples	Household & Personal Products	0.82
Consumer Staples	Consumer Staples Distribution & Retail	0.58
Materials	Materials	2.33
Materials	Industrial Gases	0.19
Communication Services	Media & Entertainment	1.39
Communication Services	Telecommunication Services	0.73
Communication Services	Consumer Discretionary Distribution & Retail	0.17
Cash	Cash	1.39
Cash	Margin Cash	0.64
Sovereign (Developed)		0.48
Equity	Equity	0.46
Derivatives	Equity Derivatives	0.09
Derivatives	FX Derivatives	0.04
Energy	Oil & Gas Storage & Transportation	0.10
Real Estate	Real Estate Management & Development	0.09

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

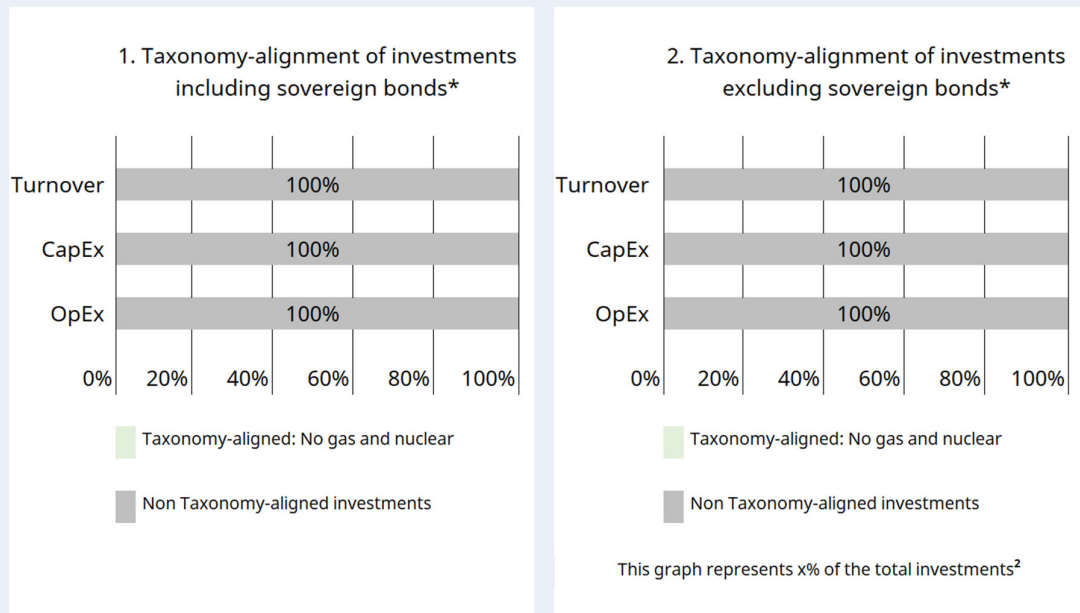

Taxonomy-aligned activities are expressed as a share of:

- **turnover**
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 27%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 29%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Emerging Markets Debt Total Return (on 21 September 2023 the Fund changed its name from Schroder ISF Emerging Markets Debt Absolute Return)

Legal Entity Identifier : TLC5LFN105XXSK6FZ338

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> with a social objective
<input type="checkbox"/>	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The Fund had a sustainable investment commitment from 1 January 2023 until 20 September 2023, at which point this commitment was removed.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the 50% JPM GBI-EM Diversified Index and 50% JPM EMBI Diversified Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 5% of its assets in sustainable investments until 20 September 2023 at which point this commitment was removed.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the

• How did the sustainability indicators perform?

The Fund's sustainability score for the reference period was -1.3% and the benchmark's sustainability

environmental or social characteristics promoted by the financial product are attained.

score for the reference period was -3.2%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Clean Energy
- Education
- Medical Research
- Socio-Political Stability
- University Education

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the 50% JPM GBI-EM Diversified Index and 50% JPM EMBI Diversified Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the 50% JPM GBI-EM Diversified Index and 50% JPM EMBI Diversified Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

Until 20 September 2023, the Investment Manager invested 31% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments over the first six months of the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 5% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ***...and compared to previous periods?***

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Sep 2023	31
Aug 2022 - Dec 2022	38

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	-1.3	-3.2
Jan 2022 - Dec 2022	-1.5	-3.8

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the calculation method is as described above.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Until 20 September 2023, in respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- Medical Research: the estimated societal benefits of medical innovation resulting in improvements in human conditions, increases of life expectancy and quality of life. Assigned in proportion to the social benefit of medical innovation to countries using patent data, specifically the number of medical-related technology patents filed by applicant country;
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth; and
- University Education: the estimated societal benefits associated with the level of education, including

tertiary and international education. Assigned in proportion to net international student figures.

The above examples of the objectives of the sustainable investments that the Fund made are based on the most significant objectives at each quarter-end until 20 September 2023. Other objectives may have applied during this period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Until 20 September 2023, the Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Until 20 September 2023, where the Investment Manager set levels in relation to the indicators for

adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Until 20 September 2023, the portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process, and some were considered via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

Compliance with these thresholds were monitored via the Investment Manager’s portfolio compliance framework.

PAI data is less meaningful in the context of an emerging markets sovereign focused strategy, as during the reference period there were limited PAI data available. Over time, we anticipate that this data will improve which will allow us to further assess the consideration of PAIs.

However, as part of the investment process, a Schrodgers’ proprietary tool was used which incorporates some of the PAIs as part of its scoring methodology. During the reference period, PAIs 1, 2, 3, 4, 5 and 15 related to greenhouse gas emissions, PAIs 7, 8 and 9 related to biodiversity, water and waste and PAIs 12, 13, and 16 related to social matters were considered as part of the investment process of the following countries: Poland, Kenya, South Africa, India, China, Argentina, Mexico, Peru, Colombia, Chile, Turkey, Pakistan, Bahamas, Bolivia, Guatemala, Honduras, Panama and Paraguay.

PAIs were also considered post-investment through engagement. The investment manager primarily used Schrodgers’ proprietary tool and data from external data providers in order to identify, assess and monitor environmental topics for engagement. During the reference period, active engagements with emerging sovereigns included the Federative Republic of Brazil, the Republic of Colombia, the People's

Republic of China, the Republic of India, the United Mexican States and the Republic of the Philippines. These engagements covered a range of topics and were aligned with environmental PAIs 1, 2, 3, 4, 5, 7, 8, 9, 15, and social PAIs relating to PAI 12 (Unadjusted gender pay gap), PAI 13 (Board gender diversity) and PAI 16 (Investee countries subject to social violations).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	7
Corporate Governance	4
Human Capital Management	2
Natural Capital and Biodiversity	2
Human Rights	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 86%. The Fund maintained a higher overall sustainability score than the 50% JPM GBI-EM Diversified Index and 50% JPM EMBI Diversified Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Until 20 September 2023 included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

Until 20 September 2023, the Fund invested 31% of its assets in sustainable investments. This percentage represents the average of the first six months of the reference period, based on quarter-end data. Within this, 20% was invested in sustainable investments with an environmental objective and 11% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
EMD Sovereign		49.63
Cash Equivalents	Treasury Bills	28.46
Foreign Sovereign		8.41
Collective Investments	Exchange Traded Funds	4.84
Cash	Cash	2.41
Cash	Margin Cash	0.67
Supranational		2.82
Industrial	Basic Industry	1.10
Industrial	Integrated Energy	0.30
Industrial	Energy - Exploration & Production	0.25
Industrial	Real Estate	0.23
Industrial	Transportation	0.18
Industrial	Leisure	0.15
Industrial	Technology & Electronics	0.13
Industrial	Media & Entertainment	0.09
Industrial	Oil Refining & Marketing	0.09
Industrial	Consumer Goods	0.06
Industrial	Telecommunications	0.01
Financial	Banking	0.27
Utilities	Electric - Generation	0.07
Utilities	Integrated Energy	0.06
Utilities	Non-Electric Utilities	0.05
Derivatives	FX Derivatives	-0.27

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

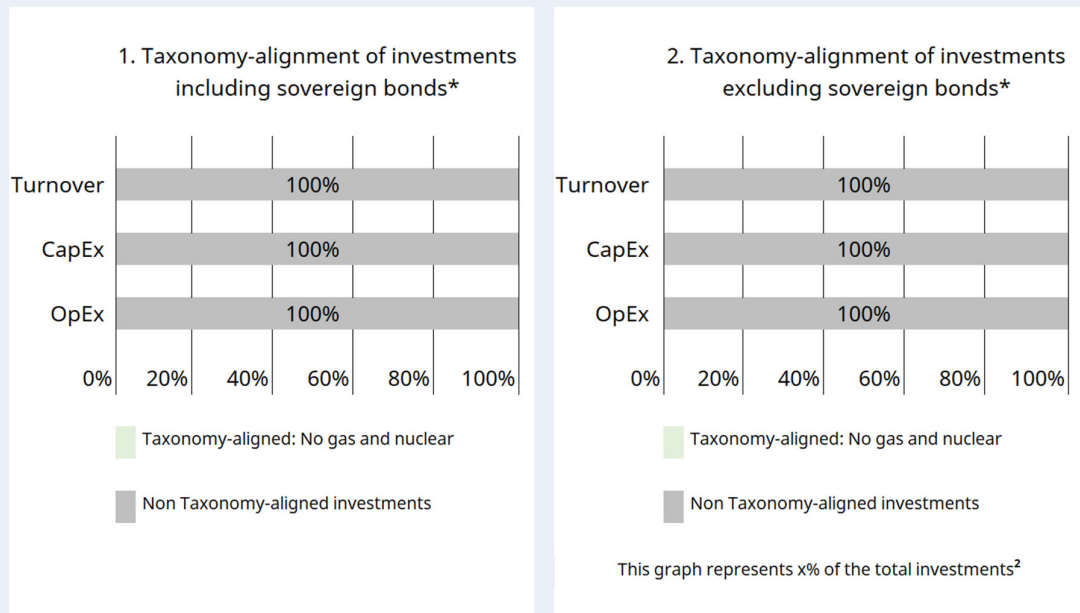

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Until 20 September 2023, the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 20%.

• **What was the share of socially sustainable investments?**

Until 20 September 2023, the share of sustainable investments with a social objective was 11%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Sustainable Global Multi Credit

Legal Entity Identifier : 549300N4PLUJQQE2N097

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 X No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 52% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse (TR) ex Treasury A+ to B- Index, USD Hedged, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.5% and the benchmark's sustainability score for the reference period was -6.0%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Medicine
- Power Provision

- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Bloomberg Multiverse (TR) ex Treasury A+ to B- Index, USD Hedged by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Bloomberg Multiverse (TR) ex Treasury A+ to B- Index, USD Hedged in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 52% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 40% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	52
Aug 2022 - Dec 2022	49

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	2.5	-6.0
Jan 2022 - Dec 2022	4.4	-5.8

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in

which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue;

- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schrodgers.com/en/sustainability/active-ownership/group-exclusions/>.

- Schrodgers became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schrodgers considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schrodgers may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from

activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >5% revenue from thermal coal mining and >10% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We

recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as

sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we

engaged with a company in the financial sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	89
Corporate Governance	51
Natural Capital and Biodiversity	18
Human Rights	17
Diversity and Inclusion	16
Human Capital Management	14

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
AVIVA PLC SR REGS 6.875% 31 Dec 2079	Financial	1.32	United Kingdom

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

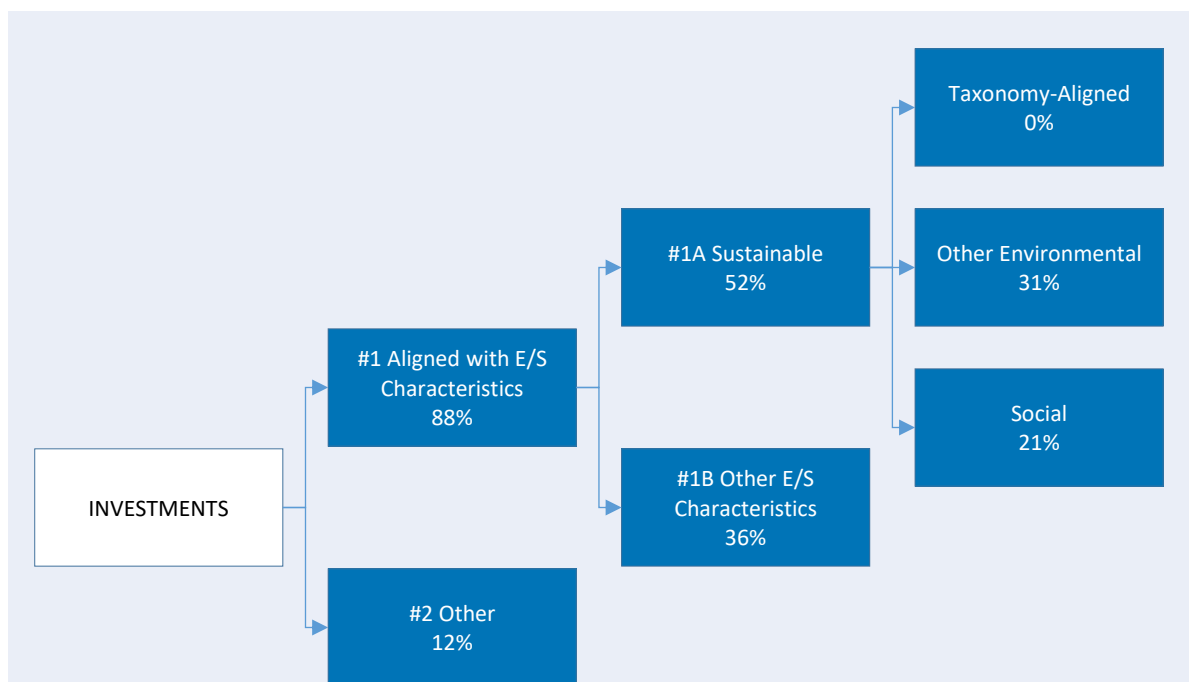

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 88%. The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse (TR) ex Treasury A+ to B- Index, USD Hedged and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 52% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 31% was invested in sustainable investments with an environmental objective and 21% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Real Estate	8.08
Industrial	Healthcare	5.41
Industrial	Transportation	4.32
Industrial	Media & Entertainment	3.84
Industrial	Basic Industry	2.93
Industrial	Telecommunications	2.81
Industrial	Services	2.78
Industrial	Retail	2.28
Industrial	Capital Goods	1.94
Industrial	Automotive	1.70
Industrial	Leisure	1.50
Industrial	Technology & Electronics	1.49
Industrial	Consumer Goods	1.49
Industrial	Integrated Energy	0.26
Industrial	Gas-Distribution	0.04
Industrial	Oil Refining & Marketing	0.04
Financial	Banking	23.87
Financial	Financial Services	9.74
Financial	Insurance	5.76
Utilities	Electric - Integrated	5.70
Utilities	Non-Electric Utilities	1.70
Utilities	Electric - Generation	1.61
Utilities	Electric - Distr/Trans	0.40
Foreign Sovereign		4.69
Collective Investments	Unit Trusts	1.22
Cash Equivalents	Treasury Bills	1.19
Sovereign (Developed)		1.14
Securitized	Asset Backed	1.11
Cash	Margin Cash	0.66
Cash	Cash	0.11
Derivatives	Interest Rate Derivatives	0.44
Derivatives	FX Derivatives	-0.25
EMD Sovereign		-0.01

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents x% of the total investments²

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 31%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 21%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF European Alpha Absolute Return
Legal Entity Identifier : 549300FIRE2DG9WO1K16

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 65% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The percentage of sustainable investments shown (which are all long positions, as short positions are not deemed to be sustainable investments) represents the sustainable investments as a proportion of the long exposure of the Fund during the reference period. This is in line with the pre-contractual disclosure for the Fund, where the Fund committed to invest at least 10% of its long exposure in sustainable investments.

For additional context, the percentage of sustainable investments as a proportion of the gross exposure of the Fund during the reference period, was 31%. The gross exposure includes both long and short positions and this figure is provided for consistency with the basis of the other calculations in the asset allocation section below. The long exposure and gross exposure excludes cash and cash equivalents.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a positive absolute sustainability score, based on Schroders' proprietary tool. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than zero, based on month-end data.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool. The Fund's long and short positions contribute differently to the aggregate score. Long positions with positive scores and short positions with negative scores both contribute positively towards the aggregate score, while long positions with negative scores and short positions with positive scores both detract from the aggregate score.

The Fund used derivatives extensively to implement its investment strategy and to meet the environmental and/or social characteristics promoted by the Fund. Long and short derivative positions contributed differently to the Fund's overall sustainability score as described. Equity and index derivatives (excluding options) are scored in the same way as physical holdings, on a look-through basis, and also contributed to the Fund's overall sustainability score.

The Fund also invested at least 10% of its long exposure in sustainable investments during the reference period. The long exposure excludes cash and cash equivalents

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The positive absolute sustainability score for the reference period was 20.8%.

The sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Alcohol
- Financial Stability
- High Salaries

- Sanitation

- Tobacco

Alcohol and Tobacco are societal costs (and therefore were scored negatively) yet contributed positively to the sustainability score of the Fund because they represent short positions, and short positions with negative scores contribute positively towards the aggregate sustainability score of the Fund.

The Investment Manager monitored compliance with the characteristic to maintain a positive absolute sustainability score by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund committed to invest at least 10% of its long exposure in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool and in line with this commitment the Fund invested 65% of its long exposure in sustainable investments (which are all long positions, as short positions are not deemed to be sustainable investments) during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its long exposure in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool.

For additional context, during the reference period and based on quarter-end data, the Investment Manager invested 31% of the Fund's gross exposure in sustainable investments. This represents the percentage of sustainable investments as a proportion of the gross exposure of the Fund. The gross exposure includes both long and short positions and this figure is provided for consistency with the basis of the calculations in the asset allocation section below.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Sustainability score

This table details the Fund's sustainability score, year on year

Period	Fund % (Gross)	Fund % (Long)	Period	Fund (%)
Jan 2023 - Dec 2023	31	65	Jan 2023 - Dec 2023	20.8
Jan 2022 - Dec 2022	31	63	Jan 2022 - Dec 2022	34.7

For 2022 the percentage of sustainable investments was calculated as at the end of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's long portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or

social objectives, as scored by Schroders' proprietary tool. The objectives of the sustainable investments that the Fund made included, but were not limited to, increasing benefits by way of the following:

- Avoided Emissions; the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity; the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine; the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue

The above examples of objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exemptions to the list during this period.
- From July 2023, the Fund excluded from its long exposure companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether

a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Where relevant, companies that derived revenues above certain thresholds from activities related thermal coal, thermal coal mining and coal fired power generation were excluded from long exposure.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list.

From July 2023 the Fund excluded from its long exposure companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 2, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were excluded from long exposure and not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included: Excluded from long and short exposure:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

Excluded from long exposure:

- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the investment manager

engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics, including supply chains with companies in the retail sector, climate and net zero with the construction and property sectors. These engagements related to PAIs 4 (Lack of a supplier code of conduct), and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	5
Natural Capital and Biodiversity	3
Corporate Governance	3
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments, based on net exposure (as a percentage of NAV), were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	
		(Net)	Country
WHITBREAD PLC	Consumer Discretionary	4.5	United Kingdom
SMITH & NEPHEW PLC	Health Care	3.8	United Kingdom
SWATCH GROUP AG	Consumer Discretionary	3.8	Switzerland
ENTAIN PLC	Consumer Discretionary	3.7	United Kingdom
SAFRAN SA	Industrials	3.6	France
SODEXO SA	Consumer Discretionary	3.4	France
HISCOX LTD	Financials	3.3	United Kingdom
UNILEVER PLC	Consumer Staples	3.3	United Kingdom
UNITE GROUP PLC	Real Estate	3.3	United Kingdom
NEXT PLC	Consumer Discretionary	3.3	United Kingdom
RELX PLC	Industrials	3.3	United Kingdom
VEOLIA ENVIRONNEMENT SA	Utilities	3.2	France
KERRY GROUP PLC	Consumer Staples	3.2	Ireland
KONINKLIJKE KPN NV	Communication Services	3.1	Netherlands
BERKELEY GROUP HOLDINGS PLC	Consumer Discretionary	3.1	United Kingdom

The list above represents the average of the Fund's net exposure as a percentage of NAV at each quarter end during the reference period.

Exposures have been provided on a look through basis for index futures, index options, total return swaps (TRS) positions and contract for difference (CFD) baskets where possible and netted at the issuer level. There may be instances where a proxy has been used.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

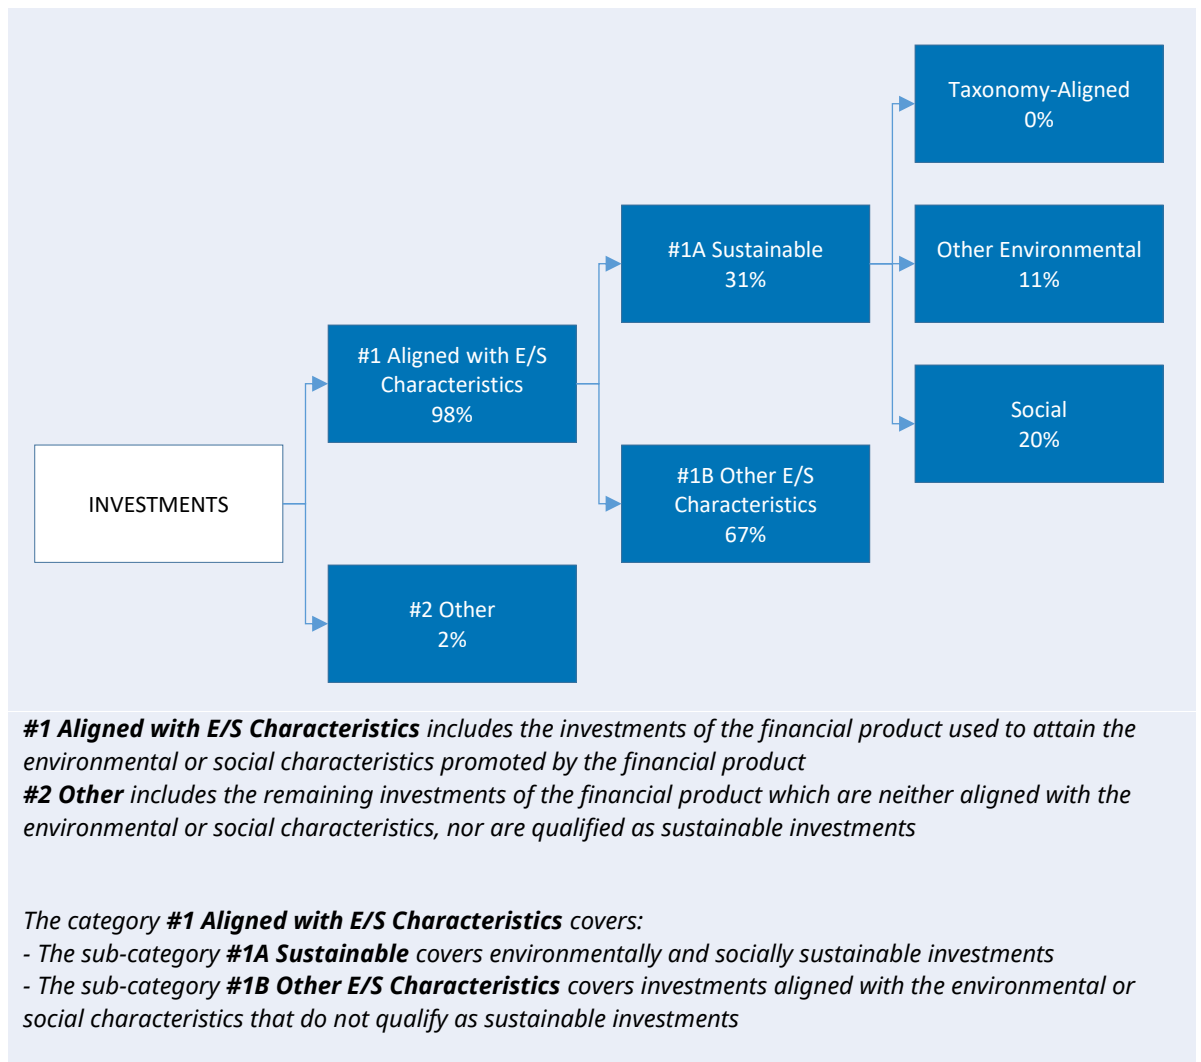

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98% of gross exposure. The Fund maintained a positive absolute sustainability score, and so the Fund's investments (both long and short) that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). Long positions with positive scores and short positions with negative scores both contributed positively towards the aggregate score, while long positions with negative scores and short positions with positive scores both detracted from the aggregate score. The percentage in #1 Aligned represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of gross exposure that was invested in sustainable investments, as indicated in #1A. Cash and cash equivalents are excluded from the proportions in #1 and #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 31% of its gross exposure in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. The gross exposure includes both long and short positions but the percentage only includes long exposures as short exposures are not deemed to be sustainable investments. Within this, 11% was invested in sustainable investments with an environmental objective and 20% was invested in sustainable investments with a social objective. However, the Fund committed to invest at least 10% of its long positions in sustainable investments. The Fund invested 65% of its long exposure in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 23% was invested in sustainable investments with an environmental objective and 41% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net

positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits". The gross exposure and long exposure excludes cash and cash equivalents

#2 Other includes investments that were not scored by Schroders' proprietary sustainability tools and so did not contribute towards the Fund's sustainability score. Cash and cash equivalents are excluded from the calculations of gross and long exposure due to the long / short nature of the Fund's investment strategy.

The percentages shown above are calculated as a proportion of gross exposure for consistency purposes. However, the Fund committed to invest at least 10% of its long exposure in sustainable investments and, as an average during the reference period, based on quarter-end data, the Fund invested 65% of its long positions in sustainable investments.

Exposures have been provided on a look through basis for index futures, index options, TRS positions

and CFD baskets where possible and netted at the issuer level. There may be instances where a proxy has been used. This netting was applied before determining whether an exposure was long or short, and before calculating the gross exposure.

• ***In which economic sectors were the investments made?***

During the reference period investments were made in the following economic sectors based on gross and net exposure (as a % of NAV):

Sector	Sub-Sector	% Assets (Net)	% Assets (Gross)
Communication Services	Media & Entertainment	3.8	5.2
Communication Services	Telecommunication Services	2.4	3.9
Consumer Discretionary	Automobiles & Components	-4.4	4.4
Consumer Discretionary	Consumer Discretionary Distribution & Retail	-0.2	8.5
Consumer Discretionary	Consumer Durables & Apparel	9.6	13.8
Consumer Discretionary	Consumer Services	13.5	17.1
Consumer Staples	Consumer Staples Distribution & Retail	-4.5	4.7
Consumer Staples	Food, Beverage & Tobacco	-2.0	18.6
Consumer Staples	Household & Personal Products	1.9	4.7
Energy	Energy	-5.4	5.4
Financials	Banks	-5.5	11.0
Financials	Financial Services	-7.3	15.6
Financials	Insurance	2.0	9.7
Health Care	Health Care Equipment & Services	3.1	4.6
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	1.7	13.5
Industrials	Capital Goods	-11.1	31.5
Industrials	Commercial and Professional Services	-0.6	9.4
Industrials	Transportation	-8.7	8.7
Information Technology	Semiconductors & Semiconductor Equipment	-1.7	1.7
Information Technology	Software & Services	-3.1	3.1
Information Technology	Technology Hardware & Equipment	1.9	3.0
Materials	Materials	-4.6	14.1
Real Estate	Equity Real Estate Investment Trusts (REITs)	1.7	5.5
Real Estate	Real Estate Management & Development	-0.3	0.3
Utilities	Utilities	0.8	5.7

The list above represents the average of the Fund's gross and net exposure as a % of NAV at each quarter end during the reference period.

Exposures have been provided on a look through basis for index futures, index options, TRS positions and CFD baskets where possible and netted at the issuer level. There may be instances where a proxy has been used.

The % of NAV aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of NAV aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of NAV aligned to economic sectors due to the differing calculation methodologies of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents x% of the total investments²

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

During the reference period and based on quarter-end data, the Fund invested 11% of its gross exposure in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy. This percentage is provided for consistency with the basis of the calculations in the asset allocation section above. The Fund invested 23% of its long exposure in sustainable investments with an environmental objective that were not aligned with the Taxonomy.

What was the share of socially sustainable investments?

During the reference period and based on the quarter-end data, the Fund invested 20% of its gross exposure in sustainable investments with a social objective. This percentage is provided for consistency with the basis of the calculations in the asset allocation section above. The Fund invested 41% of its long exposure in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes investments that were not scored by Schroders' proprietary sustainability tools and so did not contribute towards the Fund's sustainability score. Cash and cash equivalents are excluded from the calculations of gross and long exposure due to the long / short nature of the Fund's investment strategy.

Minimum safeguards were applied where relevant to other investments by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant

investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF EURO Bond

Legal Entity Identifier : 61XW5S6PT0DGAORX3X38

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 X No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 73% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg EURO Aggregate Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.7% and the benchmark's sustainability score for the reference period was 1.3%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Clean Energy
- Connectivity
- Education
- High Salaries

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Bloomberg EURO Aggregate Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Bloomberg EURO Aggregate Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 73% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	73
Aug 2022 - Dec 2022	78

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.7	1.3
Jan 2022 - Dec 2022	3.2	1.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of

communities through telecommunication services;

- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schrodgers.com/en/sustainability/active-ownership/group-exclusions/>.

- Schrodgers became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schrodgers considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schrodgers may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from

activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We

recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as

sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries' debt for the portfolio.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the energy sector to have them provide an update on their climate targets and transition plan.

There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers. During the reference period, however, we have had opportunities to engage with relevant sovereign and supranational issuers, primarily with respect to their approach to net zero carbon strategies (relating to PAI 15, GHG intensity).

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	56
Corporate Governance	27
Natural Capital and Biodiversity	11
Human Rights	9
Diversity and Inclusion	8
Human Capital Management	6

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
FRANCE (REPUBLIC OF) SR REGS .5% 25 May 2026	Sovereign (Developed)	2.18	France
FRANCE (REPUBLIC OF) SR REGS .75% 25 May 2028	Sovereign (Developed)	1.52	France
EUROPEAN UNION SR REGS 1.625% 04 Dec 2029	Supranational	1.50	Luxembourg
SPAIN (KINGDOM OF) SR REGS .6% 31 Oct 2029	Sovereign (Developed)	1.49	Spain
ITALY (REPUBLIC OF) SR REGS .95% 01 Aug 2030	Sovereign (Developed)	1.41	Italy

GERMANY (FEDERAL REPUBLIC OF) SR REGS 0% 15 Aug 2029	Sovereign (Developed)	0.92	Germany

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 95%. The Fund maintained a higher overall sustainability score than the Bloomberg EURO Aggregate Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they

contributed to the Fund’s sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders’ proprietary tool that provides an estimate of the net “impact” that an issuer may create in terms of social and environmental “costs” or “benefits”. It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 73% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 30% was invested in sustainable investments with an environmental objective and 44% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund’s portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders’ proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders’ proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both “costs” and “benefits”.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Sovereign (Developed)		36.52
Financial	Banking	18.95
Financial	Financial Services	4.20
Financial	Insurance	0.88
Industrial	Healthcare	1.56
Industrial	Real Estate	1.55
Industrial	Telecommunications	1.45
Industrial	Basic Industry	1.45
Industrial	Retail	0.98
Industrial	Automotive	0.91
Industrial	Transportation	0.82
Industrial	Integrated Energy	0.75
Industrial	Technology & Electronics	0.67
Industrial	Consumer Goods	0.59
Industrial	Capital Goods	0.56
Industrial	Services	0.54
Industrial	Energy - Exploration & Production	0.36
Industrial	Media & Entertainment	0.24
Industrial	Leisure	0.20
Supranational		10.50
Government Guaranteed		5.93
Utilities	Electric - Integrated	2.32
Utilities	Non-Electric Utilities	0.21
Utilities	Electric - Generation	0.17
Utilities	Electric - Distr/Trans	0.01
Utilities	Gas-Distribution	0.01
Agency		2.55
Foreign Sovereign		1.64
Local Authority		1.39
EMD Sovereign		0.96
Cash	Margin Cash	0.67
Cash	Cash	0.21
Securitized	Mortgage Backed	0.24
Derivatives	FX Derivatives	0.01
Derivatives	Interest Rate Derivatives	0.01
Derivatives	Credit Derivatives	-0.03

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to

economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 30%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 44%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF EURO Government Bond

Legal Entity Identifier : GQO6F0370CMTJBILPZ30

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 97% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro Government Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.5% and the benchmark's sustainability score for the reference period was 2.3%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Clean Energy
- Education
- International Aid
- Multinational Institutions

- Socio-Political Stability

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the ICE BofA Merrill Lynch Euro Government Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the ICE BofA Merrill Lynch Euro Government Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 97% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	97
Aug 2022 - Dec 2022	97

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	2.5	2.3
Jan 2022 - Dec 2022	2.7	2.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;

- Education: the estimated societal benefits of a country's education spend per school age capita;
- International Aid: the estimated societal benefits associated with humanitarian aid following natural disasters or conflicts and financial support for economic development of underdeveloped economies. Assigned in proportion to total net Official Development Assistance (ODA) receipts;
- Multinational Institutions: the estimated societal benefits associated with countries working together through international organisations that encourage cooperation and diplomatic resolutions to global problems. Assigned in proportion to a country's net UN contributions; and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schrodgers.com/en/sustainability/active-ownership/group-exclusions/>.
- Schrodgers became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schrodgers considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schrodgers may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not

categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption,

labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. The nature of this Fund is such that it does not meaningfully invest in corporate bonds and hence in practice such corporate exclusions are less important than for other Funds in Schroders' range. Nonetheless, the exclusions were formally applied, and included the following:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates PAIs as a component of its scoring methodology.

For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries' debt for the

portfolio.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers (in which this Fund did not invest). During the reference period, however, we had opportunities to engage with relevant sovereign and supranational issuers, primarily with respect to their approach to net zero carbon strategies (relating to PAI 15, GHG intensity).

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
ITALY (REPUBLIC OF) SR REGS 0% 01 Apr 2026	Sovereign (Developed)	4.45	Italy

SPAIN (KINGDOM OF) SR REGS .6% 31 Oct 2029	Sovereign (Developed)	1.58	Spain

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro Government Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 97% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 22% was invested in sustainable investments with an environmental objective and 75% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Sovereign (Developed)		89.67
Supranational		3.11
Government Guaranteed		2.20
Agency		1.31
EMD Sovereign		1.29
Cash	Cash	0.60
Cash	Margin Cash	0.41
Local Authority		0.90
Cash Equivalents	Treasury Bills	0.53
Derivatives	Interest Rate Derivatives	-0.03

The list above represents the average of the Fund's holdings at each quarter-end during the reference

period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 22%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 75%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF EURO Short Term Bond

Legal Entity Identifier : LKIIDMHWTJNCPJTJ3M14

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Euro Aggregate (1-3 Y) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.0% and the benchmark's sustainability score for the reference period was 0.5%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Clean Energy
- Connectivity
- Education
- High Salaries

- Socio-Political Stability

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Bloomberg Euro Aggregate (1-3 Y) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Bloomberg Euro Aggregate (1-3 Y) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 68% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	68
Aug 2022 - Dec 2022	66

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.0	0.5
Jan 2022 - Dec 2022	1.9	0.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of

communities through telecommunication services;

- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from

activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We

recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as

sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries' debt for the portfolio.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which

outlines our approach to active ownership.

During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the energy sector to have them provide an update on their climate targets and transition plan.

There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers. During the reference period, however, we had opportunities to engage with relevant sovereign and supranational issuers, primarily with respect to their approach to net zero carbon strategies (relating to PAI 15, GHG intensity).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	39
Corporate Governance	24
Natural Capital and Biodiversity	11
Human Rights	8
Diversity and Inclusion	6
Human Capital Management	4

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
SPAIN (KINGDOM OF) SR GOVT 2.8% 31 May 2026	Sovereign (Developed)	4.21	Spain

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 91%. The Fund maintained a higher overall sustainability score than the Bloomberg Euro Aggregate (1-3 Y) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that

they contributed to the Fund’s sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders’ proprietary tool that provides an estimate of the net “impact” that an issuer may create in terms of social and environmental “costs” or “benefits”. It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 68% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 25% was invested in sustainable investments with an environmental objective and 43% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund’s portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders’ proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders’ proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both “costs” and “benefits”.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	22.28
Financial	Financial Services	8.36
Financial	Insurance	0.82
Sovereign (Developed)		26.37
Industrial	Automotive	2.93
Industrial	Technology & Electronics	2.37
Industrial	Real Estate	2.01
Industrial	Basic Industry	1.62
Industrial	Retail	1.30
Industrial	Telecommunications	1.25
Industrial	Media & Entertainment	1.13
Industrial	Capital Goods	1.05
Industrial	Transportation	0.68
Industrial	Consumer Goods	0.62
Industrial	Healthcare	0.39
Industrial	Services	0.31
Government Guaranteed		6.69
Supranational		4.75
Cash Equivalents	Treasury Bills	4.69
Local Authority		4.04
Utilities	Electric - Integrated	1.17
Utilities	Electric - Generation	0.75
Utilities	Electric - Distr/Trans	0.28
Utilities	Non-Electric Utilities	0.15
Agency		2.23
Cash	Cash	0.91
Cash	Margin Cash	0.07
Foreign Sovereign		0.56
Derivatives	Interest Rate Derivatives	0.17
Derivatives	FX Derivatives	-0.01
Securitized	Asset Backed	0.05

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 25%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 43%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Bond
Legal Entity Identifier : ITFMVE39JEIQ35YCI721

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 60% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Global Aggregate Bond Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.6% and the benchmark's sustainability score for the reference period was -0.1%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Clean Energy
- Connectivity
- Education
- Patents

What ac

- Socio-Political Stability

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Bloomberg Global Aggregate Bond Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Bloomberg Global Aggregate Bond Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 60% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	60
Sep 2022 - Dec 2022	65

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	0.6	-0.1
Jan 2022 - Dec 2022	1.3	-0.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of

communities through telecommunication services;

- Education: the estimated societal benefits of a country's education spend per school age capita;
- Patents: the estimated societal benefits associated with governments conducting in-house Research and Development (R&D) and also finance R&D in various sectors of the economy. Assigned in proportion to the social benefits of innovation to countries using resident patent application data from the World Intellectual Property Organisation (WIPO); and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.
- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2 were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries' debt for the portfolio.

PAIs were also considered post-investment through engagement where the investment manager

engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the energy sector to have them provide an update on their climate targets and transition plan. There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers. During the reference period, however, we had opportunities to engage with relevant sovereign and supranational issuers, primarily with respect to their approach to net zero carbon strategies (relating to PAI 15, GHG intensity).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	98
Corporate Governance	36
Human Rights	19
Natural Capital and Biodiversity	17
Diversity and Inclusion	12
Human Capital Management	12

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
SCHRODER CHINA FIXED INCOME FUND RMB I ACC(CFMI) TREASURY SEC. .25% 31 Aug 2025	Collective Investments	7.23	China

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schrodgers Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

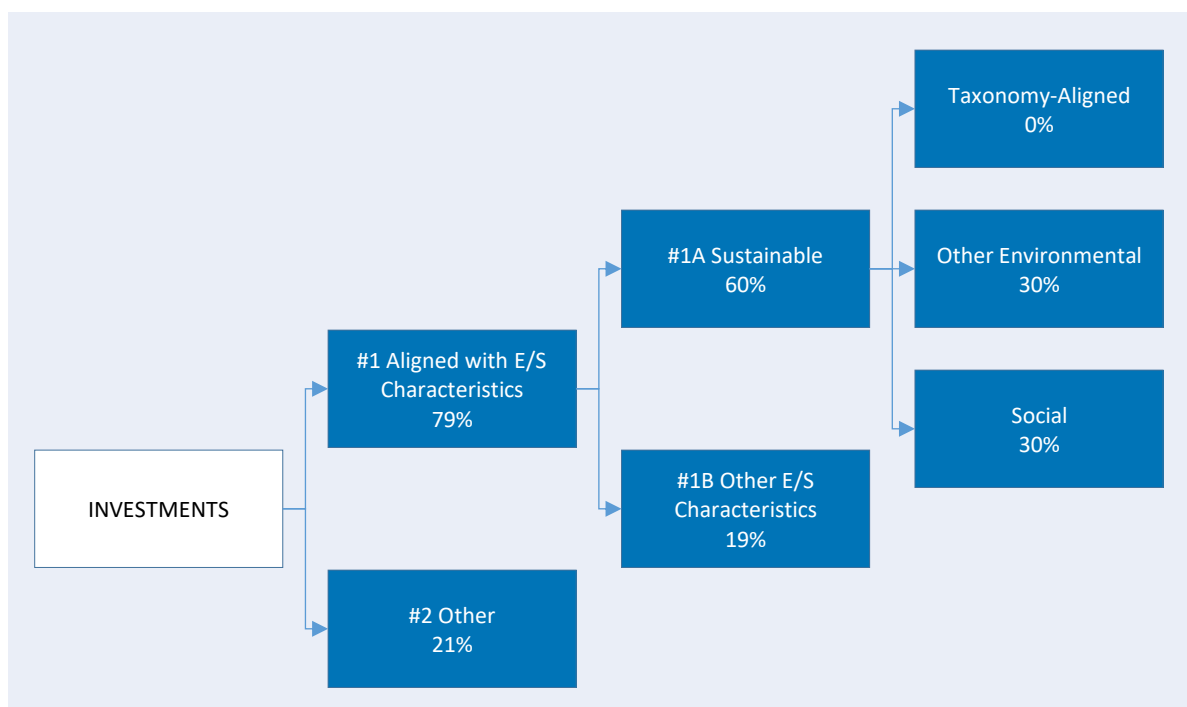

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 79%. The Fund maintained a higher overall sustainability score than the Bloomberg Global Aggregate Bond Index and so the Fund's investments that were scored by Schrodgers' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the

reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 60% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 30% was invested in sustainable investments with an environmental objective and 30% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Sovereign (Developed)		25.49
Securitized	Mortgage Backed	12.68
Securitized	Collateralized Mortgage Obligation	3.35
Securitized	Asset Backed	3.24
Securitized	Commercial Mortgage Backed	0.05
Financial	Banking	11.22
Financial	Financial Services	2.55
Financial	Insurance	0.98
Industrial	Healthcare	1.33
Industrial	Real Estate	1.25
Industrial	Telecommunications	1.03
Industrial	Consumer Goods	0.88
Industrial	Technology & Electronics	0.85
Industrial	Gas-Distribution	0.84
Industrial	Basic Industry	0.81
Industrial	Automotive	0.65
Industrial	Energy - Exploration & Production	0.63
Industrial	Media & Entertainment	0.50
Industrial	Integrated Energy	0.45

Supranational	Financial Services	0.14
Local Authority		1.60
Foreign Sovereign		1.54
Utilities	Electric - Integrated	1.07
Utilities	Electric - Generation	0.14
Utilities	Non-Electric Utilities	0.14
Utilities	Electric - Distr/Trans	0.07
Utilities	Gas-Distribution	0.01
Derivatives	FX Derivatives	0.02
Derivatives	Interest Rate Derivatives	-0.01
Derivatives	Credit Derivatives	-0.03
Cash	Margin Cash	1.32
Cash	Cash	-3.50

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 30%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 30%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Inflation Linked Bond

Legal Entity Identifier : RUBFC6653PDCGJDLQB12

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 99% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Global Governments Inflation-Linked EUR Hedged Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.9% and the benchmark's sustainability score for the reference period was 1.8%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Education
- International Aid
- Sanitation
- Socio-Political Stability

- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the ICE BofA Merrill Lynch Global Governments Inflation-Linked EUR Hedged Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the ICE BofA Merrill Lynch Global Governments Inflation-Linked EUR Hedged Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 99% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	99
Aug 2022 - Dec 2022	97

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	2.9	1.8
Jan 2022 - Dec 2022	1.8	1.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Education: the estimated societal benefits of a country's education spend per school age capita;
- International Aid: the estimated societal benefits associated with humanitarian aid following natural disasters or conflicts and financial support for economic development of underdeveloped economies.

Assigned in proportion to total net Official Development Assistance (ODA) receipts;

- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue;

- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.
- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGCC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGCC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. The nature of this Fund is such that it does not meaningfully invest in corporate bonds and hence in practice such corporate exclusions are less important than for other Funds. Nonetheless, the exclusions formally applied included the following:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates PAIs as a component of its scoring methodology.

For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries' debt for the portfolio.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers (in which this Fund does not meaningfully invest). During the reference period, however, we had opportunities to engage with relevant sovereign and supranational issuers, primarily with respect to their approach to net zero carbon strategies (relating to PAI 15, GHG intensity).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	6
Natural Capital and Biodiversity	3
Corporate Governance	3
Human Rights	2
Human Capital Management	1
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
US TREASURY INFL TII TIPS .375% 15 Jul 2025	Sovereign (Developed)	3.78	United States

US TREASURY INFL TII TIPS .75% 15 Jul 2028	Sovereign (Developed)	1.40	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

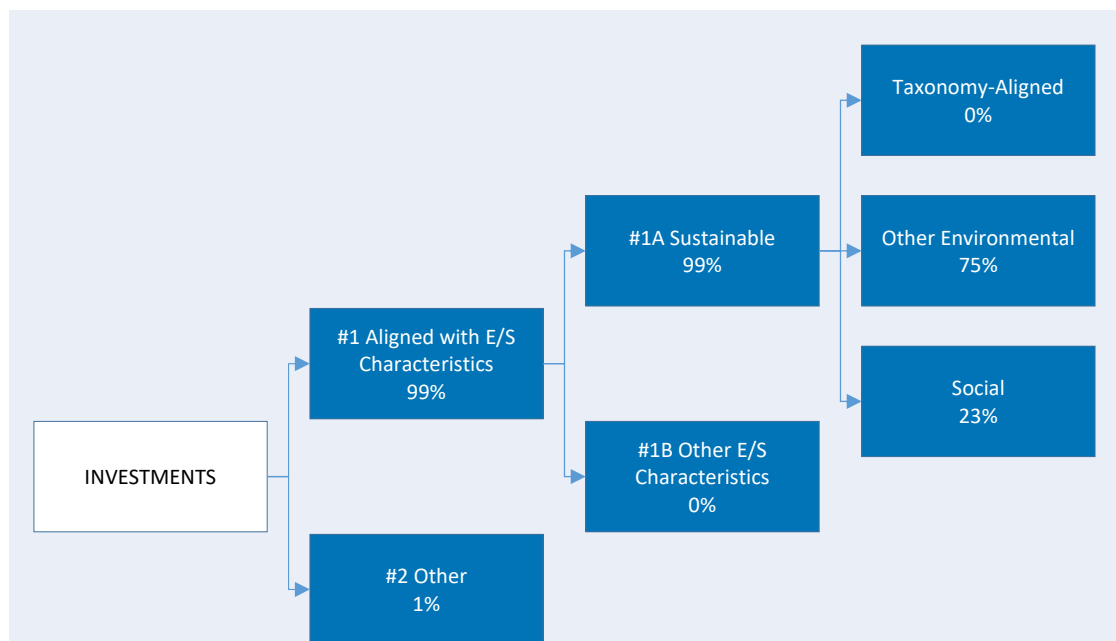

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the

environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Global Governments Inflation-Linked EUR Hedged Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 99% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 75% was invested in sustainable investments with an environmental objective and 23% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Sovereign (Developed)		91.93
Utilities	Non-Electric Utilities	1.21
Utilities	Electric - Integrated	0.54
Utilities	Electric - Generation	0.14
Government Guaranteed		1.30
Government Guaranteed	Transportation	0.54
Supranational		1.79
Industrial	Healthcare	0.68
Industrial	Telecommunications	0.39
Industrial	Media & Entertainment	0.21
Industrial	Real Estate	0.10
Industrial	Capital Goods	0.03
Industrial	Services	0.01
Cash	Margin Cash	0.51
Cash	Cash	0.04
Financial	Financial Services	0.15
Financial	Insurance	0.09
Financial	Banking	0.08
EMD Sovereign		0.15
Derivatives	FX Derivatives	0.14
Derivatives	Inflation Derivatives	-0.05

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

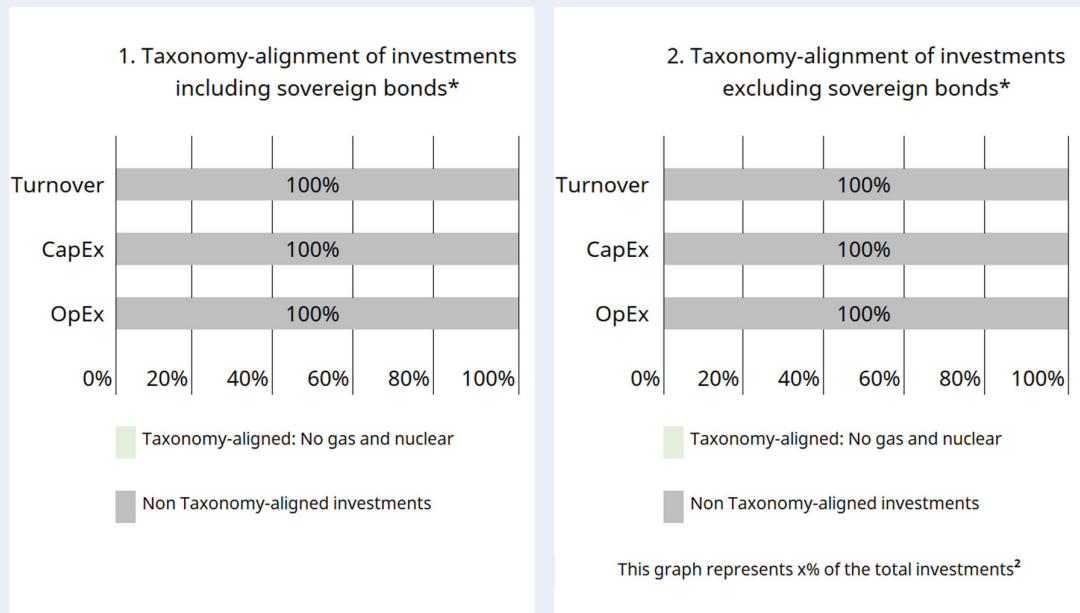

Taxonomy-aligned activities are expressed as a share of:

- **turnover**
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• ***What was the share of investments made in transitional and enabling activities?***

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• ***What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?***

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 75%.

• ***What was the share of socially sustainable investments?***

The share of sustainable investments with a social objective was 23%.

• ***What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?***

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Sustainable US Dollar Short Duration Bond

Legal Entity Identifier : 549300SQ2F1F5L1C1W23

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg US Govt/Credit 1-3 Year Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.5% and the benchmark's sustainability score for the reference period was -0.8%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Education
- High Salaries
- Sanitation
- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the Bloomberg US Govt/Credit 1-3 Year Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Bloomberg US Govt/Credit 1-3 Year Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 68% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 40% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	68
Aug 2022 - Dec 2022	65

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.5	-0.8
Jan 2022 - Dec 2022	2.0	-1.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage;

- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via

<https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company’s overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. [During the reference period, we engaged with an investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to have them provide an update on their climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	26
Corporate Governance	10
Natural Capital and Biodiversity	6
Human Capital Management	4
Human Rights	3
Diversity and Inclusion	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
TREASURY NOTE SR GOVT 3.875% 31 Mar 2025	Sovereign (Developed)	15.00	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 93%. The Fund maintained a higher overall sustainability score than the Bloomberg US Govt/Credit 1-3 Year Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 68% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 48% was invested in sustainable investments with an environmental objective and 20% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Sovereign (Developed)		31.83
Financial	Banking	15.94
Financial	Financial Services	7.35
Financial	Insurance	4.38
Industrial	Telecommunications	5.48
Industrial	Healthcare	4.59
Industrial	Automotive	3.73
Industrial	Gas-Distribution	2.53
Industrial	Media & Entertainment	2.39
Industrial	Real Estate	1.75
Industrial	Technology & Electronics	1.37
Industrial	Consumer Goods	1.26
Industrial	Services	1.04
Industrial	Basic Industry	0.63
Industrial	Transportation	0.34
Industrial	Retail	0.27
Securitized	Mortgage Backed	7.44
Supranational		3.18
Utilities	Electric - Integrated	1.49
Utilities	Non-Electric Utilities	0.29
Government Guaranteed		1.39
Cash Equivalents	Treasury Bills	0.96
Cash	Cash	0.36

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

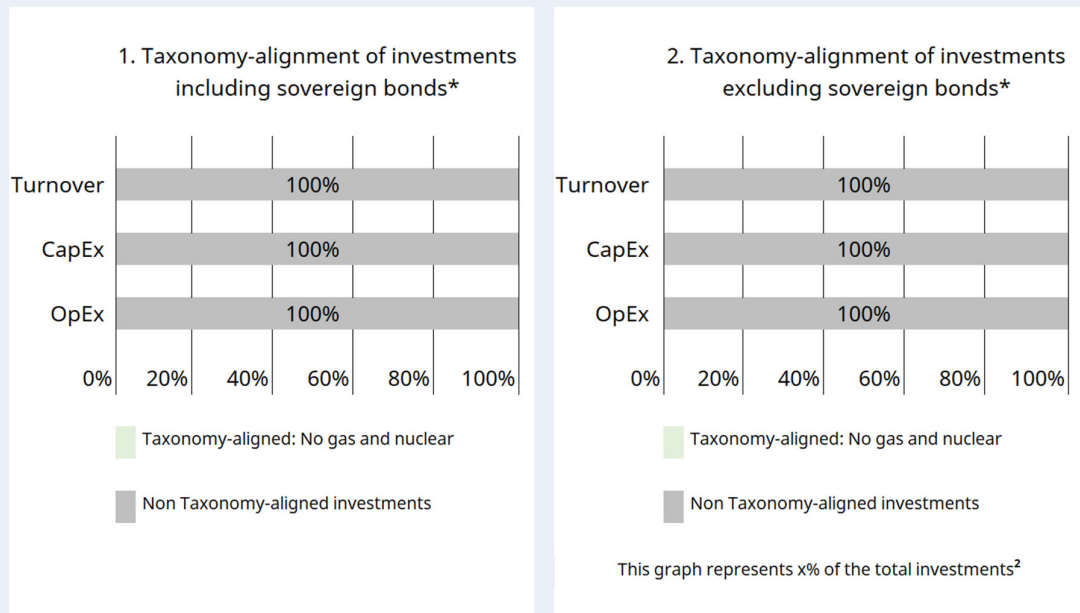

Taxonomy-aligned activities are expressed as a share of:

- **turnover**
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 48%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 20%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF US Dollar Bond
Legal Entity Identifier : GB3IPB54OX2RMO1Y4781

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 59% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg US Aggregate Bond (TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.8% and the benchmark's sustainability score for the reference period was -2.1%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Education
- High Salaries
- Sanitation

- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Bloomberg US Aggregate Bond (TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Bloomberg US Aggregate Bond (TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 59% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	59
Aug 2022 - Dec 2022	62

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.8	-2.1
Jan 2022 - Dec 2022	3.6	-2.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain

(suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural

capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on

such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. [During the reference period, we engaged with an investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the energy sector to have them provide an update on their climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1,

2, 3 and 4.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	45
Corporate Governance	14
Natural Capital and Biodiversity	7
Human Capital Management	4
Human Rights	4
Diversity and Inclusion	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
SIS SECURITISED CREDIT I ACCUMULATION	Collective Investments	7.84	Luxembourg
US TREASURY BOND 3% 15 Aug 2052	Sovereign (Developed)	3.35	United States

FR SD1581 2.5% 01 Sep 2052	Securitized	1.02	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

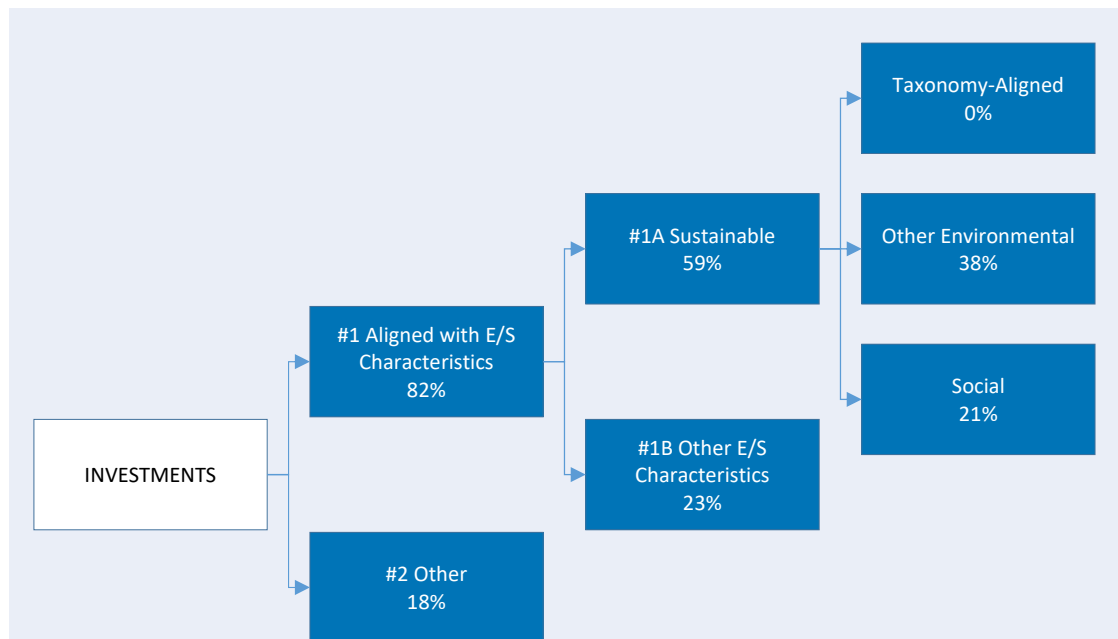

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 82%. The Fund maintained a higher overall sustainability score than the Bloomberg US Aggregate Bond (TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 59% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 38% was invested in sustainable investments with an environmental objective and 21% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Securitized	Mortgage Backed	22.36
Securitized	Asset Backed	2.63
Securitized	Collateralized Mortgage Obligation	0.10
Industrial	Telecommunications	2.82
Industrial	Automotive	2.78
Industrial	Healthcare	2.59
Industrial	Real Estate	2.46
Industrial	Gas-Distribution	1.91
Industrial	Basic Industry	1.78
Industrial	Technology & Electronics	1.59
Industrial	Media & Entertainment	1.46
Industrial	Consumer Goods	1.03
Industrial	Services	0.99
Industrial	Energy - Exploration & Production	0.69
Industrial	Capital Goods	0.39
Industrial	Leisure	0.30
Industrial	Integrated Energy	0.25
Industrial	Retail	0.18
Industrial	Transportation	0.08
Financial	Banking	14.19
Financial	Financial Services	3.88
Financial	Insurance	1.16
Sovereign (Developed)		14.01
Collective Investments	Unit Trusts	7.84
Utilities	Electric - Integrated	3.02
Utilities	Non-Electric Utilities	1.90
Utilities	Electric - Distr/Trans	0.04
Foreign Sovereign		3.98
Cash	Margin Cash	0.72
Cash	Cash	0.48
Cash Equivalents	Treasury Bills	1.09
U.S. Taxable Municipal		0.93
Agency		0.16
Local Authority	Local Authority	0.15
EMD Sovereign		0.14
Government Guaranteed		0.03
Derivatives	Credit Derivatives	-0.13

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these

differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

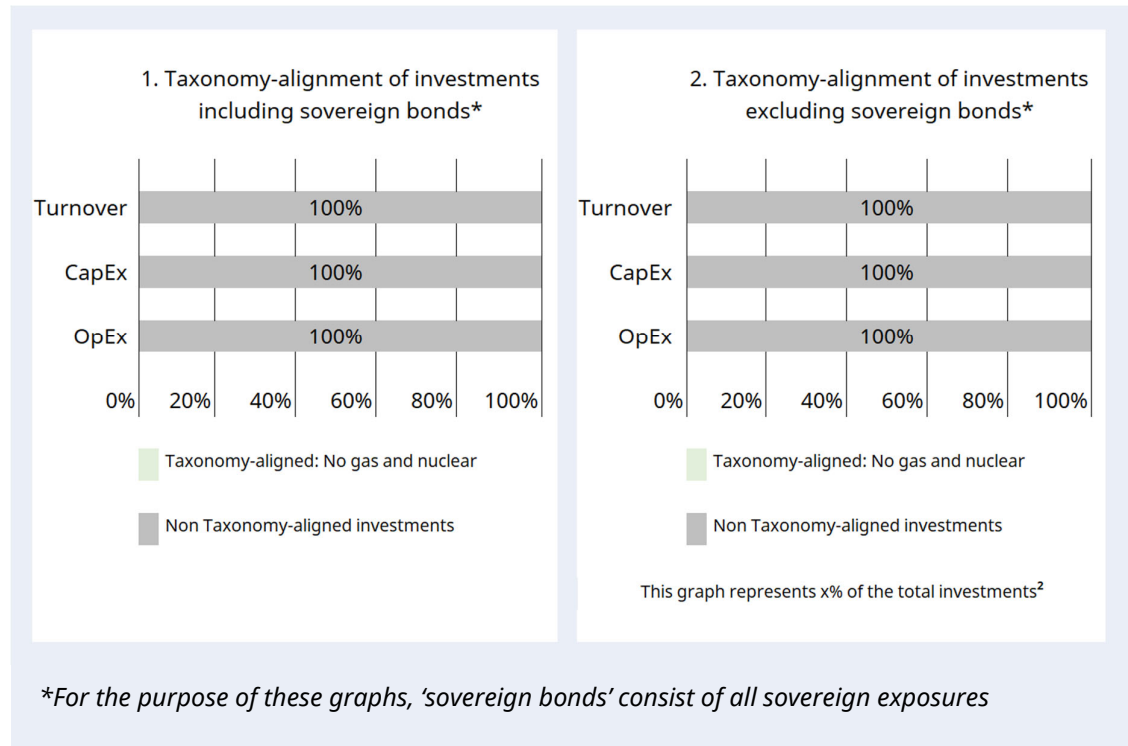

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 38%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 21%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schrodgers' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schrodgers.com/m/3222ea4ed44a1f2c/original/schrodgers-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Alternative Securitised Income
Legal Entity Identifier : 549300WDWBV63KONLL52

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> with a social objective
<input type="checkbox"/>	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund only invested in assets deemed above a minimum threshold based on the Investment Manager's rating system. Securities were ranked across Environmental, Social and Governance factors using a scorecard system and were awarded points on a 100-point /100 percent scale. These scores were then translated into a scoring system of 1- star – 5-stars, with a score of 5-stars deemed the highest. The Investment Manager ensured that at least 80% of the assets in the Fund were ranked in the top 3 Sustainability categories (3, 4, 5-stars) and 100% of the assets were invested in those ranked 2-stars or higher.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Investment Manager used different sustainability indicators to score each investment in the Fund depending on the specific asset-type, e.g. whether the underlying secured assets were mortgages or commercial real estate or another asset type. Indicators were either quantitative, data-oriented measures or information provided following engagement with issuers. Indicators included but were not limited to environmental metrics such as environmental transition risk or physical risk, social metrics such as predatory lending risk or consumer education effort and governance metrics such as risk retention or clarity of roles.

11.0% of the assets in the Fund were ranked as 5-stars, 30.8% were ranked as 4-stars and 57.7% were ranked as 3-stars, measured using quarter-end data throughout the reference period.

Compliance with the minimum required score was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- International Aid: the estimated societal benefits associated with humanitarian aid following natural disasters or conflicts and financial support for economic development of underdeveloped economies. Assigned in proportion to total net Official Development Assistance (ODA) receipts;
- Medical Research: the estimated societal benefits of medical innovation resulting in improvements in human conditions, increases of life expectancy and quality of life. Assigned in proportion to the social benefit of medical innovation to countries using patent data, specifically the number of medical-related technology patents filed by applicant country; and
- Patents: the estimated societal benefits associated with governments conducting in-house Research and Development (R&D) and also finance R&D in various sectors of the economy. Assigned in proportion

to the social benefits of innovation to countries using resident patent application data from the World Intellectual Property Organisation (WIPO).

• *...and compared to previous periods?*

Proprietary star ratings

This table details the percentage of assets invested in accordance with the proprietary star ratings, year on year.

Period	5-stars %	4-stars %	3-stars %
Jan 2023 – Dec 2023	11	31	58
Jan 2022 – Dec 2022	20	28	48

• *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

• *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

This question is not applicable for this Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

This question is not applicable for this Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This question is not applicable for this Fund.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As stated in the pre-contractual disclosure for the Fund, the Investment Manager was not able to adequately consider the principal adverse impacts on sustainability factors as these metrics only applied to investments in companies, sovereign debt and real estate.

Due to the nature of the Fund’s assets, the Investment Manager could only consider adverse impacts applicable to this asset class. The Investment Manager considered adverse impacts relevant to the strategy in the following way:

- The Investment Manager ensured that investments were aligned with the UN Principles for Responsible Investment (“PRI”). All investments were compliant with industry standards, fair, and fit-for purpose;
- The Investment Manager’s rating system considered adverse impacts on society such as the asset footprint on the environment or impact on climate change;
- Investments that could not meet minimum standards related to social, environmental or governance concerns were excluded from the portfolio. The list of excluded sectors was reviewed, updated and published quarterly.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99.5%. This means investments that were ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria. This figure was calculated using quarter-end data throughout the reference period.

#2 Other includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes investments that were not aligned with the environmental or social characteristics of the Fund as they were not ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	% Assets
Non-US Mortgage	21.57
US Mortgage	19.41
EU CLO	16.29
Agency MBS	16.17
Commercial Real Estate Securities	9.83
Cash & Equiv.	5.76
US CLO	4.01
Student Loan	3.10
Non-US Commercial	2.10
Auto	0.80
Other Asset Backed	0.55
Non-US Asset Backed	0.40

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived

from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

This question is not applicable for this Fund.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable for this Fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This question is not applicable for this Fund.

What was the share of socially sustainable investments?

This question is not applicable for this Fund.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Instruments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes investments that were not aligned with the environmental or social characteristics of the Fund as they were not ranked in the top 3 Sustainability categories according to the Investment Manager’s rating criteria.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- At least 80% of the assets in the Fund were ranked in the top 3 Sustainability categories (3, 4, 5-stars) and the Investment Manager invested 100% of its assets in those ranked 2-stars or higher based on the Investment Manager's rating system;
- To the extent possible the Investment Manager assessed good governance of the special purpose vehicles (SPVs – the structures holding the assets) and assessed the fiduciary behaviour of parties to the structure;
- Securitised markets and the markets for private financing are less standardised with respect to ESG metrics as there is no third-party scoring and reporting is in a non-standard format. Engagement activities focused on deriving information, to understand where sub-sectors and companies were in their evolution, to improve transparency, to assess social, environmental or alignment characteristics to reward and incentivise / more correctly risk price for externalities, to identify those more likely to achieve levels of governance, social policy or environmental advantage that were aligned with our own standards, particularly where the market has not correctly differentiated.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Asian Credit Opportunities

Legal Entity Identifier : 549300T8YDW23OK28X19

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 47% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the JP Morgan Asia Credit Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.2% and the benchmark's sustainability score for the reference period was -2.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Financial Inclusion
- High Salaries

- Power Provision

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the JP Morgan Asia Credit Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the JP Morgan Asia Credit Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 47% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	47
Aug 2022 - Dec 2022	47

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.2	-2.9
Jan 2022 - Dec 2022	3.4	-2.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of

communities through telecommunication services;

- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from

activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We

recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as

sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAIs related to GHG emissions and carbon footprint (PAIs 1, 2, 3 and 15), were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we

engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAIs 1 and 2, we engaged with a company in the metals and mining sector to follow up and share feedback on their targets and initiatives related to carbon emissions. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 15.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	38
Corporate Governance	9
Diversity and Inclusion	4
Human Rights	3
Natural Capital and Biodiversity	3
Human Capital Management	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
INDONESIA (REPUBLIC OF) SR REGS 6.625% 17 Feb 2037	Foreign Sovereign	2.86	Indonesia

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 91%. The Fund maintained a higher overall sustainability score than the JP Morgan Asia Credit Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the

reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 47% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 18% was invested in sustainable investments with an environmental objective and 30% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Technology & Electronics	6.09
Industrial	Integrated Energy	4.26
Industrial	Real Estate	4.23
Industrial	Leisure	4.21
Industrial	Telecommunications	4.05
Industrial	Media & Entertainment	3.27
Industrial	Retail	3.03
Industrial	Basic Industry	2.52
Industrial	Oil Refining & Marketing	1.99
Industrial	Transportation	1.94
Industrial	Gas-Distribution	1.26
Industrial	Capital Goods	1.15
Industrial	Energy - Exploration & Production	1.01
Industrial	Automotive	0.98
Industrial	Healthcare	0.51
Industrial	Consumer Goods	0.33
Industrial	Services	0.06
Financial	Banking	22.97
Financial	Financial Services	8.58
Financial	Insurance	6.77
Foreign Sovereign		8.32
Utilities	Electric - Generation	3.11
Utilities	Integrated Energy	1.13
Utilities	Electric - Integrated	0.22
Utilities	Non-Electric Utilities	0.06
Cash Equivalents	Treasury Bills	3.14
Agency		1.11
Agency	Electric - Generation	0.82
Agency	Financial Services	0.06
Local Authority	Transportation	1.94
Cash	Cash	0.67
Cash	Margin Cash	0.21
EMD Sovereign		-0.01
Derivatives	FX Derivatives	-0.01

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

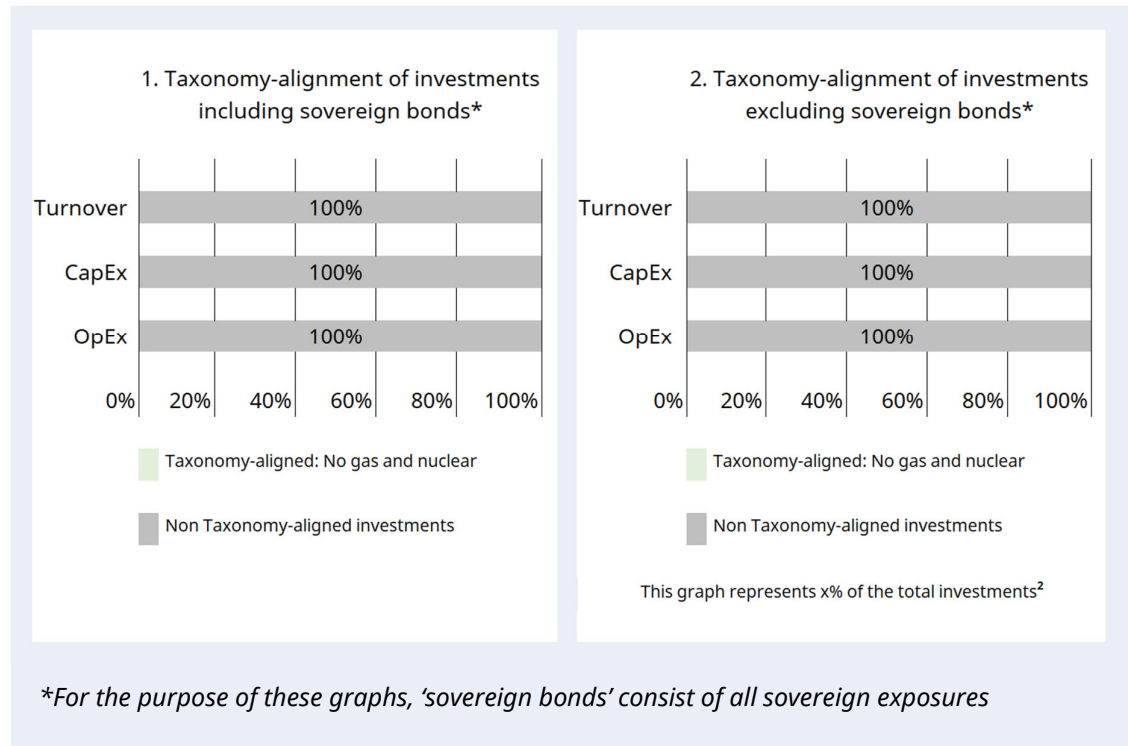

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 18%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 30%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Asian Local Currency Bond
Legal Entity Identifier : 549300KCHS5SNB1JYW85

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective : __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 30% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective : __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the iBoxx Asian Local Currency Bond Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -0.7% and the benchmark's sustainability score for the reference period was -1.3%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Education
- Patents
- Socio-Political Stability

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the iBoxx Asian Local Currency Bond Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the iBoxx Asian Local Currency Bond Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 30% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	30
Sep 2022 - Dec 2022	33

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	-0.7	-1.3
Jan 2022 - Dec 2022	-0.7	-1.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;

- Patents: the estimated societal benefits associated with governments conducting in-house Research and Development (R&D) and also finance R&D in various sectors of the economy. Assigned in proportion to the social benefits of innovation to countries using resident patent application data from the World Intellectual Property Organisation (WIPO); and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms'

breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAIs related to GHG emissions and carbon footprint (PAIs 1, 2, 3 and 15), were included as part of a company’s overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. For example, during the reference period, we engaged with an investee company on human rights and supply chain working conditions related to PAI 10 (Violations of UNGC principles).

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	38
Corporate Governance	9
Human Rights	5
Diversity and Inclusion	4
Natural Capital and Biodiversity	2
Human Capital Management	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
INDONESIA (REPUBLIC OF) FR 95 SR FR95 6.375% 15 Aug 2028	EMD Sovereign	6.02	Indonesia

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 94%. The Fund maintained a higher overall sustainability score than the iBoxx Asian Local Currency Bond Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 30% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 13% was invested in sustainable investments with an environmental objective and 17% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
EMD Sovereign		77.66
Industrial	Telecommunications	1.52
Industrial	Technology & Electronics	0.59
Industrial	Real Estate	0.55
Industrial	Integrated Energy	0.45
Industrial	Leisure	0.39
Industrial	Media & Entertainment	0.33
Industrial	Basic Industry	0.33
Industrial	Retail	0.30
Industrial	Oil Refining & Marketing	0.29
Industrial	Capital Goods	0.28
Industrial	Energy - Exploration & Production	0.19
Industrial	Transportation	0.16
Industrial	Gas-Distribution	0.14
Industrial	Consumer Goods	0.11
Industrial	Automotive	0.10
Industrial	Healthcare	0.05
Industrial	Services	0.02
Agency		4.50
Agency	Financial Services	0.15
Agency	Electric - Generation	0.06
Financial	Banking	2.07
Financial	Financial Services	1.08
Financial	Insurance	0.88
Cash	Cash	2.05
Cash	Margin Cash	1.39
Derivatives	Interest Rate Derivatives	1.25
Foreign Sovereign		0.94
Derivatives	FX Derivatives	-0.31
Cash Equivalents	Treasury Bills	0.86
Sovereign (Developed)		0.61
Utilities	Electric - Generation	0.39
Utilities	Non-Electric Utilities	0.09
Utilities	Integrated Energy	0.08
Supranational		0.28
Local Authority	Transportation	0.16

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to

economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

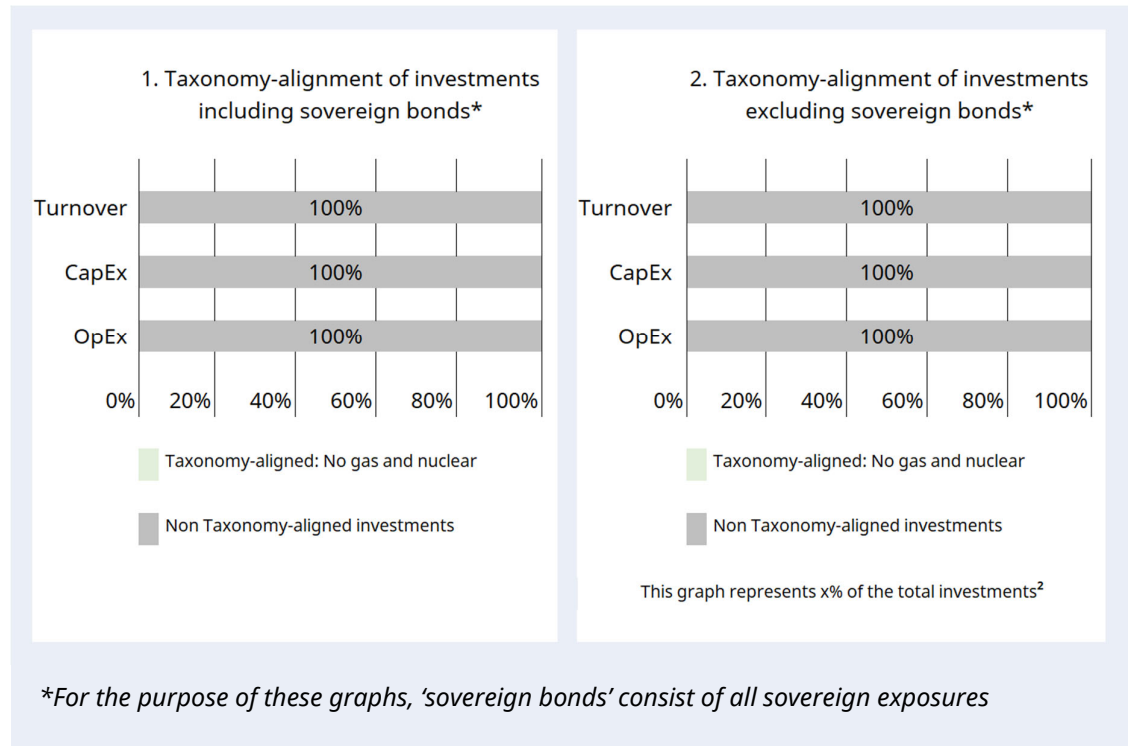

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 13%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 17%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Product Name : Schroder ISF BlueOrchard Emerging Markets Climate Bond
Legal Entity Identifier : 5493007XCI1VSIJ1FK02

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 94%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 75% of its assets in securities issued by governments and companies worldwide, including emerging market countries, that contributed towards the UN SDG of taking action to combat climate change. The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for the Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

• *How did the sustainability indicators perform?*

The Fund invested 94% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used specific sustainability key performance indicators to assess the investment's contribution to an environmental objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the impact contribution at an investee company level. In particular, the Investment Manager used a proprietary sustainability tool to verify that every bond included in the investment universe had satisfactory ESG and impact scores and was aligned to the Fund's investment objective of combatting climate change. The Fund generated a positive impact as demonstrated by indicators attributable to the portfolio, which included but were not limited to creating an estimated reduction of 143,538 tons of greenhouse gas emissions (tCO₂e), generating an estimated 109,109 MWh of renewable energy with financed renewable energy assets, installing an estimated 130 MW of renewable energy capacity and saving an estimated 32,426 MWh of energy with green buildings and energy efficiency projects. These figures are estimated based on publicly available data and are applicable to the reference period.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within this exclusionary criteria.

• *...and compared to previous periods?*

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	94
Jan 2022 - Dec 2022	94

Estimated CO₂ emissions reduction

This table details the Fund's average estimated tons of CO₂ emissions reduction, year on year.

Period	Tons of CO ₂ emissions reduction
Jan 2023 - Dec 2023	143,538
Jan 2022 - Dec 2022	221,494

Estimated renewable energy generated

This table details the Fund's average estimated MWh of renewable energy generated, year on year.

Period	MWh of renewable energy generated
Jan 2023 - Dec 2023	109,109
Jan 2022 - Dec 2022	152,768

Estimated renewable energy capacity installed

This table details the Fund's average estimated MW of renewable energy capacity installed, year on year.

Period	MW of renewable energy capacity installed
Jan 2023 - Dec 2023	130
Jan 2022 - Dec 2022	113

Estimated energy saved

This table details the Fund's average estimated MWh of energy saved, year on year.

Period	MWh of energy saved
Jan 2023 - Dec 2023	32,426
Jan 2022 - Dec 2022	16,202

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portfolio, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund did not directly invest in the sectors included in the International Finance Corporation Exclusion List and BlueOrchard's Public Asset Exclusion List:

https://www.ifc.org/wps/wcm/connect/topics_ext_content/ifc_external_corporate_site/sustainability-at-ifc/company-resources/ifcexclusionlist#2007.

https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy_Public-Assets.pdf.

Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its

portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portfolio. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to the Investment Manager's core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the theme of climate change. We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the theme of biodiversity and natural capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the theme of human rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the theme of human capital management. We identify human capital

management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the theme of diversity and inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the theme of corporate governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

During the reference period, PAIs were included within the BlueOrchard proprietary ESG scorecard which is one of the necessary steps to assess issuers and approve them for the strategy's sustainable investment universe. PAIs 1-14 were included in the BlueOrchard proprietary ESG scorecard within relevant ESG sections and guided the ESG analysis along with other ESG factors such as good governance metrics to determine an overall ESG score.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with a number of issuers covering a range of topics and related to PAIs 1, 2, 3, 12 and 13. For example we engaged with an investee company on net zero carbon emissions targets and SBTi targets, related to PAI 1 and 2. In reference to PAI 1 and 2, we engaged with a company in the financial sector to enquire why the firm did not have SBTi targets committed or validated, and shared the importance of such targets and commitments.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	33
Climate Change	16
Human Rights	4
Diversity and Inclusion	2
Human Capital Management	2
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
PERUSAHAAN PENERBIT SURAT BERHARGA SR REGS 4.7% 06 Jun 2032	Foreign Sovereign	1.89	Indonesia

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in securities issued by governments and companies worldwide, including emerging market countries, that contributed towards the UN SDG of taking action to combat climate change.

The Fund invested 94% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. All the sustainable investments had an environmental objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

• *In which economic sectors were the investments made?*

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	24.46
Financial	Insurance	2.24
Financial	Financial Services	1.32
Financial	Financial Other	0.34
Industrial	Real Estate	5.78
Industrial	Technology & Electronics	4.35
Industrial	Consumer Goods	3.03
Industrial	Transportation	2.80
Industrial	Basic Industry	2.02
Industrial	Automotive	1.29
Industrial	Integrated Energy	0.89
Industrial	Telecommunications	0.62
Industrial	Media & Entertainment	0.59
Industrial	Healthcare	0.55
Industrial	Retail	0.36
Industrial	Capital Goods	0.04
Utilities	Electric - Generation	8.13
Utilities	Electric - Integrated	5.32
Utilities	Non-Electric Utilities	1.39
Utilities	Electric - Distr/Trans	0.76
Foreign Sovereign		13.64
Supranational		7.33
Agency		4.69
Agency	Electric - Generation	0.28
Cash Equivalents	Treasury Bills	4.68
Cash	Cash	1.64
Cash	Margin Cash	0.08
Government Guaranteed		1.05
Local Authority		0.48
Derivatives	FX Derivatives	-0.19

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with

an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

• **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

All sustainable investments made by the Fund had environmental objectives that were not aligned with the EU Taxonomy.

• **What was the share of socially sustainable investments?**

There were no sustainable investments with a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective were the following:

- The Fund invested at least 75% of its assets in securities issued by governments and companies worldwide, including emerging market countries, that contributed towards the UN SDG of taking action to combat climate change.
- The Fund invested in companies that did not cause significant environmental or social harm.
- The Investment Manager utilised its proprietary framework to help assess good governance practices of investee companies.
- The Investment Manager engaged with certain issuers held in the portfolio and on average aimed to meet or speak with company management at least at the bond’s issuance or at the time of the investment. During these meetings sustainability topics (such as net zero and the energy transition) were regularly discussed alongside impact disclosure and reporting plans to voice the Investment Manager’s objectives in terms of sustainability data, and any concerns on insufficient reporting.
- During 2023 the Investment Manager conducted 58 dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to climate change,

disclosure and reporting, and corporate governance.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF BlueOrchard Emerging Markets Impact Bond

Legal Entity Identifier : 5493002UVX4QP1OMYB39

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> Yes	<input type="radio"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 22%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 71%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 75% of its assets in securities issued by governments, government agencies, supra-nationals and companies of emerging market countries that contribute towards the advancement of one or more of the UN SDGs by contributing positively towards social development and environmental themes. The Fund invested at least 5% of its assets in sustainable investments with an environmental objective and at least 50% of its assets in sustainable investments with a social objective.

The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

The Fund invested in fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies with the aim to foster financial inclusion and provide decisive funding to economically vulnerable communities globally as well as fixed and floating rate securities related to sustainable infrastructure projects and clean energy initiatives.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for the Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

• *How did the sustainability indicators perform?*

The Fund invested 93% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used specific sustainability key performance indicators to assess the investment's contribution to an environmental objective. Compliance with the

minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the impact contribution at an investee company level. In particular, the Investment Manager used a proprietary sustainability tool to verify that every bond included in the investment universe had satisfactory ESG and impact scores and was aligned to the Fund's investment objective of combatting climate change. The Fund generated a positive impact as demonstrated by indicators attributable to the portfolio. For sustainable investments with a social objective, indicators included but were not limited to providing access to finance to 59,351 people, supporting 16'829 women and minorities, reaching 59,516 number of beneficiaries patients and students, providing 301'694 households with access to connectivity, and supporting 15,322 number of micro/ small/medium enterprises. For sustainable investments with an environmental objective, indicators included but were not limited to creating an estimated reduction of 166'722 tons of greenhouse gas emissions (tCO₂e), generating an estimated 120'717 MWh of renewable energy with financed renewable energy assets, and installing an estimated 651 MW of renewable energy capacity. These figures are estimated based on publicly available data and are applicable to the reference period.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within this exclusionary criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• **...and compared to previous periods?**

As this is our first reporting period, this question is not applicable.

• **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portfolio, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund did not directly invest in the sectors included in the International Finance Corporation Exclusion List and BlueOrchard's Public Asset Exclusion List:
https://www.ifc.org/wps/wcm/connect/topics_ext_content/ifc_external_corporate_site/sustainability-at-ifc/company-resources/ifcexclusionlist#2007
https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy_Public-Assets.pdf
- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on

sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portfolio. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to the Investment Manager's core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the theme of biodiversity and natural capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the theme of human rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the theme of human capital management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the theme of diversity and inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the theme of corporate governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

During the reference period, PAIs were included within the BlueOrchard proprietary ESG scorecard which is one of the necessary steps to assess issuers and approve them for the strategy’s sustainable investment universe. PAIs 1-14 were included in the BlueOrchard proprietary ESG scorecard within relevant ESG sections and guided the ESG analysis along with other ESG factors such as good governance metrics to determine an overall ESG score.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with a number of issuers covering a range of topics and related to PAIs 1, 2, 3, 12 and 13. For example we engaged with an investee company on net zero carbon emissions targets and SBTi targets, related to PAI 1 and 2. In reference to PAI 1 and 2, we engaged with a company in the financial sector to enquire why the firm did not have SBTi targets committed or validated, and shared the importance of such targets and commitments.

A summary of the Fund’s engagement activity during the reference period, including the relevant

engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	35
Climate Change	12
Human Rights	4
Diversity and Inclusion	3
Natural Capital and Biodiversity	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment

Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

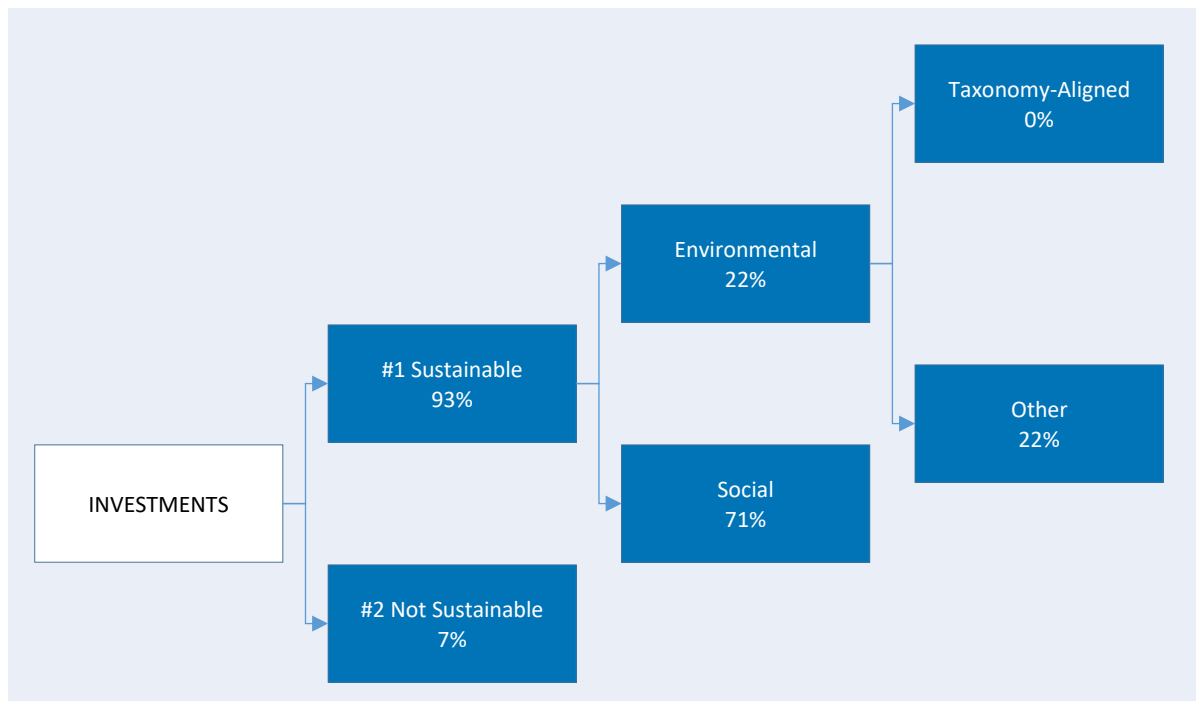

• What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in securities issued by governments, government agencies, supranationals and companies of emerging market countries that contribute towards the advancement of one or more of the UN SDGs by contributing positively towards social development and environmental themes.

The Fund invested 93% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. Within this, 22% was invested in sustainable investments with an environmental objective and 71% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

#1 Sustainable covers sustainable investments with environmental or social objectives
#2 Not sustainable includes investments which do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	39.09
Financial	Financial Services	5.58
Financial	Insurance	0.51
Supranational		18.80
Industrial	Technology & Electronics	3.27
Industrial	Telecommunications	2.52
Industrial	Real Estate	1.35
Industrial	Transportation	0.99
Industrial	Consumer Goods	0.49
Industrial	Basic Industry	0.48
Industrial	Healthcare	0.26
Industrial	Integrated Energy	0.16
Industrial	Retail	0.11
Industrial	Automotive	0.09
Industrial	Media & Entertainment	0.04
Agency		7.31
Agency	Financial Services	0.24
Agency	Banking	0.17
Agency	Electric - Generation	0.05
Foreign Sovereign		6.57
Cash Equivalents	Treasury Bills	4.44
Utilities	Electric - Generation	2.73
Utilities	Non-Electric Utilities	0.44
Utilities	Electric - Distr/Trans	0.24
Utilities	Electric - Integrated	0.16
Cash	Cash	2.42
Government Guaranteed		1.52
Local Authority		0.03
Derivatives	FX Derivatives	-0.05

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector

classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 22%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 71%.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective were the following:

- The Fund invested at least 75% of its assets in securities issued by governments, government agencies, supra-nationals and companies of emerging market countries that contribute towards the advancement of one or more of the UN SDGs by contributing positively towards social development and environmental themes.
- The Fund invested in companies that did not cause significant environmental or social harm.
- The Investment Manager utilised its proprietary framework to help assess good governance practices of investee companies.
- The Investment Manager engaged certain issuers held in the portfolio and on average aimed to meet or speak with company management at least at the bond's issuance or at the time of the investment. During these meetings sustainability topics (such as net zero and the energy transition) were regularly discussed alongside impact disclosure and reporting plans to voice the Investment Manager's objectives in terms of sustainability data, and any concerns on insufficient reporting.
- During 2023 the Investment Manager conducted 40 dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to climate change, disclosure and reporting, and corporate governance.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Carbon Neutral Credit

Legal Entity Identifier : 54930083X6X1LLU8U819

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 98%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met. The Fund aimed to achieve aggregate carbon neutrality by the year 2025 within its investment portfolio by investing its assets in sustainable investments, which were fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide that in the Investment Manager's view contributed towards the objective of carbon emission reduction by one or a combination of the following: (i) being carbon neutral; (ii) aiming for, and being on track to achieve, 80% emission reductions or equivalent by 2030; (iii) otherwise demonstrating a contribution to the reduction of carbon emissions (and companies within (iii) may include those that provide products or services which enable decarbonisation). All companies held by the Fund were deemed to be sustainable investments by the Investment Manager.

The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Aggregate carbon neutrality means achieving net zero carbon emissions intensity by balancing investments in (a) issuers that generate carbon emissions, but that have stated goals to reduce such emissions with (b) issuers that contribute to reducing carbon emissions.

The Fund's objective includes a reduction in carbon emissions, which means that it aims for low carbon emissions, consistent with the long-term objectives of the Paris Agreement on limiting global warming. The Investment Manager sought to ensure reduction in carbon emissions by investing in issuers as described in (i) – (iii) above. Companies from sectors with heavy scope 3 emissions were also required to have scope 3 emissions reduction targets or a commitment to reduce scope 3 emissions. The Investment Manager periodically assessed whether an issuer's carbon reduction pathway is consistent with the criteria through which it earlier qualified for investment by the Fund and sought to identify cases where it may deviate. The Investment Manager also sought to identify situations where an issuer's emissions reduction targets did not keep pace with the emissions reduction trajectory for that sector and reviewed any major changes in the emissions profile of an issuer, for example due to mergers or acquisitions. These considerations led to divestment by the Investment Manager of more than 8 companies in 2023.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for the Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

• *How did the sustainability indicators perform?*

The Fund invested 98% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used specific sustainability key performance indicators to assess the investment's contribution to an environmental objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to positively screen the sustainable

investment universe as well as measure the contribution at an investee company level.

The carbon emissions intensity to sales indicator (Tonnes of CO₂e per \$mn sales), as measured by Scope 1 and 2 carbon intensity using data from a third-party provider, aggregated at portfolio level, reflects the pathway of attaining the sustainable investment objective, before considering avoided emissions. Scope 1 emissions are direct emissions from owned or controlled sources. Scope 2 emissions are indirect emissions from the generation of purchased energy. Through investments in issuers with low and neutral carbon intensity, as well as issuers that are decreasing and targeting carbon reduction, the Scope 1 and 2 carbon intensity at the Fund level decreased over 2023 and was meaningfully lower than the global credit universe.

The projected net carbon intensity at the Fund level, while also considering the carbon avoided contribution from decarbonisation enablers, reflects the objective of being net carbon neutral by 2025. At the end of 2023 projected net carbon intensity was zero, as measured through Scope 1 and 2 carbon intensity using data from a third-party provider.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within these exclusionary criteria.

• ...and compared to previous periods?

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	98
Jan 2022 - Dec 2022	97

This table details the projected net carbon intensity by 2025, year on year.

Period	Projected net carbon intensity (scope 1 & 2) tCO ₂ e/\$mn
Dec 2023	0
Dec 2022	0

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. The Fund excluded companies in violation of the UNGC principles from the portfolio, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered

by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund also excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain exclusions to companies that derive revenues above certain thresholds from activities related to fossil fuels, nuclear power, civilian firearms and weapons, gambling, adult entertainment, controversy and misconduct flags, among others.

The Fund also applied exclusions to countries that are not legally bound to the Paris Agreement, UN Convention on Biological Diversity or Nuclear Non-Proliferation Treaty, countries that are classified as 'Not free' according to Freedom House or countries that fall below the required threshold on the current Corruption Perception Index by Transparency International. Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portfolio. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. The Fund additionally excluded companies that were assessed by Schroders to have breached one or more 'global norms' from July 2023 thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving 5% revenue from thermal coal mining and 5% revenue from coal power

generation. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 2, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance.

We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

We used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were via the investment process and some via engagement. Further details below.

For this product, PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous

waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, oil and gas, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool incorporated several PAIs as a component of its positive selection methodology. For example, PAI 1 and 3 and PAI 4 from Annex 1 Table 2 were also monitored for ongoing security selection, in line with the sustainability objective of the Fund.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active investment. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to request an update on their climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3, 4, 5 and 10.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	58
Corporate Governance	34
Human Capital Management	13
Natural Capital and Biodiversity	11
Diversity and Inclusion	11
Human Rights	11

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide that in the Investment Manager's view contributed towards the objective of carbon emission reduction by being carbon neutral, aiming for, and being on track to achieve, 80% emission reductions or equivalent by 2030 and/or otherwise demonstrated a contribution to the reduction of carbon emissions. This includes (i) issuers that generated carbon emissions, but that had stated goals to reduce such emissions and (ii) issuers that demonstrated a contribution to the reduction of carbon emissions.

The Fund invested 98% of its assets in sustainable investments. This percentage represents the average

of the reference period, based on quarter-end data. All the sustainable investments had an environmental objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

• ***In which economic sectors were the investments made?***

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Healthcare	7.61
Industrial	Technology & Electronics	6.93
Industrial	Real Estate	6.15
Industrial	Capital Goods	5.63
Industrial	Telecommunications	5.36
Industrial	Retail	4.32
Industrial	Media & Entertainment	4.08
Industrial	Services	3.95
Industrial	Consumer Goods	3.79
Industrial	Basic Industry	2.57
Industrial	Automotive	2.38
Industrial	Transportation	2.27
Industrial	Leisure	0.96
Financial	Banking	17.87
Financial	Insurance	10.02
Financial	Financial Services	8.07
Utilities	Electric - Generation	3.69
Utilities	Electric - Integrated	1.50
Cash	Cash	2.05
Agency		0.32
Government Guaranteed		0.25
Derivatives	FX Derivatives	0.14
Securitized	Commercial Mortgage Backed	0.08

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• ***What was the share of investments made in transitional and enabling activities?***

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• ***How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?***

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

• ***What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?***

All sustainable investments made by the Fund had environmental objectives.

• ***What was the share of socially sustainable investments?***

There were no sustainable investments with a social objective.

• ***What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?***

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a SchroderUNGS' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, that such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective by the Fund were the following:

- The Fund was actively managed and invested at least 75% of its assets in sustainable investments, which are investments that contributed towards the objective of carbon emission reduction.
- The Fund invested in companies that did not cause significant environmental or social harm.
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies. Analysis and engagements were carried out which in one instance led to divestment as the Investment Manager was not comfortable to remain invested following the engagement.
- The Fund undertook a number of diverse engagements during the reference period. The Investment Manager undertook targeted engagements on companies to reduce their carbon emissions, use more renewable energy and commit to more ambitious carbon reduction pathways. Engagements were also carried out to gain insight and request improvements on topics including natural capital, and risks human rights, corporate governance and human capital management.

How did this financial product perform compared to the reference sustainable benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the sustainable

benchmarks are indexes to measure whether the financial product attains the sustainable objective.

investment objective of the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Product Name : Schroder ISF Carbon Neutral Credit 2040

Legal Entity Identifier : 5493007M7VXI36SNXJ14

Sustainable investment objective

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes

No

- | | |

|--|--|

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met. The Fund aimed to achieve aggregate carbon neutrality by the year 2040 within its investment portfolio by investing at least 75% of its assets in fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide that in the Investment Manager's view contributed towards the objective of carbon emission reduction by one or a combination of the following: (i) being carbon neutral; (ii) aiming for, and being on track to achieve, 75% emission reductions or equivalent by 2040; (iii) committing to net zero by 2050; (iv) having SBTi decarbonisation targets; (v) otherwise demonstrating a contribution to the reduction of carbon emissions (and companies within (v) may include those that provide products or services which enable decarbonisation). All companies held by the Fund were deemed to be sustainable investments by the Investment Manager.

The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Aggregate carbon neutrality means achieving net zero carbon emissions intensity by balancing investments in (a) issuers that generate carbon emissions, but that have stated goals to reduce such emissions with (b) issuers that contribute to reducing carbon emissions.

The Fund's objective includes a reduction in carbon emissions, which means that it aims for low carbon emissions, consistent with the long-term objectives of the Paris Agreement on limiting global warming. The Investment Manager sought to ensure reduction in carbon emissions by investing in issuers as described in (i) – (v) above. Companies from sectors with heavy scope 3 emissions were also required to have scope 3 emissions reduction targets or a commitment to reduce scope 3 emissions. The Investment Manager periodically assessed whether an issuer's carbon reduction pathway is consistent with the criteria through which it earlier qualified for investment by the Fund and sought to identify cases where it may deviate. The Investment Manager also sought to identify situations where an issuer's emissions reduction targets did not keep pace with the emissions reduction trajectory for that sector and reviewed any major changes in the emissions profile of an issuer, for example due to mergers or acquisitions.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for the Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

• *How did the sustainability indicators perform?*

The Fund invested 99% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used specific sustainability key performance indicators to assess the investment's contribution to an environmental objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to positively screen the sustainable investment universe as well as measure the contribution at an investee company level.

The carbon emissions intensity indicator (tonnes of CO₂e per \$mn sales), as measured by Scope 1 and 2 carbon intensity using third-party data, aggregated at portfolio level, reflects the pathway of attaining the sustainable investment objective, before considering avoided emissions. Scope 1 emissions are direct emissions from owned or controlled sources. Scope 2 emissions are indirect emissions from the generation of purchased energy.

Through investments in issuers with low carbon intensity as well as issuers that are decarbonising compared to sector peers, the Fund-level Scope 1 and 2 carbon intensity indicators (tonnes of CO₂e per \$mn sales) at end 2023 was 133, in comparison to 45 at end 2022. Given the Fund's pathway to net carbon neutrality by 2040, during 2023 the Fund invested in some companies which have targets to decarbonise by 2040, from diverse sectors of the Fund's carbon neutral universe. Furthermore, the Fund's carbon intensity was lower than the global credit universe.

The projected net carbon intensity at the Fund level, while also considering the carbon avoided contribution from decarbonisation enablers, reflects the objective of being net carbon neutral by 2040. At the end of 2023 projected net carbon intensity (Scope 1 and Scope 2) was zero, using data from a third-party provider.

The Fund also pursued alignment to the Paris Agreement by investing in companies committed to net zero by 2050 or having SBTi decarbonisation targets. The Fund's Scope 3 carbon intensity increased during the reference period, however remained lower than the reference universe. Scope 3 emissions are a consequence of the activities of the company but occur from sources not owned or controlled by the company.

The Fund also applied additional exclusions related to fossil fuels, which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within these exclusionary criteria.

• **...and compared to previous periods?**

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	99
Jan 2022 - Dec 2022	96

This table details the scope 1 and scope 2 carbon intensity, year on year.

Period	Scope 1 & 2 Carbon Intensity tCO ₂ e/\$mn
Dec 2023	133
Dec 2022	45

This table details the projected net carbon intensity by 2040, year on year.

Period	Projected net carbon intensity (scope 1 & 2) tCO ₂ e/\$mn
Dec 2023	0
Dec 2022	45

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. The Fund excluded companies in violation of the UNGC principles from the portfolio, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund also excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions to exclude fossil fuels among others. Further information on the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on

sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portfolio. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition, the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >5% revenue from thermal coal mining and >5% revenue from coal power generation among others. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 2, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

We used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

For this product, PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, oil and gas, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its positive selection methodology. For example, PAI 1 and 3 and PAI 4 from Annex 1 Table 2 were considered in defining the investment universe and were also monitored for ongoing security selection, in line with the sustainability objective of the Fund.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active investment. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to request an update on their climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3, 4, 5 and 10.

A summary of the Fund’s engagement activity during the reference period, including the relevant

engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	41
Corporate Governance	17
Natural Capital and Biodiversity	11
Diversity and Inclusion	7
Human Rights	6
Human Capital Management	4

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment

Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide that in the Investment Manager's view contributed towards the objective of carbon emission reduction by being carbon neutral, aiming for, and being on track to achieve, 75% emission reductions or equivalent by 2040, had committed to net zero by 2050, had SBTi decarbonisation targets or otherwise demonstrated a contribution to the reduction of carbon emissions. This includes (i) issuers that generated carbon emissions, but that had stated goals to reduce such emissions and (ii) issuers that demonstrated a contribution to the reduction of carbon emissions. The Fund invested 99% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. All the sustainable investments had an environmental objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

#1 Sustainable covers sustainable investments with environmental or social objectives
#2 Not sustainable includes investments which do not qualify as sustainable investments

• ***In which economic sectors were the investments made?***

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Telecommunications	11.60
Industrial	Technology & Electronics	6.51
Industrial	Automotive	6.47
Industrial	Capital Goods	6.19
Industrial	Retail	5.49
Industrial	Healthcare	5.17
Industrial	Transportation	4.47
Industrial	Basic Industry	4.03
Industrial	Real Estate	3.99
Industrial	Consumer Goods	2.92
Industrial	Services	2.16
Industrial	Leisure	1.64

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover**
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

• **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

All sustainable investments made by the Fund had environmental objectives.

• **What was the share of socially sustainable investments?**

There were no sustainable investments with a social objective.

• **What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested at least 75% of its assets fixed and floating rate securities issued by governments, government agencies, supnationals and companies worldwide that in the Investment Manager's view contributed towards the objective of carbon emission reduction.
- The Fund invested in companies that did not cause significant environmental or social harm.
- The Investment Manager utilised Schroders' proprietary tool and analysis to help assess good governance practices of investee companies.
- The Fund undertook a number of diverse engagements during the reference period. The Investment Manager undertook targeted engagements on companies to reduce their carbon emissions, use more renewable energy and commit to more ambitious carbon reduction pathways. Engagements were also carried out to gain insight and request improvements on topics including nature related risks and management, Governance and remuneration practise, and Human capital management.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are

No index was designated as a reference benchmark for the purpose of attaining the sustainable

indexes to measure whether the financial product attains the sustainable objective.

investment objective of the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF China Local Currency Bond

Legal Entity Identifier : HPREJ5FHRT0CLC11ND15

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> with a social objective
<input type="checkbox"/>	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the iBoxx ALBI China Onshore Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The reference period for this Fund is 1 January 2023 to 31 December 2023

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -0.4% and the benchmark's sustainability score for the reference period was -1.7%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues; and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide

in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the iBoxx ALBI China Onshore Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the iBoxx ALBI China Onshore Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	-0.4	-1.7
Jan 2022 - Dec 2022	-0.7	-1.8

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This question is not applicable for this Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

This question is not applicable for this Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This question is not applicable for this Fund.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAIs related to GHG emissions and carbon footprint (PAIs 1, 2, 3 and 15), were included as part of a company’s overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. For example, during the reference period, we engaged with an investee company on a climate action plan and greenhouse gas emission targets related to PAI 1, 2, 3, and 15. A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	4
Human Capital Management	1
Human Rights	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference

period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 96%. The Fund maintained a higher overall sustainability score than the iBoxx ALBI China Onshore Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Agency		42.04
EMD Sovereign		38.76
Industrial	Transportation	4.94
Industrial	Basic Industry	4.23
Industrial	Real Estate	1.20
Industrial	Automotive	0.54
Industrial	Retail	0.43
Utilities	Electric - Distr/Trans	1.92
Utilities	Electric - Integrated	1.90
Financial	Financial Services	2.23
Financial	Banking	0.26
Local Authority	Transportation	1.18
Cash	Cash	0.34
Foreign Sovereign		0.08
Derivatives	FX Derivatives	-0.08

The list above represents the average of the Fund's holdings at each quarter-end during the reference

period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

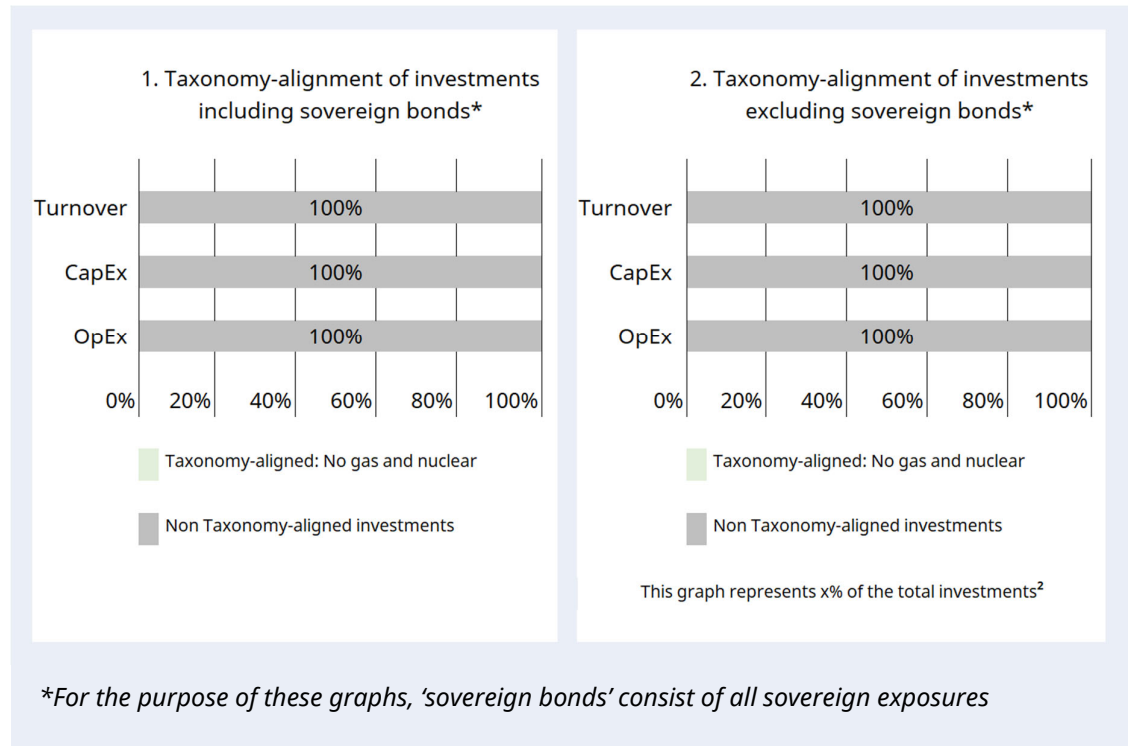

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This question is not applicable.

What was the share of socially sustainable investments?

This question is not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Emerging Markets Local Currency Bond
Legal Entity Identifier : 549300V3X0D0HRKP2Z47

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> with a social objective
<input type="checkbox"/>	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The Fund had a sustainable investment commitment from 1 January 2023 until 20 September 2023, at which point this commitment was removed.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the JP Morgan GBI-EM Global Diversified Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments until 20 September 2023 at which point this commitment was removed.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -0.2% and the benchmark's sustainability score for the reference period was -2.2%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Clean Energy
- Education
- Infrastructure
- Medical Research
- Socio-Political Stability

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the JP Morgan GBI-EM Global Diversified Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the JP Morgan GBI-EM Global Diversified Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

Until 20 September 2023, the Investment Manager invested 31% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments over the first six months of the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Sep 2023	31
Sep 2022 - Dec 2022	32

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	-0.2	-2.2
Jan 2022 - Dec 2022	0.0	-2.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the calculation method is as described above.

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Until 20 September 2023, in respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- Infrastructure: the estimated societal benefits associated with investment in infrastructure. Assigned in proportion to a country's infrastructure spend via gross capital formation (GCF) data;
- Medical Research: the estimated societal benefits of medical innovation resulting in improvements in human conditions, increases of life expectancy and quality of life. Assigned in proportion to the social benefit of medical innovation to countries using patent data, specifically the number of medical-related technology patents filed by applicant country; and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made are based on the most significant objectives at each quarter-end until 20 September 2023. Other objectives may have applied during this period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Until 20 September 2023, the Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global

Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Until 20 September 2023, where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: [Link](#)

<https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Until 20 September 2023, the portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and

Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process, and some were considered via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions). Compliance with these thresholds were monitored via the Investment Manager's portfolio compliance framework.

PAI data is less meaningful in the context of an emerging markets sovereign focused strategy, as during the reference period there were limited PAI data available. Over time, we anticipate that this data will improve which will allow us to further assess the consideration of PAIs.

However, as part of the investment process, a Schroders' proprietary tool was used which incorporates some of the PAIs as part of its scoring methodology. During the reference period, PAIs 1, 2, 3, 4, 5 and 15 related to greenhouse gas emissions, PAIs 7, 8 and 9 related to biodiversity, water and waste and PAIs 12, 13, and 16 related to social matters were considered as part of the investment process of the following countries: Poland, Kenya, South Africa, India, China, Argentina, Mexico, Peru, Colombia, Chile, Turkey, Pakistan, Bahamas, Bolivia, Guatemala, Honduras, Panama and Paraguay.

PAIs were also considered post-investment through engagement. The investment manager primarily used Schroders' proprietary tool and data from external data providers in order to identify, assess and monitor environmental topics for engagement. During the reference period, active engagements with emerging sovereigns included the Federative Republic of Brazil, the Republic of Colombia, the People's Republic of China, the Republic of India, the United Mexican States and the Republic of the Philippines. These engagements covered a range of topics and were aligned with environmental PAIs 1, 2, 3, 4, 5, 7, 8, 9, 15, and social PAIs relating to PAI 12 (Unadjusted gender pay gap), PAI 13 (Board gender diversity) and PAI 16 (Investee countries subject to social violations).

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
SCHRODER CHINA FIXED INCOME FUND RMB I ACC(CFMI)	Collective Investments	4.72	China

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

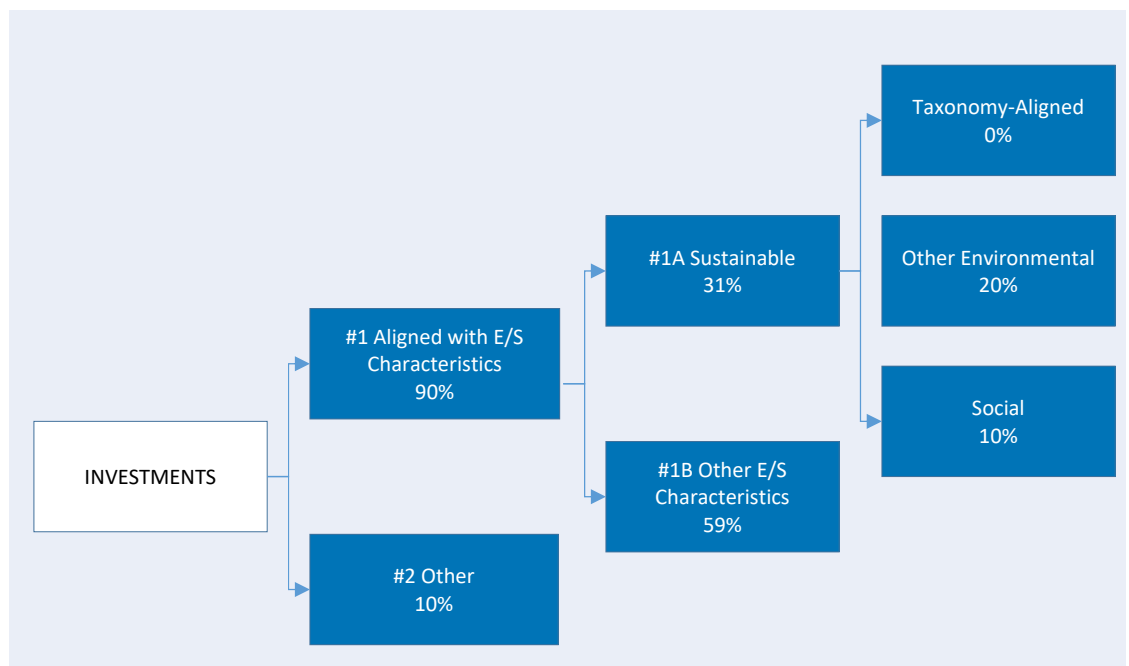

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 90%. The Fund maintained a higher overall sustainability score than the JP Morgan GBI-EM Global Diversified Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Until 20 September 2023 included within #1 is the

proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

Until 20 September 2023, the Fund invested 31% of its assets in sustainable investments. This percentage represents the average of the first six months of the reference period, based on quarter-end data. Within this, 20% was invested in sustainable investments with an environmental objective and 10% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
EMD Sovereign		66.76
Cash Equivalents	Treasury Bills	15.34
Supranational		11.09
Collective Investments	Unit Trusts	4.72
Cash	Cash	1.37
Cash	Margin Cash	0.12
Government Guaranteed		0.47
Industrial	Media & Entertainment	0.25
Derivatives	FX Derivatives	-0.12

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover**
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Until 20 September 2023, the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 20%.

• **What was the share of socially sustainable investments?**

Until 20 September 2023, the share of sustainable investments with a social objective was 10%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

whether the financial product attains the environmental or social characteristics that they promote.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF EURO Corporate Bond
Legal Entity Identifier : 4EKHGX69UZIZADPEK36

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 51% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro Corporate Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.3% and the benchmark's sustainability score for the reference period was -3.1%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- High Salaries
- Power Provision

- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the ICE BofA Merrill Lynch Euro Corporate Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the ICE BofA Merrill Lynch Euro Corporate Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 51% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	51
Aug 2022 - Dec 2022	49

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.3	-3.1
Jan 2022 - Dec 2022	3.7	-3.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of

contraceptives. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from

activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >~~30~~20% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We

recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as

sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we

engaged with a company in the financial sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	85
Corporate Governance	47
Natural Capital and Biodiversity	20
Diversity and Inclusion	14
Human Rights	11
Human Capital Management	10

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
MORGAN STANLEY SR GMTN 5.148% 25 Jan 2034	Financial	1.11	United States
SOCIETE GENERALE SA SR 144A 6.691% 10 Jan 2034	Financial	0.98	France
FRAPORT AG SR REGS 1.875% 31 Mar 2028	Industrial	0.78	Germany
UBS GROUP AG SR REGS 7.75% 01 Mar 2029	Financial	0.72	Switzerland
EQT AB SR REGS 2.875% 06 Apr 2032	Financial	0.72	Sweden
APT PIPELINES LTD SR REGS 1.25% 15 Mar 2033	Industrial	0.69	Australia
INVESTEC BANK PLC SR REGS 1.25% 11 Aug 2026	Financial	0.63	United Kingdom
NETFLIX INC SR REGS 3.875% 15 Nov 2029	Industrial	0.63	United States
LOGICOR FINANCING SARL (REGS) 1.625% 15 Jul 2027	Industrial	0.56	Luxembourg
ENEL FINANCE INTERNATIONAL NV SR 144A 7.5% 14 Oct 2032	Utilities	0.56	Italy
LOGICOR FINANCING SARL SR REGS 1.625% 17 Jan 2030	Industrial	0.53	Luxembourg
BOOKING HOLDINGS INC SR CORP 4.5% 15 Nov 2031	Industrial	0.53	United States
TOTALENERGIES SE SR REGS 3.25% 31 Dec 2079	Industrial	0.52	France

NATIONAL GRID PLC SR REGS 4.275% 16 Jan 2035	Utilities	0.51	United Kingdom

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

• *What was the asset allocation?*

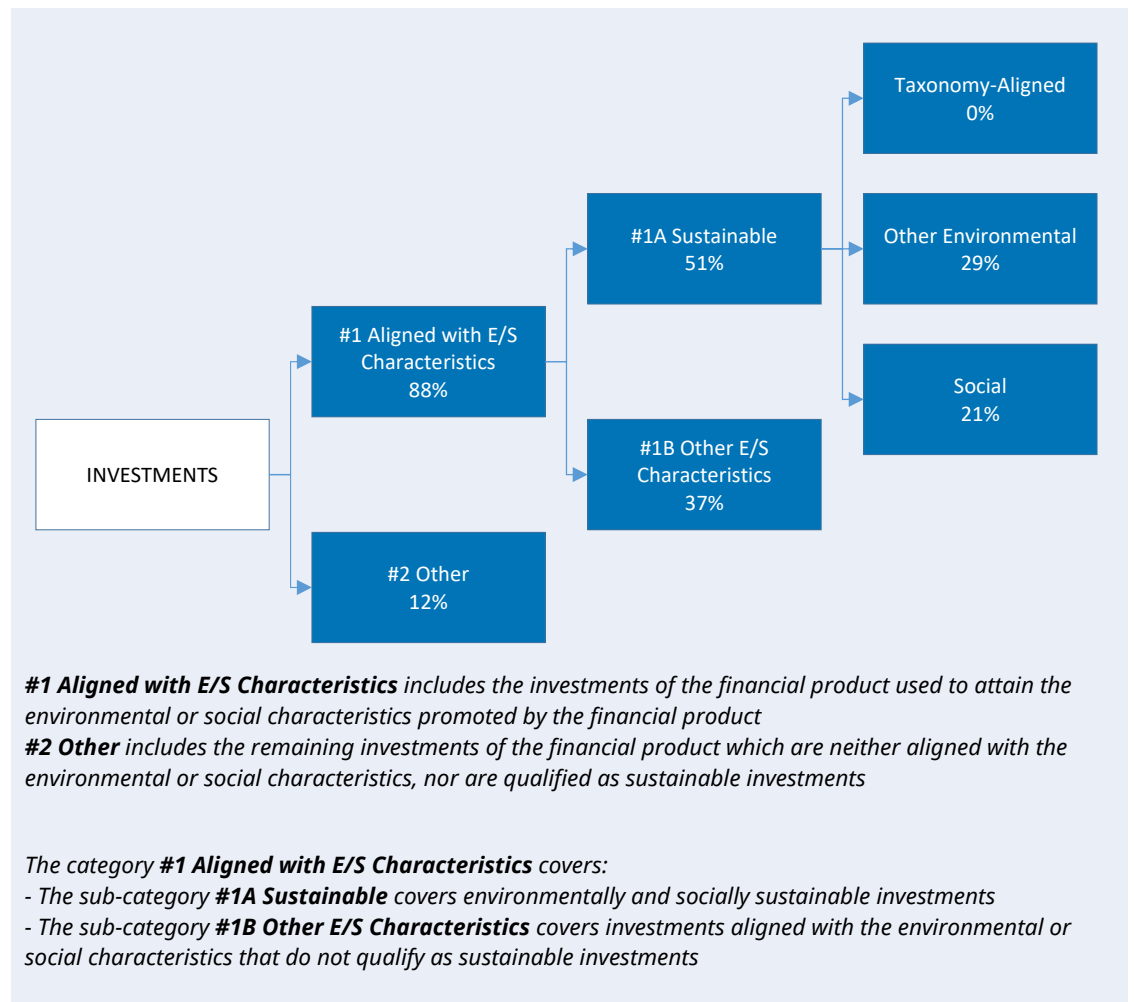

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 88%. The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro Corporate Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 51% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 29% was invested in sustainable investments with an environmental objective and 21% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Real Estate	7.85
Industrial	Transportation	5.02
Industrial	Healthcare	3.98
Industrial	Media & Entertainment	3.38
Industrial	Integrated Energy	2.77
Industrial	Basic Industry	2.53
Industrial	Retail	2.38
Industrial	Telecommunications	2.29
Industrial	Leisure	2.06
Industrial	Automotive	2.04
Industrial	Capital Goods	1.88
Industrial	Services	1.67
Industrial	Technology & Electronics	1.54
Industrial	Energy - Exploration & Production	0.99
Industrial	Consumer Goods	0.96
Industrial	Gas-Distribution	0.73
Industrial	Oil Field Equipment & Services	0.01
Industrial	Oil Refining & Marketing	0.01
Financial	Banking	24.03
Financial	Financial Services	11.92
Financial	Insurance	4.99
Utilities	Electric - Integrated	6.93
Utilities	Electric - Distr/Trans	1.26
Utilities	Electric - Generation	0.87
Utilities	Non-Electric Utilities	0.48
Sovereign (Developed)		2.57
Foreign Sovereign		1.48
Cash Equivalents	Treasury Bills	1.21
Securitized	Asset Backed	0.72
Derivatives	Interest Rate Derivatives	0.57
Derivatives	FX Derivatives	0.02
Derivatives	Credit Derivatives	0.01
Collective Investments	Unit Trusts	0.42
Agency		0.28
Cash	Cash	0.24
Cash	Margin Cash	-0.08

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to

economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

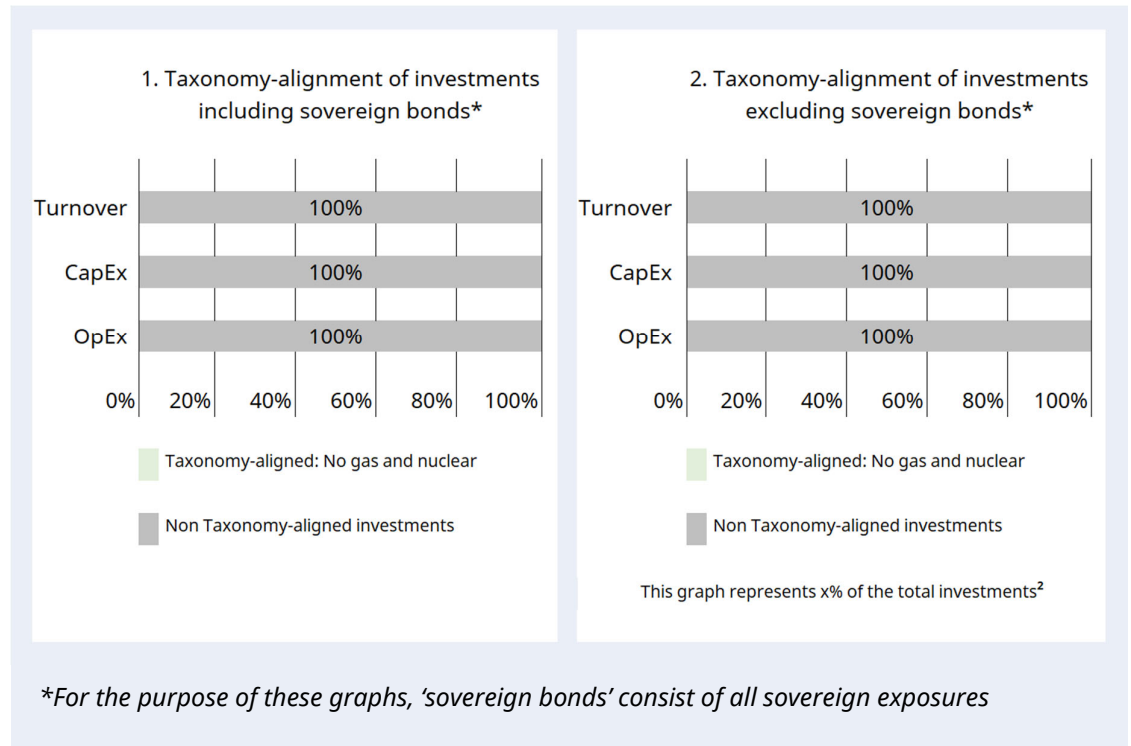

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 29%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 21%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF EURO Credit Conviction

Legal Entity Identifier : 549300JLL34Z2HKTT336

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the iBoxx EUR Corporates BBB (TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.3% and the benchmark's sustainability score for the reference period was -2.1%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- High Salaries
- Power Provision

- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the iBoxx EUR Corporates BBB (TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the iBoxx EUR Corporates BBB (TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 50% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	50
Aug 2022 - Dec 2022	49

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.3	-2.1
Jan 2022 - Dec 2022	4.3	-3.5

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of

contraceptives. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from

activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >~~30~~20% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We

recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as

sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we

engaged with a company in the financial sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	59
Corporate Governance	36
Natural Capital and Biodiversity	12
Diversity and Inclusion	12
Human Capital Management	7
Human Rights	5

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
FRAPORT AG SR REGS 1.875% 31 Mar 2028	Industrial	1.37	Germany
MORGAN STANLEY SR GMTN 5.148% 25 Jan 2034	Financial	1.24	United States
GATWICK AIRPORT FINANCE SR REGS 4.375% 07 Apr 2026	Industrial	0.99	United Kingdom

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schrodgers Investment

Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 88%. The Fund maintained a higher overall sustainability score than the iBoxx EUR Corporates BBB (TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 50% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 29% was invested in sustainable investments with an environmental objective and 22% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Real Estate	10.42
Industrial	Transportation	7.35
Industrial	Media & Entertainment	3.90
Industrial	Healthcare	3.22
Industrial	Telecommunications	3.11
Industrial	Basic Industry	2.80
Industrial	Services	2.70
Industrial	Integrated Energy	2.40
Industrial	Retail	2.35
Industrial	Leisure	1.87
Industrial	Energy - Exploration & Production	1.61
Industrial	Automotive	1.28
Industrial	Capital Goods	1.19
Industrial	Technology & Electronics	1.02
Industrial	Gas-Distribution	0.70
Industrial	Consumer Goods	0.49
Industrial	Oil Refining & Marketing	0.04
Financial	Banking	21.66
Financial	Financial Services	11.73
Financial	Insurance	4.95
Utilities	Electric - Integrated	6.59
Utilities	Electric - Distr/Trans	1.42
Utilities	Electric - Generation	0.65
Utilities	Non-Electric Utilities	0.55
Sovereign (Developed)		2.31
Foreign Sovereign		1.76
Securitized	Asset Backed	0.77
Derivatives	Interest Rate Derivatives	0.59
Derivatives	FX Derivatives	0.05
Derivatives	Credit Derivatives	0.02
Cash Equivalents	Treasury Bills	0.41
Cash	Margin Cash	0.18
Cash	Cash	-0.10
EMD Sovereign		-0.01

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

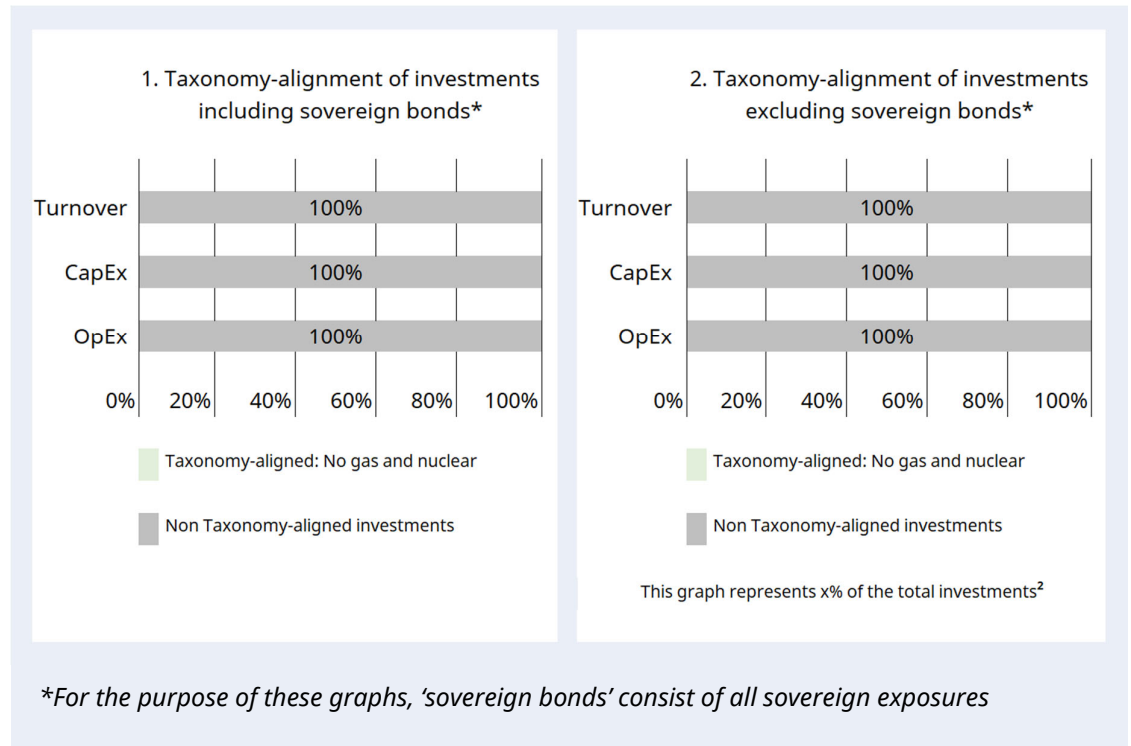

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 29%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 22%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schrodgers' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schrodgers.com/m/3222ea4ed44a1f2c/original/schrodgers-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF EURO High Yield
Legal Entity Identifier : FDQ3U0BX0ZTSLH0GBR19

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 57% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro High Yield Constrained Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 3.2% and the benchmark's sustainability score for the reference period was 0.4%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- High Salaries
- Medicine

- Power Provision

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the ICE BofA Merrill Lynch Euro High Yield Constrained Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the ICE BofA Merrill Lynch Euro High Yield Constrained Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 57% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	57
Aug 2022 - Dec 2022	56

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	3.2	0.4
Jan 2022 - Dec 2022	3.0	1.0

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of

contraceptives. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not

categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption,

labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the investment manager

engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	24
Corporate Governance	15
Natural Capital and Biodiversity	6
Human Rights	2
Human Capital Management	2
Diversity and Inclusion	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
FRANCE (REPUBLIC OF) SR REGS 0% 25 Feb 2025	Sovereign (Developed)	2.64	France

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

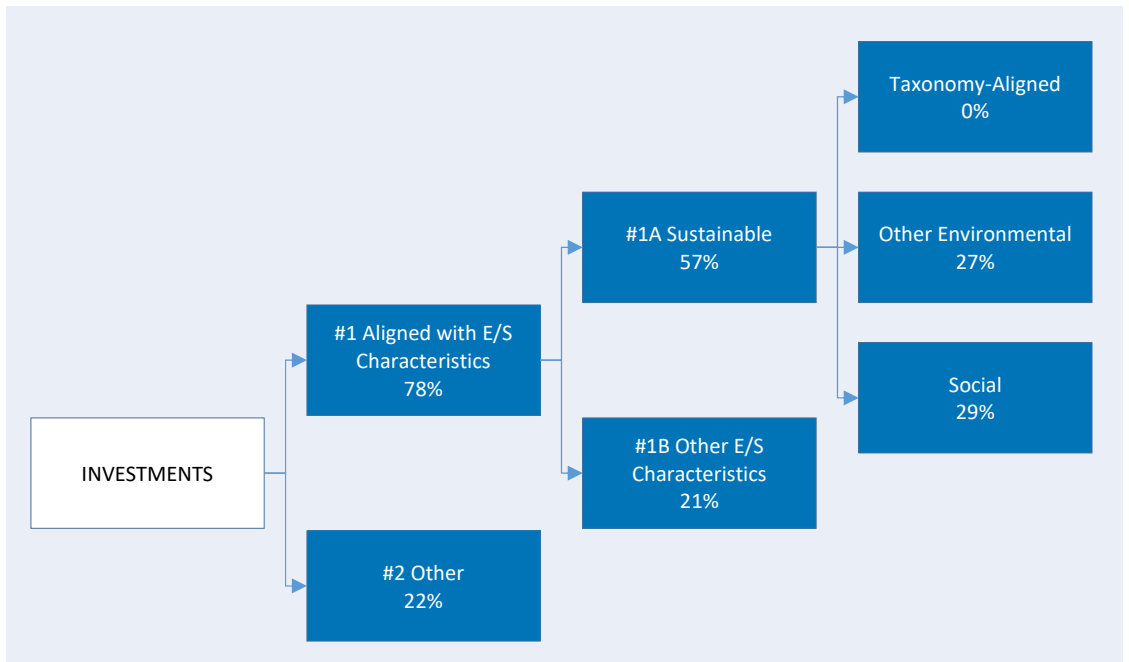

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 78%. The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro High Yield Constrained Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 57% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 27% was invested in sustainable investments with an environmental objective and 29% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Telecommunications	7.98
Industrial	Services	7.88
Industrial	Healthcare	7.73
Industrial	Real Estate	6.82
Industrial	Basic Industry	5.71
Industrial	Capital Goods	4.27
Industrial	Automotive	3.89
Industrial	Leisure	3.01
Industrial	Retail	2.50
Industrial	Transportation	2.19
Industrial	Technology & Electronics	2.09
Industrial	Energy - Exploration & Production	2.07
Industrial	Consumer Goods	1.21
Industrial	Media & Entertainment	1.15
Industrial	Integrated Energy	0.95
Industrial	Gas-Distribution	0.16
Industrial	Oil Field Equipment & Services	0.10
Financial	Banking	13.38
Financial	Financial Services	10.78
Financial	Insurance	5.39
Sovereign (Developed)		5.74
Utilities	Electric - Integrated	2.73
Utilities	Non-Electric Utilities	1.18
Utilities	Gas-Distribution	0.52
Cash	Margin Cash	0.50
Cash	Cash	0.23
Derivatives	FX Derivatives	-0.03
Derivatives	Credit Derivatives	-0.04
EMD Sovereign		-0.08

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's

investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 27%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 29%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders’ proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund’s engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question ‘How did this financial product consider principal adverse impacts on sustainability factors?’. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Corporate Bond
Legal Entity Identifier : 1YK3XMIPDXWQ8KR0SJ46

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 41% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Global Aggregate - Corporate Index Hedged to USD, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.0% and the benchmark's sustainability score for the reference period was -6.6%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Medicine
- Sanitation

- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Bloomberg Global Aggregate - Corporate Index Hedged to USD by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Bloomberg Global Aggregate - Corporate Index Hedged to USD in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 41% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	41
Aug 2022 - Dec 2022	34

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	0.0	-6.6
Jan 2022 - Dec 2022	0.2	-6.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in

which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue;

- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the

stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN

Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	130
Corporate Governance	53
Natural Capital and Biodiversity	25
Diversity and Inclusion	16
Human Capital Management	16
Human Rights	14

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
BANK OF AMERICA CORP SR RR 4.375% 31 Dec 2079	Financial	1.11	United States

ESSENTIAL UTILITIES INC SR 2.4% 01 May 2031	Utilities	0.52	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

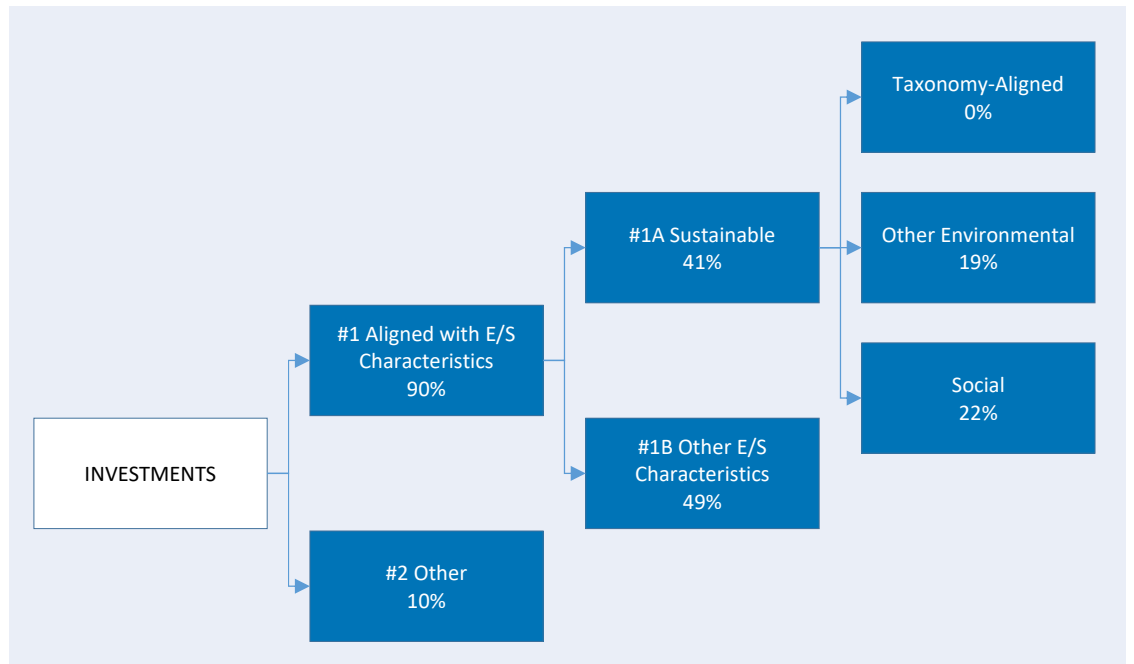

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 90%. The Fund maintained a higher overall sustainability score than the Bloomberg Global Aggregate - Corporate Index Hedged to USD and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net

“impact” that an issuer may create in terms of social and environmental “costs” or “benefits”. It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 41% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 19% was invested in sustainable investments with an environmental objective and 22% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund’s portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders’ proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders’ proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both “costs” and “benefits”.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Real Estate	7.20
Industrial	Gas-Distribution	4.80
Industrial	Healthcare	3.77
Industrial	Energy - Exploration & Production	3.38
Industrial	Media & Entertainment	3.36
Industrial	Telecommunications	3.31
Industrial	Consumer Goods	3.24
Industrial	Basic Industry	3.17
Industrial	Technology & Electronics	3.16
Industrial	Retail	2.54
Industrial	Automotive	2.46
Industrial	Capital Goods	2.31
Industrial	Leisure	1.87
Industrial	Integrated Energy	1.48
Industrial	Transportation	1.39
Industrial	Services	1.03
Industrial	Oil Refining & Marketing	0.69
Industrial	Oil Field Equipment & Services	0.08
Financial	Banking	23.43
Financial	Financial Services	9.35
Financial	Insurance	3.51
Utilities	Electric - Integrated	3.18
Utilities	Non-Electric Utilities	1.55
Utilities	Electric - Generation	0.92
Utilities	Electric - Distr/Trans	0.45
Utilities	Energy - Exploration & Production	0.02
Utilities	Integrated Energy	0.01
Cash	Cash	4.84
Cash	Margin Cash	0.53
Sovereign (Developed)		1.72
Securitized	Asset Backed	0.46
Securitized	Commercial Mortgage Backed	0.12
Cash Equivalents	Treasury Bills	0.23
Agency		0.15
Agency	Financial Services	0.05
Agency	Basic Industry	0.02
Agency	Electric - Generation	0.01
Foreign Sovereign		0.18
Supranational		0.11
Local Authority	Transportation	0.05
Local Authority		0.03
Local Authority	Financial Services	0.01
Derivatives	Credit Derivatives	-0.01
Derivatives	FX Derivatives	-0.17

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 19%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 22%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

SFDR Periodic Report (continued)

Reference Period: 1 January 2023 - 31 December 2023

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Credit High Income

Legal Entity Identifier : GLW6BQ1WNCTANKN6GW68

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 X No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 48% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse ex Treasury BBB+ to CCC+ USD, EUR, GBP Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.7% and the benchmark's sustainability score for the reference period was -5.3%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- High Salaries
- Medicine

- Sanitation

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Bloomberg Multiverse ex Treasury BBB+ to CCC+ USD, EUR, GBP Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Bloomberg Multiverse ex Treasury BBB+ to CCC+ USD, EUR, GBP Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 48% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	48
Aug 2022 - Dec 2022	38

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.7	-5.3
Jan 2022 - Dec 2022	1.1	-6.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of

contraceptives. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where

the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN

Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN - Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the energy sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	47
Corporate Governance	29
Natural Capital and Biodiversity	9
Human Capital Management	8
Diversity and Inclusion	6
Human Rights	5

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
US TREASURY N/B 1.125% 15 Feb 2031	Sovereign (Developed)	2.35	United States

GRUENENTHAL GMBH SR REGS 4.125% 15 May 2028	Industrial	0.94	Germany

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 73%. The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse ex Treasury BBB+ to CCC+ USD, EUR, GBP Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 48% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 29% was invested in sustainable investments with an environmental objective and 19% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Healthcare	8.33
Industrial	Real Estate	7.07
Industrial	Energy - Exploration & Production	4.65
Industrial	Telecommunications	4.54
Industrial	Services	3.06
Industrial	Retail	2.84
Industrial	Media & Entertainment	2.57
Industrial	Technology & Electronics	2.47
Industrial	Basic Industry	2.13
Industrial	Automotive	2.08
Industrial	Transportation	1.34
Industrial	Gas-Distribution	1.20
Industrial	Capital Goods	1.08
Industrial	Oil Refining & Marketing	0.59
Industrial	Leisure	0.44
Industrial	Consumer Goods	0.26
Industrial	Oil Field Equipment & Services	0.06
Industrial	Integrated Energy	0.03
Financial	Banking	19.70
Financial	Financial Services	11.28
Financial	Insurance	5.90
Sovereign (Developed)		6.38
Cash	Cash	2.60
Cash	Margin Cash	1.05
Utilities	Non-Electric Utilities	0.82
Utilities	Electric - Generation	0.70
Utilities	Electric - Integrated	0.45
Utilities	Gas-Distribution	0.42
Utilities	Electric - Distr/Trans	0.32
Utilities	Energy - Exploration & Production	0.06
Collective Investments	Unit Trusts	2.52
Securitized	Mortgage Backed	1.56
Securitized	Asset Backed	0.73
Foreign Sovereign		0.71
EMD Sovereign		0.27
Derivatives	Equity Derivatives	0.09
Derivatives	Credit Derivatives	-0.04
Derivatives	FX Derivatives	-0.26

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived

from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 29%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 19%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Credit Income

Legal Entity Identifier : 5493009U5NQCD335Y052

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse ex Treasury A+ to B- USD Hedged Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.2% and the benchmark's sustainability score for the reference period was -6.0%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Medicine
- Sanitation

SFDR Periodic Report (continued)

Reference Period: 1 January 2023 - 31 December 2023

- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Bloomberg Multiverse ex Treasury A+ to B- USD Hedged Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Bloomberg Multiverse ex Treasury A+ to B- USD Hedged Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 50% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	50
Aug 2022 - Dec 2022	44

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	0.2	-6.0
Jan 2022 - Dec 2022	1.4	-5.8

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in

which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue;

- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where

the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN

Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN - Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the energy sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	158
Corporate Governance	66
Natural Capital and Biodiversity	33
Human Rights	26
Human Capital Management	24
Diversity and Inclusion	18

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
TREASURY NOTE SR GOVT 4.25% 30 Sep 2024	Sovereign (Developed)	3.35	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schrodgers Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 85%. The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse ex Treasury A+ to B- USD Hedged Index and so the Fund's investments that were scored by Schrodgers' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1

is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 50% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 29% was invested in sustainable investments with an environmental objective and 21% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	23.82
Financial	Financial Services	11.33
Financial	Insurance	4.22
Industrial	Real Estate	6.26
Industrial	Healthcare	4.33
Industrial	Technology & Electronics	2.65
Industrial	Telecommunications	2.59
Industrial	Basic Industry	2.31
Industrial	Transportation	2.28
Industrial	Media & Entertainment	2.26
Industrial	Energy - Exploration & Production	2.22
Industrial	Retail	2.20
Industrial	Capital Goods	1.48
Industrial	Consumer Goods	1.32
Industrial	Leisure	1.23
Industrial	Gas-Distribution	1.21
Industrial	Services	1.20
Industrial	Automotive	1.14
Industrial	Integrated Energy	1.02
Industrial	Oil Refining & Marketing	0.66
Industrial	Oil Field Equipment & Services	0.10
Sovereign (Developed)		6.77
Utilities	Electric - Integrated	2.66
Utilities	Non-Electric Utilities	2.06
Utilities	Electric - Generation	0.74
Utilities	Electric - Distr/Trans	0.46
Utilities	Gas-Distribution	0.02
Utilities	Energy - Exploration & Production	0.01
Foreign Sovereign		3.51
Cash	Cash	1.98
Cash	Margin Cash	1.37
Securitized	Mortgage Backed	2.24
Securitized	Asset Backed	0.30
Collective Investments	Unit Trusts	1.76
Cash Equivalents	Treasury Bills	0.30
Agency		0.20
Government Guaranteed		0.02
Supranational		0.01
EMD Sovereign		-0.02
Derivatives	Equity Derivatives	0.05
Derivatives	Credit Derivatives	-0.02
Derivatives	FX Derivatives	-0.24

The list above represents the average of the Fund's holdings at each quarter-end during the reference

period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 29%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 21%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Sustainable Global Credit Income Short Duration (on 21 September 2023 the Fund changed its name from Schroder ISF Global Credit Income Short Duration)

Legal Entity Identifier : 5493006ZQNNBQCGW4K92

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 60% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse 1-5 year TR ex-Treasury A+ to B- EUR hedged Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• How did the sustainability indicators perform?

The Fund’s sustainability score for the reference period was 3.0% and the benchmark’s sustainability score for the reference period was -5.1%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders’ proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Power Provision
- Sanitation
- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Bloomberg Multiverse 1-5 year TR ex-Treasury A+ to B- EUR hedged Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Bloomberg Multiverse 1-5 year TR ex-Treasury A+ to B- EUR hedged Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 60% of the Fund’s assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders’ proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	60
Aug 2022 - Dec 2022	52

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	3.0	-5.1
Jan 2022 - Dec 2022	3.8	-5.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues;
- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an

issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong

governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN - Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee

countries subject to social violations).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the energy sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	66
Corporate Governance	38
Natural Capital and Biodiversity	12
Human Capital Management	10
Diversity and Inclusion	9
Human Rights	4

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
GERMANY (FEDERAL REPUBLIC OF) SR REGS 0% 21 Feb 2024	Cash Equivalents	3.83	Germany

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schrodgers Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

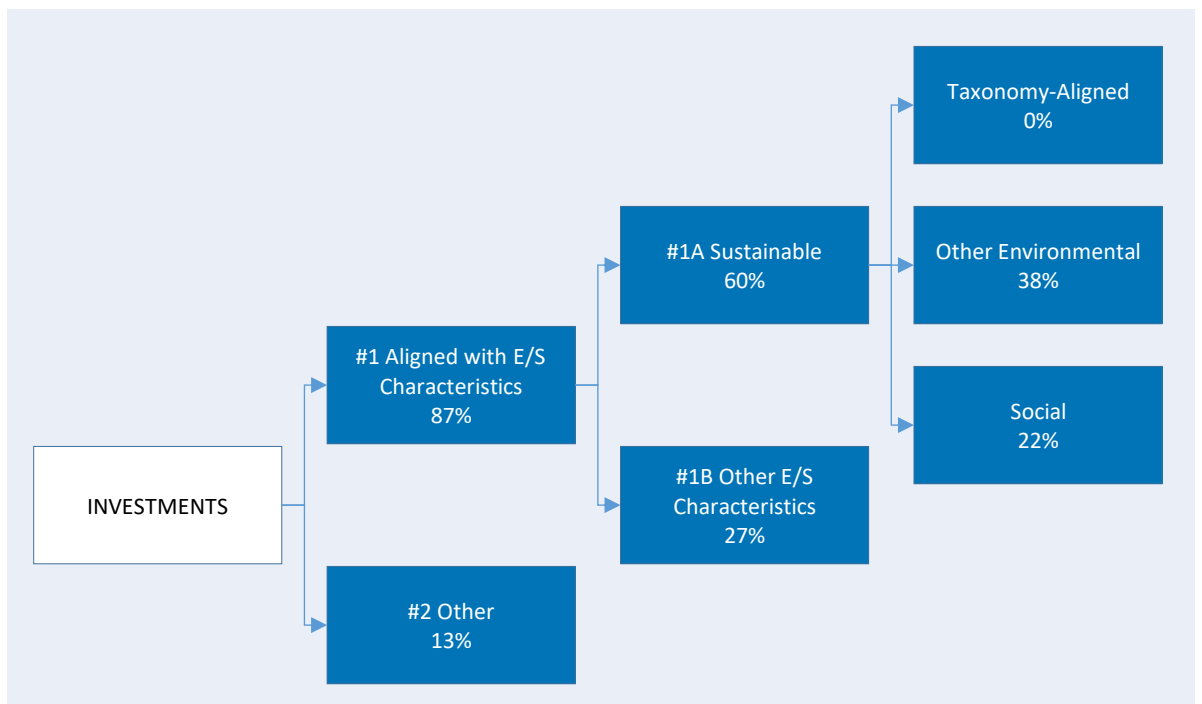

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 87%. The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse 1-5 year TR ex-Treasury A+ to B- EUR hedged Index and so the Fund's investments that were scored by Schrodgers' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated

in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 60% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 38% was invested in sustainable investments with an environmental objective and 22% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	26.22
Financial	Financial Services	10.64
Financial	Insurance	3.04
Industrial	Real Estate	8.07
Industrial	Healthcare	4.61
Industrial	Media & Entertainment	3.43
Industrial	Retail	3.14
Industrial	Capital Goods	3.11
Industrial	Basic Industry	2.84
Industrial	Transportation	2.16
Industrial	Consumer Goods	2.00
Industrial	Technology & Electronics	1.98
Industrial	Telecommunications	1.74
Industrial	Services	1.08
Industrial	Leisure	0.84
Industrial	Automotive	0.58
Industrial	Oil Refining & Marketing	0.16
Industrial	Integrated Energy	0.11
Industrial	Oil Field Equipment & Services	0.01
Utilities	Electric - Integrated	4.24
Utilities	Non-Electric Utilities	2.93
Utilities	Electric - Generation	1.25
Utilities	Electric - Distr/Trans	0.72
Cash Equivalents	Treasury Bills	4.04
Sovereign (Developed)		4.03
Foreign Sovereign		2.97
Securitized	Mortgage Backed	1.07
Securitized	Asset Backed	0.84
Cash	Margin Cash	0.99
Cash	Cash	-0.23
Supranational		0.66
Collective Investments	Unit Trusts	0.49
Agency		0.25
Derivatives	FX Derivatives	0.03
Derivatives	Equity Derivatives	0.02
Derivatives	Credit Derivatives	-0.02
EMD Sovereign		-0.04

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these

differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 38%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 22%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global High Yield
Legal Entity Identifier : M6LM7N6UFRSLZ1MG8Z19

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 39% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Global HYxCMBsxEMG Index USD Hedged 2% cap, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -0.4% and the benchmark's sustainability score for the reference period was -1.6%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine

- Power Provision

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Bloomberg Global HYxCMBSxEMG Index USD Hedged 2% cap by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Bloomberg Global HYxCMBSxEMG Index USD Hedged 2% cap in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 39% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	39
Aug 2022 - Dec 2022	39

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	-0.4	-1.6
Jan 2022 - Dec 2022	-0.2	-1.7

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of

communities through telecommunication services;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not

categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption,

labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the investment manager

engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	53
Corporate Governance	20
Natural Capital and Biodiversity	8
Human Capital Management	8
Human Rights	5
Diversity and Inclusion	4

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Jan 2023 to 31 Dec 2023

Largest Investments	Sector	% Assets	Country
CHS/COMMUNITY HEALTH SYSTEMS INC SR 144A 8% 15 Mar 2026	Industrial	0.83	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 78%. The Fund maintained a higher overall sustainability score than the Bloomberg Global HYxCMBSxEMG Index USD Hedged 2% cap and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 39% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 21% was invested in sustainable investments with an environmental objective and 19% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Media & Entertainment	8.81
Industrial	Leisure	8.19
Industrial	Healthcare	6.21
Industrial	Services	5.75
Industrial	Telecommunications	5.65
Industrial	Gas-Distribution	5.62
Industrial	Energy - Exploration & Production	5.20
Industrial	Capital Goods	5.12
Industrial	Basic Industry	5.06
Industrial	Technology & Electronics	4.31
Industrial	Retail	4.07
Industrial	Real Estate	3.59
Industrial	Automotive	3.39
Industrial	Consumer Goods	2.35
Industrial	Transportation	1.65
Industrial	Oil Field Equipment & Services	1.03
Industrial	Oil Refining & Marketing	0.87
Industrial	Integrated Energy	0.44
Financial	Banking	6.74
Financial	Financial Services	5.95
Financial	Insurance	2.41
Cash	Cash	2.92
Cash	Margin Cash	0.45
Utilities	Electric - Integrated	1.50
Utilities	Electric - Generation	1.23
Utilities	Non-Electric Utilities	0.23
Utilities	Gas-Distribution	0.08
Sovereign (Developed)		1.21
Foreign Sovereign		0.22
EMD Sovereign		-0.02
Derivatives	Credit Derivatives	-0.12
Derivatives	FX Derivatives	-0.14

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective

aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

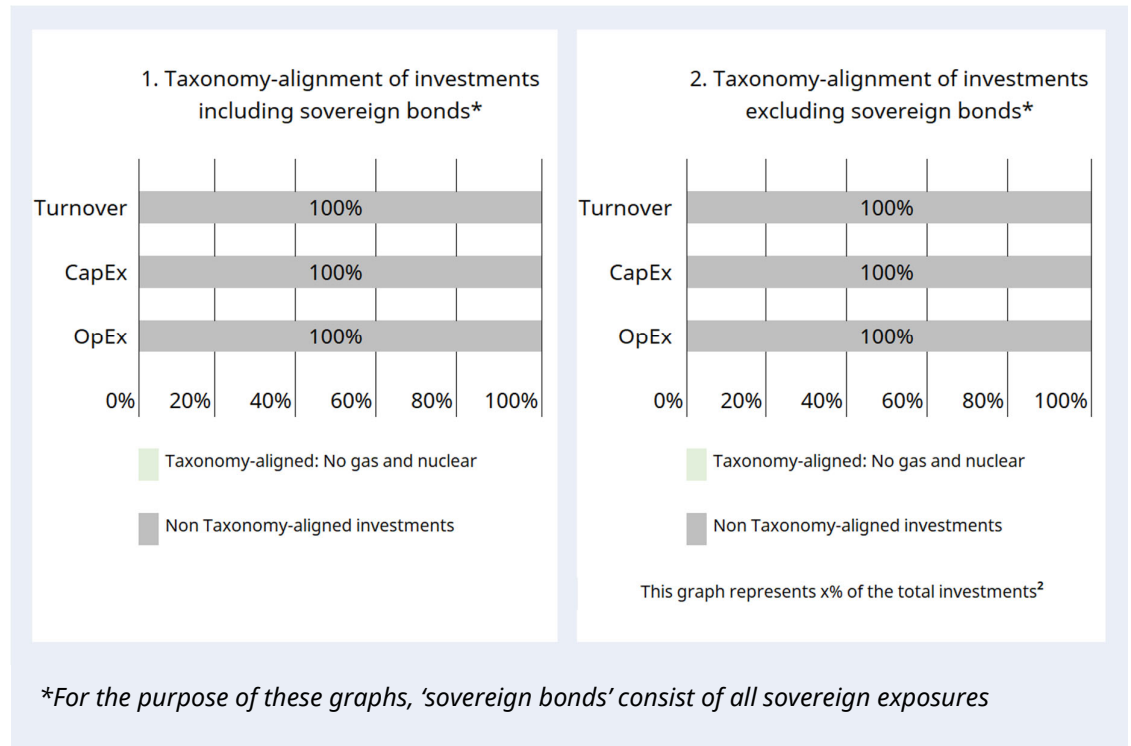

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 21%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 19%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Sustainable Convertible Bond
Legal Entity Identifier : 5493006DE43UTCSDK432

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 78% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Thomson Reuters Global, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 6.9% and the benchmark's sustainability score for the reference period was 1.5%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine

- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Thomson Reuters Global by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Thomson Reuters Global in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 78% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 50% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	78
Aug 2022 - Dec 2022	67

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	6.9	1.5
Jan 2022 - Dec 2022	6.0	1.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of

communities through telecommunication services;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schrodgers.com/en/sustainability/active-ownership/group-exclusions/>.

- Schrodgers became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schrodgers considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schrodgers may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from

activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We

recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as

sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

Schroders exclusions regarding:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derive revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

Compliance with these thresholds was monitored via the Investment Manager's portfolio compliance framework.

All PAI indicators were monitored via Schroders PAI dashboard.

Schroders' proprietary tool incorporates several PAIs as a component of its scoring methodology. III. PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines Schroders approach to active ownership. Issuers identified as laggards may be selected for engagement on PAI indicators material for the sector and the region the company operates in.

While there is a high degree of correlation between PAI laggards and the strict exclusion screening for our fund, the Investment Manager may engage with selected issuers held by the Fund on PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity) and others.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	11
Corporate Governance	4
Natural Capital and Biodiversity	3
Human Capital Management	3
Human Rights	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
AMERICA MOVIL BV CONV REGS 0% 02 Mar 2024	Industrial	3.55	Mexico

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 100%. The Fund maintained a higher overall sustainability score than the Thomson Reuters Global and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 78% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 35% was invested in sustainable investments with an environmental objective and 43% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Technology & Electronics	42.77
Industrial	Healthcare	12.88
Industrial	Capital Goods	6.52
Industrial	Transportation	5.98
Industrial	Automotive	5.05
Industrial	Telecommunications	4.51
Industrial	Media & Entertainment	3.95
Industrial	Leisure	3.50
Industrial	Basic Industry	3.31
Industrial	Retail	2.79
Industrial	Real Estate	0.82
Industrial	Services	0.24
Industrial	Consumer Goods	0.06
Financial	Financial Services	5.91
Financial	Banking	2.31
Utilities	Electric - Generation	1.99
Utilities	Non-Electric Utilities	0.62
Derivatives	FX Derivatives	0.22
Cash	Cash	-3.44

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

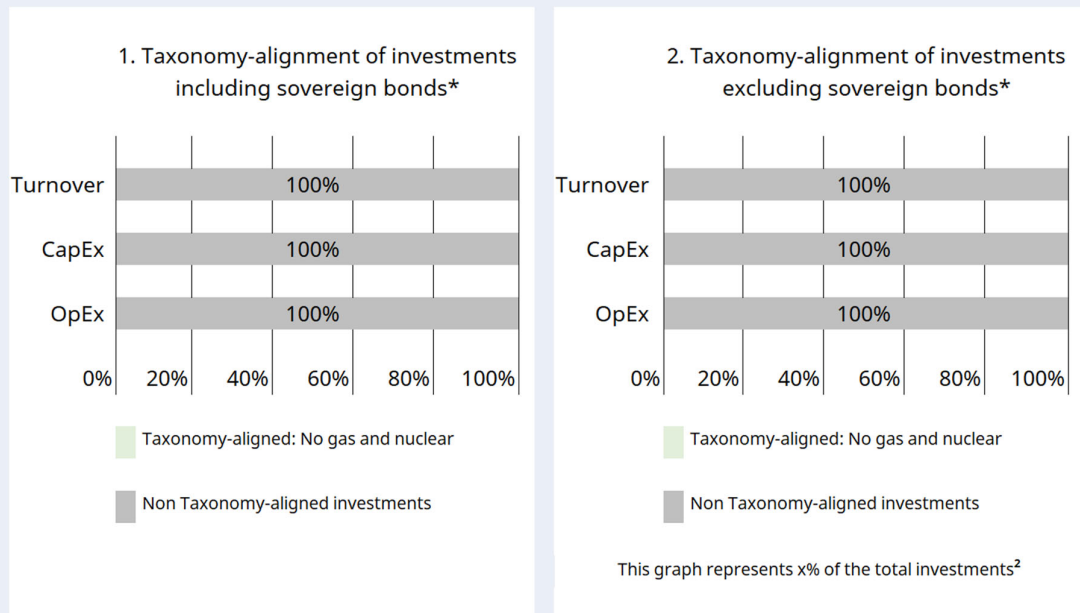

Taxonomy-aligned activities are expressed as a share of:

- **turnover**
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 35%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 43%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Securitised Credit
Legal Entity Identifier : 549300JBQI0S7PKT3U55

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> with a social objective
<input type="checkbox"/>	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund only invested in assets deemed above a minimum threshold based on the Investment Manager's rating system. Securities were ranked across Environmental, Social and Governance factors using a scorecard system and were awarded points on a 100-point /100 percent scale. These scores were then translated into a scoring system of 1- star – 5-stars, with a score of 5-stars deemed the highest. The Investment Manager ensured that at least 80% of the assets in the Fund were ranked in the top 3 Sustainability categories (3, 4, 5-stars) and 100% of the assets were invested in those ranked 2-stars or higher.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Investment Manager used different sustainability indicators to score each investment in the Fund depending on the specific asset-type, e.g. whether the underlying secured assets were mortgages or commercial real estate or another asset type. Indicators were either quantitative, data-oriented measures or information provided following engagement with issuers. Indicators included but were not limited to environmental metrics such as environmental transition risk or physical risk, social metrics such as predatory lending risk or consumer education effort and governance metrics such as risk retention or clarity of roles.

15% of the assets in the Fund were ranked as 5-stars, 35% were ranked as 4-stars and 49% were ranked as 3-stars, measured using quarter-end data throughout the reference period.

Compliance with the minimum required score was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- International Aid: the estimated societal benefits associated with humanitarian aid following natural disasters or conflicts and financial support for economic development of underdeveloped economies. Assigned in proportion to total net Official Development Assistance (ODA) receipts;
- Medical Research: the estimated societal benefits of medical innovation resulting in improvements in human conditions, increases of life expectancy and quality of life. Assigned in proportion to the social benefit of medical innovation to countries using patent data, specifically the number of medical-related technology patents filed by applicant country; and
- Patents: the estimated societal benefits associated with governments conducting in-house Research and Development (R&D) and also finance R&D in various sectors of the economy. Assigned in proportion

to the social benefits of innovation to countries using resident patent application data from the World Intellectual Property Organisation (WIPO).

• **...and compared to previous periods?**

Proprietary star ratings

This table details the percentage of assets invested in accordance with the proprietary star ratings, year on year.

Period	5-stars %	4-stars %	3-stars %
Jan 2023 – Dec 2023	15	35	49
Jan 2022 – Dec 2022	15	30	52

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

• **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

This question is not applicable for this Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

This question is not applicable for this Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This question is not applicable for this Fund.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As stated in the pre-contractual disclosure for the Fund, the Investment Manager was not able to adequately consider the principal adverse impacts on sustainability factors as these metrics only applied to investments in companies, sovereign debt and real estate.

Due to the nature of the Fund’s assets, the Investment Manager could only consider adverse impacts applicable to this asset class. The Investment Manager considered adverse impacts relevant to the strategy in the following way:

- The Investment Manager ensured that investments were aligned with the UN Principles for Responsible Investment (“PRI”). All investments were compliant with industry standards, fair, and fit-for purpose;
- The Investment Manager’s rating system considered adverse impacts on society such as the asset footprint on the environment or impact on climate change;
- Investments that could not meet minimum standards related to social, environmental or governance concerns were excluded from the portfolio. The list of excluded sectors was reviewed, updated and published quarterly.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
TREASURY BILLGOVT B 0 08/22/23 Govt	Cash & Equiv.	8.27	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. This means investments that were ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria. This figure was calculated using quarter-end data throughout the reference period.

#2 Other includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes investments that were not aligned with the environmental or social characteristics of the Fund as they were not ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	% Assets
Commercial Real Estate Securities	9.74%
Cash & Equiv.	9.12%
US CLO	8.61%
Agency MBS	7.34%
Corporate	2.91%
Auto	1.25%
Non-US Commercial	0.99%
Non-US Asset Backed	0.90%
Student Loan	0.55%
Other Asset Backed	0.41%

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these

differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

This question is not applicable for this Fund.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable for this Fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This question is not applicable for this Fund.

What was the share of socially sustainable investments?

This question is not applicable for this Fund.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Instruments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes investments that were not aligned with the environmental or social characteristics of the Fund as they were not ranked in the top 3 Sustainability categories according to the Investment Manager’s rating criteria.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- At least 80% of the assets in the Fund were ranked in the top 3 Sustainability categories (3, 4, 5-stars) and the Investment Manager invested 100% of its assets in those ranked 2-stars or higher based on the Investment Manager's rating system;
- To the extent possible the Investment Manager assessed good governance of the special purpose vehicles (SPVs – the structures holding the assets) and assessed the fiduciary behaviour of parties to the structure; and
- Securitised markets and the markets for private financing are less standardized with respect to ESG metrics as there is no third-party scoring and reporting is in a non-standard format. Engagement activities focused on deriving information, to understand where sub-sectors and companies were in their evolution, to improve transparency, to assess social, environmental or alignment characteristics to reward and incentivize / more correctly risk price for externalities, to identify those more likely to achieve levels of governance, social policy or environmental advantage that were aligned with our own standards, particularly where the market has not correctly differentiated.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Sustainable Global Sovereign Bond
Legal Entity Identifier : 549300TDFLMR98OUAQ49

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 97% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Global Treasury EUR hedged index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling four month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 21 September 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 3.7% and the benchmark's sustainability score for the reference period was 1.7%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Clean Energy
- Education
- International Aid
- Patents
- Socio-Political Stability

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

SFDR Periodic Report (continued)

Reference Period: 21 September 2023 - 31 December 2023

sustainability score than the Bloomberg Global Treasury EUR hedged index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Bloomberg Global Treasury EUR hedged index in Schroders' proprietary tool over a rolling four month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 97% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 40% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• *...and compared to previous periods?*

As this is our first reporting period, this question is not applicable.

• *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- International Aid: the estimated societal benefits associated with humanitarian aid following natural disasters or conflicts and financial support for economic development of underdeveloped economies. Assigned in proportion to total net Official Development Assistance (ODA) receipts;
- Patents: the estimated societal benefits associated with governments conducting in-house Research and Development (R&D) and also finance R&D in various sectors of the economy. Assigned in proportion to the social benefits of innovation to countries using resident patent application data from the World Intellectual Property Organisation (WIPO); and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-

run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.
- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

The Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate

SFDR Periodic Report (continued)

Reference Period: 21 September 2023 - 31 December 2023

change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. The investment process for this strategy incorporates the exclusion of sovereign issuers who fail to meet our sustainable criteria on environmental, social or developmental grounds. During the reference period a number of sovereign issuers were excluded on grounds of insufficient progress or aspiration on environmental improvements (which relates to PAI 15 - GHG intensity) or of an unsatisfactory approach to achieving the UN SDGs or allowing basic social freedoms (which relate to PAI 16 - investee countries subject to social violations).

The nature of this Fund is such that it does not invest in corporate bonds and hence in practice such corporate exclusions are less important than for other Funds. Nonetheless, the exclusions were formally applied, and included the following:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster

munitions, chemical weapons and biological weapons).

- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates PAIs as a component of its scoring methodology.

For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries' debt for the portfolio.

There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers (in which this Fund does not invest). However, prior to launch of the Fund an engagement with a sovereign by the same Investment Manager relating to PAIs 1, 2, 3 (Greenhouse gas emissions) resulted in that entity being included in the Fund's portfolio allocation.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **21 Sep 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
TREASURY NOTE SR GOVT 5% 31 Aug 2025	Sovereign (Developed)	12.22	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

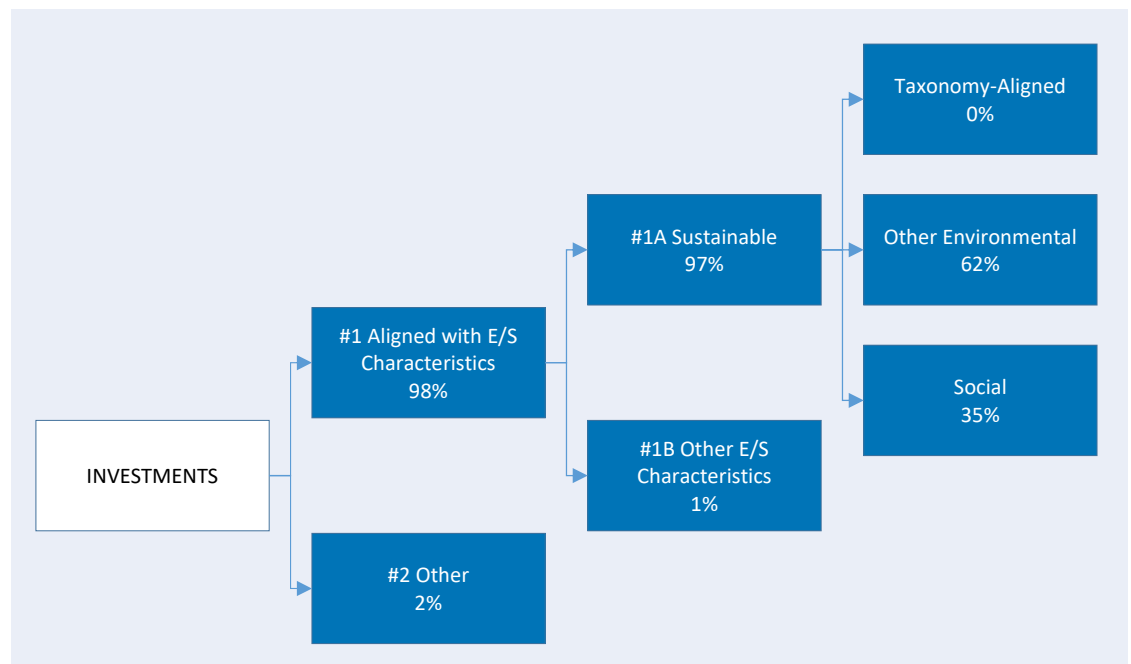

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the Bloomberg Global Treasury EUR hedged index and so the Fund's

investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 97% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 62% was invested in sustainable investments with an environmental objective and 35% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Sovereign (Developed)		59.72
Supranational		16.11
Government Guaranteed		9.01
EMD Sovereign		6.74
Cash Equivalents	Treasury Bills	4.16
Cash	Margin Cash	0.98
Cash	Cash	0.75
Agency		1.39
Local Authority		1.13
Foreign Sovereign		0.66
Industrial	Integrated Energy	0.03
Derivatives	Inflation Derivatives	0.01
Derivatives	Interest Rate Derivatives	-0.18
Derivatives	FX Derivatives	-0.5

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

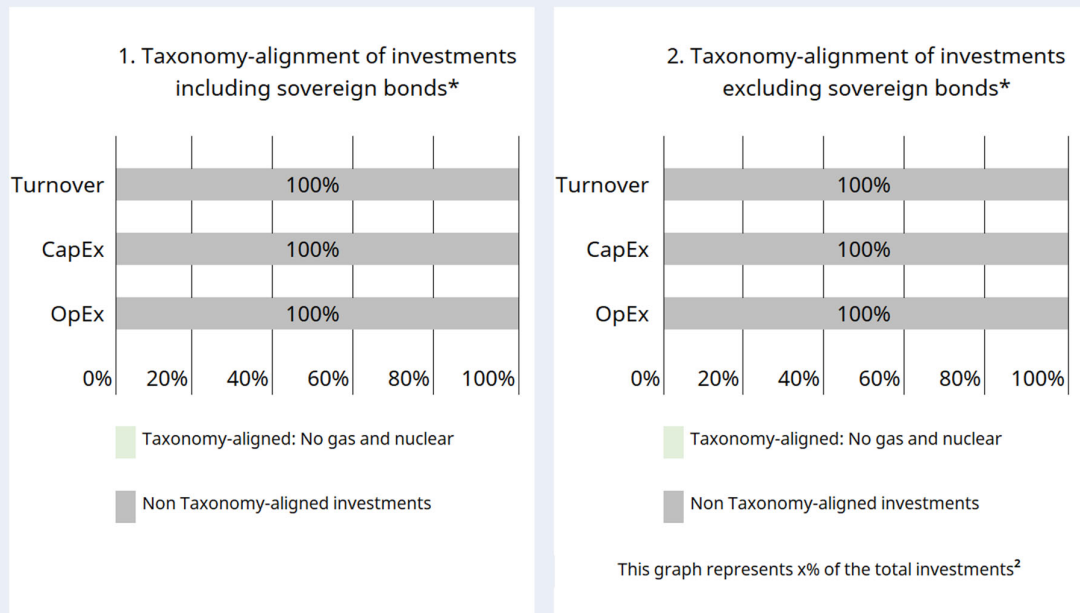

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 62%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 35%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

whether the financial product attains the environmental or social characteristics that they promote.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Social Impact Credit

Legal Entity Identifier : 549300YH78G2CDHL6585

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 24.0%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 75.6%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met. The Fund invested at least 75% of its assets in fixed and floating rate securities issued by governments, government agencies, supra nationals and companies worldwide that the Investment Manager expected to contribute positively towards social development themes. These themes included but were not limited to:

- Sustainable Infrastructure (such as connectivity, sustainable power and clean water)
- Economic Inclusion (such as training, gender equality, workforce diversity, access to finance and quality work)
- Health and Wellbeing (such as medicine and healthcare services)

From October 2023 the Fund invested at least 67% of its assets in sustainable investments with a social objective. The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash and derivatives used with the aim of managing the Fund more efficiently.

The Investment Manager selected investments for the Fund from a universe of eligible companies that were determined as meeting the Investment Manager's sustainability criteria. The criteria included an assessment of the company's contribution to social impact themes, which themselves align with one or more of the UN SDGs. This means that the extent to which companies deliver a direct or indirect positive impact on society together with the impact that these actions may have on a company's value were considered in the assessment. The Fund also invested in social and sustainability bonds, which are bonds that are specifically designed to address social challenges.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

• *How did the sustainability indicators perform?*

The Fund invested 100% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used a combination of a revenue-based approach in this assessment, by considering whether a certain percentage of the relevant issuer's revenues or operating expenditure contributed to a social objective, and specific sustainability key performance indicators to assess the investment's contribution to a social objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the impact contribution at an investee company level. In particular, the Investment Manager used proprietary sustainability analysis to identify companies that were expected to contribute positively towards the attainment of one or more UN SDGs. Examples of the indicators included, but were not limited to, female representation in the workforce and percentage of women in managerial positions.

At the end of the reference period, approximately 25% of the Fund's NAV was invested in companies

that were expected to contribute towards Quality Education (SDG 4), as measured by, but not limited to, numbers of students or training hours per employee. The Fund also invested in companies that were expected to contribute towards other UN SDGs including, but not limited to, Quality Work (SDG 8), Affordable and Clean Energy (SDG 7) and Digital Inclusion (SDG 9).

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within these exclusionary criteria.

• **...and compared to previous periods?**

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	100
Jan 2022 - Dec 2022	98

This table details the percentage of assets aligned with SDGs, year on year.

Period	Quality Education (SDG 4) (%)	Good Health and Wellbeing (SDG 3) (%)	Inclusion (SDG 10 and 5) (%)
Jan 2023 - Dec 2023	25	29	7
Jan 2022 - Dec 2022	28	-	-

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager’s approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. The Fund excluded companies in violation of the UNGC principles from the portfolio, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund also excluded companies that were assessed by Schroders to have breached one or more ‘global norms’ thereby causing significant environmental or social harm; these companies comprised Schroders’ ‘global norms’ breach list. Schroders’ determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global

Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions. For example, alcohol production and distribution, gambling, weapons, fossil fuel extraction and production, non compliance of international labour organisations standards. Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portfolio. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

From July 2023, the Fund also excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition, the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied for exclusion from the Fund's investable universe were companies deriving >5% revenue from fossil fuels extraction and production. The Fund also had other exclusions as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In addition to exclusions, the Fund considered and selectively engaged with companies in setting carbon reduction targets (related to PAIs 1, 2 and 3 covering GHG emissions).

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link](#))

<https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 2, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

We used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

Additionally, from July 2023 companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, oil and gas, that were deemed by the investment manager to have a significant negative impact on climate were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, one or more of PAI 10, 11, 12, 13, and 14 were included as part of a company's overall social score, while we also considered the decarbonising plans for several companies.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active investment.

During the reference period, we engaged with an investee company on human capital management related to PAI 10, 11, 12 and 13. Over the period, our engagements covered a range of topics, also including those related to PAIs 1, 2, 3 and 4.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	29
Natural Capital and Biodiversity	7
Human Rights	6
Corporate Governance	6
Diversity and Inclusion	6
Human Capital Management	3

The engagements shown relate to engagements with companies and issuers.

Given the impact nature of the fund, we undertook some other engagements. focusing on formulating impact thesis for example.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

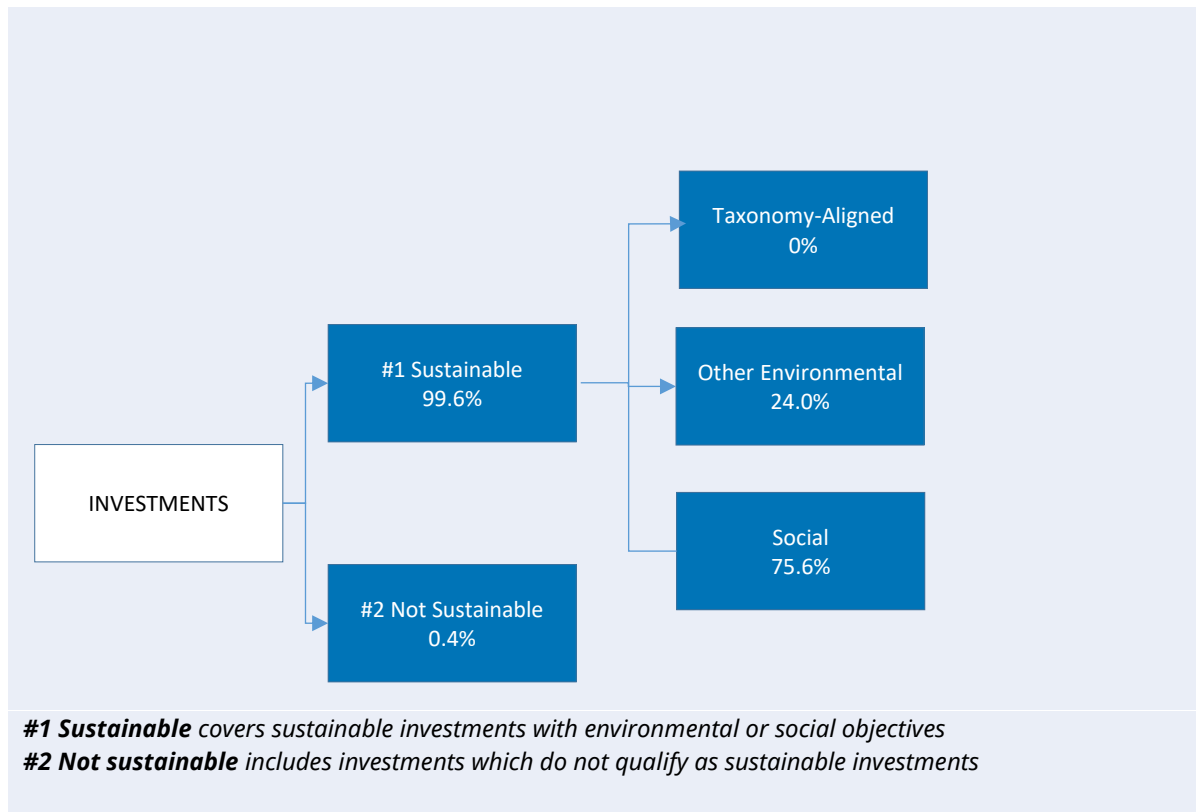

• What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in fixed and floating rate securities issued by governments, government agencies, supra nationals and companies worldwide that the Investment Manager expected to contribute positively towards social development themes.

The Fund invested 99.6% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. Within this, 24.0% was invested in sustainable investments with an environmental objective and 75.6% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and derivatives, used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Healthcare	18.50
Industrial	Telecommunications	13.37
Industrial	Real Estate	3.36
Industrial	Media & Entertainment	2.76
Industrial	Basic Industry	2.69
Industrial	Technology & Electronics	2.67
Industrial	Services	2.34
Industrial	Transportation	1.49
Industrial	Retail	1.32
Industrial	Capital Goods	1.13
Industrial	Consumer Goods	0.41
Industrial	Leisure	0.28
Industrial	Automotive	0.14
Financial	Banking	25.34
Financial	Financial Services	8.34
Financial	Insurance	2.63
Utilities	Non-Electric Utilities	4.45
Utilities	Electric - Integrated	1.84
Utilities	Electric - Generation	1.61
Utilities	Integrated Energy	1.03
Foreign Sovereign		2.59
Agency		1.28
Cash	Cash	0.58
Derivatives	FX Derivatives	-0.17

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas
- In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

• **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 24.0%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 75.6%.

• **What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and derivatives, used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested at least 75% of its assets in fixed and floating rate securities issued by governments, government agencies, supra nationals and companies worldwide that the Investment Manager expected to contribute positively towards social development themes. The Investment Manager also analysed and invested in selective social bonds with social objectives.
- The Fund invested in companies that did not cause significant environmental or social harm. During the reference period, the Investment Manager divested from a one company with social objectives which the Investment Manager believed had developed adverse impacts on pollution and hazardous waste.
- The Investment Manager utilised a Schroders' proprietary tool and analysis to help assess good governance practices of investee companies. During the reference period the portfolio divested from one company with social objective that failed the internal good governance analysis.
- The Investment Manager undertook a number of engagements on holdings in the Fund during the reference period, that focused on diverse set of topics such as inclusion, diversity and quality education, corporate governance, affordable and clean energy provision, regenerative agriculture for sustainable food impact formulation and disclosure, health safety and wellbeing, nature related risk and management, , and carbon reduction and net zero targets.

- The Investment Manager utilised Schroders' proprietary tool and analysis to select companies which have forward looking social and sustainability targets as well as have forward looking research and development expenditure, for example in the healthcare sector, aimed at positive social impact.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Strategic Credit
Legal Entity Identifier : 549300402PQWGGYQR877

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 46% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a positive absolute sustainability score, based on Schroders' proprietary tool. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than zero, based on month-end data.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The positive absolute sustainability score for the reference period was 2.5%.

The sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- High Salaries
- Medicine
- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a positive absolute

sustainability score by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 46% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	46
Aug 2022 - Dec 2022	47

Sustainability score

This table details the Fund's sustainability score, year on year

Period	Fund (%)
Jan 2023 - Dec 2023	2.5
Jan 2022 - Dec 2022	3.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage;

- **Medicine:** the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

- **Water Access:** the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of

themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding

Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schrodgers' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN - Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schrodgers' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the energy sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	29
Corporate Governance	17
Natural Capital and Biodiversity	6
Diversity and Inclusion	3
Human Rights	3
Human Capital Management	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 77%. The Fund maintained a positive absolute sustainability score, and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 46% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. [Within this, 25% was invested in sustainable investments with an environmental objective and 21% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Healthcare	13.72
Industrial	Telecommunications	7.59
Industrial	Basic Industry	5.75
Industrial	Automotive	4.61
Industrial	Real Estate	4.38
Industrial	Services	4.20
Industrial	Media & Entertainment	4.17
Industrial	Retail	3.68
Industrial	Leisure	2.97
Industrial	Capital Goods	2.81
Industrial	Energy - Exploration & Production	2.68
Industrial	Technology & Electronics	2.01
Industrial	Consumer Goods	1.33
Industrial	Transportation	1.04
Industrial	Integrated Energy	0.71
Industrial	Gas-Distribution	0.68
Industrial	Oil Refining & Marketing	0.07
Financial	Banking	14.69
Financial	Financial Services	8.40
Financial	Insurance	6.81
Utilities	Electric - Integrated	1.36
Utilities	Non-Electric Utilities	1.27
Utilities	Electric - Distr/Trans	0.41
Utilities	Electric - Generation	0.04
Cash	Cash	2.15
Cash	Margin Cash	0.06
Cash Equivalents	Treasury Bills	1.14
Securitized	Asset Backed	0.84
Securitized	Commercial Mortgage Backed	0.11
Derivatives	FX Derivatives	0.25
Derivatives	Interest Rate Derivatives	0.10

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 25%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 21%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Sustainable Euro Credit

Legal Entity Identifier : 5493003OZ3JFD52K6J04

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 64% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the ICE Bank of America Merrill Lynch Euro Corporate index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) did not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The Fund invested at least 10% of its assets in green, social and/or sustainable bonds.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 4.3% and the benchmark's sustainability score for the reference period was -3.1%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the end of the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine

- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the ICE Bank of America Merrill Lynch Euro Corporate index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the benchmark in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 64% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager invested 42% of the Fund's assets in green, social and/or sustainable bonds. This figure represents the average percentage of green, social and/or sustainable bonds during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 50% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	64
Aug 2022 - Dec 2022	63

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	4.3	-3.1
Jan 2022 - Dec 2022	6.9	-3.4

For 2022 the percentage of sustainable investments was calculated as at the end of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. The objectives of the sustainable investments that the Fund made included, but were not limited to increasing benefits by way of the following:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schrodgers.com/en/sustainability/active-ownership/group-exclusions/>.
- Schrodgers became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. The fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schrodgers considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schrodgers may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain exclusions to companies that derive revenues above certain thresholds from activities related to fossil fuels, nuclear power, civilian firearms and conventional weapons, gambling, adult entertainment, controversy and misconduct flags, among others.
- The Fund also applied exclusions to countries that are not legally bound to the Paris Agreement, UN Convention on Biological Diversity or Nuclear Non-Proliferation Treaty, countries that are classified as 'Not free' according to Freedom House or countries that fall below the required threshold on the current Corruption Perception Index by Transparency International. Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list.

From July 2023 the Fund also excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition, the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >5% revenue from thermal coal mining and >5% revenue from coal power generation. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate

change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 2, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The fund used a list of companies that were deemed to violate the UN Global Compact (UNGC)

Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

Additionally, from July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were via the investment process and some via engagement. Further details below.

For this product, PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, additionally Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, oil and gas, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

Greenhouse gas emissions, carbon footprint, greenhouse gas intensity of investment companies, activities negatively affecting biodiversity-sensitive areas: PAI 1,2, 3 & 7 are considered into this fund

through Schroders' proprietary tool and subsequent sustainability assessments. The proprietary tool incorporates several PAIs as a component of its scoring methodology and sustainability assessments. As part of our analysis, we consider how a firm is managing its environmental footprint (including its impact on the climate), its negative impact on biodiversity, as well as its potential exposure to the effects of long-term climate change. Certain PAIs may be more relevant for different issuers, sectors, or industries and therefore we assess companies based on ESG performance and PAIs on a sector-relevant basis.

While no single metric determines the overall assessment of a company's environmental score, the fund evaluated a variety of different metrics to determine whether a company is adequately managing its climate and environmental risks.

Unadjusted gender pay gap and board gender diversity: PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were considered as part of our good governance framework using data from our internal Schroders' proprietary tool.

All PAI indicators are monitored via Schroders' PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

During the reference period, we engaged with investee companies on topics such as climate alignment, which are related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to have them provide an update on their climate targets and transition plan. We are continuing our efforts to encourage companies to set clear emissions reduction targets for all three scopes of emissions and where targets are already set, to ensure these targets are properly integrated into company remuneration policies.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	81
Corporate Governance	39
Natural Capital and Biodiversity	21
Diversity and Inclusion	12
Human Rights	9
Human Capital Management	9

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
NATWEST GROUP PLC SR REGS 4.699% 14 Mar 2028	Financial	0.66	United Kingdom

The list above represents the average of the Fund's holdings at each quarter end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

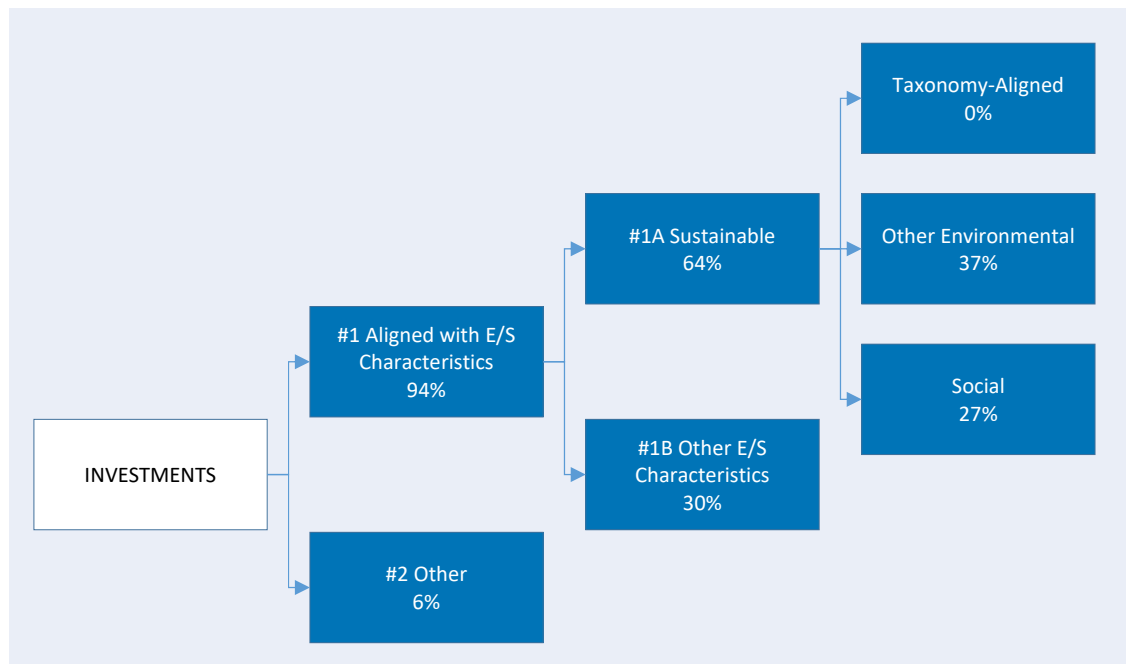

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 94%. The Fund maintained a higher overall sustainability score than the benchmark and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable

investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 64% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 37% was invested in sustainable investments with an environmental objective and 27% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of the green or social bonds, which were classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Real Estate	7.17
Industrial	Healthcare	6.86
Industrial	Telecommunications	5.96
Industrial	Transportation	4.45
Industrial	Capital Goods	3.92
Industrial	Retail	3.23
Industrial	Media & Entertainment	2.94
Industrial	Technology & Electronics	2.36
Industrial	Services	1.89
Industrial	Basic Industry	1.87
Industrial	Consumer Goods	1.73
Industrial	Automotive	1.65
Industrial	Leisure	1.14
Financial	Banking	27.97
Financial	Insurance	9.80
Financial	Financial Services	4.75
Utilities	Electric - Integrated	3.65
Utilities	Electric - Generation	1.68
Utilities	Non-Electric Utilities	1.23
Utilities	Electric - Distr/Trans	0.83
Cash	Cash	2.30
Sovereign (Developed)		1.37
Supranational		0.65
Securitized	Asset Backed	0.29
Foreign Sovereign		0.21
Government Guaranteed		0.08

The list above represents the average of the Fund's holdings at each quarter end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived

from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

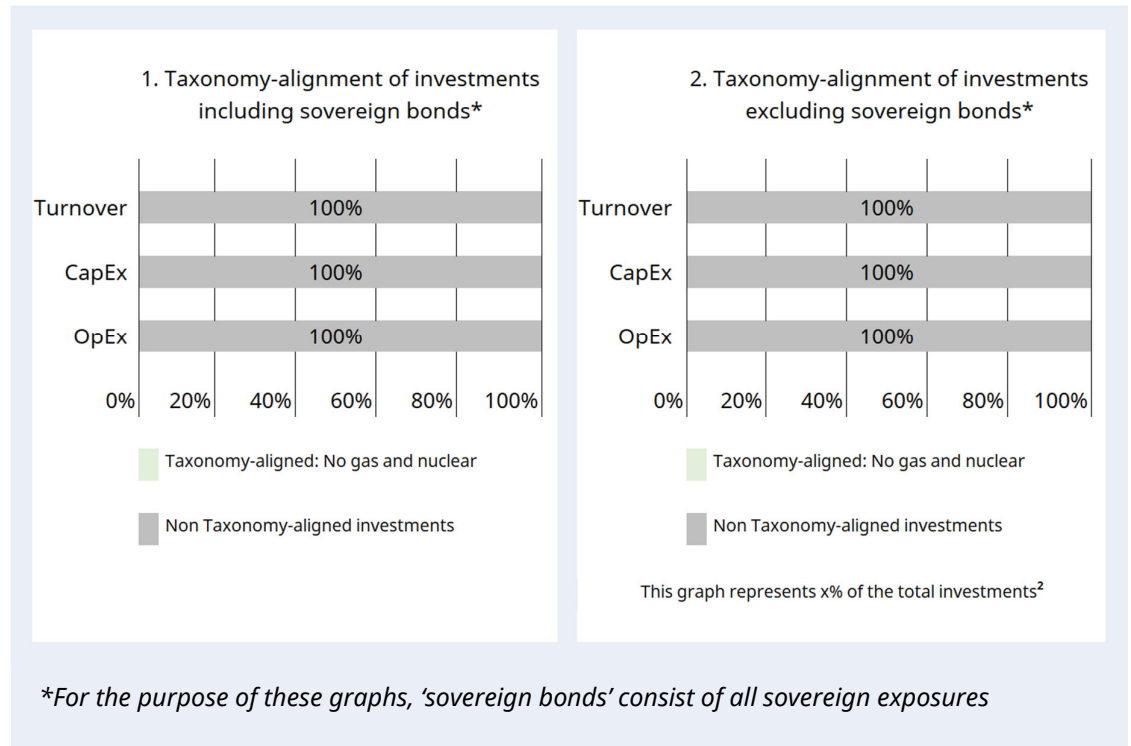

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 37%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 27%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and, where relevant, of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF EURO Credit Conviction Short Duration (on 21 September 2023 the Fund changed its name from Schroder ISF EURO Credit Absolute Return)

Legal Entity Identifier : 549300GRJ5K0KUG41F58

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 52% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund's characteristic to maintain a positive absolute sustainability score changed to maintain a higher overall sustainability score than the benchmark during the reference period.

Until 20 September 2023, the Fund maintained a positive absolute sustainability score, based on Schroders' proprietary tool. This means that the Fund's weighted average score over a rolling six-month period up to the end of the reference period was higher than zero, based on month-end data.

From 21 September 2023, the Fund maintained a higher overall sustainability score than the ICE BofA 1-5 Year BBB Euro Corporate Total Return Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling four-month period until the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

• ***How did the sustainability indicators perform?***

Until 20 September 2023, the positive absolute sustainability score for the reference period was 1.9%.

From 21 September 2023, the Fund's sustainability score was 1.0% and the benchmark's sustainability score was -2.5%.

The sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- High Salaries
- Medicine
- Power Provision

Until 20 September 2023, the Investment Manager monitored compliance with the characteristic to maintain a positive absolute sustainability score by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool over a rolling six-month period up to the end of the reference period, based on month-end data.

From 21 September 2023, the Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the ICE BofA 1-5 Year BBB Euro Corporate Total Return Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the ICE BofA 1-5 Year BBB Euro Corporate Total Return Index in Schroders' proprietary tool over a rolling four-month period until the end of the reference period, based on month-end data.

The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 52% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on

an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	52
Aug 2022 - Dec 2022	50

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.2	-2.2
Jan 2022 - Dec 2022	5.3	

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.
- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The

list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a

number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	53
Corporate Governance	30
Natural Capital and Biodiversity	11
Diversity and Inclusion	11
Human Capital Management	6
Human Rights	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 85%. Until 20 September 2023, the Fund maintained a positive absolute sustainability score and from 21 September 2023 the Fund maintained a higher overall sustainability score than the ICE BofA 1-5 Year BBB Euro Corporate Total Return Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 52% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 32% was invested in sustainable investments with an environmental objective and 20% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Real Estate	10.18
Industrial	Transportation	7.59
Industrial	Media & Entertainment	6.03
Industrial	Telecommunications	3.03
Industrial	Basic Industry	2.94
Industrial	Retail	2.71
Industrial	Healthcare	2.65
Industrial	Leisure	2.04
Industrial	Services	1.92
Industrial	Energy - Exploration & Production	1.83
Industrial	Automotive	1.44
Industrial	Integrated Energy	1.36
Industrial	Capital Goods	1.19
Industrial	Technology & Electronics	0.86
Industrial	Consumer Goods	0.58
Industrial	Gas-Distribution	0.17
Industrial	Oil Refining & Marketing	0.05
Financial	Banking	22.02
Financial	Financial Services	11.14
Financial	Insurance	4.97
Utilities	Electric - Integrated	3.71
Utilities	Electric - Distr/Trans	1.83
Utilities	Electric - Generation	1.22
Utilities	Non-Electric Utilities	0.82
Sovereign (Developed)		2.77
Cash Equivalents	Treasury Bills	1.76
Derivatives	Interest Rate Derivatives	1.54
Derivatives	FX Derivatives	0.03
Derivatives	Credit Derivatives	0.01
Foreign Sovereign		1.33
Securitized	Asset Backed	0.18
Cash	Cash	0.64
Cash	Margin Cash	-0.54
EMD Sovereign		-0.02

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 32%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 20%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Sustainable US Dollar Corporate Bond
Legal Entity Identifier : 549300PT9R3Q006WKS27

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 67% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg US Corporate (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling four month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary.

The reference period for this Fund is 14 September 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 6.7% and the benchmark's sustainability score for the reference period was -8.6%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Medicine
- Power Provision

- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Bloomberg US Corporate (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Bloomberg US Corporate (Net TR) Index in Schroders' proprietary tool over a rolling four month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 67% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 40% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ***...and compared to previous periods?***

As this is our first reporting period, this question is not applicable.

• ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue;
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

The Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	7
Human Capital Management	1
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **14 Sep 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
JPMORGAN CHASE & CO SR KK 3.65% 01 Sep 2169	Financial	3.98	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the Bloomberg US Corporate (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this

by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 67% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 26% was invested in sustainable investments with an environmental objective and 42% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Healthcare	11.66
Industrial	Real Estate	8.00
Industrial	Technology & Electronics	7.42
Industrial	Basic Industry	5.96
Industrial	Telecommunications	5.18
Industrial	Retail	4.95
Industrial	Consumer Goods	4.45
Industrial	Capital Goods	4.39
Industrial	Media & Entertainment	4.22
Industrial	Automotive	1.99
Industrial	Services	0.99
Financial	Banking	17.04
Financial	Financial Services	10.19
Financial	Insurance	1.97
Utilities	Electric - Integrated	4.32
Utilities	Electric - Generation	2.01
Utilities	Non-Electric Utilities	1.99
Utilities	Electric - Distr/Trans	1.99
Cash	Cash	0.94
Cash	Margin Cash	0.35

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

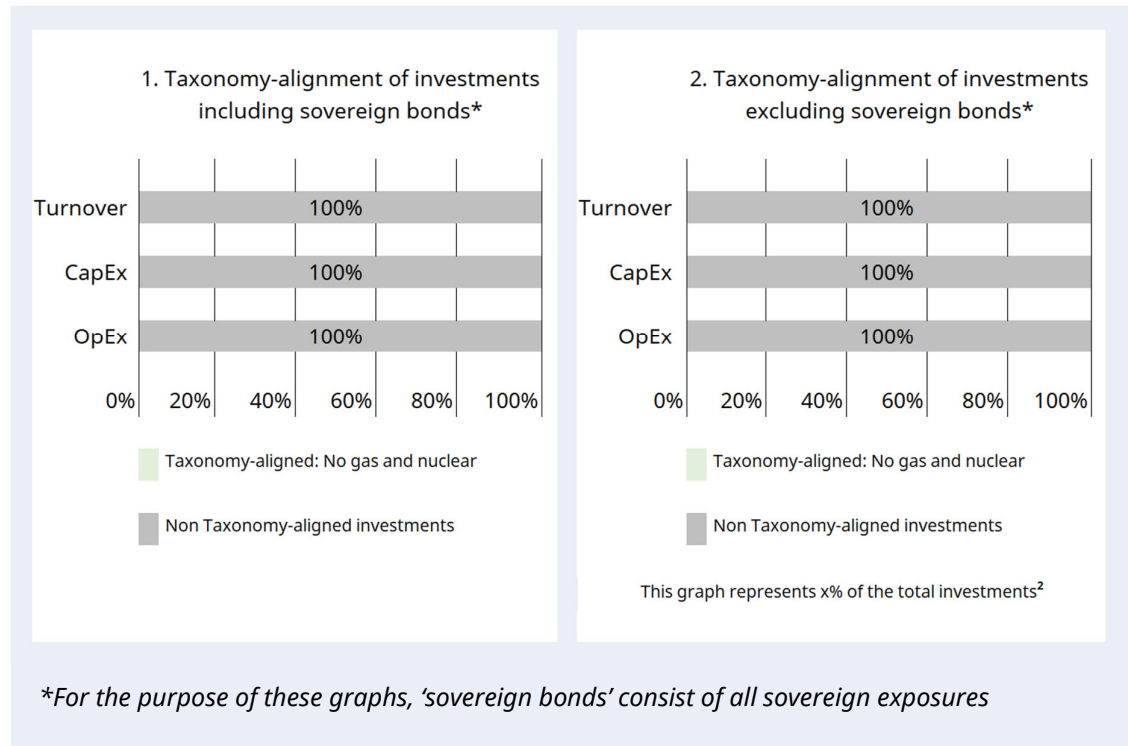

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 26%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 42%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF European Sustainable Value (merged with Schroder ISF Global Sustainable Value on 8 November 2023)

Legal Entity Identifier : 549300F4GDD1IL4MMG90

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 70% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Europe (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 8 November 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.5% and the benchmark's sustainability score for the reference period was -5.3%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Donations
- High Salaries
- Innovation
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the MSCI Europe (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI Europe (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 70% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 50% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Nov 2023	70
Aug 2022 - Dec 2022	74

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Nov 2023	2.5	-5.3
Jan 2022 - Dec 2022	3.3	-8.1

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schrodgers.com/en/sustainability/active-ownership/group-exclusions/>.
- Schrodgers became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schrodgers considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schrodgers may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain

(suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations)

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms'

breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment via the sustainability framework that sits at the heart of the investment process. This framework uses a “triple lens” approach that uses Schroders’ proprietary tools, external third-party data and qualitative on-desk analysis to incorporate several PAIs in our sustainability analysis of each stock. As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 13 (Board gender diversity) was included as part of a company’s overall governance assessment and we considered the ratio of female to male board members in investee companies, expressed as a percentage of all board members.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on biodiversity and discussed appropriate progress and robust policies that they have in place as well as pushing for a water consumption target, related to PAI 7. We also engaged with several companies on board gender diversity, related to PAI 13 diversity at board level and discussed

appropriate progress that they should be making and what our expectations are.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme:

Engagement Theme	# Issuers
Climate Change	15
Corporate Governance	12
Human Rights	7
Human Capital Management	4
Natural Capital and Biodiversity	4
Diversity and Inclusion	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 8 Nov 2023**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schrodgers Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the

Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 96%. The Fund maintained a higher overall sustainability score than the MSCI Europe (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 70% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 37% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	17.19
Financial	Insurance	9.38
Communication Services	Media & Entertainment	13.47
Communication Services	Telecommunication Services	8.18
Consumer Staples	Consumer Staples Distribution & Retail	11.62
Consumer Staples	Household & Personal Products	3.71
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	12.50
Health Care	Health Care Equipment & Services	1.51
Industrial	Transportation	4.95
Consumer Discretionary	Consumer Services	2.78
Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.77
Consumer Discretionary	Consumer Durables & Apparel	1.38
Industrial	Consumer Discretionary Distribution & Retail	1.00
Industrial	Commercial & Professional Services	0.98
Cash	Cash	4.41
Real Estate	Equity Real Estate Investment Trusts (REITs)	3.19
Information Technology	Software & Services	1.00

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

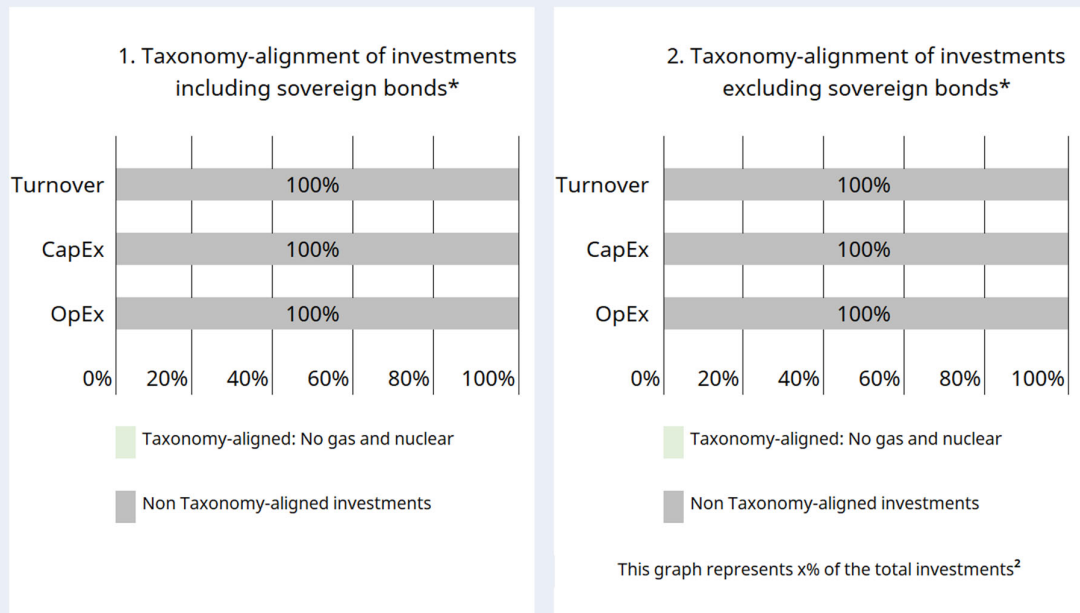

Taxonomy-aligned activities are expressed as a share of:

- **turnover**
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 37%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 34%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

Product Name: Schroder ISF Digital Infrastructure (liquidated on 10 October 2023)
Legal Entity Identifier: 549300RXHDP6AJVZE869

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes No

<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 42%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 56%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

Until 30 June 2023 the Fund invested at least 75% of its assets, and from 1 July 2023 at least 90% of its assets in companies worldwide which helped to advance the development of the global digital infrastructure by contributing towards more environmentally resilient socially inclusive and/or innovative digital infrastructure. The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which was cash.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2023 to 10 October 2023 when the Fund was liquidated.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

• *How did the sustainability indicators perform?*

The Fund invested 98% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used specific sustainability key performance indicators to assess the investment's contribution to an environmental and/or social objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the contribution at an investee company level. In particular, the Investment Manager carried out analysis to score a company's alignment with the United Nations' Sustainable Development Goal 9; Industry, Innovation and Infrastructure (UN SDG 9), focusing on building resilient infrastructure, promoting inclusive and sustainable industrialisation and fostering innovation. Secondly, the Investment Manager used a proprietary sustainability tool which rates companies based on their treatment of key stakeholders, including communities and the environment. This score is broken down into 8 main categories – customers (e.g. customer reviews), employees (e.g. employee turnover), the environment (e.g. carbon intensity), local communities (e.g. community donations), regulators and governments (e.g. fines imposed), suppliers (e.g. supplier payables days), governance (e.g. board gender inequality) and management (e.g. management quality). The minimum threshold for companies to be included is having a score in the proprietary tool which is within the top three quartiles within the remaining investment universe. During the reference period, all of the Fund's equity holdings passed the required thresholds, by having a positive alignment to UN SDG 9 and with a score in the top three quartiles in Schroders' proprietary tool. The percentage of equity holdings aligned to UN SDG 9 and covered by Schroders' proprietary SDG alignment tool was 88%, as measured on 30 September 2023. The Fund's weighted average percentile ranking for companies in the portfolio was 71%. This means the Fund was holding companies that were on average scored in the 71st percentile compared to the investment universe in 2023. This figure is based on quarter-end data during the reference period.

For example, the Fund invested in a data centre company which was targeting 100% renewable for their facilities, having already been carbon neutral for their own administrative function since 2018, and rolled out a service for customers to be able to opt in to offset all the carbon emissions generated by their IT equipment and cooling systems used in any of the company's data centres nationally. The Fund also invested in a company which was rolling out communications tower infrastructure across some of

the world's most remote regions enabling over a hundred million more people to access an improved, more reliable mobile network service.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund %
Jan 2023 – Oct 2023	98
Jan 2022 – Dec 2022	96

This table details the weighted average percentile ranking for the portfolio compared to the universe using a proprietary sustainability tool, year on year.

Period	Fund %
Jan 2023 – Oct 2023	71
Jan 2022 – Dec 2022	75

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portfolio, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portfolio. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list this period.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition, the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural

capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 2, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on

such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through the Schroders proprietary tool, the scoring for which was used to screen the investment universe and to provide the maximum quantum that can be invested in each company. For example, in assessing an issuer's overall environmental score, PAIs 3 and 6 were included. In assessing an issuer's overall social score, PAI 13 was included.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with an investee company on their commitment to mitigating climate change, which relates to PAIs 1, 2 and 3.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	6
Climate Change	1
Human Capital Management	1
Human Rights	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 10 Oct 2023**

Largest Investments	Sector	% Assets	Country
DIGITAL REALTY TRUST INCORPORATED REIT USD0.01	Real Estate	5.15	United States
AMERICAN TOWER CORPORATION REIT USD0.01	Real Estate	4.34	United States

The list above represents the average of the Fund's holdings at each quarter end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

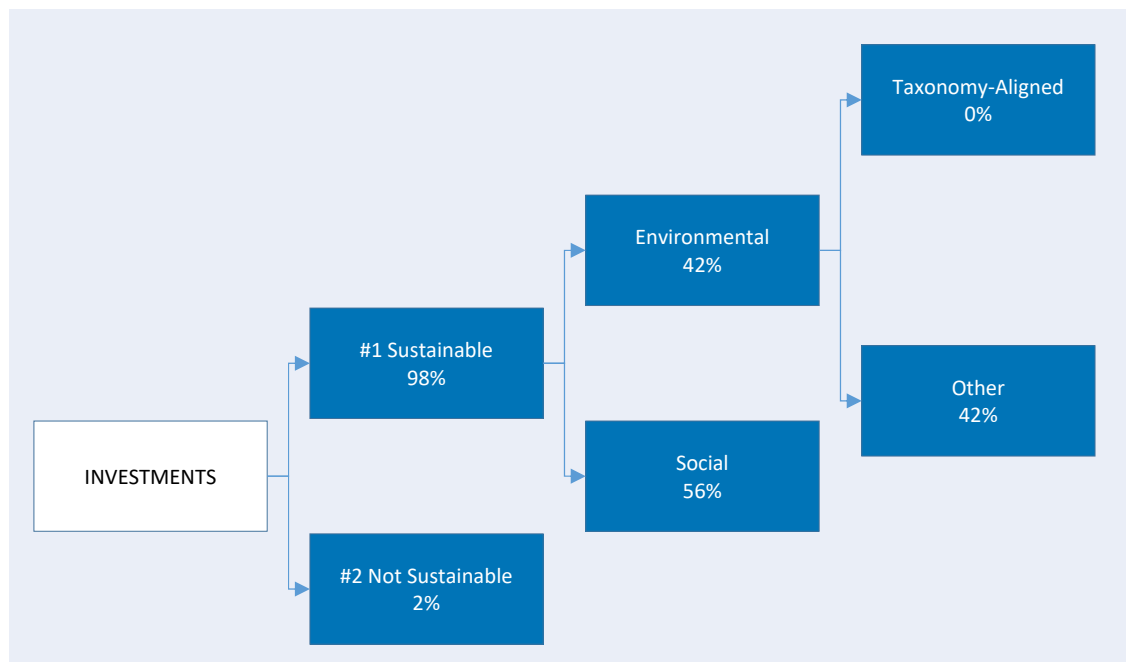

• What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in companies worldwide which helped to advance the development of the global digital infrastructure by contributing towards more environmentally resilient socially inclusive and/or innovative digital infrastructure.

The Fund invested 98% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. Within this, 42% was invested in sustainable investments with an environmental objective and 56% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

#1 Sustainable covers sustainable investments with environmental or social objectives
#2 Not sustainable includes investments which do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Communication Services	Telecommunication Services	37.38
Real Estate	Equity Real Estate Investment Trusts (REITs)	21.57
Real Estate	Real Estate Management & Development	2.22
Information Technology	Software & Services	7.90
Information Technology	Technology Hardware & Equipment	1.72
Financial	Financial Services	2.76
Cash	Cash	1.45

The list above represents the average of the Fund's holdings at each quarter end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

• **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 42%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 56%.

• **What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

Minimum safeguards were applied where relevant to investments by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction, which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- Until 30 June 2023 the Fund invested at least 75% of its assets, and from 1 July 2023 at least 90% of its assets, in companies that contributed towards more environmentally resilient socially inclusive and/or innovative digital infrastructure.
- The Fund invested in companies that did not cause significant environmental or social harm.
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies.
- The Investment Manager engaged with issuers held in the portfolio and on average aimed to meet or speak with company management once a year. During these meetings sustainability topics were regularly discussed alongside business trends and financial performance.
- During the reference period, the Investment Manager conducted nine dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to climate alignment, with a focus on emissions and renewable power, nature related risks, boards & management and executive compensation.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

• How does the reference benchmark differ from a broad market index?

This question is not applicable for this Fund.

• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

This question is not applicable for this Fund.

• How did this financial product perform compared with the reference benchmark?

This question is not applicable for this Fund.

• How did this financial product perform compared with the broad market index?

This question is not applicable for this Fund.

Product : Schroder ISF Sustainable European Market Neutral (merged with Schroder ISF European Alpha Absolute Return on 27 September 2023)

Legal Entity Identifier : 55PC08X9J3DW3SSCY58

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76% of sustainable investments
<input type="checkbox"/> In economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> With an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> In economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> With an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> With a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The percentage of sustainable investments shown (which are all long exposures, as short positions are not deemed to be sustainable investments) represents the sustainable investments as a proportion of the long exposure of the Fund during the reference period. This is in line with the pre-contractual disclosure for the Fund, where the Fund committed to invest at least 10% of its long exposure in sustainable investments.

For additional context, the percentage of sustainable investments as a proportion of gross exposure during the reference period was 36%. The gross exposure includes both long and short positions and this figure is provided for consistency with the basis of the other calculations in the asset allocation section below. The long exposure and gross exposure excludes cash and cash equivalents.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a positive absolute sustainability score, based on Schroders' proprietary tool. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than zero, based on month-end data.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool. The Fund's long and short positions contribute differently to the aggregate score. Long positions with positive scores and short positions with negative scores both contribute positively towards the aggregate score, while long positions with negative scores and short positions with positive scores both detract from the aggregate score.

The Fund used derivatives extensively to implement its investment strategy and to meet the environmental and/or social characteristics promoted by the Fund. Long and short derivative positions contributed differently to the Fund's overall sustainability score as described. Equity and index derivatives (excluding options) are scored in the same way as physical holdings, on a look-through basis, and also contributed to the Fund's overall sustainability score.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund also invested at least 10% of its long exposure in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 27 September 2023.

• ***How did the sustainability indicators perform?***

The positive absolute sustainability score for the reference period was 25.7%.

The sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Alcohol
- Contraception
- Financial Stability
- High Salaries
- Tobacco

Alcohol and Tobacco are societal costs (and therefore were scored negatively) yet contributed positively to the sustainability score of the Fund because they represent short positions, and short positions with negative scores contribute positively towards the aggregate sustainability score of the Fund.

The Investment Manager monitored compliance with the characteristic to maintain a positive absolute sustainability score by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund committed to invest at least 10% of its long exposure in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool and in line with this commitment the Fund invested 76% of its long exposure in sustainable investments (which are all long positions, as short positions are not deemed to be sustainable investments) during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its long exposure in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool.

For additional context, during the reference period and based on quarter-end data, the Investment Manager invested 36% of the Fund's gross exposure in sustainable investments. This represents the percentage of sustainable investments as a proportion of the gross exposure of the Fund. The gross exposure includes both long and short positions and this figure is provided for consistency with the basis of the calculations in the asset allocation section below.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund % (Gross)	Fund % (Long)
Jan 2023 - Sep 2023	36	76
Aug 2022 - Dec 2022	34	67

Sustainability score

This table details the Fund's sustainability score, year on year

Period	Fund (%)
Jan 2023 - Sep 2023	25.7
Jan 2022 - Dec 2022	5.7

For 2022 the percentage of sustainable investments was calculated as at the end of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's long portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. The objectives of the sustainable investments that the Fund made included, but were not limited to, increasing benefits by way of the following:

- Connectivity; the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- Corruption; societal costs, to both developed and developing economies, associated with a nations estimated level of corruption. Company exposure is calculated based on regional exposure.
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine; the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue;

The above examples of objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded from its long exposure companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded from its long exposure companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- Where relevant, companies that derived revenues above certain thresholds from activities related thermal coal, thermal coal mining and coal fired power generation were excluded from long exposure.
- The Fund also applied certain other exclusions. Further information on all of the Fund's exclusions is to be found under on the Fund's webpage, accessed via <https://www.schroders.com/en-lu/lu/professional/fund-centre>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded from companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders applied may have certain exceptions to the list.

From July 2023 the Fund excluded from its long exposure companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global

norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 2, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were excluded from long exposure and not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

Excluded from long and short exposure:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

Excluded from long exposure:

- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics, including supply chains with companies in the retail sector, climate and net zero with the construction and property sectors. These engagements related to PAIs 4 (Lack of a supplier code of conduct), and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	12
Corporate Governance	6
Human Capital Management	3
Natural Capital and Biodiversity	3
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments, based on net exposure (as a percentage of NAV), were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	
		(Net)	Country
WHITBREAD PLC	Consumer Discretionary	4.4	United Kingdom
SMITH & NEPHEW PLC	Health Care	4.3	United Kingdom
SWATCH GROUP AG	Consumer Discretionary	4.0	Switzerland
UNILEVER PLC	Consumer Staples	3.8	United Kingdom
BURBERRY GROUP PLC	Consumer Discretionary	3.8	United Kingdom
RELX PLC	Industrials	3.7	United Kingdom
KERRY GROUP PLC	Consumer Staples	3.6	United Kingdom
SODEXO SA	Consumer Discretionary	3.6	France
UNITE GROUP PLC	Real Estate	3.3	United Kingdom
INFORMA PLC	Communication Services	3.3	United Kingdom
NEXT PLC	Consumer Discretionary	3.3	United Kingdom
ASSOCIATED BRITISH FOODS PLC	Consumer Staples	3.2	United Kingdom
GERRESHEIMER AG	Health Care	3.2	Germany
HISCOX LTD	Financials	3.2	United Kingdom
BAYER AG	Health Care	3.2	Germany

The list above represents the average of the Fund's net exposure as a percentage of NAV at each quarter-end during the reference period.

Exposures have been provided on a look through basis for index futures, index options, total return swaps (TRS) positions and contract for difference (CFD) baskets where possible and netted at the issuer level. There may be instances where a proxy has been used.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98% of gross exposure. The Fund maintained a positive absolute sustainability score, and so the Fund's investments (both long and short) that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). Long positions with positive scores and short positions with negative scores both contributed positively towards the aggregate score, while long positions with negative scores and short positions with positive scores both detracted from the aggregate score. The percentage in #1 Aligned represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of gross exposure that was invested in sustainable investments, as indicated in #1A. Cash and cash equivalents are excluded from the proportions in #1 and #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 36% of its gross exposure in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. The gross exposure includes both long and short positions but the percentage only includes long exposures as short exposure are not deemed to be sustainable investments. Within this, 13% was invested in sustainable investments with an environmental objective and 23% was invested in sustainable investments with a social objective. However, the Fund committed to invest at least 10% of its long positions in sustainable investments. The Fund invested 76% of its long exposure in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 28% was invested in sustainable investments with an environmental objective and 48% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes investments that were not scored by Schroders' proprietary sustainability tools and so did not contribute towards the Fund's sustainability score. Cash and cash equivalents are excluded from the calculations of gross and long exposure due to the long / short nature of the Fund's investment strategy.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

The percentages shown above are calculated as a proportion of gross exposure for consistency purposes. However, the Fund committed to invest at least 10% of its long exposure in sustainable investments and, as an average during the reference period, based on quarter-end data, the Fund invested 76% of its long positions in sustainable investments.

Exposures have been provided on a look through basis for index futures, index options, Total Return Swaps (TRS) positions and Contracts for Difference (CFD) baskets where possible and netted at the issuer level. There may be instances where a proxy has been used. This netting was applied before determining whether an exposure was long or short, and before calculating the gross exposure.

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors based on gross and net exposure (as a % of NAV):

Sector	Sub-Sector	% Assets (Net)	% Assets (Gross)
Communication Services	Media & Entertainment	4.8	5.8
Communication Services	Telecommunication Services	2.3	3.2
Consumer Discretionary	Automobiles & Components	-3.1	3.1
Consumer Discretionary	Consumer Discretionary Distribution & Retail	-0.1	8.4
Consumer Discretionary	Consumer Durables & Apparel	12.1	13.9
Consumer Discretionary	Consumer Services	7.6	11.1
Consumer Staples	Consumer Staples Distribution & Retail	-2.9	3.4
Consumer Staples	Food, Beverage & Tobacco	-1.8	15.6
Consumer Staples	Household & Personal Products	3.0	4.7
Energy	Energy	-3.5	3.5
Financials	Banks	-5.3	9.0
Financials	Financial Services	-4.4	15.0
Financials	Insurance	1.7	10.0
Health Care	Health Care Equipment & Services	4.1	4.4
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	3.8	13.8
Industrials	Capital Goods	-18.8	24.2
Industrials	Commercial and Professional Services	0.9	10.0
Industrials	Transportation	-7.6	7.6
Information Technology	Semiconductors & Semiconductor Equipment	-1.5	1.5
Information Technology	Software & Services	-1.6	1.6
Information Technology	Technology Hardware & Equipment	2.1	2.9
Materials	Materials	-6.8	12.2
Real Estate	Equity Real Estate Investment Trusts (REITs)	2.2	4.5
Real Estate	Real Estate Management & Development	-0.2	0.2
Utilities	Utilities	-1.6	1.6

The list above represents the average of the Fund's gross and net exposure as a % of NAV at each quarter-end during the reference period.

Exposures have been provided on a look through basis for index futures, index options, TRS positions and CFD baskets where possible and netted at the issuer level. There may be instances where a proxy has been used.

The % of NAV aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of NAV aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of NAV aligned to economic sectors due to the differing calculation methodologies of these alternative data sources.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The Fund invested 13% of its gross exposure in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. This percentage is provided for consistency with the basis of the calculations in the asset allocation section above. The Fund invested 28% of its long exposure in sustainable investments with an environmental objective that are not aligned with the Taxonomy. These percentages are a proportion of the total percentage of sustainable investments, which is calculated as the average of the last four months of the reference period, based on month-end data.

What was the share of socially sustainable investments?

The Fund invested 23% of its gross exposure in sustainable investments with a social objective. This percentage is provided for consistency with the basis of the calculations in the asset allocation section above. The Fund invested 48% of its long exposure in sustainable investments with a social objective. These percentages are a proportion of the total percentage of sustainable investments, which is calculated as the average of the last four months of the reference period, based on month-end data.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes investments that were not scored by Schroders’ proprietary sustainability tools and so did not contribute towards the Fund’s sustainability score. Cash and cash equivalents are excluded from the calculations of gross and long exposure due to the long / short nature of the Fund’s investment strategy.

Minimum safeguards were applied where relevant to other investments by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• **How did the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

• **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

• **How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

• **How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF European Innovators
Legal Entity Identifier : OZ21W1QBRG4B97S8ZE25

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 42%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: 53%	<input type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

Until 30 June 2023 the Fund invested at least 75% of its assets, and from 1 July 2023 at least 90% of its assets, in European companies that contributed towards the advancement of one or more of the UN SDGs using a science or engineering-driven, innovation-led approach. The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

• *How did the sustainability indicators perform?*

The Fund invested 95% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used a revenue-based approach in this assessment by considering whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure contributed to an environmental or social objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the contribution at an investee company level. In particular, the Investment Manager used a bottom-up mapping process that established the extent of each company's contribution to the UN SDGs. Examples of the indicators included revenues generated via the production or distribution of energy-efficient products or services using a science or engineering-driven approach to reduce CO2 emissions, such as natural refrigerants or eco-friendly heat pumps.

At the end of the reference period, 92% of the Fund was invested into companies with a major contribution to the SDGs, 1% of the Fund was invested into companies with a significant contribution to the SDGs and 5% was invested into companies with a minor contribution to the SDGs.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within this exclusionary criteria.

• *...and compared to previous periods?*

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
--------	----------

Jan 2023 - Dec 2023	95
Jan 2022 - Dec 2022	90

SDG Contributions

This table details the percentage of assets that contributed to the SDGs, year on year.

Period	Major contribution to the SDGs (%)	Significant contribution to the SDGs (%)	Minor contribution to the SDGs (%)
Jan 2023 - Dec 2023	92	1	5
Jan 2022 - Dec 2022	81	6	4

The percentage of assets that contributed to the SDGs is calculated as at the end of the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portfolio, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain

(suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions. Further information on all of the Fund's exclusions is to be found under on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portfolio. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders applied may have certain exceptions to the list during this period.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of

themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding

Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Schroders exclusions regarding:
 - Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
 - UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
 - Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including biodiversity challenges in the Energy sector, and climate & Net Zero commitments for held companies within the Utilities sector. These engagements related to PAIs 7 (Negatively affecting biodiversity-sensitive areas) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of

investee company and Share of non-renewable energy consumption and production.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

Engagement Theme	# Issuers
Climate Change	11
Corporate Governance	6
Human Rights	3
Natural Capital and Biodiversity	3
Diversity and Inclusion	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
RELX PLC ORDINARY 14.4397P	Industrial	7.05	United Kingdom
SCHNEIDER ELECTRIC SE EUR4	Industrial	6.23	France
ASML HOLDING NV EUR0.09 (POST SPLIT)	Information Technology	6.08	Netherlands
PRYSMIAN SPA EUR0.10	Industrial	5.20	Italy
EXPERIAN PLC ORDINARY USD0.10	Industrial	5.09	United Kingdom
SIKA AG CHF0.01	Materials	4.93	Switzerland
INFINEON TECHNOLOGIES AG NPV	Information Technology	4.89	Germany
BEIJER REF CLASS B SEK0.97	Industrial	4.86	Sweden
SIEMENS HEALTHINEERS AG NPV REGS/144A	Health Care	4.81	Germany
BORREGAARD ASA NPV	Materials	4.51	Norway
SOITEC EUR2	Information Technology	4.47	France
VAT GROUP AG CHF0.10	Industrial	4.36	Switzerland
HEXAGON CLASS B EUR0.22	Information Technology	4.20	Sweden
GERRESHEIMER AG NPV (BEARER)	Health Care	4.02	Germany
CRODA INTERNATIONAL PLC 10.60976P	Materials	3.72	United Kingdom

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment

Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in European companies that contributed towards the advancement of one or more of the UN SDGs using a science or engineering-driven, innovation-led approach.

The Fund invested 95% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. Within this, 42% was invested in sustainable investments with an environmental objective and 53% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

• ***In which economic sectors were the investments made?***

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	24.47
Industrial	Commercial & Professional Services	12.15
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	15.51
Health Care	Health Care Equipment & Services	7.74
Information Technology	Semiconductors & Semiconductor Equipment	15.44
Information Technology	Technology Hardware & Equipment	4.61
Materials	Materials	15.14
Cash	Cash	4.91
Cash	Margin Cash	0.03

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

• **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 42%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 53%.

• **What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to attain the sustainable investment objective of the Fund were the following:

- Until 30 June 2023 the Fund invested at least 75% of its assets, and from 1 July 2023 at least 90% of its assets, in European companies that contributed towards the advancement of one or more of the UN SDGs using a science or engineering driven, innovation-led approach.
- The Fund invested in companies that did not cause significant environmental or social harm.
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies.
- The Investment Manager completed a number of engagements with portfolio companies throughout the reference period to discuss a broad range of sustainability-related topics including conversations, for example, in June 2023, with a speciality chemicals company to understand the company's progress towards: achieving targets related to biodiversity; emissions reduction plans. The company was encouraged to disclose further detail around target setting and methodology.
- The investment manager completed a significant engagement in December 2023, with an electrical equipment company, debating the methodology of calculating avoided emissions, which products are key to the avoided emissions number, and how much they could disclose further. There was also discussion about what constitutes 'green revenues'. The company agreed to share further detail/disclosure on which products specifically are the main contributors to avoided emissions, which

they then did via email several days later.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This question is not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable.
