Notes to the Financial Statements as at 31 December 2023

The Company

The Company was incorporated in Luxembourg on 5 December 1968 as a 'société anonyme'. Pursuant to an Extraordinary General Meeting of Shareholders held on 31 January 1989, the form and name of the Company, as well as its establishment period, was changed to a 'société d'investissement à capital variable' ('SICAV') established for an unlimited period under the name of Schroder International Selection Fund. The Company qualifies as an undertaking for collective investment (UCI) regulated by the provisions of Part I of the Luxembourg Law of 17 December 2010, as amended, regarding undertaking for collective investment (the '2010 law').

Classes of Shares

At the date of this report, thirty one classes of shares are available within the Sub-Funds: A, A1, A CO, AX, B, C, C CO, CN, CX, D, E, F, I, IA, IB, IC, IE, IZ, J, K1, R, S, U, X, X1, X2, X3, X9, Y, Y9 and Z shares.

All Sub-Funds offer A, B and C shares, apart from the following Sub-Funds:

Schroder ISF Emerging Markets Equity Alpha (offers only A, C, E, I, IZ & X);
Schroder ISF Global Gold (offers only A, A1, C, I, IZ, S & U);
Schroder ISF Indian Opportunities (offers only A, A1, C, E, F, I & IZ);
Schroder ISF Japanese Opportunities (offers only A, A1, C & I);
Schroder ISF Nordic Micro Cap (offers only A, C, I & IZ);
Schroder ISF Nordic Smaller Companies (offers only A, C, I & IZ);

Schroder ISF Sustainable US Dollar Corporate Bond*(offers only A, C, E, I, IZ)
Schroder ISF Sustainable US Dollar High Yield*(offers only A, C, E, I, IZ)

Shares are generally issued as Accumulation shares. Distribution shares may be issued within any Sub-Fund at the Directors' discretion. A list of available Distribution shares may be obtained upon request at the Management Company.

In accordance with the provisions of the current prospectus, the Directors may also offer classes in multiple currency denominations. The respective Investment Managers have the ability to hedge the shares of such classes in relation to the Sub-Fund currency or in relation to currencies in which the relevant Sub-Fund's underlying assets are denominated. Where hedging of this kind is undertaken, the respective Investment Managers may engage, for the exclusive account of such share class, in currency forwards, currency futures, currency option transactions and swaps in order to preserve the value of the reference currency against the Sub-Fund currency. Where undertaken, the effects of this hedging will be reflected in the Net Asset Value and, therefore, in the performance of such additional share class. Similarly, any expenses arising from such hedging transactions will be borne by the class in relation to which they have been incurred. The classes of share available for each Sub-Fund are set out in detail in the current prospectus. The Directors may decide from time to time for some or all of the Bond Funds to issue duration hedged share classes. Duration hedged share classes utilise hedging strategies that seek to reduce the share class' sensitivity to changes in interest rate movements. There is no assurance that these hedging strategies will be successful. Where undertaken, the effects of this hedging will be reflected in the Net Asset Value and, therefore, in the performance of the share class. Similarly, any expenses arising from such hedging transactions will be borne by the duration hedged share class. The performance of the duration hedged share classes may underperform other share classes in the Bond Funds depending on interest rate movements. Duration hedged share classes can be issued in relation to any type of available share classes of Bond Funds.

The naming convention used for the share classes is as follows:

A Acc for base currency share class;

A Acc 'CCY' for a multicurrency share class;

A Acc 'CCY' Hedged for a hedged share class.

* Please refer to the Directors' Report for details of all corporate actions that occurred during the year under review.

† These minima may be waived from time to time at the discretion of the Directors.

Further details on specific features of the different classes of shares and the conditions under which initial and distribution fees are calculated can be found in the current prospectus.

Accounting Policies

Summary of Significant Accounting Policies

The financial statements are prepared and presented in accordance with generally accepted accounting principles in Luxembourg for investment funds on a going concern basis. Sub-Funds that have been liquidated or are intended to be liquidated after the year end are prepared on a non-going concern basis. The application of the non-going concern basis of accounting has not lead to material adjustments to the Sub-Funds published net asset values. This cash is monitored by management and will be re distributed to the investors once all outstanding costs are paid.

At the reporting date the cash amounts held at custody for the following liquidated Sub-Funds were:

Sub-Funds	Cash held at custody as at reporting date
Schroder ISF European Large Cap	59 EUR
Schroder ISF Digital Infrastructure	71,367 USD
Schroder ISF European Sustainable Value	83,252 EUR
Schroder ISF Global Multi-Factor Equity	28,371 USD
Schroder ISF QEP Global Value Plus	100,076 USD
Schroder ISF Global Credit Duration Hedged	498 EUR

Net Asset Value

Calculation of Net Asset Value per share

The Net Asset Value ('NAV') per Share of each Class is calculated on each Dealing Day in the currency of the relevant class. It is calculated by dividing the NAV attributable to each Class, being the proportionate value of its assets less its liabilities, by the number of Shares of such Class then in issue. The resulting sum is rounded to the nearest up to four decimal places. Further details on rules that apply in valuing total assets can be found in the current prospectus.

The financial statement are prepared on the basis of the last NAV calculated during the year (29 December 2023 for all Sub-Funds).

Valuation of the Assets of the Company

The values of securities, derivative instruments and assets are determined on the last day on which prices were calculated. The basis for this value uses the available price at the valuation point for each fund on the stock exchange or any other regulated market on which those securities or assets are traded or admitted for trading. Where such securities or other assets are quoted or dealt in on more than one stock exchange or any other regulated market, the Directors shall make regulations for the order of priority in which stock exchanges or other regulated markets shall be used for the provision of prices of securities or other assets.

If a security is not traded on or admitted to any official stock exchange or any other regulated market or, in the case of securities so traded or admitted, the last available price does not reflect their true value, the Directors are required to proceed on the basis of their expected sales price, which shall be valued with prudence and in good faith.

The value of any cash in hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received shall be deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof shall be arrived at after making such discount as the Company may consider appropriate in such case to reflect the true value thereof.

Financial derivative instruments, which are not listed on any official stock exchange or any other regulated market, are valued in accordance with market practice. The swaps are valued at their fair value based on the underlying securities (at close of business or intraday) as well as on the characteristics of the underlying commitments.

The Schroder ISF EURO Liquidity* and Schroder ISF US Dollar Liquidity* Sub Fund are a standard Money Market Sub Fund which falls under Money Market Fund Regulation or MMFR the regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on Money Market Funds, as it may be amended or supplemented from time to time. The assets of Sub Funds qualifying as Money Market Funds shall be valued on at least a daily basis. The Net Asset Value per Share shall be calculated as the difference between the sum of all assets of the Fund and the sum of all liabilities of the Fund valued in accordance with Mark-to-Market or Mark-to-Model, or both, divided by the number of outstanding Shares of the Fund. Units or shares of any other standard or short-term Money Market Fund ("targeted MMF") provided that all of the following conditions are fulfilled: (1) no more than 10 % of the assets of the targeted MMF are able, according to its fund rules or instruments of incorporation, to be invested in aggregate in units or shares of targeted MMFs.

Units or shares in open-ended undertakings for collective investment are valued on the basis of the latest available reported Net Asset Value.

* This is not a money market fund in Hong Kong

Notes to the Financial Statements as at 31 December 2023 (continued)

Net Asset Value (continued)

If any of the aforesaid valuation principles do not reflect the valuation method commonly used in specific markets or if any such valuation principles do not seem accurate for the purpose of determining the value of the Company's assets, the Directors may fix different valuation principles in good faith and in accordance with generally accepted valuation principles and procedures. Any assets or liabilities in currencies other than the base currency of the Sub-Funds are converted using the relevant spot rate quoted by a bank or other responsible financial institution.

The Directors are authorised, to the extent allowed by applicable law, to apply other appropriate valuation principles for the assets of the Sub-Funds and/or the assets of a given Share Class if the aforesaid valuation methods appear impossible or inappropriate due to extraordinary circumstances or events.

As of 31 December 2023, fair valuation was applied to the following securities:

Fair Value Pricing

In accordance with the provisions of the current prospectus, pricing may be implemented to protect the interests of the Company's Shareholders against market timing practices. Accordingly, if a Sub-Fund is primarily invested in markets that are closed for business at the time the Sub-Fund is valued, the Directors may, during periods of market volatility and by derogation from the provisions above under 'Calculation of Net Asset Value per share', cause the Sub-Fund Administrator to allow for the Net Asset Value per share to be adjusted to reflect more accurately the fair value of the Sub-Fund's investments at the point of valuation. The level of adjustment is based upon a systematic process involving a multi-factor regression approach that incorporates global, regional and security specific factors up until the point of valuation.

The Directors, however, reserve the right to extend the implementation of fair value pricing in respect of other Sub-Funds wherever they deem it appropriate.

On 29 December 2023, the last working day of the year under review, the following Sub-Funds were adjusted.

Sub-Fund	Currency	Total Adjustment
Schroder ISF Asian Opportunities	USD	6,032,486

Notes to the Financial Statements as at 31 December 2023 (continued)

Swing Pricing Adjustment

A Sub-Fund may suffer dilution of the Net Asset Value per Share due to investors buying or selling Shares in a Sub-Fund at a price that does not reflect the dealing and other costs that arise when security trades are undertaken by the Investment Manager to accommodate cash inflows or outflows. In order to counter this impact, a Swing Pricing mechanism may be adopted to protect the interests of Shareholders of the Sub-Fund. If on any Valuation Date, the aggregate net transactions in Shares of a Sub-Fund exceed a pre-determined threshold, as determined and reviewed for each Sub-Fund on a periodic basis by the Directors, the Net Asset Value per Share may be adjusted upwards or downwards to reflect net inflows and net outflows respectively.

The net inflows and net outflows is determined by the Management Company based on the latest available information at the time of calculation of the Net Asset Value per Share. The Swing Pricing mechanism may be applied across all Sub-Funds. The extent of the price adjustment will be set by the Management Company to reflect dealing and other costs. Such adjustment may vary from Sub-Fund to Sub-Fund and in normal market conditions is not expected to exceed 2% of the unadjusted Net Asset Value per Share of the relevant Fund on any Dealing Day. However, under unusual or exceptional market conditions (such as significant market volatility, market disruption or significant economic contraction, a terrorist attack or war (or other hostilities), a pandemic or other health crisis, or a natural disaster), the Management Company may decide, on a temporary basis, to adjust the Net Asset Value of a Fund by more than 2% when such a decision is justified as being in the best interests of the shareholders. Any such decision to adjust the Net Asset Value by more than 2% will be published on the following website: www.schroders.lu

The swing pricing mechanism has been applied to the Company's Sub-Funds since 12 January 2009.

On 29 December 2023, the last working day of the period under review, swing pricing adjustment was applied to Schroder ISF China A All Cap. The official Net Asset Values per share of these Sub-Funds following the application of the swing pricing adjustment are shown in the following table. All other financial information stated in this report is shown before any adjustments for swing pricing.

Sub-Fund	Share class currency	Unswung NAV per share	Swung NAV per share

Class K1 Acc	USD	101.3227	101.1098

Cash Collateral Reinvestment

For the purpose of counterparty risk mitigation, Sub-Funds with currency hedging transactions related to hedged share classes will pay or receive cash collateral on a daily basis from the counterparty, thus reducing their exposure over the duration of the forward contract. Investment Managers may reinvest the cash collateral they receive from their counterparty in connection with currency hedging, in line with the investment objectives of the Sub Fund.

Realised Gains and Losses on Sales of Investments in Securities

Realised gains and losses on sales of investments in securities are determined on the average cost basis and include transaction costs.

Forward Currency Exchange Contracts

Outstanding forward currency exchange contracts are valued at the last available price at NAV calculation day by reference to the forward rate of exchange applicable to the maturity of the contracts. The unrealised gain/(loss) is shown in the Combined Statement of Net Assets under 'Unrealised gain/(loss) on forward currency exchange contracts'.

Futures Contracts

Futures contracts were valued at the last available price on 29 December 2023. The unrealised gain/(loss) is shown in the Combined Statement of Net Assets under 'Unrealised gain/(loss) on financial futures contracts'.

Options Contracts

Options contracts were valued at the last available price on 29 December 2023 and the net market value is shown in the Combined Statement of Net Assets under 'Options purchased and swaptions contracts at market value' for assets and under 'Options written and swaptions contracts at market value' for liabilities.

Inflation Rate Swap Contracts

The Company invests in inflation swaps as part of the investment strategy. Inflation swaps were valued at the last available price on 29 December 2023 at their intrinsic value. The valuation method involves the determination of the net present value of future cash flows at the closing date. The result of these revaluations together with any interest receivable/payable in relation to inflation swaps on 29 December 2023 is shown in the Combined Statement of Net Assets under 'Swap contracts at fair value'.

Notes to the Financial Statements as at 31 December 2023 (continued)

Interest Rate Swap Contracts

In order to hedge against interest rate fluctuations, the Company may enter into interest rate swaps. Such contracts must be denominated in the currencies in which the assets of such Sub-Fund are denominated, or in currencies which are likely to fluctuate in a similar manner and must be either listed on an exchange or dealt in on a Regulated Market. Interest rate swaps were valued at the last available price on 29 December 2023 at their intrinsic value. The valuation method involves a current value of each interest rate and capital series converted into the currency of the Sub-Fund on the closing date. The result of these revaluations together with any interest receivable/payable in relation to interest rate swaps on 29 December 2023 is shown in the Combined Statement of Net Assets under 'Swap contracts at fair value'.

Credit Default Swap Contracts

A credit default swap contract is a credit derivative transaction in which two parties enter into an agreement, whereby one party pays the other a fixed periodic coupon for the specified life of the agreement. The other party makes no payments unless a credit event, relating to a predetermined reference asset, occurs. If such an event occurs, the party will then make a payment to the first party, and the swap will terminate. The value of the underlying securities shall be taken into account for the calculation of the investment and borrowing powers applicable to individual issuers. The market values are recorded under "Swap contracts at fair value" in the Combined Statement of Net Assets. The changes in unrealised gains or losses are included in the Combined Statement of Operations and Changes in Net Assets under "Net change in unrealised appreciation/(depreciation) on Swaps contracts". When a contract is closed, the realised gains or losses are recorded under "Net change in realised appreciation/ (depreciation) on swap contracts" in the Combined Statement of Operations and Changes in Net Assets.

Total Return Swap

The Company may use total return swaps. A total return swap is a bilateral financial contract which allows the Company to enjoy all of the cash flow benefits of an asset without actually owning this asset (the 'Reference Asset'). The Company will have to pay a periodic fee (fixed or floating payment) in exchange of its right to receive the total return of the Reference Asset (coupons, dividends and capital gains or losses). The Reference Asset can be almost any asset, index or basket of asset which constitutes an eligible investment for the Company. The Company may use such instruments to seek exposure to an eligible market or for hedging purposes.

The Company will only enter into a total return swap transaction with financial institutions specialised in this type of transaction. In addition, the use of total return swaps must comply with the investment objectives and policies and risk profile of the relevant Sub-Fund. The total commitments arising from the use of total return swaps together with the total commitments arising from the use of other derivative instruments may not, at any time, exceed the net assets of the relevant Sub-Fund.

The total return swaps were valued at the last available price on Returns 29 December 2023. The unrealised gain or loss on total return swaps at the year end is represented by the values of interests to be received (or paid), based on relevant swap agreements' interest rates less (or plus, respectively), the value of the performance to be paid (or received, respectively), based on the total return value of underlying assets, which is made of the current fair value of the bonds plus the coupon for such debt instruments for the relevant swap period. The unrealised gain/(loss) is shown in the Combined Statement of Net Assets under 'Swap contracts at fair value'.

Fees and Expenses

Expense Subsidy

The administration fees, custodian fees, distribution fees, management fees and statutory fees are calculated and accrued daily by reference to the Net Asset Value of the Sub-Funds and are paid monthly.

The following table shows the share classes whose TER was below the designated CAP as at reporting date.

Operating Expenses

The Sub-Funds pay other Operating expenses incurred in the operation of the Company which are composed of statutory fees and are mainly audit, legal and publication fees, please refer to the 'Operating Expenses' shown in the Combined Statement of Operations and Change in Net Assets.

Directors' Fees

For the year from 1 January 2023 to 31 December 2023 Richard Mountford received in remuneration the amount of EUR 58,000 per annum, Hugh Mullan received in remuneration the amount of EUR 50,000 per annum. Bernard Herman ,Eric Bertrand and Marie-Jeanne Chevremont each received the amount of EUR 54,167 in remuneration per annum.

The remaining directors have waived their remuneration.

Notes to the Financial Statements as at 31 December 2023 (continued)

Management Fees

The Investment Managers are entitled to receive management fees for their services, which are calculated and accrued daily by reference to the Net Asset Value of the Sub-Funds and are paid monthly. No management fees are payable out of the net assets for I and J share classes, however the Investors are charged directly by Schroders. The actual rates payable as at 31 December 2023, which vary from Sub-Fund to Sub-Fund and from share class to share class are set out in the table on pages 927-953 Please refer to the Directors report for changes to the management fees that occurred during the year under review.

Performance Fees

In accordance with the provisions of the current prospectus, performance fees terms were applied to 4 Sub-Funds. Accordingly, the Investment Managers of the relevant Sub-Funds are entitled to receive from the Sub-Funds a performance fee, in addition to management fee, provided that the increase in the Net Asset Value per share of the Sub Funds over the calendar year outperforms their relevant benchmarks over the same period, in accordance with the high water mark principle, i.e. by reference to the Net Asset Value per Share at the end of any previous performance period (the High Water Mark). The performance period shall normally be each financial year except that where the Net Asset Value per Share as at the end of the financial year is lower than the High Water Mark, the performance period will commence on the date of the High Water Mark.

If a performance fee is introduced on a Sub-Fund during a financial year, then its first performance period will commence on the date on which such fee is introduced. The performance fee is 15% of the outperformance (except for Schroder ISF European Alpha Absolute Return which is set at 20%) and is payable annually in January. Further details of the calculation of the performance fees can be found in the current prospectus.

The Sub-Funds in relation to which performance fees were calculated during the period under review as well as details of the relevant Investment Managers and benchmarks are set out in the following table.

Sub-Fund	Investment Manager	Benchmark
Schroder ISF European Special Situations	Schroder Investment Management Limited	MSCI Europe Net TR
Schroder ISF European Value	Schroder Investment Management Limited	MSCI Europe Net TR
Schroder ISF European Alpha Absolute Return	Schroder Investment Management Limited	3 Month EUR London Interbank Offer Rate Act 360
Schroder ISF Sustainable European Market Neutral*	Schroder Investment Management Limited	3 Month EUR London Interbank Offer Rate Act 360

The actual amounts payable for the year ended 31 December 2023, which vary from Sub-Fund to Sub-Fund and from share class to share class are set out in the table on page 954

Taxation

The Company is not subject to any taxes in Luxembourg on income or capital gains. The only tax to which the Company in Luxembourg is subject is the 'taxe d'abonnement' to a rate of 0.05% per annum based on the net asset value of each Sub-Fund at the end of the relevant quarter, calculated and paid quarterly. In respect of any Share Class or Sub-Fund which comprises only institutional Investors (within the meaning of article 174 of the Law of 17 December 2010), the tax levied will be at the rate of 0.01% per annum.

Interest and dividend income received by the Company may be subject to non-recoverable withholding tax in the source countries. The Company may further be subject to tax on the realised or unrealised capital appreciation of its assets in the countries of origin, and provisions in this respect may be recognised in certain jurisdictions.

Capital gains realized on the disposal of Indian listed stocks within 12 months after purchase (short term gains) are subject to a 15% Indian capital gains tax. The disposal of Indian listed stocks after 12 months after purchase (long-term gains) were exempt until 1 April 2018. Starting on 1 April 2018 India also introduced a capital gains tax on long-term gains at a rate of 10%. The capital gains taxes are taken into account on an arisen basis at the applicable rates for a short term gain or a long term gain without taking a provision into account. Since 4 April 2018, the capital gains taxes are accrued in the net asset value and included in the statement of net assets under the heading 'Other liabilities' and included in the statement of operations and changes in net assets under 'Net realized gain/(loss) on: currency exchange' for the capital gain taxes linked to realized gains and under 'Net Change in unrealized appreciation/depreciation on: currency exchange' for the unrealized appreciation of investments during the year.

Changes in the Sub-Funds

A list specifying the total purchases and sales for each Sub-Funds, which took place during the year under review, may be obtained free of charge upon request at the Company's registered office.

Transactions made for a Purpose other than Hedging

In accordance with the provisions of the current prospectus, the Company may, for a purpose other than hedging, purchase and sell futures contracts, forward foreign exchange contracts, financial derivative instruments that are traded OTC including, without limitation, total return swaps, contracts for difference or other financial derivative instruments with similar characteristics and equity swaps provided that the Company will only enter into equity swap transactions with highly rated financial institutions specialised in this type of transactions.

Securities Lending

There has been no securities lending activity on the Company's Sub-Funds since December 2012.

Disclosure of Transaction Costs

The transaction costs are broker commission fees and taxes related to the purchase and sale of transferable securities. Custodian transaction costs are not included in this table, please refer to the Depository Fees' shown in the Combined Statement of Operations and Change in Net Assets which includes custody transaction costs that represent fixed rate charges per market levied by the custodian for the servicing of portfolio transactions. Bond Sub-Funds will generally show the figure of zero as the broker commission fees are included in the spread, which is excluded from the calculation pursuant to Annex I, Schedule B, Chapter V of Directive 2009/65/EC of the European Parliament. Transaction costs for baskets of CFD are included in the market value. The transactions costs for the year under review are as follows:

Sub-Funds	Sub-Funds Currency	Total Transaction Costs
Schroder ISF Asian Opportunities	USD	2,281,593

* Please refer to the Directors' Report for details of all corporate actions that occurred during the year under review.

Soft Commission Arrangements

Pursuant to the requirements of the Hong Kong Securities and Futures Commission regulations, the following statement is made:

Soft commission arrangements have been undertaken in respect of the Company. Services which are paid for through or by soft commission were in majority limited to the following areas:

- Research, analysis or price information including computer or other information facilities;
- Portfolio valuations; or
- Performance measurement.

Transactions with Connected Persons

The Company has entered into agreements and arrangements with Schroder Investment Management Limited and its affiliates, under which a management fee, performance fee and distribution fee are payable. These agreements and arrangements have been entered into in the ordinary course of business and on normal commercial terms. Details on management fees, distribution fees and performance fees are set out in the respective sections above. In addition, the Management Company is entitled to receive the customary charges for its services as administration agent, coordinator, domiciliary agent and global distributor. These fees are accrued daily at an annual rate of up to 0.25% by reference to the Net Asset Value of the relevant portfolio and are paid monthly in arrears. Further details on fees payable by the Company can be found in the current prospectus. No transactions of the Company were effected through a broker who is a connected person of the Management Company, the Investment Adviser or the Directors of the Company.

The following table shows transactions in relation to seed capital from the Management Company, and have been entered into in the ordinary course of business and on normal commercial terms:

Appendix I – Global Exposure and Leverage (Unaudited)

Method used to calculate global exposure

The following sections indicate whether the UCITS global exposure is managed under a commitment approach, a relative Value at Risk relative VaR) approach or an absolute Value at Risk (absolute VaR) approach.

For Sub-Funds managed under a VaR approach, additional information is provided on the VaR model, the VaR benchmark, the regulatory VaR limit usage and the level of leverage reached.

1. Commitment approach

The approach used for the Sub-Funds with low derivative usage or Sub-Funds which limit their derivatives commitment to 100% or less of their Net Asset Value.

Schroder ISF EURO Corporate Bond	ICE BofA Euro Corporate Index
Schroder ISF EURO Credit Conviction	iBoxx Euro Corporate Bond BBB Index
Schroder ISF Global Corporate Bond	Barclays Global Aggregate Credit Component USD Hedged Index
Schroder ISF Global High Yield	Bloomberg Global High Yield ex CMBS ex EMG 2% Cap Index USD Hedged

The level of leverage is an indication of the derivative usage and of any leverage generated by the reinvestment of cash received as collateral when using efficient portfolio management techniques. It does not take into account other physical assets directly held in the portfolio of the relevant Sub-Funds. The figure is not representative of the maximum amount that a Sub-Fund could lose, as it includes the derivatives used to protect the Net Asset Value of a Sub-Fund as well as the derivatives backed by risk free assets and derivatives which do not generate any incremental exposure, leverage or market risk from an economic perspective. The reported leverage figure is therefore not a true representation of the economic leverage¹ in the Sub-Fund. The level of leverage disclosed is based on the total notional value² of all financial derivative instruments held by a Sub-Fund and is expressed as a percentage of Sub-Fund's Net Asset Value. For the purpose of this calculation the holdings and offset derivative positions ('long' and 'short' positions) do not cancel each other out and the figure is a sum of the total holdings (except for forwards used for currency hedging purposes).

* Please refer to the Directors' Report for details of all corporate actions that occurred during the year under review.

1 Where economic leverage is the sum of derivatives commitments (calculated in line with ESMA 10/788) and excludes derivatives used within hedging arrangements, derivatives whose commitment is covered by risk free assets and derivatives which are not considered to generate any incremental exposure and leverage or market risk.

2 Delta adjusted in line with ESMA 10/788 when appropriate

Appendix II – Securities Financing Transactions (Unaudited)

The Sub-Funds engages in Securities Financing Transactions (as defined in Article 3 of Regulation (EU) 2015/2365, securities financing transactions (SFTs) include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions) and/or Total Return Swaps. In accordance with Article 13 of the Regulation, the Sub-Funds involvement in and exposures related to SFTs and Total Return Swaps for the reporting date are detailed below.

Global Data

Amount of assets engaged in each type of SFTs and Total Return Swaps

The following table represents the fair value of assets engaged in each type of SFTs (including Total Return Swaps) in the Sub-Fund currency.

	Amount of assets	% of AUM
Schroder ISF Commodity	USD	
Total Return Swaps	3,877,576	7.30%
Schroder ISF Cross Asset Momentum Component	USD	
Total Return Swaps	377,749	0.08%
Schroder ISF Global Multi-Asset Balanced	EUR	
Total Return Swaps	459,337	0.08%
Schroder ISF Multi-Asset Total Return	USD	
Total Return Swaps	20,699	0.02%
Schroder ISF European Alpha Absolute Return	EUR	
Total Return Swaps	2,383,949	5.03%
Schroder ISF Asian Bond Total Return	USD	
Total Return Swaps	2,212,348	1.41%
Schroder ISF Asian Local Currency Bond	USD	
Total Return Swaps	6,018,454	1.36%

Concentration Data

Ten largest collateral issuers

As at 31 December 2023, there are no collateral securities and commodities received in respect of total return swaps.

Top ten counterparties

The following table provides details of the top ten counterparties (based on gross volume of outstanding transactions), in respect of SFTs and Total Return Swaps, as at the reporting date.

Counterparty	Outstanding Transactions
Schroder ISF Commodity	USD
Total Return Swaps	
Macquarie Bank Limited London	1,419,398
BNP Paribas SA	1,221,338
J.P. Morgan Securities plc	770,187
The Goldman Sachs Group, Inc.	466,653
Schroder ISF Cross Asset Momentum Component	USD
Total Return Swaps	
J.P. Morgan Securities plc	377,749
Schroder ISF Global Multi-Asset Balanced	EUR
Total Return Swaps

Country in which counterparties are established

The following table provides details of the country of incorporation of counterparties across all SFTs and Total Return Swaps, as at the reporting date.

Counterparty	Country of Incorporation
BNP Paribas SA	France
Citigroup Global Markets Ltd.	United States of America
J.P. Morgan Securities plc	United Kingdom
Macquarie Bank Limited London	United Kingdom
Morgan Stanley & Co. International plc London	United Kingdom
Standard Chartered Bank	United Kingdom
The Goldman Sachs Group, Inc.	United States of America

Aggregate transaction data

Settlement and Clearing

The Sub-Fund utilises bi-lateral settlement and clearing with its counterparties for total return swaps.

Data on re use of collateral

Shares of collateral received that is reused and reinvestment return

The Sub-Fund does not reuse or reinvest collaterals received, if any, on total return swaps.

Collateral received

The following table provides an analysis of the amounts held at each custodian as collateral received by the Sub-Funds in respect of SFTs and OTC derivative transactions (including Total Return Swaps), as at the reporting date.

Appendix II – Securities Financing Transactions (Unaudited) (continued)

Collateral received (continued)

Custodian	Value
Schroder ISF Commodity	USD
OTC derivative transactions	
J.P. Morgan Bank Luxembourg S.A.	90,000
Total	90,000
Schroder ISF Cross Asset Momentum Component	USD
OTC derivative transactions	
J.P. Morgan Bank Luxembourg S.A.	810,000
Total	810,000
Schroder ISF Global Multi-Asset Balanced	EUR

J.P. Morgan Bank Luxembourg S.A.	230,000
Total	230,000
Schroder ISF Asian Local Currency Bond	USD
OTC derivative transactions	
J.P. Morgan Bank Luxembourg S.A.	310,000
Total	310,000

Collateral granted

The following table provides an analysis of the amounts held at each custodian as collateral granted by the Sub-Funds in respect of SFTs and OTC derivative transactions (including Total Return Swaps), as at the reporting date.

Account type	Proportion %	Value
Schroder ISF Commodity		USD
OTC derivative transactions		
Segregated	100.00%	2,290,000
Total		2,290,000
Schroder ISF Cross Asset Momentum Component		USD
OTC derivative transactions		
Segregated	100.00%	4,410,000
Total		4,410,000

Appendix II – Securities Financing Transactions (Unaudited) (continued)

Return and cost

Total Return Swaps

Return on Total Return Swaps disclosed below are included as part of 'Interest on swaps', 'Net realised gains/(losses) on Swaps contracts' and 'Net change in unrealised appreciation/(depreciation) on Swaps contracts' in the Combined Statement of Operations and Changes in Net Assets". All returns on Total Return Swaps are attributable to these Sub-Funds and are not subject to return sharing agreements.

Sub-Fund	Total Return Swaps - returns for the Sub-Funds	
	Absolute - in Sub-Fund currency	
Schroder ISF Commodity		13,128,640
Schroder ISF Cross Asset Momentum Component		6,005,464
Schroder ISF Global Multi-Asset Balanced		5,466,882
Schroder ISF Multi-Asset Total Return		477,974
Schroder ISF European Alpha Absolute Return		2,997,149
Schroder ISF Asian Bond Total Return		191,845
Schroder ISF Asian Local Currency Bond		487,151

Cost

The costs attributed to total return swaps held during the year were included in the spread.

Appendix III – Remuneration Disclosures (Unaudited)

UCITS remuneration disclosures for Schroder Investment Management Europe S.A. ('SIM Europe') for the year to 31 December 2023

These disclosures form part of the non-audited section of this annual report and accounts and should be read in conjunction with the Schroders plc Remuneration Report on pages 74 to 93 of the 2023 Annual Report & Accounts (available on the Group's website -<https://www.schroders.com/en/investor-relations/results-and-reports/annual-report-and-accounts-2023/>), which provides more information on the activities of our Remuneration Committee and our remuneration principles and policies.

The UCITS Material Risk Takers ('UCITS MRTs') of SIM Europe are individuals whose roles within the Schroders Group can materially affect the risk of SIM Europe or any UCITS fund that it manages. These roles are identified in line with the requirements of the UCITS Directive and guidance issued by the European Securities and Markets Authority.

The Remuneration Committee of Schroders plc has established a remuneration policy to ensure the requirements of the UCITS Directive are met for all UCITS MRTs. The Remuneration Committee and the Board of Schroders plc review remuneration strategy at least annually. The directors of SIM Europe are responsible for the adoption of the remuneration policy, for reviewing its general principles at least annually, for overseeing its implementation and for ensuring compliance with relevant local legislation and regulation. During 2023 the Remuneration Policy was reviewed to ensure compliance with the UCITS/AIFMD remuneration requirements and no significant changes were made.

The implementation of the remuneration policy is, at least annually, subject to independent internal review for compliance with the policies and procedures for remuneration adopted by the Board of SIM Europe and the Remuneration Committee. The most recent review found no fundamental issues but resulted in a range of more minor recommendations, principally improvements to process and policy documentation.

Our ratio of operating compensation costs to net operating income guides the total spend on remuneration each year. This is recommended by the Remuneration Committee to the Board of Schroders plc. This approach aligns remuneration with Schroders financial performance. In determining the remuneration spend each year, the underlying strength and sustainability of the business is taken into account, along with reports on risk & compliance, legal and internal audit matters from the heads of those areas.

The remuneration data that follows reflects amounts paid in respect of performance during 2023.

- The total amount of remuneration paid by SIM Europe to its 342 staff was €57.71 million of which €40.07 million was fixed remuneration (e.g. salaries, benefits in kind) and €17.64 million was variable remuneration (e.g. annual bonus awards or deferred bonus awards). Employees of other Schroders Group entities who serve as Directors of SIM Europe receive no additional fees in respect of their role on the Board of SIM Europe.
- The following disclosures relate to UCITS MRTs of SIM Europe. Most of those UCITS MRTs were employed by other Schroders group companies, including as a result of delegation by SIM Europe of investment management or other responsibilities to other Schroders group entities or third parties. Many of those UCITS MRTs provide services to other Schroders group companies and other clients. In the interests of transparency, the aggregate remuneration figures that follow reflect the full remuneration for each SIM Europe UCITS MRT. The aggregate total remuneration paid to the 237 UCITS MRTs of SIM Europe in respect of the financial year ended 31 December 2023, and attributed to SIM Europe or the UCITS funds that it manages, is €177.70 million, of which €51.24 million was paid to senior management, €123.80 million was paid to MRTs deemed to be taking risk on behalf of SIM Europe or the UCITS funds that it manages and €2.64 million was paid to other UCITS MRTs including control function MRTs. Those total remuneration values include amounts paid by delegates where available.

For additional qualitative information on remuneration policies and practices see www.schroders.com/rem-disclosures.

Appendix V – Sustainable Finance Disclosure (Unaudited)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Asian Opportunities

Legal Entity Identifier : YV2UILN4DUFWUTDZHO58

Environmental and/or social characteristics

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** __%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** __%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 54% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

The EU Taxonomy

is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC Asia ex Japan (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -1.0% and the benchmark's sustainability score for the reference period was -2.4%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Donations
- Financial Inclusion
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI AC Asia ex Japan (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI AC Asia ex Japan (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 54% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	54
Aug 2022 - Dec 2022	57

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	-1.0	-2.4
Jan 2022 - Dec 2022	-1.4	-2.9

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local

populations. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain

(suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural

capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on

such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations)
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company's relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). PAI indicators were also reviewed as appropriate via the Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1,2,3,5 (Greenhouse gas emissions) and 13 (Board gender diversity).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	33
Human Rights	8
Corporate Governance	7
Natural Capital and Biodiversity	7
Human Capital Management	5

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	9.47	Taiwan

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the

Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

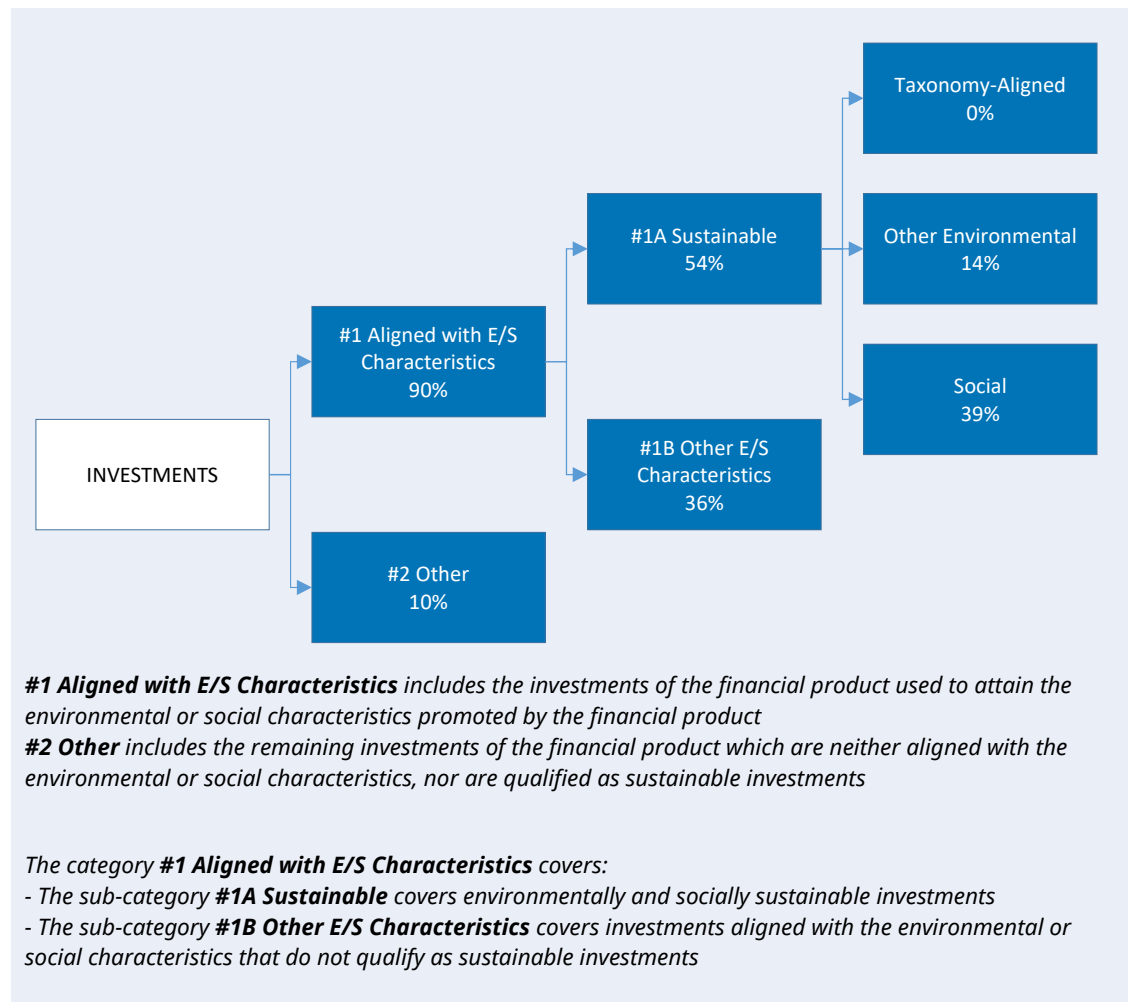

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 90%. The Fund maintained a higher overall sustainability score than the MSCI AC Asia ex Japan (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 54% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 14% was invested in sustainable investments with an environmental objective and 39% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	13.10
Information Technology	Technology Hardware & Equipment	7.92
Information Technology	Software & Services	1.71
Financial	Banking	13.68
Financial	Insurance	6.28
Financial	Financial Services	1.68
Consumer Discretionary	Consumer Services	5.99
Consumer Discretionary	Consumer Durables & Apparel	5.63
Consumer Discretionary	Consumer Discretionary Distribution & Retail	4.86
Consumer Discretionary	Automobiles & Components	0.77
Collective Investments	Unit Trusts	8.50
Industrial	Capital Goods	7.21
Communication Services	Media & Entertainment	6.09
Health Care	Health Care Equipment & Services	2.79
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	0.98
Materials	Materials	3.63
Real Estate	Real Estate Management & Development	3.54
Consumer Staples	Food, Beverage & Tobacco	2.63
Energy	Integrated Oil & Gas	1.55
Energy	Oil & Gas Refining & Marketing	0.15
Cash	Cash	1.31

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

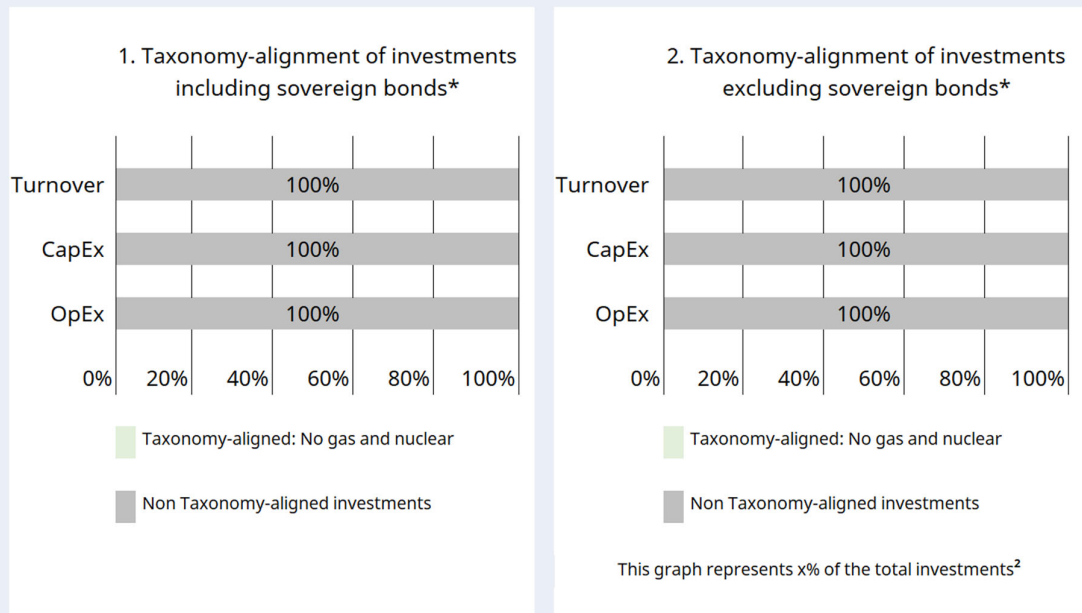

Taxonomy-aligned activities are expressed as a share of:

- **turnover**
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Appendix V – Sustainable Finance Disclosure (Unaudited)

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• *What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?*

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 14%.

• *What was the share of socially sustainable investments?*

The share of sustainable investments with a social objective was 39%.

• *What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?*

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF EURO Equity
Legal Entity Identifier : 3YYOQS43D8251JTKU860

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI European Monetary Union (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -0.8% and the benchmark's sustainability score for the reference period was -1.8%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Contraception
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI European Monetary Union (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI European Monetary Union (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 58% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	58
Aug 2022 - Dec 2022	56

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	-0.8	-1.8
Jan 2022 - Dec 2022	-1.5	-2.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of

contraceptives. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain

(suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural

capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on

such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included: Schroders exclusions regarding:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including biodiversity challenges in the Energy sector, and climate & Net Zero commitments for held companies within the Utilities sector. These engagements related to PAIs 7 (Negatively affecting biodiversity-sensitive areas) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of

investee company and Share of non-renewable energy consumption and production.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

Engagement Theme	# Issuers
Climate Change	25
Corporate Governance	18
Natural Capital and Biodiversity	7
Human Capital Management	5
Human Rights	4
Diversity and Inclusion	4

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
COMPAGNIE FINANCIERE RICHEMONT SA CHF1 (REGISTERED)	Consumer Discretionary	4.89	Switzerland
QIAGEN NV EUR0.01	Health Care	3.75	United States
AMADEUS IT GROUP SA CLASS A EUR0.01	Consumer Discretionary	3.53	Spain
BAYER AG NPV (REGISTERED)	Health Care	3.46	Germany
SAAB AB SEK16 SERIES 'B'	Industrial	3.38	Sweden
KNORR-BREMSE AG NPV	Industrial	3.14	Germany
ASM INTERNATIONAL NV EUR0.04	Information Technology	3.02	Netherlands
KONINKLIJKE PHILIPS NV EUR0.20	Health Care	2.91	Netherlands
ACCOR SA EUR3	Consumer Discretionary	2.85	France
INTESA SANPAOLO SPA EUR0.52	Financial	2.75	Italy
SKF AB SERIES 'B' NPV (POST SPLIT)	Industrial	2.61	Sweden
PERNOD-RICARD SA EUR1.55	Consumer Staples	2.57	France
AIRBUS SE EUR1 (FRENCH LISTING)	Industrial	2.52	France
CAIXABANK SA EUR1	Financial	2.43	Spain
BANK OF IRELAND GROUP PLC NPV	Financial	2.30	Ireland

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

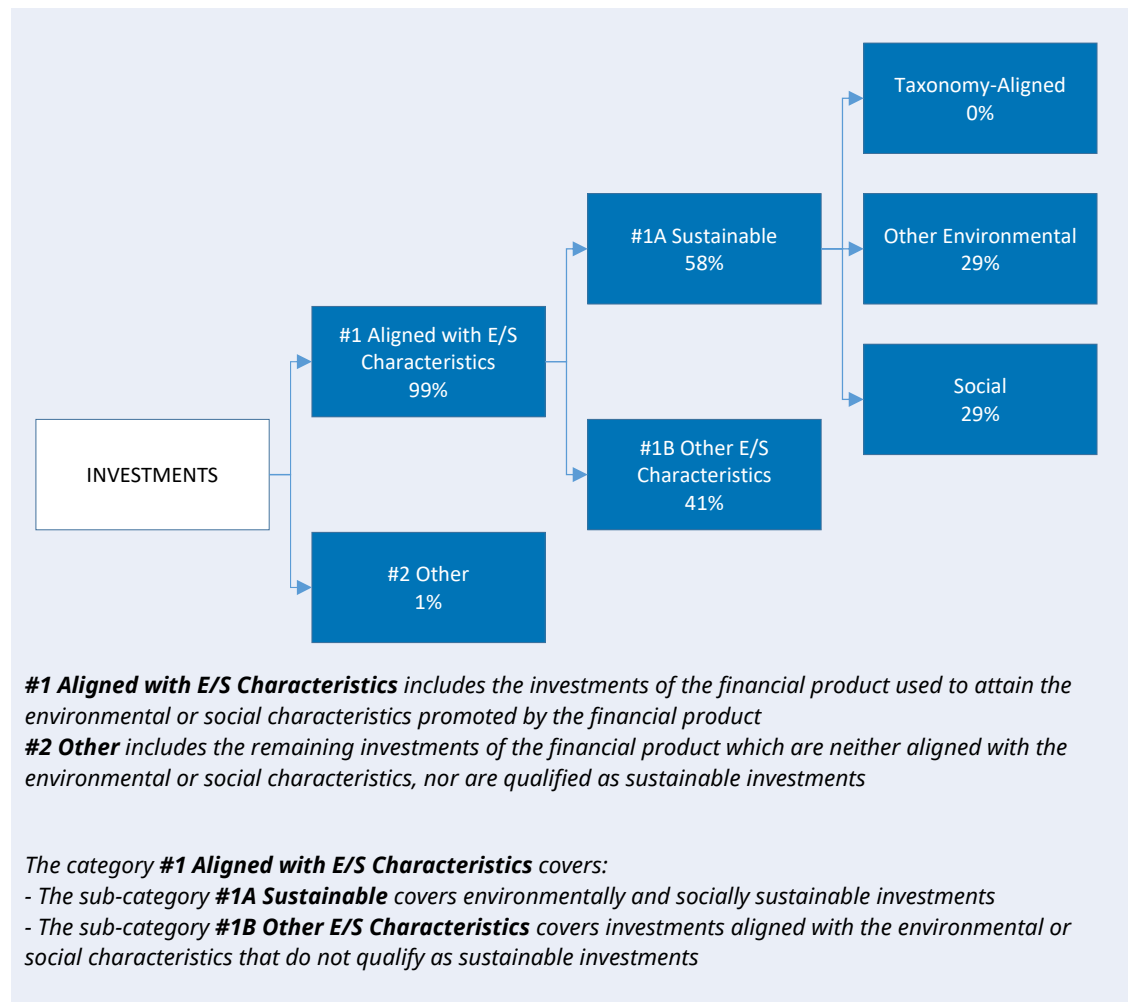

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI European Monetary Union (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 58% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 29% was invested in sustainable investments with an environmental objective and 29% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	18.44
Consumer Discretionary	Consumer Services	7.29
Consumer Discretionary	Consumer Durables & Apparel	6.80
Consumer Discretionary	Automobiles & Components	1.54
Consumer Discretionary	Consumer Discretionary Distribution & Retail	1.14
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	9.01
Health Care	Health Care Equipment & Services	5.93
Financial	Banking	9.78
Financial	Financial Services	2.22
Financial	Insurance	2.13
Information Technology	Semiconductors & Semiconductor Equipment	7.80
Information Technology	Software & Services	2.31
Consumer Staples	Food, Beverage & Tobacco	4.11
Consumer Staples	Household & Personal Products	2.02
Consumer Staples	Consumer Staples Distribution & Retail	1.40
Communication Services	Media & Entertainment	4.49
Communication Services	Telecommunication Services	1.54
Materials	Materials	5.51
Utilities	Utilities	2.41
Energy	Oil & Gas Refining & Marketing	1.39
Energy	Oil & Gas Exploration & Production	0.88
Cash	Cash	1.17
Real Estate	Real Estate Management & Development	0.68

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

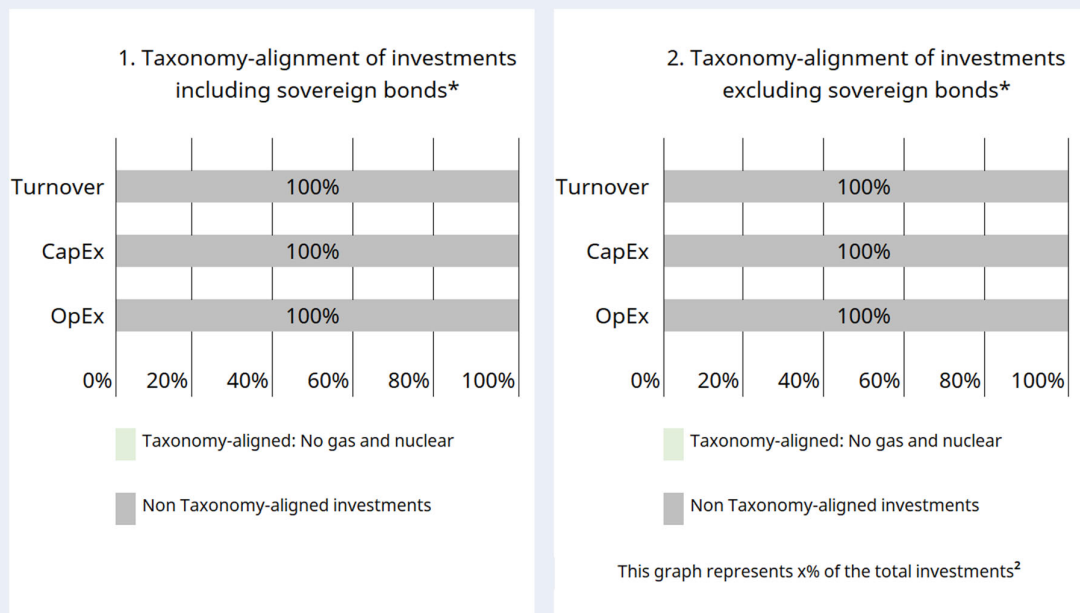

Taxonomy-aligned activities are expressed as a share of:

- **turnover**
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 29%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 29%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Equity
Legal Entity Identifier : W98SM5I2EG2S17ELT606

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 54% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI All Country (AC) World (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.6% and the benchmark's sustainability score for the reference period was -2.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI All Country (AC) World (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI All Country (AC) World (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 54% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	54
Aug 2022 - Dec 2022	47

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.6	-2.9
Jan 2022 - Dec 2022	0.6	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 2, 3, 4, 5, 6 (Greenhouse gas emissions) and PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company’s overall environmental score. These PAIs, amongst others, are embedded within our investment process, informing our view on business risk and long-term growth drivers. PAI 13 (Board gender diversity) was also considered as part of our assessment of good governance, management quality and company strategy.

During the reference period, PAI 6, PAI 4 from Annex 1 Table 2 and PAI 14 from Annex 1 Table 3 (Number of identified cases of severe human rights issues and incidents) were considered relative to industry peers and poor performance issuers on these metrics/ indicators received higher risk scores in our assessment and formed the basis of our engagement activities.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate commitments and biodiversity targets related to PAIs 6,7 and 8. For example, in

reference to PAI 7 (Activities negatively affecting biodiversity-sensitive areas) we engaged with a company in the consumer sector on its contribution to single-use plastic. Over the period, our engagements covered a range of topics and related to PAIs 6, PAI 4 from Annex 1 Table 2 and PAI 14 from Annex 1 Table 3.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	89
Corporate Governance	33
Natural Capital and Biodiversity	25
Human Rights	22
Human Capital Management	19
Diversity and Inclusion	7

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

Appendix V – Sustainable Finance Disclosure (Unaudited)

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
MICROSOFT CORPORATION COMMON STOCK USD0.0000125	Information Technology	4.60	United States
ALPHABET INCORPORATED CL A NPV	Communication Services	3.30	United States
APPLE INCORPORATED COMMON STOCK NPV	Information Technology	2.73	United States
AMAZON.COM INCORPORATED USD0.01	Consumer Discretionary	2.03	United States
JPMORGAN CHASE AND COMPANY COMMON STOCK USD1	Financial	1.68	United States
NVIDIA CORPORATION COMMON STOCK USD0.001	Information Technology	1.63	United States
ELI LILLY AND COMPANY COMMON STOCK NPV	Health Care	1.60	United States
VISA INCORPORATED CLASS A COMMON STOCK USD0.0001	Financial	1.57	United States

SCHNEIDER ELECTRIC SE EUR4	Industrial	1.39	United States
BOOKING HOLDINGS INCORPORATED COMMON STOCK USD0.008	Consumer Discretionary	1.37	United States
ASML HOLDING NV EUR0.09 (POST SPLIT)	Information Technology	1.19	Netherlands
PEPSICO INCORPORATED CAPITAL STOCK USD0.016666	Consumer Staples	1.10	United States
MERCK AND COMPANY INCORPORATED NEW COMMON STOCK USD0.01	Health Care	1.06	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

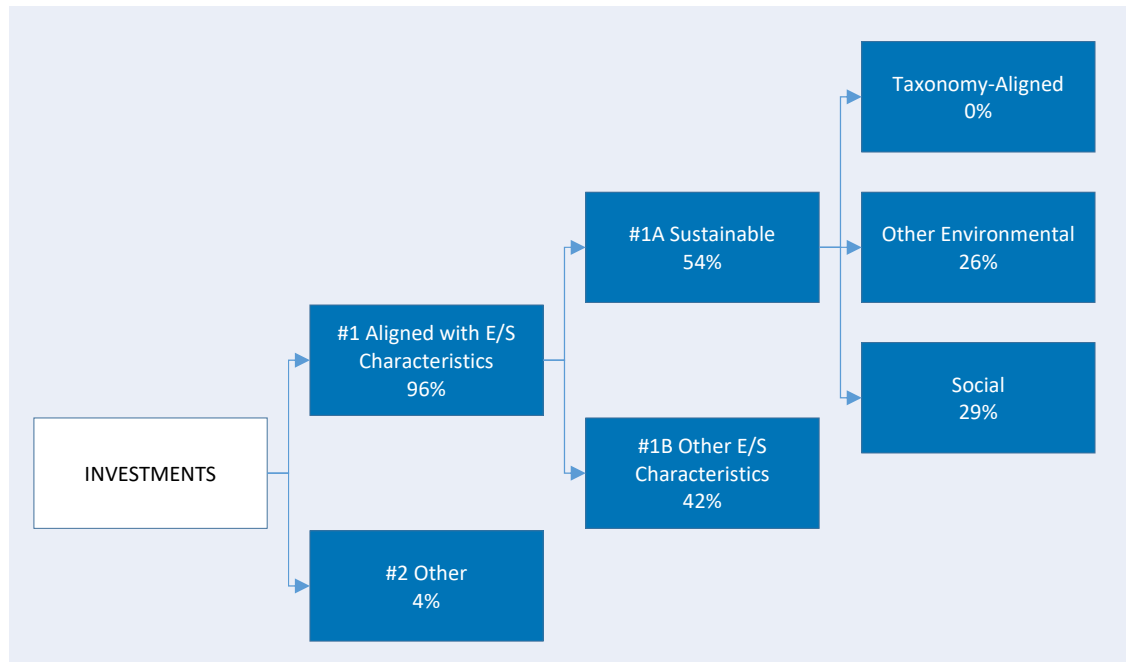

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 96%. The Fund maintained a higher overall sustainability score than the MSCI All Country (AC) World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that

they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 54% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 26% was invested in sustainable investments with an environmental objective and 29% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	9.08
Information Technology	Semiconductors & Semiconductor Equipment	7.81
Information Technology	Technology Hardware & Equipment	5.60
Financial	Banking	7.79
Financial	Financial Services	5.50
Financial	Insurance	1.10
Industrial	Capital Goods	11.10
Industrial	Commercial & Professional Services	1.33
Industrial	Transportation	0.80
Consumer Discretionary	Consumer Discretionary Distribution & Retail	6.20
Consumer Discretionary	Automobiles & Components	3.27
Consumer Discretionary	Consumer Durables & Apparel	2.52
Consumer Discretionary	Consumer Services	0.98
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	8.47
Health Care	Health Care Equipment & Services	3.19
Communication Services	Media & Entertainment	6.25
Communication Services	Consumer Discretionary Distribution & Retail	0.83
Communication Services	Telecommunication Services	0.45
Consumer Staples	Food, Beverage & Tobacco	2.51
Consumer Staples	Household & Personal Products	2.00
Consumer Staples	Consumer Staples Distribution & Retail	0.78
Energy	Integrated Oil & Gas	2.12
Energy	Oil & Gas Exploration & Production	1.90
Cash	Cash	3.40
Cash	Margin Cash	0.12
Materials	Materials	2.48
Materials	Industrial Gases	0.63
Utilities	Utilities	1.33
Real Estate	Equity Real Estate Investment Trusts (REITs)	0.46

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 26%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 29%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Italian Equity
Legal Entity Identifier : KZ4CKIFING0D2JM68769

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 60% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the FTSE Italia All-Share (TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.2% and the benchmark's sustainability score for the reference period was -1.3%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Power Provision

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the FTSE Italia All-Share (TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the FTSE Italia All-Share (TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 60% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	60
Aug 2022 - Dec 2022	63

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	0.2	-1.3
Jan 2022 - Dec 2022	1.6	-1.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of

themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding

Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included: Schroders exclusions regarding:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including biodiversity challenges in the Energy sector, and climate & Net Zero commitments for held companies within the Utilities sector. These engagements related to PAIs 7 (Negatively affecting biodiversity-sensitive areas) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

Engagement Theme	# Issuers
Climate Change	9
Corporate Governance	6
Diversity and Inclusion	1
Human Capital Management	1
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
INTESA SANPAOLO SPA EUR0.52	Financial	9.65	Italy
UNICREDIT SPA NPV	Financial	9.54	Italy
STELLANTIS NV EUR0.01	Consumer Discretionary	8.16	United States
ST MICROELECTRONICS NV EUR1.04 (ITALIAN LISTING)	Information Technology	7.57	Singapore
PIOVANI SPA	Industrial	4.14	Italy
ENEL EUR1	Utilities	4.13	Italy
TINEXTA	Industrial	3.11	Italy
MONCLER SPA NPV	Consumer Discretionary	3.09	Italy
PRYSMIAN SPA EUR0.10	Industrial	3.04	Italy
DOVALUE SPA NPV REGS / 144A	Financial	2.86	Italy
RWE AG NPV	Utilities	2.84	Germany
FINECOBANK BANCA FINECO SPA NPV	Financial	2.73	Italy
RECORDATI SPA EUR0.125	Health Care	2.72	Italy
SANLORENZO	Consumer Discretionary	2.66	Italy
IREN SPA EUR1	Utilities	2.58	Italy

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the

Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the FTSE Italia All-Share (TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 60% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 27% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	24.29
Financial	Financial Services	5.41
Industrial	Capital Goods	15.46
Industrial	Financial Services	3.11
Consumer Discretionary	Automobiles & Components	8.16
Consumer Discretionary	Consumer Durables & Apparel	7.97
Utilities	Utilities	12.25
Information Technology	Semiconductors & Semiconductor Equipment	7.57
Energy	Oil & Gas Equipment & Services	3.47
Energy	Oil & Gas Refining & Marketing	1.54
Consumer Staples	Household & Personal Products	2.17
Consumer Staples	Consumer Staples Distribution & Retail	0.88
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	2.72
Communication Services	Telecommunication Services	2.25
Materials	Industrial Gases	1.84
Cash	Cash	0.90

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover**
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 27%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 34%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

Product Name : Schroder ISF Japanese Equity
Legal Entity Identifier : CJJRRIDG3Y95POYRD382

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Tokyo Stock Exchange 1st Section Index (TOPIX) (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.0% and the benchmark's sustainability score for the reference period was -3.2%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Financial Inclusion
- High Salaries
- Medicine
- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Tokyo Stock Exchange 1st Section Index (TOPIX) (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Tokyo Stock Exchange 1st Section Index (TOPIX) (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 62% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	58

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.0	-3.2
Jan 2022 - Dec 2022	1.2	-3.1

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.
- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. PAIs were considered through our ESG integrated process in both the analysis of individual companies and portfolio construction. Individual analysts were primarily responsible for financial forecasts and ESG assessment through the use of Schroders proprietary tools. The analysts' views on ESG factors covering multiple PAIs were quantified by our analysts, alongside fundamental financial factors.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, Tokyo based Japanese equity team including fund managers and analysts engaged with investee companies on their plans around and disclosure of net zero targets which relates to PAIs 1, 2 and 3. This is our Climate Changes

focused engagement targeting higher emission companies within our investee companies, and collaborated with Sustainable Investment team. We also engaged with companies to discuss social and governance issues, and the topics discussed with management of investee companies included board gender diversity, related to PAI 13.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	21
Corporate Governance	16
Natural Capital and Biodiversity	3
Human Capital Management	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
MITSUBISHI UFJ FINANCIAL GROUP INCORPORATED NPV	Financial	5.24	Japan
SONY GROUP CORPORATION NPV	Consumer Discretionary	5.18	Japan
NIPPON TELEGRAPH AND TELEPHONE CORPORATION NPV	Communication Services	4.63	Japan
SUZUKI MOTOR CORPORATION JPY50	Consumer Discretionary	3.30	Japan
DAIKIN INDUSTRIES LIMITED NPV	Industrial	3.00	Japan
DAI-ICHI LIFE HOLDINGS INCORPORATED NPV	Financial	2.96	Japan
TOYOTA INDUSTRIES CORPORATION JPY50	Industrial	2.93	Japan
ORIX CORPORATION NPV	Financial	2.93	Japan
TOKIO MARINE HOLDINGS INCORPORATED NPV	Financial	2.75	Japan
KEYENCE CORPORATION NPV	Information Technology	2.71	Japan
KDDI CORPORATION NPV	Communication Services	2.69	Japan
CHUGAI PHARMACEUTICAL COMPANY LIMITED NPV	Health Care	2.27	Japan
ISUZU MOTORS LIMITED NPV	Consumer Discretionary	2.22	Japan
BANDAI NAMCO HOLDINGS INCORPORATED NPV	Consumer Discretionary	1.98	Japan
STANLEY ELECTRIC CO LTD JPY50	Consumer Discretionary	1.78	Japan

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the Tokyo Stock Exchange 1st Section Index (TOPIX) (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 62% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 32% was invested in sustainable investments with an environmental objective and 30% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or what actsocial characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	17.96
Industrial	Commercial & Professional Services	2.35
Industrial	Transportation	0.91
Consumer Discretionary	Automobiles & Components	9.52
Consumer Discretionary	Consumer Durables & Apparel	8.47
Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.68
Consumer Discretionary	Consumer Services	0.15
Financial	Insurance	6.22
Financial	Banking	5.48
Financial	Financial Services	4.98
Information Technology	Software & Services	6.68
Information Technology	Technology Hardware & Equipment	6.15
Information Technology	Semiconductors & Semiconductor Equipment	2.61
Communication Services	Telecommunication Services	8.97
Communication Services	Media & Entertainment	2.16
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	6.06
Health Care	Health Care Equipment & Services	2.35
Materials	Materials	3.44
Consumer Staples	Consumer Staples Distribution & Retail	1.43
Consumer Staples	Food, Beverage & Tobacco	0.33
Cash	Cash	1.00
Cash	Margin Cash	0.04
Real Estate	Real Estate Management & Development	0.05

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

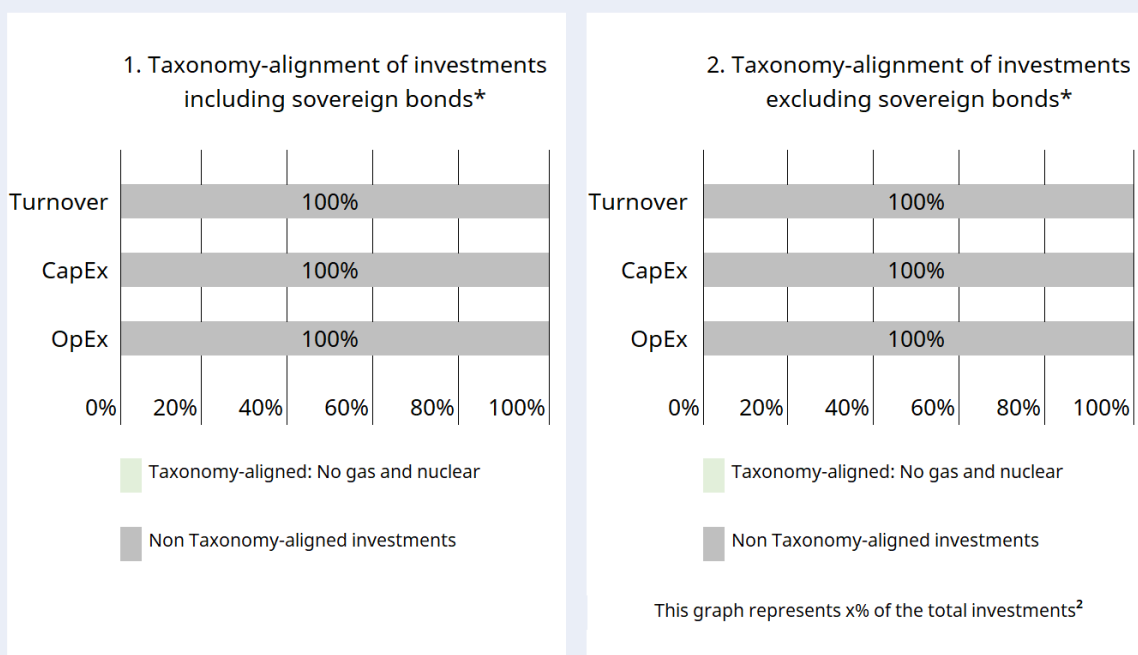

Taxonomy-aligned activities are expressed as a share of:

- turnover
reflecting the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• ***What was the share of investments made in transitional and enabling activities?***

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• ***What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?***

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 32%.

• ***What was the share of socially sustainable investments?***

The share of sustainable investments with a social objective was 30%.

• ***What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?***

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Swiss Equity
Legal Entity Identifier : K0IBGMFXVN7F42QXE203

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 65% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund's characteristic to maintain a higher overall sustainability score than the benchmark changed to maintain a positive absolute sustainability score during the reference period.

Until 20 September 2023, the Fund maintained a higher overall sustainability score than the Swiss Leaders Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six-month period until 20 September 2023 was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

From 21 September 2023, the Fund maintained a positive absolute sustainability score, based on Schroders' proprietary tool. This means that the Fund's weighted average score over a rolling four-month period up to the end of the reference period was higher than zero, based on month-end data.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

Until 20 September 2023, the Fund's sustainability score was 2.5% and the benchmark's sustainability score was 1.0%.

From 21 September 2023, the positive absolute sustainability score until the end of the reference period was 2.3%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Donations

- High Salaries
- Innovation
- Medicine
- Power Provision

Until 20 September 2023, the Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Swiss Leaders Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Swiss Leaders Index in Schroders' proprietary tool over a rolling six-month period until 20 September 2023, based on month-end data.

From 21 September 2023, the Investment Manager monitored compliance with the characteristic to maintain a positive absolute sustainability score by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool over a rolling four-month period up to the end of the reference period, based on month-end data.

The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 65% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	65
Aug 2022 - Dec 2022	68

Sustainability score

This table details the Fund's sustainability score, year on year

Period	Fund (%)
Jan 2023 - Dec 2023	2.2
Jan 2022 - Dec 2022	2.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to

the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the

engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Schroders exclusions regarding:
 - Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
 - UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including biodiversity challenges in the Energy sector, and climate & Net Zero commitments for held companies within the Utilities sector. These engagements related to PAIs 7 (Negatively affecting biodiversity-sensitive areas) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	12
Corporate Governance	7
Human Rights	3
Human Capital Management	2
Natural Capital and Biodiversity	2
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Jan 2023 to 31 Dec 2023

Largest Investments	Sector	% Assets	Country
NOVARTIS AG CHF0.50 (REGISTERED)	Health Care	9.69	Switzerland
NESTLE SA CHF0.10 (REGISTERED)	Consumer Staples	9.57	United States
ROCHE HOLDING AG NPV	Health Care	9.46	United States
COMPAGNIE FINANCIERE RICHEMONT SA CHF1 (REGISTERED)	Consumer Discretionary	5.31	Switzerland
ZURICH INSURANCE GROUP AG CHF0.10 (REGISTERED)	Financial	4.75	Switzerland
UBS GROUP AG CHF0.10 (REGISTERED)	Financial	2.64	Switzerland
GIVAUDAN SA CHF10	Materials	2.63	Switzerland
PARTNERS GROUP HOLDING AG CHF0.01 (REGISTERED)	Financial	2.58	Switzerland
SWISS LIFE HOLDING AG CHF5.10 (REGISTERED)	Financial	2.57	Switzerland
TECAN GROUP AG CHF0.10 (REGISTERED)	Health Care	2.35	Switzerland
BALOISE HOLDING AG CHF0.10 (REGISTERED)	Financial	2.14	Switzerland
LONZA AG CHF1(REGISTERED)	Health Care	2.13	Switzerland
ALCON INC CHF0.040000	Health Care	2.05	Switzerland
BKW SA NPV	Utilities	1.94	Switzerland
SCHINDLER HOLDING AG PARTICIPATING CERTIFICATES CHF0.10	Industrial	1.93	Switzerland

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

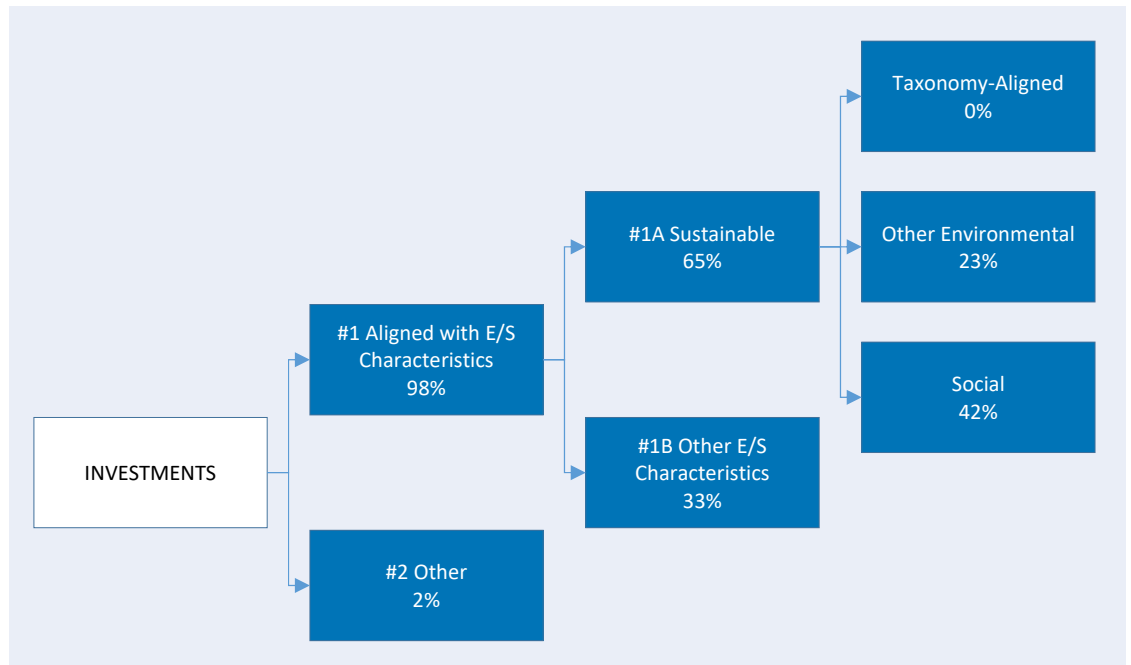

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. Until 20 September 2023, the Fund maintained a higher overall sustainability score than the Swiss Leaders Index and from 21 September 2023 the Fund maintained a positive absolute sustainability score, and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that were invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net

“impact” that an issuer may create in terms of social and environmental “costs” or “benefits”. It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 65% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 23% was invested in sustainable investments with an environmental objective and 42% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both “costs” and “benefits”.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	24.25
Health Care	Health Care Equipment & Services	5.38
Health Care	Financial Services	0.70
Financial	Insurance	10.28
Financial	Financial Services	9.04
Financial	Banking	0.84
Industrial	Capital Goods	13.58
Industrial	Transportation	1.51
Industrial	Commercial & Professional Services	0.83
Consumer Staples	Food, Beverage & Tobacco	14.35
Consumer Discretionary	Consumer Durables & Apparel	6.50
Consumer Discretionary	Automobiles & Components	0.10
Materials	Materials	5.71
Information Technology	Technology Hardware & Equipment	3.12
Information Technology	Semiconductors & Semiconductor Equipment	0.42
Utilities	Utilities	1.94
Cash	Cash	1.43

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

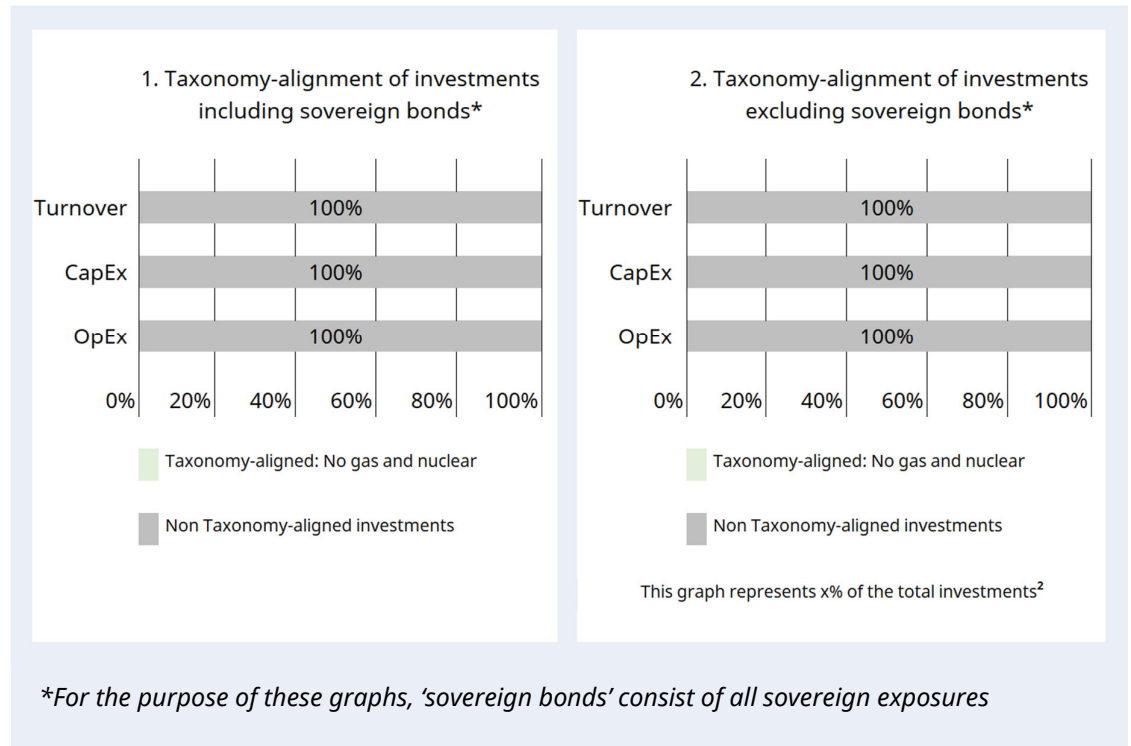

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 23%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 42%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF UK Equity

Legal Entity Identifier : O3Z02YF8JZJN90D5MT95

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 69% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the FTSE All Share Total Return Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -1.4% and the benchmark's sustainability score for the reference period was -18.2%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Donations
- High Salaries
- Medicine
- Training

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the FTSE All Share Total Return Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the FTSE All Share Total Return Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 69% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	69
Aug 2022 - Dec 2022	60

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	-1.4	-18.2
Jan 2022 - Dec 2022	-1.5	-25.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Training: the estimated societal benefit associated with a more highly skilled workforce, both to the company and society. Assigned based on company spending on employee training.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of

themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding

Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Schroders exclusions regarding:
 - Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
 - UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
 - Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including biodiversity challenges in the Energy sector, and climate & Net Zero commitments for held companies within the Utilities sector. These engagements related to PAIs 7 (Negatively affecting biodiversity-sensitive areas) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of

investee company and Share of non-renewable energy consumption and production.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

Engagement Theme	# Issuers
Corporate Governance	12
Climate Change	12
Natural Capital and Biodiversity	6
Human Capital Management	4
Diversity and Inclusion	3
Human Rights	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
UNILEVER PLC ORDINARY 3 1/9P	Consumer Staples	9.11	United Kingdom

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the FTSE All Share Total Return Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 69% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 42% was invested in sustainable investments with an environmental objective and 27% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Consumer Discretionary	Consumer Services	15.23
Consumer Discretionary	Consumer Durables & Apparel	8.62
Consumer Discretionary	Consumer Discretionary Distribution & Retail	6.05
Financial	Financial Services	8.18
Financial	Insurance	6.35
Consumer Staples	Household & Personal Products	9.11
Consumer Staples	Food, Beverage & Tobacco	3.92
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	5.68
Health Care	Health Care Equipment & Services	4.58
Industrial	Commercial & Professional Services	7.11
Industrial	Capital Goods	2.32
Communication Services	Media & Entertainment	6.59
Materials	Materials	6.02
Real Estate	Equity Real Estate Investment Trusts (REITs)	4.55
Information Technology	Software & Services	2.51
Information Technology	Technology Hardware & Equipment	1.79
Cash	Cash	1.39

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

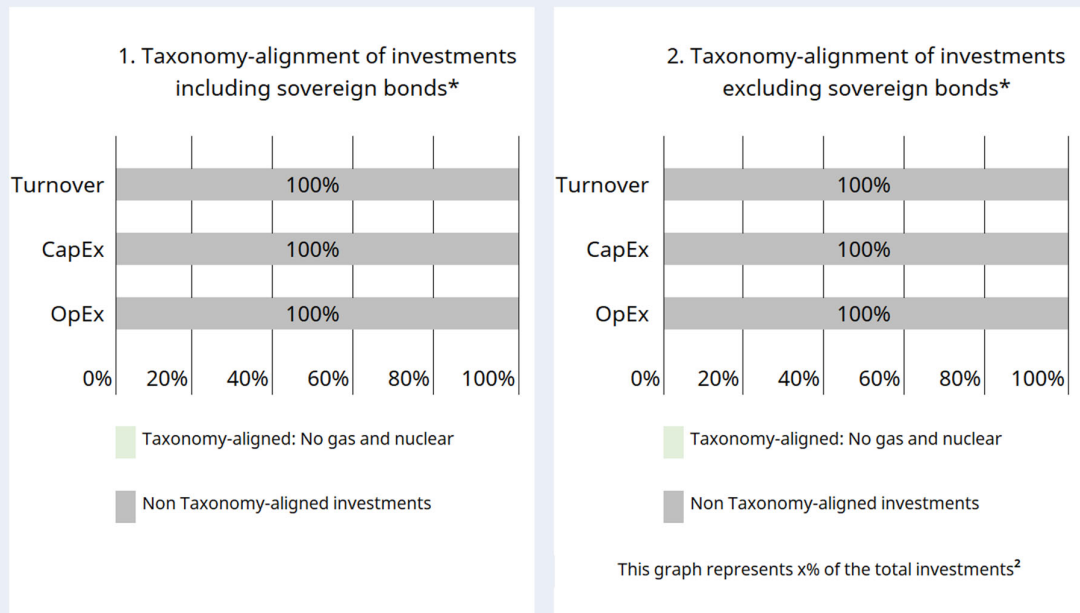

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 42%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 27%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

Appendix V – Sustainable Finance Disclosure (Unaudited)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Asian Dividend Maximiser

Legal Entity Identifier : 5493008UI8R6FCP1MG15

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 53% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC Pacific ex Japan High Dividend Yield (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.3% and the benchmark's sustainability score for the reference period was -4.8%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Donations
- Financial Inclusion
- High Salaries
- Training

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI AC Pacific ex Japan High Dividend Yield (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI AC Pacific ex Japan High Dividend Yield (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 53% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	53
Aug 2022 - Dec 2022	50

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	0.3	-4.8
Jan 2022 - Dec 2022	0.8	-6.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local

populations. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and

- Training: the estimated societal benefit associated with a more highly skilled workforce, both to the company and society. Assigned based on company spending on employee training.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from [DATE] Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team has a number of proprietary tools to aid ESG analysis. At the company level, Asia CONTEXT is the main repository for the team’s ESG analysis. Asia CONTEXT provides a framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model. By expanding our information sources beyond company reporting, we build a more robust and balanced picture of a company’s performance and reduce our reliance on corporate disclosure. PAI indicators may be further reviewed via the Schroders PAI dashboard and Asia Context templates, and our investors may also consider a company’s SustainEx score as part of their ESG review.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with an investee company on their plans to disclose a net zero target, which relates to PAIs 1, 2 and 3. We also engaged with a number of other companies on the topic of net zero targets. Other topics discussed with investee companies included board gender diversity, related to PAI 13, and an apparel company around water intensity and management, related to PAI 8.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

Engagement Theme	# Issuers
Climate Change	32
Corporate Governance	11
Human Capital Management	4
Natural Capital and Biodiversity	4
Human Rights	2
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	9.29	Taiwan
SAMSUNG ELECTRONICS COMPANY LIMITED PREFERENCE KRW5000	Information Technology	5.20	South Korea
SAMSUNG ELECTRONICS COMPANY LIMITED KRW100	Information Technology	3.17	South Korea
BHP GROUP LIMITED NPV	Materials	3.02	Australia
BOC HONG KONG HOLDINGS LIMITED HKD5	Financial	2.92	China
OVERSEA-CHINESE BANKING CORPORATION LIMITED SGD0.50	Financial	2.90	Singapore
TELSTRA CORPORATION LIMITED NPV	Communication Services	2.73	Australia
SINGAPORE TELECOMMUNICATIONS LTD	Communication Services	2.71	Singapore
BANK MANDIRI TBK PT IDR250	Financial	2.51	Indonesia
NATIONAL AUSTRALIA BANK LIMITED NPV	Financial	2.40	Australia
RIO TINTO PLC ORDINARY 10P	Materials	2.27	Australia
MEDIATEK INCORPORATED TWD10	Information Technology	1.95	Taiwan
HKT TRUST AND HKT LIMITED HKD0.0005 (STAPLED)	Communication Services	1.95	Hong Kong
HON HAI PRECISION INDUSTRY COMPANY LIMITED TWD10	Information Technology	1.68	Taiwan
HANG LUNG PROPERTIES LIMITED HKD1	Real Estate	1.63	Hong Kong

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 96%. The Fund maintained a higher overall sustainability score than the MSCI AC Pacific ex Japan High Dividend Yield (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 53% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 27% was invested in sustainable investments with an environmental objective and 27% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes and covered call options for income generation purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	20.77
Financial	Insurance	5.91
Financial	Financial Services	3.68
Information Technology	Semiconductors & Semiconductor Equipment	13.23
Information Technology	Technology Hardware & Equipment	12.65
Real Estate	Equity Real Estate Investment Trusts (REITs)	5.96
Real Estate	Real Estate Management & Development	5.34
Communication Services	Telecommunication Services	10.10
Materials	Materials	7.89
Consumer Discretionary	Consumer Durables & Apparel	4.13
Cash	Cash	3.16
Consumer Staples	Food, Beverage & Tobacco	2.26
Consumer Staples	Consumer Staples Distribution & Retail	0.79
Energy	Integrated Oil & Gas	1.47
Energy	Oil & Gas Exploration & Production	0.53
Industrial	Capital Goods	1.89
Health Care	Health Care Equipment & Services	0.24

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

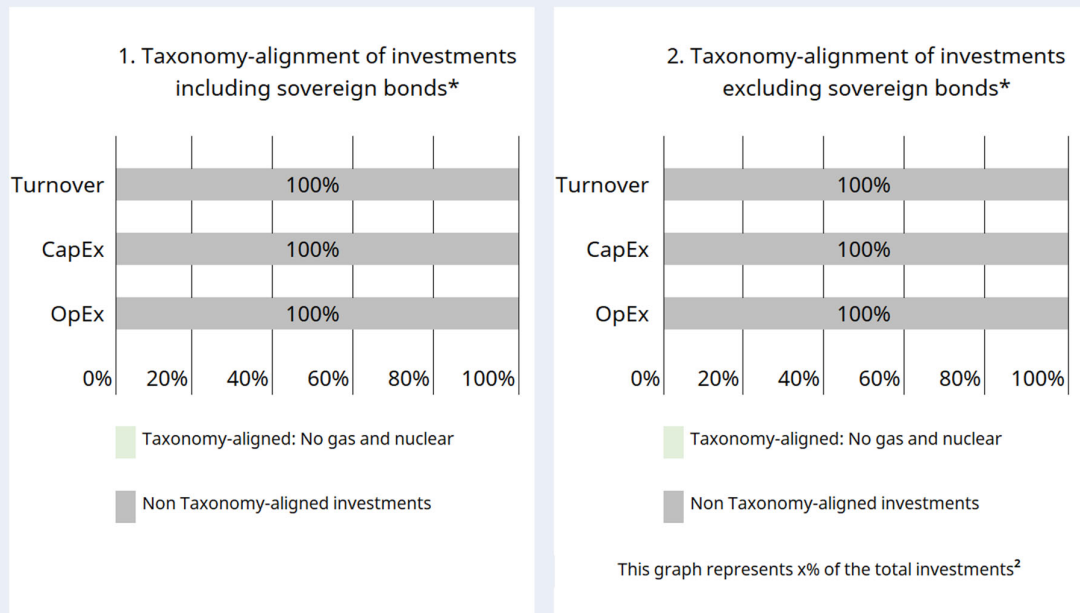

Taxonomy-aligned activities are expressed as a share of:

- **turnover**
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 27%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 27%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes and covered call options for income generation purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Asian Equity Impact
Legal Entity Identifier : 549300VDHYBAVAYHQV19

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 35%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 62%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 75% of its assets in sustainable investments, which are investments in Asia Pacific companies (excluding Japan) or companies which derive a significant proportion of their revenues or profits from Asia Pacific countries (excluding Japan) that were expected to contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs. The Fund also invested in cash, which the Investment Manager deemed to be neutral under its sustainability criteria.

The Investment Manager selected companies from a universe of eligible companies that were determined as meeting the Investment Manager's impact criteria. The impact criteria included an assessment of the company's contribution to the UN SDGs. This means that the extent to which companies deliver a direct or indirect positive impact to society in order to advance the UN SDGs together with the impact that these actions could have on a company's value were considered in the assessment of companies.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 12 April 2023 to 31 December 2023.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

• *How did the sustainability indicators perform?*

The Fund invested 97% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment meets the criteria of a sustainable investment. The Investment Manager used a revenue-based approach in this assessment by considering whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure contributes to an environmental or social objective. Compliance with the minimum percentage in sustainable investments is monitored daily via the Investment Manager's automated compliance controls.

The Investment Manager used a number of sustainability indicators to measure the impact contribution at an investee company level. In particular, the Investment Manager assessed a company's contribution to the UN SDGs. The Investment Manager selected companies that derived at least 50% of their revenues within three to five years from whose main activity is associated with one or more of the UN SDGs. Companies whose financial statements did not provide a comprehensive revenue breakdown were assessed on the basis of direct engagement. A company's assessment considered a number of factors, including, but not limited to, a company's positive contributions to and negative externalities on society, how and to what degree a company's activities relate to the UN SDGs, a company's management's commitment to sustainability, and a company's actions towards its employees, customers, suppliers and the environment.

The Investment Manager applies sustainability criteria when selecting investments for the Fund. The Investment Manager defines positive impact according to three key themes: (i) Climate Change (ii) Health & Well-being (iii) Social Development and Sustainable economy. Sustainable economy is a system that supports society and provides for a good quality of life while minimizing resource use and

environmental harm in order to preserve natural resources for future generations, including the companies that facilitate such a system.

As at the end of the reference period, the companies in the Fund were aligned with the following three positive impact themes, which address mutually-exclusive SDGs: (1) 50.6% in Social Development and Sustainable Economy; (2) 25.7% in Healthcare; and (3) 23.7% in Climate Change.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within this exclusionary criteria.

• **...and compared to previous periods?**

As this is our first reporting period, this question is not applicable.

• **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portfolio, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions. Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portfolio. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand

the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. Portfolio holdings are reviewed on a proprietary scorecard that assesses the materiality of impact for each company amongst other dimensions of impact, which can consider a number of PAIs including PAI 1-3 (Greenhouse gas emissions). The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). PAI indicators were also reviewed as appropriate via the Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

Over the period, our engagements covered a range of topics including those related to PAIs 1,2,3,5 (Greenhouse gas emissions) and 13 (Board gender diversity).

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	10
Human Rights	2
Diversity and Inclusion	2
Natural Capital and Biodiversity	2
Human Capital Management	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **12 Apr 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
AIA GROUP LIMITED USD1	Financial	3.86	Hong Kong
CSL LIMITED NPV	Health Care	3.57	United States
ICICI BANK LIMITED SPONSORED ADR (EACH REPRESENTS 2 ORDINARY INR10)	Financial	3.50	India
COCHLEAR LIMITED	Health Care	3.47	Australia

MERIDA INDUSTRY COMPANY LIMITED TWD10	Consumer Discretionary	2.94	Taiwan
BANK MANDIRI TBK PT IDR250	Financial	2.87	Indonesia

The list above represents the average of the Fund’s holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the

Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

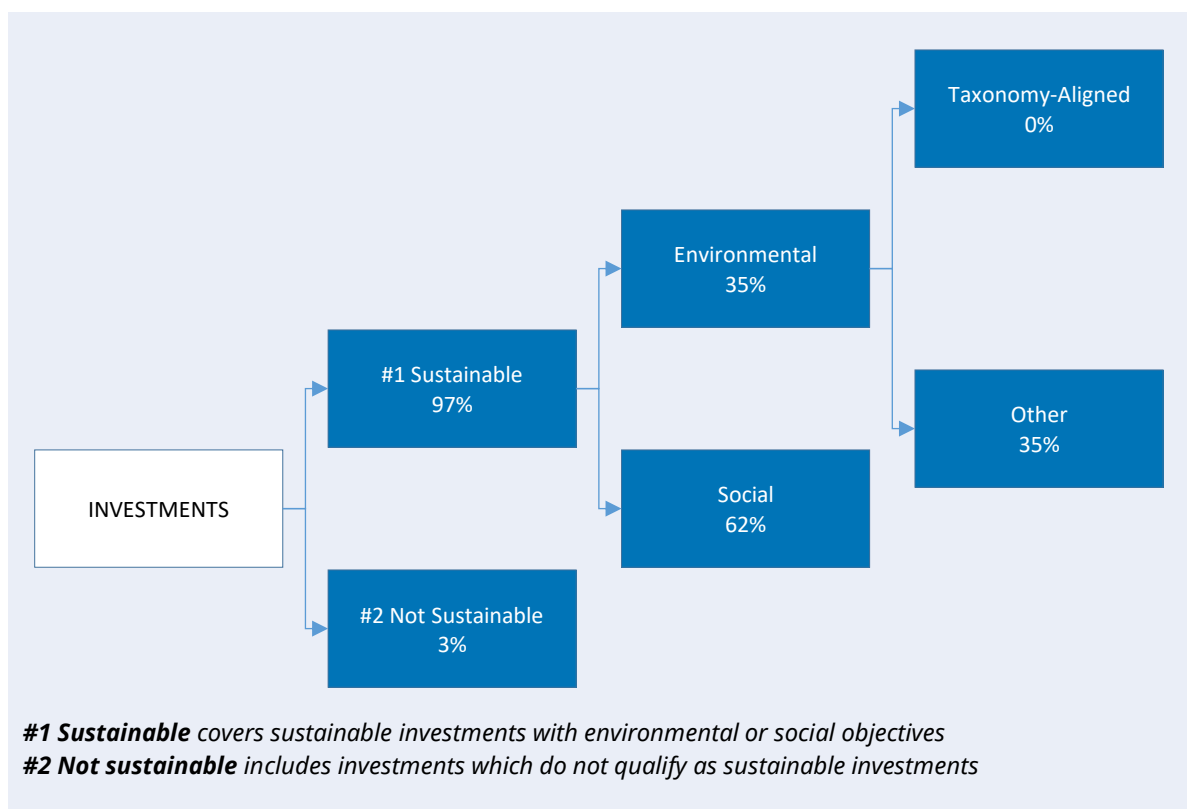

• *What was the asset allocation?*

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in Asia Pacific companies (excluding Japan) or companies which derive a significant proportion of their revenues or profits from Asia Pacific countries (excluding Japan) which were expected to contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs.

The Fund invested 97% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. Within this, 35% was invested in sustainable investments with an environmental objective and 62% was invested in sustainable investments with a social objective.

#2 Not sustainable includes cash, which was treated as neutral for sustainability purposes.

• ***In which economic sectors were the investments made?***

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Health Care	Health Care Equipment & Services	13.83
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	6.70
Financial	Banking	15.95
Financial	Insurance	3.86
Industrial	Capital Goods	6.96
Industrial	Commercial & Professional Services	4.38
Industrial	Transportation	2.95
Information Technology	Technology Hardware & Equipment	8.26
Information Technology	Semiconductors & Semiconductor Equipment	5.70
Communication Services	Telecommunication Services	4.67
Communication Services	Media & Entertainment	2.98
Utilities	Utilities	6.53
Consumer Discretionary	Consumer Durables & Apparel	2.94
Consumer Discretionary	Automobiles & Components	1.25
Consumer Discretionary	Consumer Services	1.18
Consumer Staples	Consumer Staples Distribution & Retail	3.14
Consumer Staples	Food, Beverage & Tobacco	0.84
Consumer Staples	Household & Personal Products	0.83
Materials	Materials	3.88
Cash	Cash	3.16

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
reflecting the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• ***What was the share of investments made in transitional and enabling activities?***

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• ***How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?***

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 35%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 62%.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes cash, which was treated as neutral for sustainability purposes.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework.

Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to attain the sustainable investment objective of the Fund were the following:

- The Fund invested at least 75% of its assets in sustainable investments, which were investments in Asia Pacific companies (excluding Japan) or companies which derive a significant proportion of their revenues or profits from Asia Pacific countries (excluding Japan) that were expected to contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs.
- The Fund invested in companies that did not cause significant environmental or social harm.
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies.
- During the year the Investment Manager conducted a number of engagements across the key themes such as climate change, diversity and inclusion, human rights and natural capital. Of particular note were a number of impact engagements, focussed on increasing the impact of, or improving the impact measurement of, products and services offered by companies in the investible universe.

The Investment Manager also engaged with selected companies as part of a group-wide climate engagement programme. Topics included understanding these companies' pathways to net zero, encouraging the development of fossil fuel financing in line with best practices, and improving disclosures around climate metrics.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This question is not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Asian Equity Yield
Legal Entity Identifier : HW8T20METRZQAOYP1O66

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 61% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan High Dividend Yield (net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.4% and the benchmark's sustainability score for the reference period was -5.6%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Power Provision

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI AC Asia Pacific ex Japan High Dividend Yield (net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI AC Asia Pacific ex Japan High Dividend Yield (net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 61% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	61
Aug 2022 - Dec 2022	60

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.4	-5.6
Jan 2022 - Dec 2022	1.9	-10.0

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of

themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding

Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations)
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company's relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). PAI indicators were also reviewed as appropriate via the Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1,2,3,5 (Greenhouse gas emissions) and 13 (Board gender diversity).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme

Issuers

Appendix V – Sustainable Finance Disclosure (Unaudited)

Climate Change	30
Corporate Governance	6
Natural Capital and Biodiversity	4
Human Rights	2
Human Capital Management	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	9.14	Taiwan
SAMSUNG ELECTRONICS COMPANY LIMITED PREFERENCE KRW5000	Information Technology	7.10	South Korea
CSL LIMITED NPV	Health Care	2.67	United States
HDFC BANK LIMITED INR1	Financial	2.49	India
MEDIATEK INCORPORATED TWD10	Information Technology	2.49	Taiwan
ADVANTECH COMPANY LIMITED TWD10	Information Technology	2.41	Taiwan
DBS GROUP HOLDINGS LIMITED NPV	Financial	2.39	Singapore
CHINA YANGTZE POWER COMPANY LIMITED A CNY1 (CNY)	Utilities	2.35	China
RIO TINTO LIMITED NPV	Materials	2.24	Australia
VENTURE CORPORATION LIMITED SGD0.25	Information Technology	2.03	Singapore
KERRY PROPERTIES LIMITED ORDINARY HKD1	Real Estate	2.01	Hong Kong
BANK MANDIRI TBK PT IDR250	Financial	2.00	Indonesia
SPARK NEW ZEALAND LIMITED NPV (NEW ZEALAND LISTING)	Communication Services	1.95	New Zealand
AUSTRALIA AND NEW ZEALAND BANKING GROUP LIMITED NPV	Financial	1.91	Australia
SHENZHOU INTERNATIONAL GROUP HOLDINGS LIMITED HKD0.10	Consumer Discretionary	1.89	China

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest

investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan High Dividend Yield (net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 61% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 27% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	13.57
Information Technology	Technology Hardware & Equipment	13.41
Information Technology	Software & Services	2.19
Financial	Banking	13.41
Financial	Insurance	6.09
Financial	Financial Services	4.31
Consumer Discretionary	Consumer Durables & Apparel	6.42
Consumer Discretionary	Consumer Services	3.60
Materials	Materials	7.80
Communication Services	Media & Entertainment	3.63
Communication Services	Telecommunication Services	3.16
Industrial	Capital Goods	4.32
Industrial	Transportation	1.81
Real Estate	Real Estate Management & Development	4.44
Real Estate	Equity Real Estate Investment Trusts (REITs)	0.44
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	2.67
Health Care	Health Care Equipment & Services	1.87
Utilities	Utilities	3.54
Cash	Cash	2.38
Consumer Staples	Consumer Staples Distribution & Retail	0.93

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

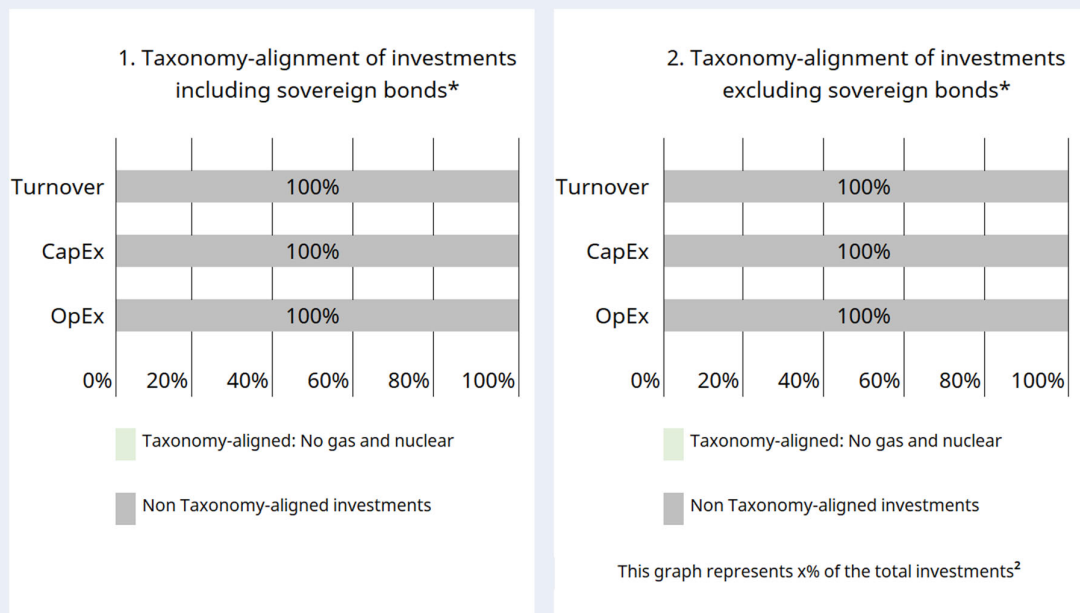

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 27%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 34%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Asian Smaller Companies

Legal Entity Identifier : I42YR6PXBTSHDUSQX75

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 72% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC Asia Ex Japan Small Cap (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.9% and the benchmark's sustainability score for the reference period was -0.4%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Donations
- High Salaries
- Medicine
- Training

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI AC Asia Ex Japan Small Cap (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI AC Asia Ex Japan Small Cap (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 72% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	72
Aug 2022 - Dec 2022	64

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.9	-0.4
Jan 2022 - Dec 2022	1.4	-1.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Training: the estimated societal benefit associated with a more highly skilled workforce, both to the company and society. Assigned based on company spending on employee training.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of

themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding

Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations)
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company's relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). PAI indicators were also reviewed as appropriate via the Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1,2,3,5 (Greenhouse gas emissions) and 13 (Board gender diversity).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme

Issuers

Climate Change	12
Corporate Governance	7
Human Capital Management	4
Human Rights	3
Natural Capital and Biodiversity	3
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
SINBON ELECTRONICS COMPANY LIMITED TWD10	Information Technology	2.59	Taiwan
APOLLO HOSPITALS ENTERPRISE LIMITED INR5	Health Care	2.37	India
VENTURE CORPORATION LIMITED SGD0.25	Information Technology	2.34	Singapore
PHOENIX MILLS LIMITED INR2	Real Estate	2.32	India
PARKSYSTEMS CORP KRW500	Information Technology	2.12	South Korea
TECHTRONIC INDUSTRIES COMPANY LIMITED HKD0.10	Industrial	2.10	Hong Kong
CHROMA ATE INCORPORATED TWD10	Information Technology	2.10	Taiwan
WILCON DEPOT INCORPORATED PHP1	Consumer Discretionary	2.09	Philippines
CAFE DE CORAL HOLDINGS HKD0.10	Consumer Discretionary	2.08	Hong Kong
SPORTON INTERNATIONAL INCORPORATED TWD10	Industrial	2.07	Taiwan
MERIDA INDUSTRY COMPANY LIMITED TWD10	Consumer Discretionary	2.04	Taiwan
CTCI CORPORATION TWD10	Industrial	1.98	Taiwan
NEXTEER AUTOMOTIVE GROUP LIMITED HKD0.10	Consumer Discretionary	1.97	China
JOHNSON ELECTRIC HOLDINGS LIMITED HKD0.05	Consumer Discretionary	1.96	Hong Kong
KERRY PROPERTIES LIMITED ORDINARY HKD1	Real Estate	1.96	Hong Kong

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the

Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

• *What was the asset allocation?*

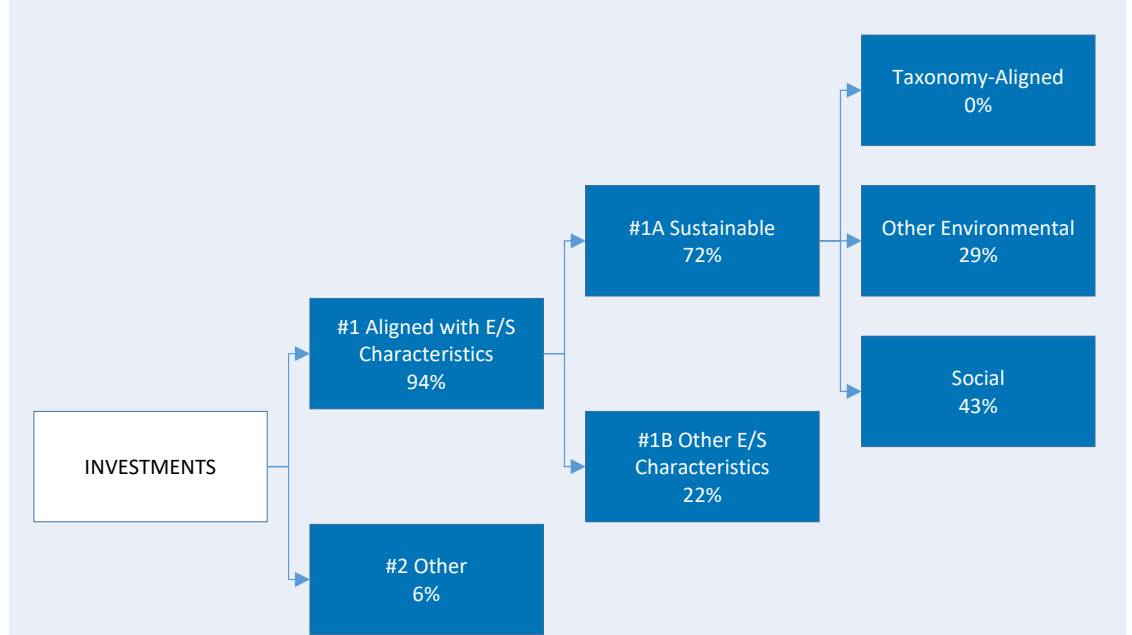

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 94%. The Fund maintained a higher overall sustainability score than the MSCI AC Asia Ex Japan Small Cap (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 72% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 29% was invested in sustainable investments with an environmental objective and 43% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	14.37
Industrial	Commercial & Professional Services	5.11
Industrial	Transportation	3.53
Consumer Discretionary	Consumer Durables & Apparel	9.32
Consumer Discretionary	Automobiles & Components	6.08
Consumer Discretionary	Consumer Discretionary Distribution & Retail	3.82
Consumer Discretionary	Consumer Services	2.76
Information Technology	Technology Hardware & Equipment	9.86
Information Technology	Semiconductors & Semiconductor Equipment	7.92
Financial	Financial Services	7.19
Financial	Banking	1.75
Real Estate	Real Estate Management & Development	8.58
Health Care	Health Care Equipment & Services	3.20
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	2.39
Materials	Materials	4.41
Consumer Staples	Household & Personal Products	1.36
Consumer Staples	Food, Beverage & Tobacco	0.98
Consumer Staples	Consumer Staples Distribution & Retail	0.78
Cash	Cash	2.84
Communication Services	Media & Entertainment	2.39
Utilities	Gas Utilities	1.37

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

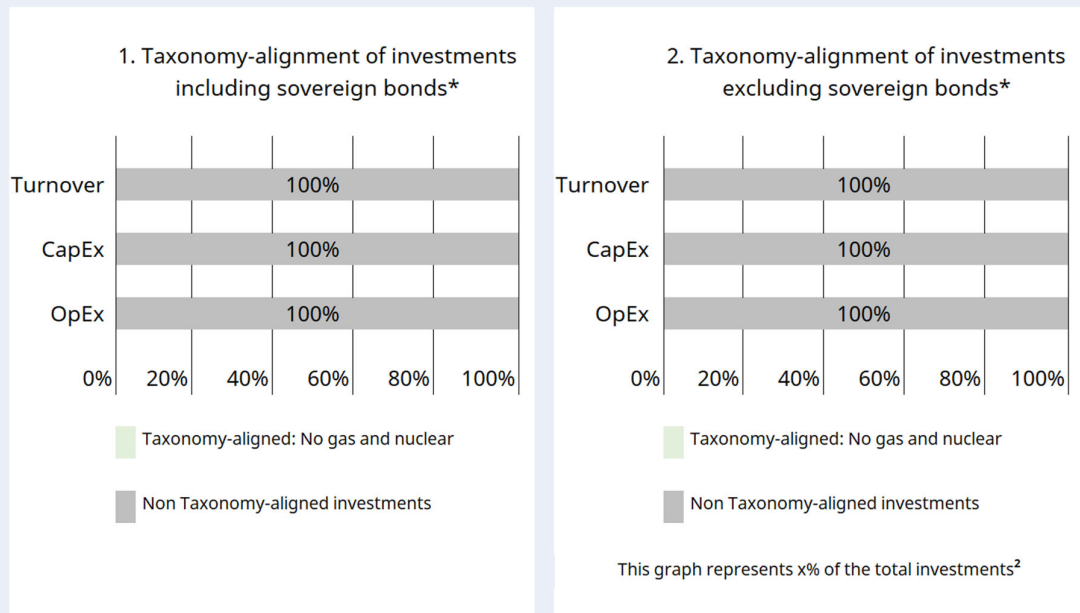

Taxonomy-aligned activities are expressed as a share of:

- **turnover**
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 29%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 43%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Asian Total Return
Legal Entity Identifier : A3HSL7JNL11S4BK1H669

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 60% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -0.4% and the benchmark's sustainability score for the reference period was -2.6%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Donations
- Financial Inclusion
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI AC Asia Pacific ex Japan (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 60% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	60
Aug 2022 - Dec 2022	58

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	-0.4	-2.6
Jan 2022 - Dec 2022	0.4	-3.1

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms'

breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations)
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). PAI indicators were also reviewed as appropriate via the Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1,2,3,5 (Greenhouse gas emissions) and 13 (Board gender diversity).

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Diversity and Inclusion	2

Climate Change	33
Corporate Governance	9
Human Rights	6
Natural Capital and Biodiversity	6
Human Capital Management	4

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	9.63	Taiwan
SAMSUNG ELECTRONICS COMPANY LIMITED KRW100	Information Technology	7.80	South Korea
TENCENT HOLDINGS LIMITED HKD0.00002	Communication Services	3.64	China
HDFC BANK LIMITED INR1	Financial	3.61	India
DBS GROUP HOLDINGS LIMITED NPV	Financial	3.26	Singapore
AIA GROUP LIMITED USD1	Financial	2.93	Hong Kong
BANK MANDIRI TBK PT IDR250	Financial	2.57	Indonesia
MEDIATEK INCORPORATED TWD10	Information Technology	2.30	Taiwan
CSL LIMITED NPV	Health Care	2.12	United States
TECHTRONIC INDUSTRIES COMPANY LIMITED HKD0.10	Industrial	2.05	Hong Kong
SWIRE PACIFIC LTD 'B'	Real Estate	2.04	Hong Kong
RIO TINTO PLC ORDINARY 10P	Materials	2.00	Australia
BHP GROUP LIMITED NPV	Materials	1.92	Australia
SINGAPORE EXCHANGE LIMITED SGD0.01	Financial	1.89	Singapore
APOLLO HOSPITALS ENTERPRISE LIMITED INR5	Health Care	1.83	India

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 60% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 16% was invested in sustainable investments with an environmental objective and 43% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	14.75
Information Technology	Technology Hardware & Equipment	12.95
Information Technology	Software & Services	3.68
Financial	Banking	14.27
Financial	Insurance	4.85
Financial	Financial Services	3.78
Consumer Discretionary	Consumer Durables & Apparel	6.76
Consumer Discretionary	Consumer Services	6.66
Consumer Discretionary	Consumer Discretionary Distribution & Retail	1.20
Health Care	Health Care Equipment & Services	5.54
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	2.49
Communication Services	Media & Entertainment	6.81
Communication Services	Telecommunication Services	0.29
Materials	Materials	6.54
Industrial	Capital Goods	2.35
Industrial	Transportation	1.32
Industrial	Commercial & Professional Services	1.06
Real Estate	Real Estate Management & Development	3.08
Cash	Cash	1.10
Consumer Staples	Food, Beverage & Tobacco	0.34
Derivatives	Equity Derivatives	0.18

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 16%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 43%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF BIC (Brazil, India, China)

Legal Entity Identifier : LM0QRH514E4ICW7YYO70

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 61% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI BIC (Net TR) 10/40 Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -0.3% and the benchmark's sustainability score for the reference period was -2.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Power Provision

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI BIC (Net TR) 10/40 Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI BIC (Net TR) 10/40 Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 61% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	61
Aug 2022 - Dec 2022	69

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	-0.3	-2.9
Jan 2022 - Dec 2022	4.0	-3.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of

themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding

Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schroders proprietary tool is the main repository for the team's ESG analysis. Schroders proprietary tools provide a systematic framework for analysing a company's relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company's performance in specific areas.

PAIs 1,2,3,9,13 were specifically considered as part of the Schroders proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data was very limited so it was not widely used within Schroders proprietary tool but monitored instead at the overall portfolio level.

All PAI indicators were monitored via Schroders PAI dashboard. We reviewed the PAI data in the PAI

dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5, 13.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	37
Corporate Governance	11
Human Rights	9
Natural Capital and Biodiversity	7
Diversity and Inclusion	4
Human Capital Management	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Jan 2023 to 31 Dec 2023

Largest Investments

	Sector	% Assets	Country
TENCENT HOLDINGS LIMITED HKD0.00002	Communication Services	9.34	China
ALIBABA GROUP HOLDING LIMITED USD0.000003125	Consumer Discretionary	6.45	China
TATA CONSULTANCY SERVICES LIMITED INR1	Information Technology	4.24	India
ICICI BANK LIMITED INR2	Financial	3.55	India
HDFC BANK LIMITED INR1	Financial	3.53	India
RELIANCE INDUSTRIES LIMITED INR10 (DEMAT)	Energy	3.13	India
AXIS BANK LIMITED INR2	Financial	2.58	India
APOLLO HOSPITALS ENTERPRISE LIMITED INR5	Health Care	2.32	India
ITAU UNIBANCO HOLDING SA ADR (EACH REPRESENTS 1 PREFERENCE SHARE)	Financial	2.28	Brazil
BHARTI AIRTEL LIMITED INR5	Communication Services	2.19	India
MAHINDRA AND MAHINDRA LIMITED INR5 (DEMAT)	Consumer Discretionary	2.07	India
KWEICHOW MOUTAI COMPANY LIMITED A CNY1	Consumer Staples	1.85	China
CHINA PACIFIC INSURANCE GROUP COMPANY LIMITED H CNY1	Financial	1.79	China
SHENZHOU INTERNATIONAL GROUP HOLDINGS LIMITED HKD0.10	Consumer Discretionary	1.79	China
MIDEA GROUP CO LTD-A (CNY)	Consumer Discretionary	1.74	China

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

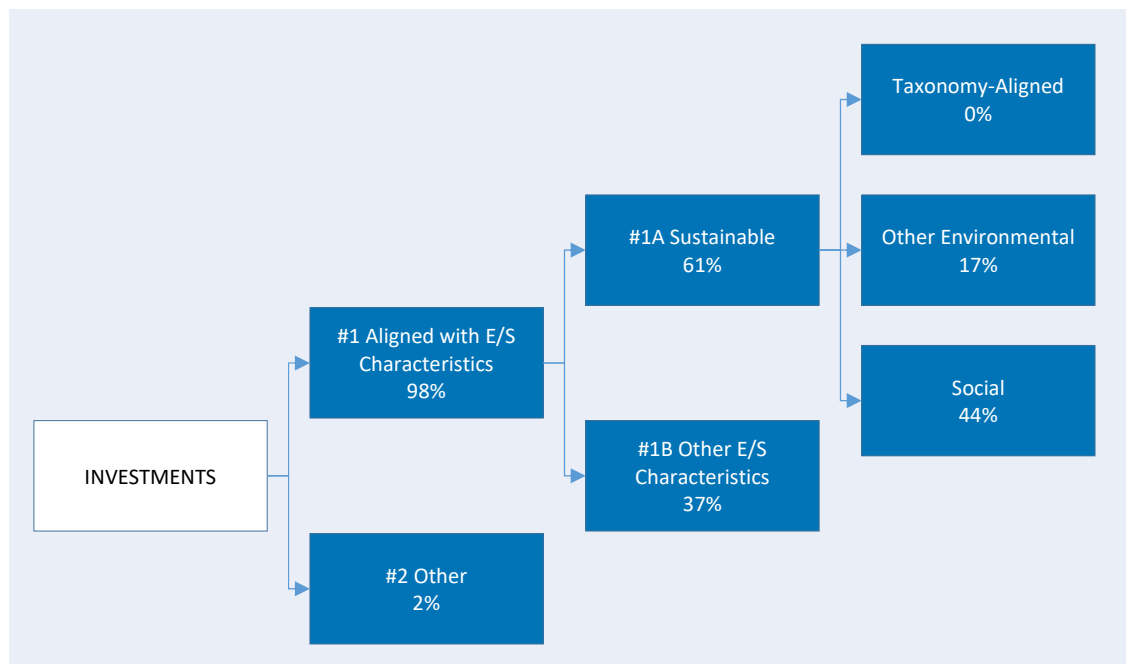

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI BIC (Net TR) 10/40 Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that

was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 61% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 17% was invested in sustainable investments with an environmental objective and 44% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Consumer	Consumer Discretionary Distribution & Retail	10.93
Consumer	Consumer Durables & Apparel	4.15
Consumer	Consumer Services	3.87
Consumer	Automobiles & Components	3.34
Financial	Banking	14.86
Financial	Insurance	4.80
Financial	Financial Services	1.01
Communication	Media & Entertainment	10.70
Communication	Telecommunication Services	2.19
Industrial	Capital Goods	7.22
Industrial	Transportation	2.10
Industrial	Commercial & Professional Services	1.37
Information	Software & Services	4.24
Information	Semiconductors & Semiconductor Equipment	1.49
Information	Technology Hardware & Equipment	1.41
Consumer Staples	Food, Beverage & Tobacco	4.57
Consumer Staples	Consumer Staples Distribution & Retail	1.73
Energy	Oil & Gas Refining & Marketing	3.13
Energy	Integrated Oil & Gas	1.48
Energy	Oil & Gas Exploration & Production	1.46
Health Care	Health Care Equipment & Services	3.12
Health Care	Pharmaceuticals, Biotechnology & Life	2.18
Materials	Materials	2.77
Cash	Cash	2.49
Utilities	Utilities	1.10
Utilities	Gas Utilities	0.70
Real Estate	Real Estate Management & Development	1.59

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund’s investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund’s investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund’s portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

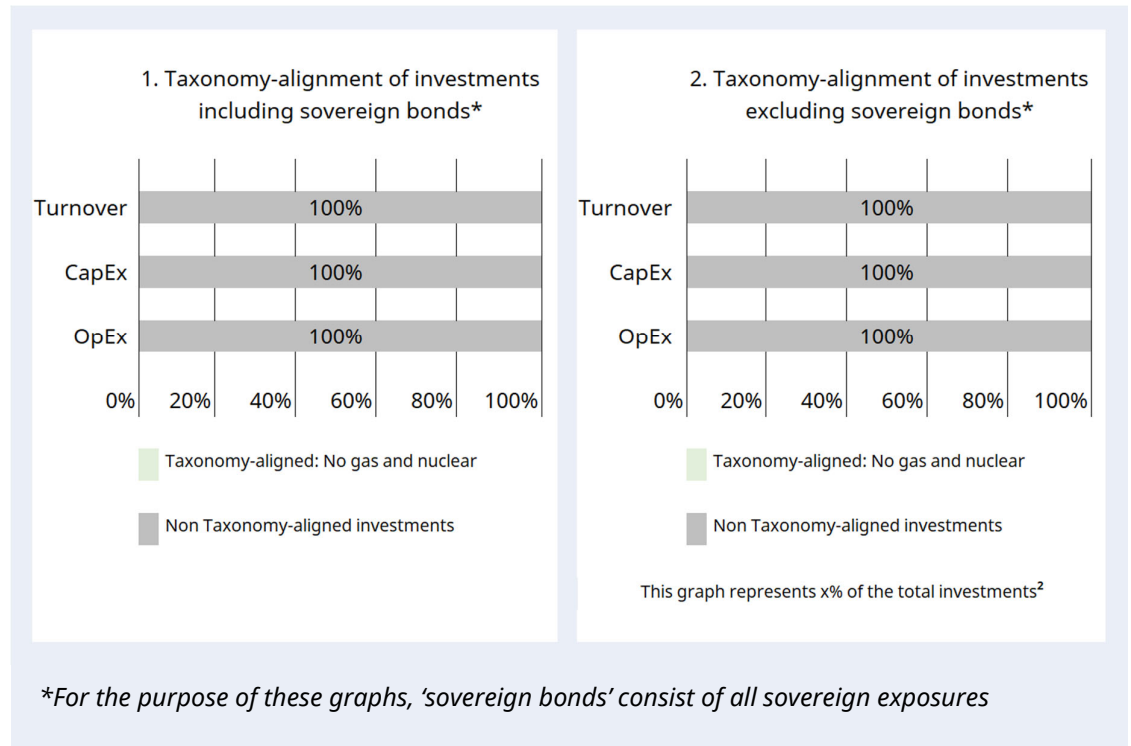

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 17%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 44%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Changing Lifestyles
Legal Entity Identifier : 5493000OPXVHAW8N3B55

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.2% and the benchmark's sustainability score for the reference period was -2.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Contraception
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI All Country World (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI All Country World (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 62% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	67

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	0.2	-2.9
Jan 2022 - Dec 2022	-0.3	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of

contraceptives. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain

(suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural

capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on

such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment research, stock selection and portfolio construction parts of the investment process. For example, in assessing an issuer's overall environmental score, PAIs 1, 2, 3, 4, 5 and 6 were included. In assessing an issuer's overall social score, PAIs 12 and 13 were included.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with an investee company on their plans to achieve net zero by 2050, which relates to PAIs 1, 2 and 3.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	20
Corporate Governance	12
Human Capital Management	9
Natural Capital and Biodiversity	9
Human Rights	7
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
TJX COS INCORPORATED COMMON STOCK USD1	Consumer Discretionary	4.00	United States
MASTERCARD INCORPORATED CLASS A COMMON STOCK USD0.0001	Financial	3.46	United States
INDUSTRIA DE DISEÑO TEXTIL SA EUR0.03	Consumer Discretionary	3.39	Spain

BURBERRY GROUP PLC ORDINARY 0.05P	Consumer Discretionary	2.68	United Kingdom
AIA GROUP LIMITED USD1	Financial	2.61	Hong Kong
RAIA DROGASIL SA NPV	Consumer Staples	2.61	Brazil

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 62% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 34% was invested in sustainable investments with an environmental objective and 29% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Consumer Discretionary	Consumer Discretionary Distribution & Retail	21.66
Consumer Discretionary	Consumer Durables & Apparel	17.80
Consumer Discretionary	Automobiles & Components	8.33
Consumer Discretionary	Consumer Services	4.68
Consumer Staples	Consumer Staples Distribution & Retail	9.88
Consumer Staples	Household & Personal Products	5.92
Consumer Staples	Food, Beverage & Tobacco	3.69
Communication Services	Media & Entertainment	6.10
Communication Services	Consumer Discretionary Distribution & Retail	3.35
Financial	Financial Services	3.46
Financial	Insurance	2.61
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	4.47
Health Care	Health Care Equipment & Services	1.33
Industrial	Capital Goods	1.76
Industrial	Transportation	1.00
Cash	Cash	2.06
Information Technology	Software & Services	1.89

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

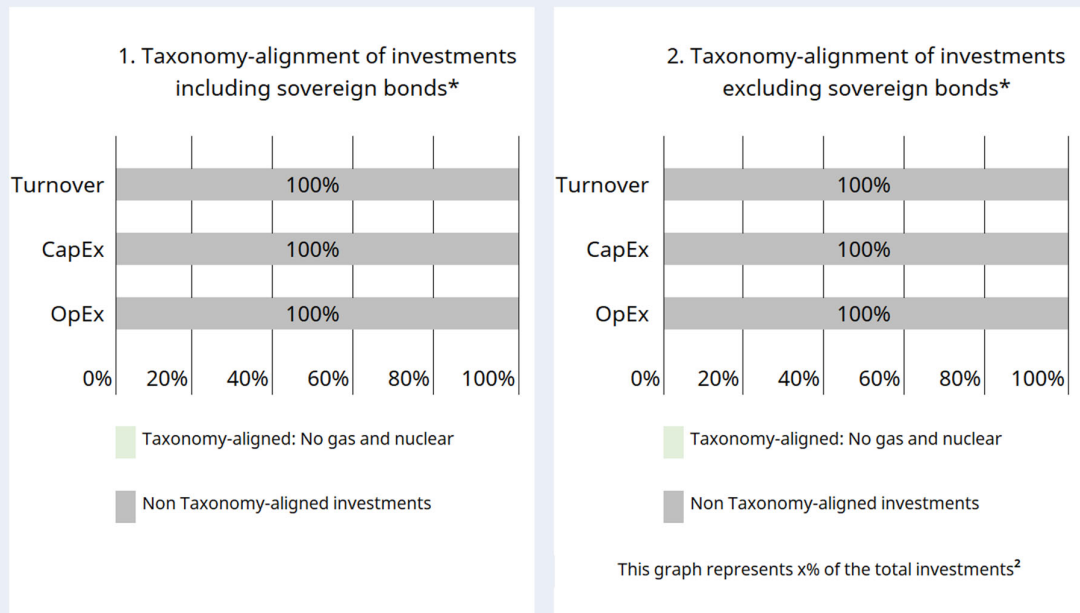

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 34%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 29%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF China A All Cap
Legal Entity Identifier : 5493000BXUD89QYZ9M71

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 63% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI China A Onshore (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -1.6% and the benchmark's sustainability score for the reference period was -3.3%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Power Provision

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI China A Onshore (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI China A Onshore (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 63% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	63
Aug 2022 - Dec 2022	54

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	-1.6	-3.3
Jan 2022 - Dec 2022	-4.6	-5.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schroders’ proprietary tool is the main repository for the team’s ESG analysis. Schroders’ proprietary tool provides a systematic framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model.

PAIs 1, 2, 3, 9 and 13 were specifically considered as part of the Schroders’ proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data was very limited so it was not widely used within Schroders’ proprietary tool but monitored instead at the overall portfolio level.

All PAI indicators were monitored via Schroders PAI dashboard. We reviewed the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs were also considered post-investment through engagement where the investment manager

engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 and 13.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	19
Human Rights	7
Corporate Governance	4
Human Capital Management	4
Natural Capital and Biodiversity	3
Diversity and Inclusion	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Jan 2023 to 31 Dec 2023

Largest Investments	Sector	% Assets	Country
KWEICHOW MOUTAI COMPANY LIMITED A CNY1	Consumer Staples	5.71	China
SHENZHEN INOVANCE TECHNOLO-A	Industrial	4.60	China
PING AN INSURANCE GROUP COMPANY OF CHINA LIMITED A CNY1	Financial	4.45	China
CONTEMPORARY AMPEREX TECHNOLOGY LT CNY1	Industrial	4.37	China
EAST MONEY INFORMATION LTD A CNY1	Financial	4.12	China
HUALAN BIOLOGICAL ENGINEERING INCORPORATED-A CNY1	Health Care	3.68	China
ZHEJIANG SANHUA INTELLIGENT CONTROLS COMPANY LIMITED CNY1 (CNY)	Industrial	2.63	China
BAIDU INCORPORATEDCLASS A HKD0.00000625	Communication Services	2.51	China
YIZUMI HOLDINGS COMPANY L-A CNY1	Industrial	2.47	China
SHANGHAI MOONS' ELECTRIC COMPANY LIMITED A CNY1	Industrial	2.18	China

TOFFLON SCIENCE AND TECHNOLOGY GRO CNY1	Health Care	1.98	China
XIAMEN FARATRONIC LTD A CNY1	Information Technology	1.95	China

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI China A Onshore (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 63% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 32% was invested in sustainable investments with an environmental objective and 31% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	23.65
Industrial	Transportation	1.19
Information Technology	Technology Hardware & Equipment	10.22
Information Technology	Semiconductors & Semiconductor Equipment	5.77
Information Technology	Software & Services	1.79
Financial	Insurance	6.12
Financial	Financial Services	5.94
Financial	Banking	0.58
Consumer Discretionary	Automobiles & Components	3.64
Consumer Discretionary	Consumer Durables & Apparel	3.07
Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.75
Consumer Discretionary	Consumer Services	1.75
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	5.96
Health Care	Health Care Equipment & Services	3.61
Consumer Staples	Food, Beverage & Tobacco	8.97
Consumer Staples	Consumer Staples Distribution & Retail	0.21
Materials	Materials	7.17
Communication Services	Media & Entertainment	2.51
Utilities	Utilities	2.06
Energy	Integrated Oil & Gas	1.81
Cash	Cash	0.98
Cash	Other	0.01
Real Estate	Real Estate Management & Development	0.24

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these

differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

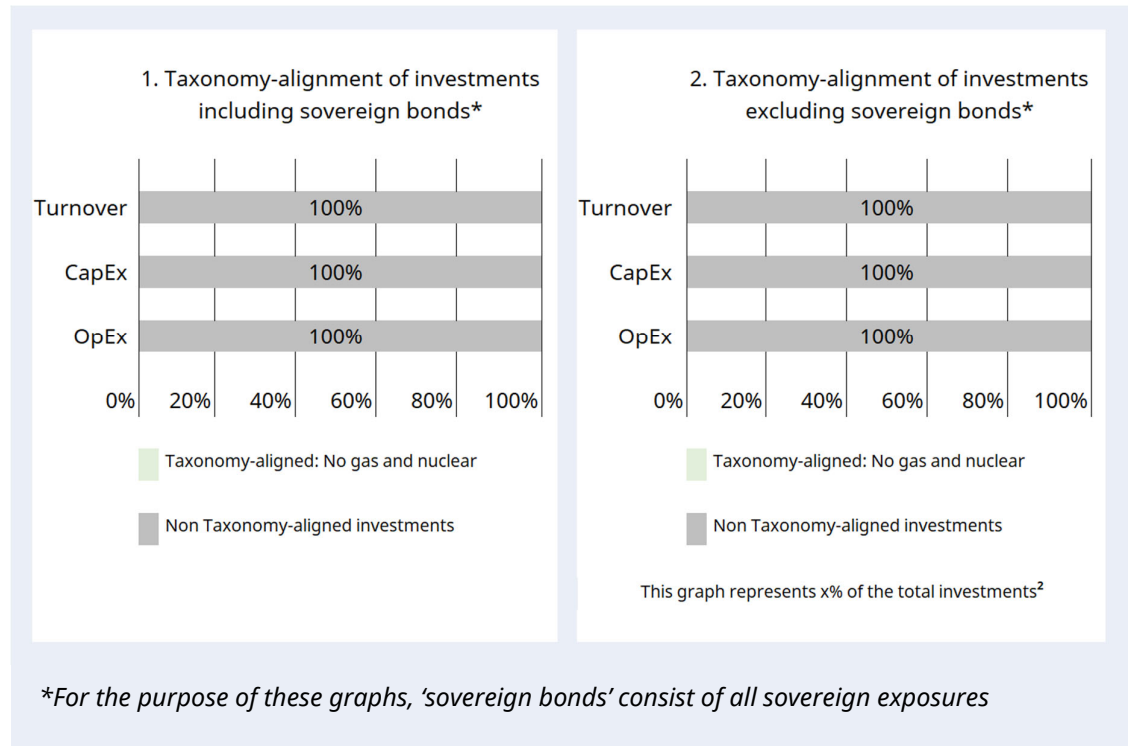

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 32%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 31%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF China Opportunities
Legal Entity Identifier : CON8ADEN6LBWQO6J6710

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI China (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -0.2% and the benchmark's sustainability score for the reference period was -1.5%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Power Provision

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI China (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI China (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 58% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	58
Sep 2022 - Dec 2022	59

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	-0.2	-1.5
Jan 2022 - Dec 2022	-0.6	-2.1

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of

themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding

Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations)
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company's relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). PAI indicators were also reviewed as appropriate via the Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1,2,3,5 (Greenhouse gas emissions) and 13 (Board gender diversity).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme

Issuers

Climate Change	33
Human Rights	12
Corporate Governance	8
Natural Capital and Biodiversity	7
Human Capital Management	6
Diversity and Inclusion	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
ALIBABA GROUP HOLDING LIMITED USD0.000003125	Consumer Discretionary	9.88	China
TENCENT HOLDINGS LIMITED HKD0.00002	Communication Services	9.58	China
MEITUAN CLASS B USD0.00001 REGS	Consumer Discretionary	4.32	China
CONTEMPORARY AMPEREX TECHNOLOGY LT CNY1	Industrial	2.59	China
SHENZHOU INTERNATIONAL GROUP HOLDINGS LIMITED HKD0.10	Consumer Discretionary	2.30	China
CHINA PETROLEUM AND CHEMICAL CORPORATION H CNY1	Energy	2.24	China

PRADA HOLDING SPA NPV (HK LISTING)	Consumer Discretionary	1.54	Italy
GALAXY ENTERTAINMENT GROUP LIMITED HKD0.10	Consumer Discretionary	1.51	Macao

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment

Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

• *What was the asset allocation?*

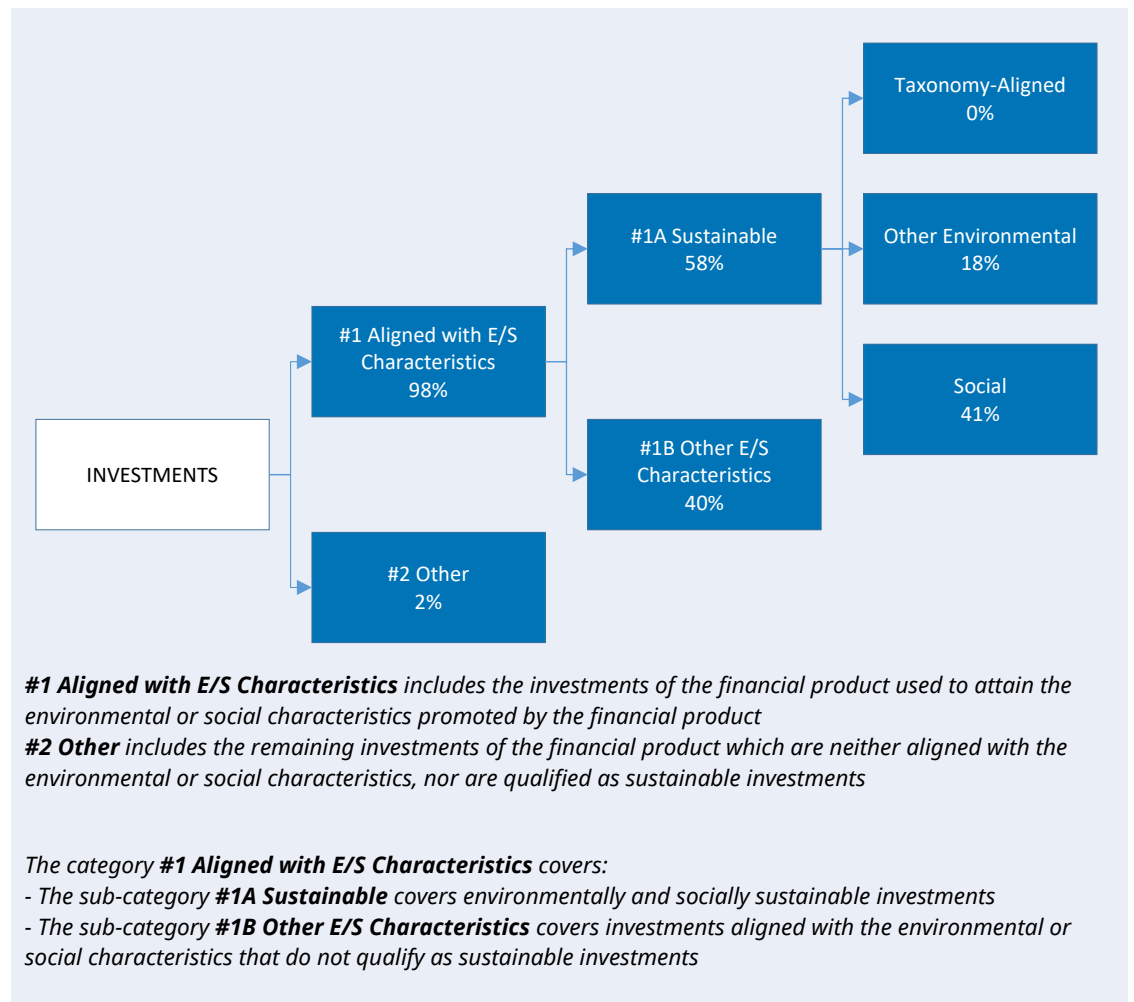

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI China (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 58% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 18% was invested in sustainable investments with an environmental objective and 41% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Consumer Discretionary	Consumer Discretionary Distribution & Retail	15.19
Consumer Discretionary	Consumer Services	8.45
Consumer Discretionary	Consumer Durables & Apparel	6.15
Consumer Discretionary	Automobiles & Components	1.60
Communication Services	Media & Entertainment	13.72
Industrial	Capital Goods	9.16
Industrial	Transportation	0.98
Information Technology	Technology Hardware & Equipment	4.00
Information Technology	Semiconductors & Semiconductor Equipment	3.20
Information Technology	Software & Services	1.97
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	6.41
Health Care	Health Care Equipment & Services	2.61
Financial	Banking	2.64
Financial	Financial Services	2.26
Financial	Insurance	2.00
Consumer Staples	Food, Beverage & Tobacco	5.64
Consumer Staples	Consumer Staples Distribution & Retail	0.26
Materials	Materials	5.52
Energy	Integrated Oil & Gas	3.53
Real Estate	Real Estate Management & Development	2.16
Cash	Cash	1.57
Cash	Other	0.01
Utilities	Utilities	0.94

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• ***What was the share of investments made in transitional and enabling activities?***

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• ***What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?***

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 18%.

• ***What was the share of socially sustainable investments?***

The share of sustainable investments with a social objective was 41%.

• ***What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?***

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Emerging Markets
Legal Entity Identifier : BDU06UKEHWLI0JDDWF68

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 54% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.1% and the benchmark's sustainability score for the reference period was -2.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Contraception
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI Emerging Markets (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI Emerging Markets (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 54% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	54
Aug 2022 - Dec 2022	57

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	0.1	-2.9
Jan 2022 - Dec 2022	2.8	-3.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of

contraceptives. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain

(suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural

Appendix V – Sustainable Finance Disclosure (Unaudited)

capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on

such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schroders proprietary tool is the main repository for the team's ESG analysis. Schroders proprietary tools provide a systematic framework for analysing a company's relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company's performance in specific areas.

PAIs 1,2,3,9,13 were specifically considered as part of the Schroders proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data was very limited so it was not widely used within Schroders proprietary tool but monitored instead at the overall portfolio level.

All PAI indicators were monitored via Schroders PAI dashboard. We reviewed the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5, 13.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	75
Corporate Governance	28
Natural Capital and Biodiversity	13
Human Rights	9
Human Capital Management	8
Diversity and Inclusion	7

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	9.55	Taiwan
SAMSUNG ELECTRONICS COMPANY LIMITED KRW100	Information Technology	6.70	South Korea
TENCENT HOLDINGS LIMITED HKD0.00002	Communication Services	5.01	China
ALIBABA GROUP HOLDING LIMITED USD0.000003125	Consumer Discretionary	3.42	China
HDFC BANK LIMITED INR1	Financial	2.06	India
ICICI BANK LIMITED INR2	Financial	1.89	India
SK HYNIX INCORPORATED KRW5000	Information Technology	1.69	South Korea
AIA GROUP LIMITED USD1	Financial	1.64	Hong Kong
TATA CONSULTANCY SERVICES LIMITED INR1	Information Technology	1.56	India
AXIS BANK LIMITED INR2	Financial	1.55	India
ITAU UNIBANCO HOLDING SA ADR (EACH REPRESENTS 1 PREFERENCE SHARE)	Financial	1.46	Brazil
MIDEA GROUP CO LTD-A (CNY)	Consumer Discretionary	1.45	China
HON HAI PRECISION INDUSTRY COMPANY LIMITED TWD10	Information Technology	1.41	Taiwan
MEDIATEK INCORPORATED TWD10	Information Technology	1.36	Taiwan
SISF GLOBAL EMERGING MARKETS SMALLER COMPANIES I ACCUMULATION	Collective Investments	1.28	Luxembourg

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

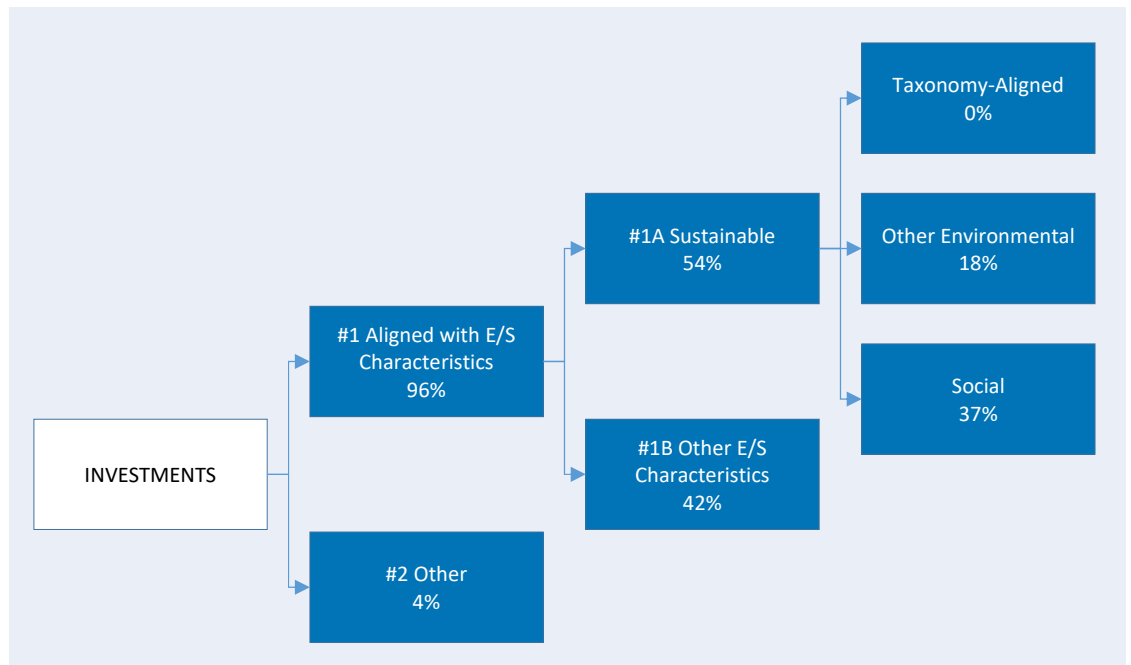

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 96%. The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a

negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 54% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 18% was invested in sustainable investments with an environmental objective and 37% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	13.75
Information Technology	Technology Hardware & Equipment	11.01
Information Technology	Software & Services	1.99
Financial	Banking	18.10
Financial	Insurance	4.88
Financial	Financial Services	2.12
Consumer Discretionary	Consumer Discretionary Distribution & Retail	6.61
Consumer Discretionary	Consumer Durables & Apparel	2.53
Consumer Discretionary	Consumer Services	2.45
Consumer Discretionary	Automobiles & Components	1.40
Communication Services	Media & Entertainment	6.01
Communication Services	Telecommunication Services	2.53
Industrial	Capital Goods	3.84
Industrial	Transportation	1.41
Industrial	Commercial & Professional Services	0.41
Consumer Staples	Food, Beverage & Tobacco	3.20
Consumer Staples	Consumer Staples Distribution & Retail	1.78
Consumer Staples	Household & Personal Products	0.35
Materials	Materials	4.61
Energy	Oil & Gas Refining & Marketing	1.17
Energy	Integrated Oil & Gas	1.14
Energy	Oil & Gas Exploration & Production	0.63
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	1.81
Health Care	Health Care Equipment & Services	0.34
Cash	Cash	2.11
Real Estate	Real Estate Management & Development	1.40
Collective Investments	Unit Trusts	1.28
Utilities	Utilities	0.77
Utilities	Gas Utilities	0.38

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

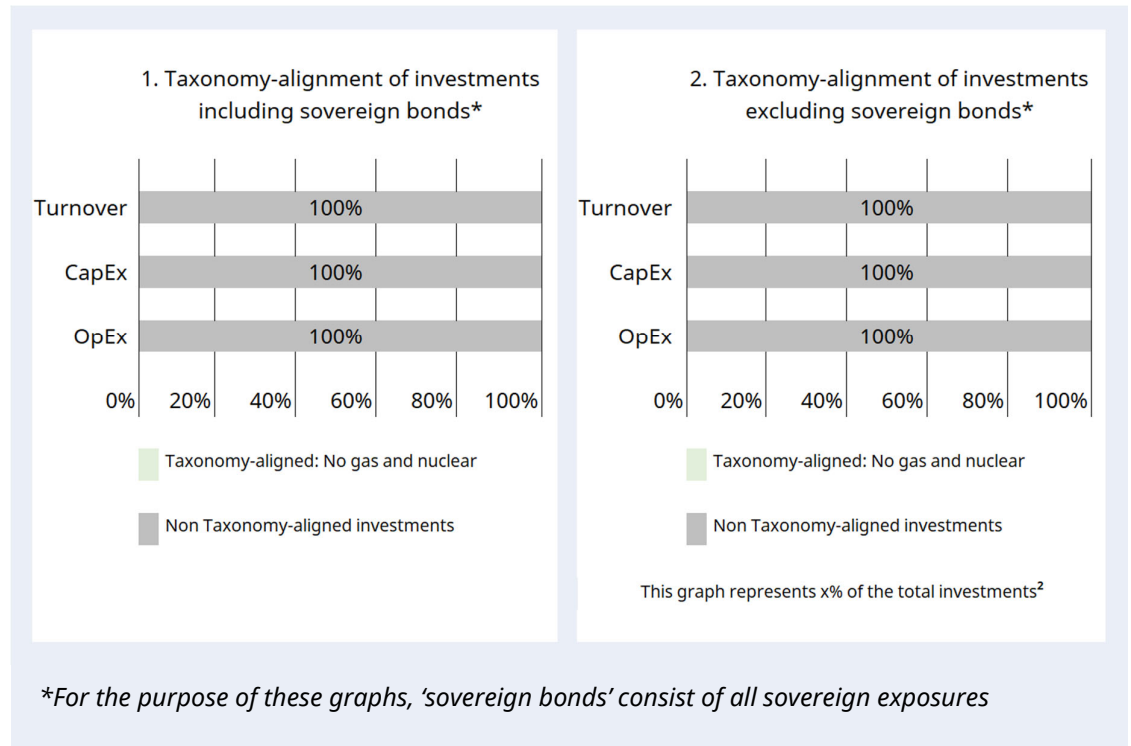

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 18%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 37%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Product Name : Schroder ISF Emerging Markets Equity Impact
Legal Entity Identifier : 5493000PBF2B6FI3QM81

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes **No**

<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective : 37%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective : 60%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

Until 30 June 2023 the Fund invested at least 75% of its assets, and from 1 July 2023 at least 90% of its assets, in sustainable investments, which are investments in companies that were expected to contribute towards the advancement of one or more of the UN SDGs, to be managed in the interests of all stakeholders, and to deliver returns to shareholders over the long term. The Fund also invested in cash, which the Investment Manager deemed to be neutral under its sustainability criteria.

The Investment Manager selected companies from a universe of eligible companies that were determined as meeting the Investment Manager's impact criteria. The impact criteria included an assessment of the company's contribution to the UN SDGs. This means that the extent to which companies deliver a direct or indirect positive impact to society in order to advance the UN SDGs together with the impact that these actions could have on a company's value were considered in the assessment of companies.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

• *How did the sustainability indicators perform?*

The Fund invested 97% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used a revenue-based approach in this assessment by considering whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure contributed to an environmental and/or social objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the impact contribution at an investee company level. In particular, the Investment Manager assessed a company's contribution to the UN SDGs. The Investment Manager selected companies that derived a certain amount of their revenues from activities associated with one or more UN SDGs and that are expected to have a certain amount of average daily liquidity. Companies whose financial statements did not provide a comprehensive revenue breakdown were assessed on the basis of direct engagement. A company's assessment considered a number of factors, including, but not limited to, a company's positive contributions to and negative externalities on society, how and to what degree a company's activities relate to the UN SDGs, a company's management's commitment to sustainability, and a company's actions towards its employees, customers, suppliers and the environment.

As at the end of the reference period, the companies in the Fund were aligned with the following five key impact areas; (1) 32% in inclusion; (2) 22% in health and wellness; (3) 15% in environment; (4) 21% in sustainable infrastructure; and (5) 10% in responsible consumption.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within

this exclusionary criteria.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	97
Jan 2022 - Dec 2022	95

Key Impact Areas

This table details the breakdown of the sustainable investments by impact area at the end of the reference period.

Period	Inclusion %	Health and Wellness %	Sustainable Infrastructure %	Environment %	Responsible Consumption %
Dec 2023	32	22	21	15	10
Dec 2022	21	28	20	20	11

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global

Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: [\(Link](#)

<https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schroders proprietary tool is the

main repository for the team's ESG analysis. Schroders proprietary tools provide a systematic framework for analysing a company's relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company's performance in specific areas.

PAIs 1, 2, 3, 9 and 13 were specifically considered as part of the Schroders proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data was very limited so it was not widely used within Schroders proprietary tool but monitored instead at the overall portfolio level.

All PAI indicators were monitored via Schroders PAI dashboard. We reviewed the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 and 13.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	12
Corporate Governance	7
Human Rights	6
Diversity and Inclusion	3
Human Capital Management	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country

SHOPRITE HOLDINGS LIMITED ZAR0.01134	Consumer Staples	3.03	South Africa
GENTERA SAB DE CV NPV	Financial	2.89	Mexico
WEG SA NPV	Industrial	2.89	Brazil

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in companies which were expected to contribute towards the advancement of one or more of the UN SDGs, to be managed in the interests of all stakeholders, and to deliver returns to shareholders over the long term.

The Fund invested 97% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. Within this, 37% was invested in sustainable investments with an environmental objective and 60% was invested in sustainable investments with a social objective.

#2 Not sustainable includes cash, which was treated as neutral for sustainability purposes.

• ***In which economic sectors were the investments made?***

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	10.03
Financial	Insurance	4.14
Financial	Financial Services	3.76
Information Technology	Technology Hardware & Equipment	11.79
Information Technology	Semiconductors & Semiconductor Equipment	5.05
Information Technology	Software & Services	0.55
Industrial	Capital Goods	10.49
Industrial	Commercial & Professional Services	3.48
Health Care	Health Care Equipment & Services	8.89
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	4.66
Consumer Staples	Consumer Staples Distribution & Retail	11.08
Consumer Staples	Household & Personal Products	1.52
Consumer Discretionary	Consumer Discretionary Distribution & Retail	6.41
Consumer Discretionary	Consumer Durables & Apparel	2.80
Consumer Discretionary	Consumer Services	2.24
Materials	Materials	3.85
Utilities	Utilities	3.14
Cash	Cash	3.10
Communication Services	Telecommunication Services	2.11
Communication Services	Media & Entertainment	0.89

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

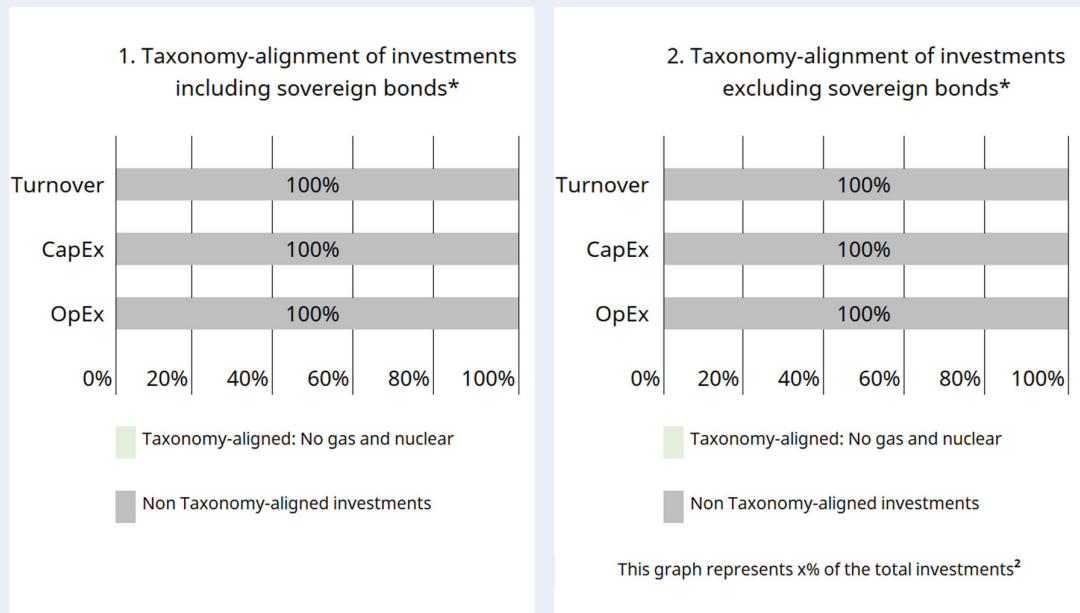

Taxonomy-aligned activities are expressed as a share of:

- **turnover**
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

• **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 37%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 60%.

• **What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Not sustainable includes cash, which was treated as neutral for sustainability purposes.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework.

Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- Until 30 June 2023 the Fund invested at least 75% of its assets, and from 1 July 2023 at least 90% of its assets, in sustainable investments, which were investments in companies that were expected to contribute towards the advancement of one or more of the UN SDGs, to be managed in the interests of all stakeholders, and to deliver returns to shareholders over the long term. Although there was an increase in the minimum amount of assets to be invested in sustainable investments there was no change to the investment process during the reference period.
- The Fund invested in companies that did not cause significant environmental or social harm.
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies.
- During the year the Investment Manager conducted a number of engagements across the key themes such as climate change, diversity and inclusion, human rights and natural capital. Of particular note were a number of impact engagements, focused on increasing the impact of, or improving the impact measurement of, products and services offered by companies in the investible universe.
- In addition, the Investment Manager worked on a mass engagement project during the year which encouraged companies within the portfolio to set net zero emissions transition plans as well as an engagement programme to improve board gender diversity both of which will remain priorities into the next reference period.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This question is not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF European Dividend Maximiser
Legal Entity Identifier : 5G167LY8W47ZFOL7Z717

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 67% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained

i) a carbon exposure below that of the MSCI Europe (Net TR) Index; and

ii) a higher overall sustainability score than the MSCI Europe (Net TR) Index, based on the Investment Manager's rating system.

This means that:

(a) the Fund's weighted average carbon emissions exposure over the reference period was lower than the benchmark's weighted average carbon emissions exposure over the same period, based on quarterly-end data and;

(b) the Fund's weighted average sustainability score over a rolling six-month period up to the end of the reference period was higher than the benchmark's weighted average sustainability score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The carbon emissions exposure represents the emissions of the portfolio relative to the market value of the portfolio. It is expressed as the carbon emissions per million euros of investment and displayed as tons CO₂e / €M investment. This is measured using data from a third party provider. Where a data point is not available, the provider may make use of estimated data.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Disclaimer: Certain information ©2022 MSCI ESG Research LLC. Reproduced by permission

Sustainability indicators measure how the environmental or

• *How did the sustainability indicators perform?*

The Fund's weighted average carbon emissions exposure for the reference period was 1.9 tons CO₂e / €M and the benchmark's weighted average carbon emissions exposure for the reference period was 6.3

social characteristics promoted by the financial product are attained.

tons CO₂e / €M.

The outputs reflect the average carbon exposure for the reference period of both the portfolio and the benchmark based on quarterly data points. The formula integrates the quarter end value of investments/total investments (e.g. stock weight) multiplied by the issuer's reported or estimated scope 1 and scope 2 greenhouse gas emissions. The calculation seeks to measure the Fund's and the benchmark's exposure to the highest carbon emitters within the portfolio and the benchmark respectively.

The Investment Manager monitored compliance with the characteristic to maintain a carbon exposure below that of the MSCI Europe (Net TR) Index by reference to the carbon emissions measured on a weighted average based on quarterly holdings using data from a third party provider.

The Fund's sustainability score for the reference period was 3.4% and the benchmark's sustainability score for the reference period was -5.2%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Contraception
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the MSCI Europe (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI Europe (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 67% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	67
Aug 2022 - Dec 2022	67

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	3.4	-5.2
Jan 2022 - Dec 2022	2.7	-8.1

Carbon exposure

This table details the Fund's and benchmark's carbon exposure, year on year.

Period	Fund (tCO ₂ e/€M)	Benchmark (tCO ₂ e/€M)
Jan 2023 - Dec 2023	1.9	6.3
Jan 2022 - Dec 2022	3.1	6.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

Schroders exclusions regarding:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders’ proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including human rights in the consumer discretionary sector, and climate & net zero commitments for held companies within the financials sector. These engagements related to PAIs 16 (Social Violations) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	37
Corporate Governance	24
Natural Capital and Biodiversity	12
Human Rights	8
Diversity and Inclusion	7
Human Capital Management	6

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
SIEMENS AG NPV (REGISTERED)	Industrial	4.27	Germany
INTESA SANPAOLO SPA EUR0.52	Financial	3.99	Italy

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schrodgers Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest

investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

• What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

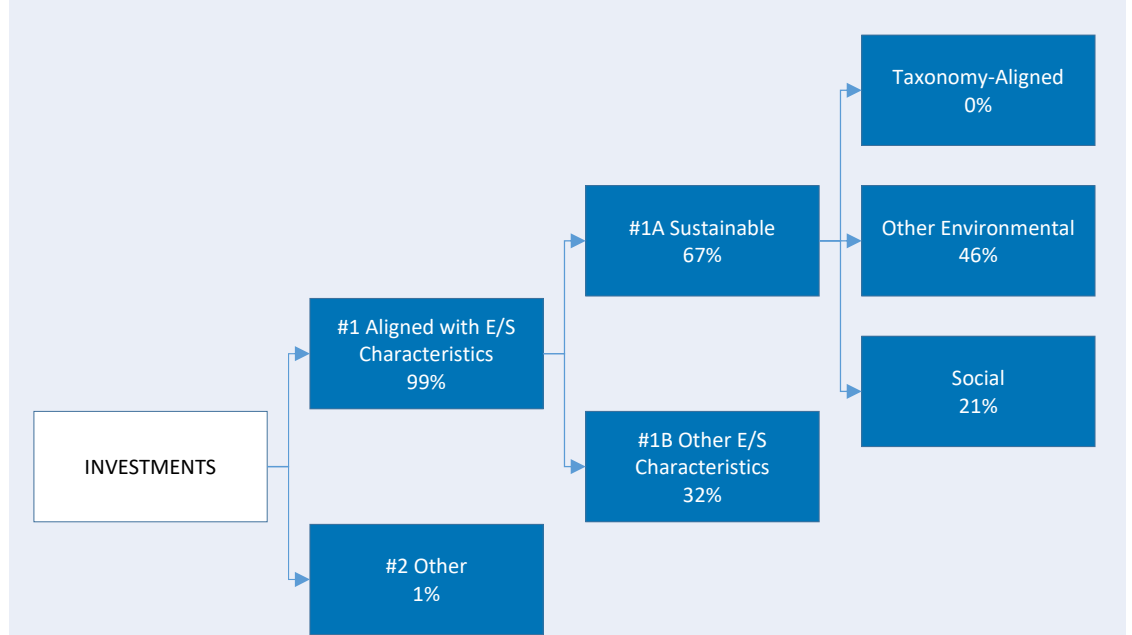

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI Europe (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 67% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 46% was invested in sustainable investments with an environmental objective and 21% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes and covered call options for income generation purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	13.59
Financial	Insurance	5.36
Financial	Financial Services	2.74
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	11.48
Health Care	Health Care Equipment & Services	2.21
Consumer Staples	Household & Personal Products	6.14
Consumer Staples	Food, Beverage & Tobacco	4.74
Consumer Staples	Consumer Staples Distribution & Retail	2.76
Consumer Staples	Food Bevg Tobacco	-0.03
Industrial	Capital Goods	9.78
Industrial	Commercial & Professional Services	0.93
Industrial	Transportation	0.17
Information Technology	Software & Services	3.95
Information Technology	Semiconductors & Semiconductor Equipment	3.28
Information Technology	Technology Hardware & Equipment	1.13
Materials	Materials	7.47
Materials	Industrial Gases	0.60
Consumer Discretionary	Consumer Durables & Apparel	3.40
Consumer Discretionary	Automobiles & Components	2.97
Consumer Discretionary	Consumer Discretionary Distribution & Retail	0.59
Consumer Discretionary	Consumer Services	0.39
Utilities	Utilities	6.02
Communication Services	Telecommunication Services	3.53
Communication Services	Media & Entertainment	2.26
Energy	Oil & Gas Refining & Marketing	2.39
Energy	Energy	-0.01
Cash	Cash	2.09
Real Estate	Real Estate Management & Development	0.10

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the

Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 46%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 21%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes and covered call options for income generation purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the carbon exposure and sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF European Smaller Companies

Legal Entity Identifier : 1J9TCPIOPE5175IZP193

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 77% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund's benchmark changed during the reference period.

Until 31 July 2023, the Fund maintained a higher overall sustainability score than the EMIX European Smaller Companies (TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to 31 July 2023 was higher than the benchmark's weighted average score over the same period, based on month-end data. From 1 August 2023, the Fund maintained a higher overall sustainability score than the MSCI Europe Small Cap Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling five month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

The benchmarks (each of which is a broad market index) are not reference benchmarks for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

Until 31 July 2023, the Fund's sustainability score was 3.4% and the benchmark's sustainability score was 0.4%.

From 1 August 2023, the Fund's sustainability score up to the end of the reference period was 3.8% and the benchmark's sustainability score up to the end of the reference period was 0.4%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions

- Connectivity
- High Salaries
- Medicine
- Sanitation

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the benchmarks by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the benchmarks in Schroders' proprietary tool over a rolling six month period and five month period respectively, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 77% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	77
Jan 2022 - Dec 2022	74

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	3.7	0.4
Jan 2022 - Dec 2022	1.4	0.4

The Fund's benchmark changed during 2023.

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one

or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included: Schroders exclusions regarding:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including biodiversity challenges in the Energy sector, and climate & Net Zero commitments for held companies within the Utilities sector. These engagements related to PAIs 7 (Negatively affecting biodiversity-sensitive areas) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

Engagement Theme	# Issuers
Corporate Governance	10
Climate Change	9
Human Capital Management	3
Diversity and Inclusion	2
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
SPIRE HEALTHCARE GROUP PLC ORDINARY 1P	Health Care	4.32	United Kingdom
ZEAL NETWORK SE NPV	Consumer Discretionary	4.08	Germany
HELLOFRESH SE NPV	Consumer Staples	3.73	Germany
BANK OF IRELAND GROUP PLC NPV	Financial	3.71	Ireland
BEFESA SA NPV 144A / REGS	Industrial	3.58	Spain
ELEMENTIS PLC ORDINARY 5P	Materials	3.55	United Kingdom
DOVALUE SPA NPV REGS / 144A	Financial	3.52	Italy
MONTANA N AG Regs	Industrial	3.44	Germany

CRANSWICK PLC ORDINARY 10P	Consumer Staples	2.84	United Kingdom
MEYER BURGER TECHNOLOGY AG CHF0.05	Information Technology	2.55	Switzerland
LU-VE SPA	Industrial	2.52	Italy
RECORDATI SPA EUR0.125	Health Care	2.47	Italy

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. Until 31 July 2023, the Fund maintained a higher overall sustainability score than the EMIX European Smaller Companies (TR) Index and from 1 August 2023 the Fund maintained a higher overall sustainability score than the MSCI Europe Small Cap Index, and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this

by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 77% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 35% was invested in sustainable investments with an environmental objective and 42% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	12.06
Industrial	Commercial & Professional Services	6.53
Industrial	Financial Services	3.14
Industrial	Transportation	2.15
Consumer Discretionary	Consumer Services	7.55
Consumer Discretionary	Consumer Discretionary Distribution & Retail	6.28
Consumer Discretionary	Consumer Durables & Apparel	4.13
Financial	Banking	7.15
Financial	Financial Services	5.64
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	5.59
Health Care	Health Care Equipment & Services	4.61
Consumer Staples	Consumer Staples Distribution & Retail	4.49
Consumer Staples	Food, Beverage & Tobacco	2.84
Consumer Staples	Household & Personal Products	2.07
Information Technology	Semiconductors & Semiconductor Equipment	4.78
Information Technology	Software & Services	2.02
Information Technology	Technology Hardware & Equipment	1.96
Materials	Materials	6.66
Communication Services	Media & Entertainment	4.43
Utilities	Utilities	2.37
Energy	Oil & Gas Equipment & Services	2.35
Cash	Cash	1.21

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to

economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

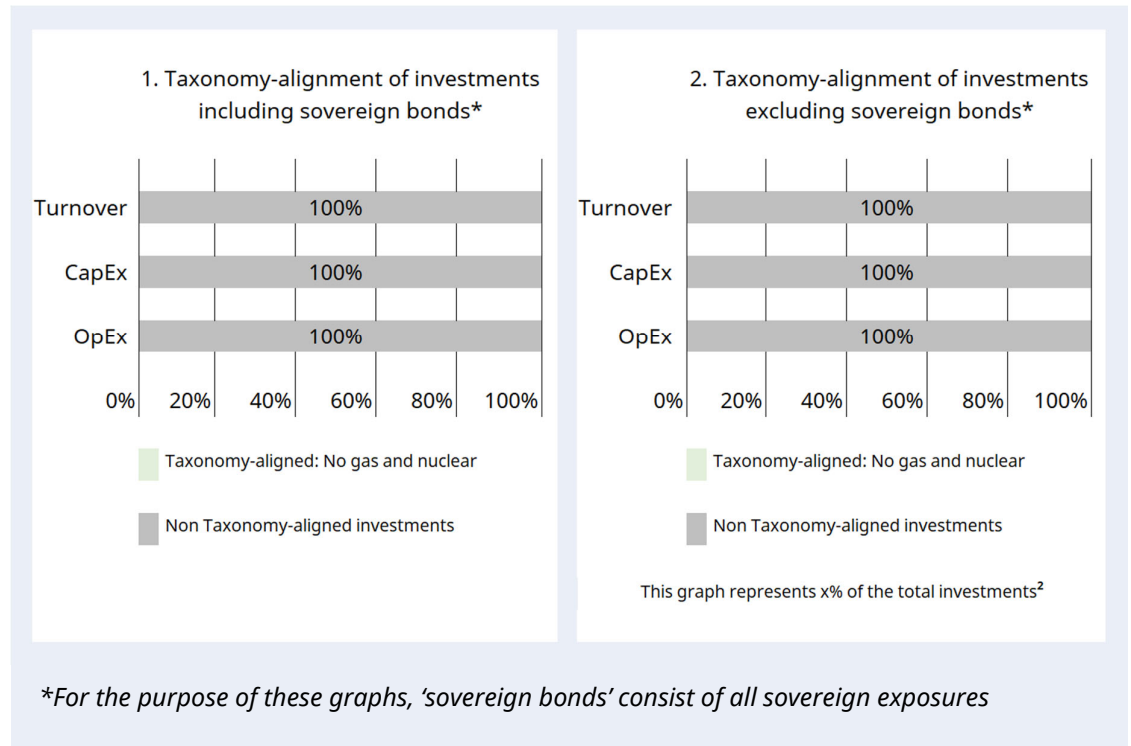

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 35%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 42%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Product Name : Schroder ISF European Special Situations
Legal Entity Identifier : KV1VJCZ9TY7EN2E4WH87

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Europe Net TR Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.8% and the benchmark's sustainability score for the reference period was -5.2%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Training

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI Europe Net TR Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI Europe Net TR Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 68% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	68
Aug 2022 - Dec 2022	69

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	1.8	-5.2
Jan 2022 - Dec 2022	2.0	-8.1

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Training: the estimated societal benefit associated with a more highly skilled workforce, both to the company and society. Assigned based on company spending on employee training.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of

themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding

Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Schroders exclusions regarding:
 - Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
 - UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
 - Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including biodiversity challenges in the Chemicals sector, and climate & Net Zero commitments for held companies within the Industrials sector. These engagements related to PAIs 7 (Negatively affecting biodiversity-sensitive areas) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of

investee company and Share of non-renewable energy consumption and production.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

Engagement Theme	# Issuers
Climate Change	18
Corporate Governance	9
Natural Capital and Biodiversity	5
Human Rights	5
Diversity and Inclusion	3
Human Capital Management	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
RELX PLC ORDINARY 14.4397P	Industrial	5.92	United Kingdom
ASML HOLDING NV EUR0.09 (POST SPLIT)	Information Technology	4.77	Netherlands

NOVO NORDISK CLASS B	Health Care	2.75	Denmark

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment

Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a higher overall sustainability score than the MSCI Europe Net TR Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 68% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 35% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	29.05
Industrial	Commercial & Professional Services	14.75
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	10.48
Health Care	Health Care Equipment & Services	9.21
Information Technology	Semiconductors & Semiconductor Equipment	13.09
Information Technology	Technology Hardware & Equipment	3.63
Materials	Materials	7.11
Consumer Discretionary	Consumer Durables & Apparel	1.89
Consumer Discretionary	Automobiles & Components	1.57
Consumer Staples	Food, Beverage & Tobacco	3.29
Cash	Cash	3.03
Financial	Banking	2.89

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 35%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 34%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF European Sustainable Equity
Legal Entity Identifier : 5493009GLO7HFGVW9C92

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 66% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Europe (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 3.0% and the benchmark's sustainability score for the reference period was -5.2%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Contraception
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI Europe (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI Europe (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 66% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 50% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	66
Aug 2022 - Dec 2022	69

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	3.0	-5.2
Jan 2022 - Dec 2022	3.0	-8.1

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of

contraceptives. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Schroders exclusions regarding:
 - Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
 - UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
 - Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders’ proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including biodiversity challenges in the Energy sector, and climate & Net Zero commitments for held companies within the Utilities sector. These engagements related to PAIs 7 (Negatively affecting biodiversity-sensitive areas) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data

evolves.

Engagement Theme	# Issuers
Climate Change	33
Corporate Governance	24
Natural Capital and Biodiversity	10
Human Capital Management	7
Human Rights	7
Diversity and Inclusion	6

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
SANOFI EUR2	Health Care	3.96	United States
NESTLE SA CHF0.10 (REGISTERED)	Consumer Staples	3.67	United States
SAP SE NPV	Information Technology	3.41	Germany

INTESA SANPAOLO SPA EUR0.52	Financial	2.79	Italy
STANDARD CHARTERED PLC ORDINARY USD0.50	Financial	2.73	United Kingdom
ENERGIAS DE PORTUGAL SA EUR1	Utilities	2.67	Portugal
NOVARTIS AG CHF0.50 (REGISTERED)	Health Care	2.66	Switzerland
ASM INTERNATIONAL NV EUR0.04	Information Technology	2.62	Netherlands
BEIERSDORF AG	Consumer Staples	2.58	Germany
SSE PLC ORDINARY 50P	Utilities	2.45	United Kingdom
STELLANTIS NV EUR0.01	Consumer Discretionary	2.39	United States
HISCOX LIMITED ORDINARY 6.5P	Financial	2.39	United Kingdom
NOVO NORDISK CLASS B	Health Care	2.38	Denmark

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest

investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a higher overall sustainability score than the MSCI Europe (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 66% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 46% was invested in sustainable investments with an environmental objective and 20% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	12.15
Financial	Insurance	5.43
Financial	Financial Services	2.02
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	11.39
Health Care	Health Care Equipment & Services	3.10
Consumer Staples	Household & Personal Products	6.17
Consumer Staples	Food, Beverage & Tobacco	4.65
Consumer Staples	Consumer Staples Distribution & Retail	2.90
Industrial	Capital Goods	10.50
Industrial	Commercial & Professional Services	2.91
Information Technology	Software & Services	4.06
Information Technology	Semiconductors & Semiconductor Equipment	3.87
Information Technology	Technology Hardware & Equipment	1.03
Consumer Discretionary	Consumer Durables & Apparel	3.79
Consumer Discretionary	Automobiles & Components	2.39
Consumer Discretionary	Consumer Services	1.65
Consumer Discretionary	Consumer Discretionary Distribution & Retail	0.85
Materials	Materials	6.49
Utilities	Utilities	5.12
Communication Services	Media & Entertainment	2.57
Communication Services	Telecommunication Services	2.29
Cash	Cash	2.55
Energy	Oil & Gas Refining & Marketing	2.11

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

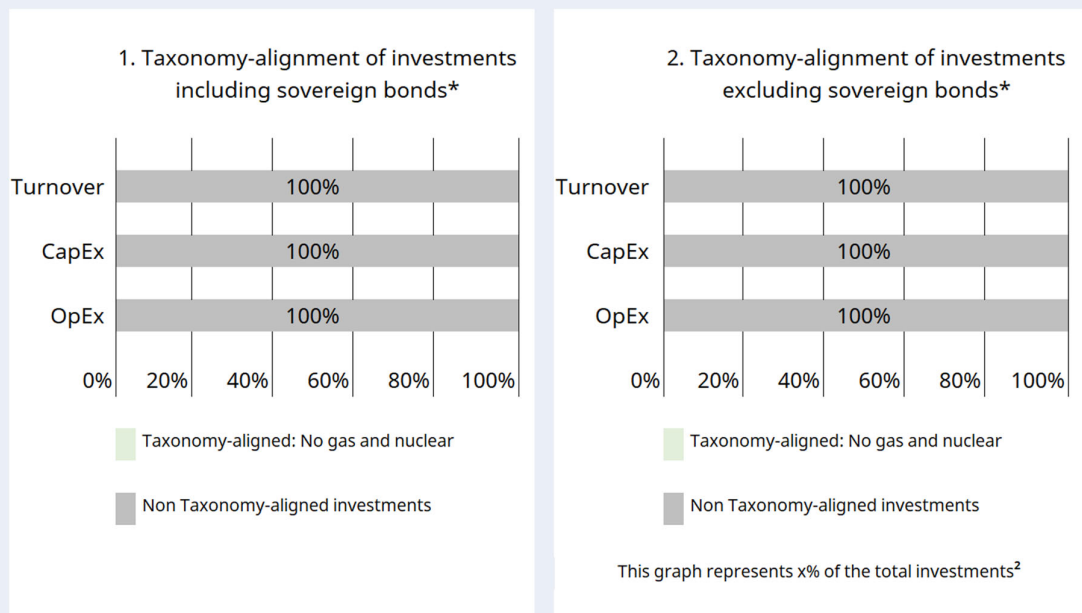

Taxonomy-aligned activities are expressed as a share of:

- **turnover**
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures*

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 46%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 20%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product Name: Schroder ISF Global Cities
Legal Entity Identifier: 1D8UMR1OQ0TSCJYQ0716

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 15%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> with a social objective	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 83%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

Until 30 June 2023 the Fund invested at least 75% of its assets, and from 1 July 2023 at least 90% of its assets in real estate companies worldwide that contributed towards more environmentally resilient and innovative cities and infrastructure. The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which was cash.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

• *How did the sustainability indicators perform?*

The Fund invested 98% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used a combination of a revenue-based approach in this assessment and specific sustainability key performance indicators to assess the investment's contribution to an environmental and/or social objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the contribution at an investee company level. In the first stage of the investment process, the Investment Manager evaluated companies based on the locations of their assets. This focused on filtering for companies that have those assets generating revenue from rents in cities that are considered highly connected, innovative, and environmentally resilient. In the second stage of the investment process, the Investment Manager used a proprietary sustainability tool which rates companies based on their treatment of key stakeholders, including communities and the environment. Examples of the indicators included, but were not limited to, GHG reduction targets, employee fatality rates, board independence and carbon intensity. Over 50% of companies in the investment universe were excluded during the first stage due to not having sufficient exposure to the most sustainable and innovative global cities. In addition, over 25% of companies in the investment universe were excluded due to not achieving the minimum threshold based on the scoring from this proprietary sustainability tool.

For example, the Fund invested in a diversified Asian property company that when developing new buildings had begun to use leftover concrete as a way to reduce the carbon impact of the buildings. Most of a building's carbon impact over 60 years comes from the materials used to build it, so they partnered with a specialist company to reduce this. This company is aligned with SDG 11 Sustainable Cities and Communities, ensuring that urbanisation can be done in a way that limits the impact on the environment.

The Investment Manager encouraged companies to join GRESB, a benchmark which has been set up specifically for the real estate sector. GRESB gives access to vital information about submitting member companies, such as, greenhouse gas emissions, energy or water use. This information can be carefully monitored and used to hold companies accountable for their actions. GRESB is used within the second stage of the investment process, around half of the company's scorecard is derived from GRESB metrics which allows the Investment Manager to gauge the performance credentials of each company's assets

allowing it to append a risk score.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	98
Jan 2022 - Dec 2022	98

GHG reduction targets

This table details the percentage of equity holdings that had GHG reduction targets, a constituent of the Environmental part of the proprietary sustainability score.

Date	Equity Holdings (%)
31 Dec 2023	89
31 Dec 2022	93

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portfolio, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions. Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portfolio. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition, the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: [Link](#)

<https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023, Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through the Schroders proprietary tool, the scoring for which was used to screen the investment universe and to provide the maximum quantum that can be invested in each company. For example, in assessing an issuer's overall environmental

score, PAIs 1, 2, 3, 4, 5 and 6 were included. In assessing an issuer's overall social score, PAIs 12 and 13 were included.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with an investee company on their commitment to mitigating climate change, which relates to PAIs 1, 2 and 3.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	25
Corporate Governance	12
Human Capital Management	3
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
REXFORD INDUSTRIAL REALTY IN REIT USD0.01	Real Estate	5.12	United States
EQUINIX INCORPORATED REIT USD0.001	Real Estate	4.98	United States

MITSUBISHI ESTATE COMPANY LIMITED NPV	Real Estate	2.76	Japan
REGENCY CENTERS CORPORATION REIT USD0.01	Real Estate	2.69	United States
TERRENO REALTY CORPORATION REIT USD0.01	Real Estate	2.61	United States
PROLOGIS INCORPORATED REIT USD0.01	Real Estate	2.42	United States
HEALTHPEAK PROPERTIES INCORPORATED USD1	Real Estate	2.40	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

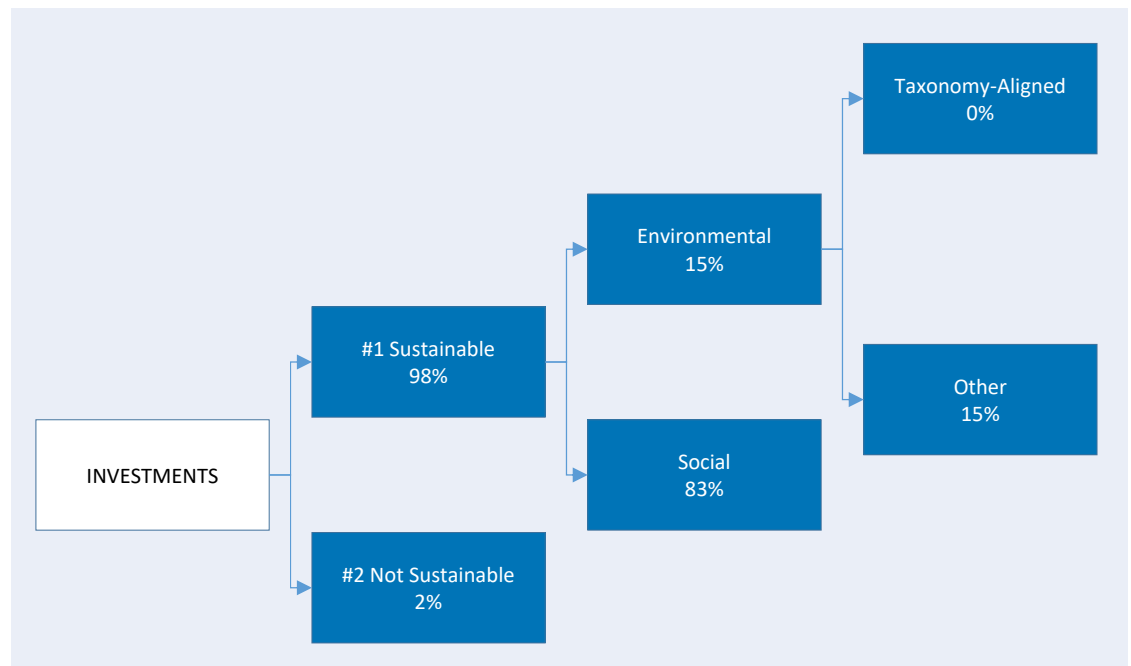

• What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in real estate companies worldwide that contributed towards more environmentally resilient and innovative cities and infrastructure.

The Fund invested 98% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. Within this, 15% was invested in sustainable investments with an environmental objective and 83% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

#1 Sustainable covers sustainable investments with environmental or social objectives
#2 Not sustainable includes investments which do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Real Estate	Equity Real Estate Investment Trusts (REITs)	80.62
Real Estate	Real Estate Management & Development	14.61
Cash	Cash	1.84
Information Technology	Software & Services	1.59
Communication Services	Telecommunication Services	1.34

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

greenhouse gas emission levels corresponding to the best performance.

• How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 15%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 83%.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

Minimum safeguards were applied where relevant to investments by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction, which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social

and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective by the Fund were the following:

- Until 30 June 2023 the Fund invested at least 75% of its assets, and from 1 July 2023 at least 90% of its assets in real estate companies worldwide that contributed towards more environmentally resilient and innovative cities and infrastructure.
- The Fund invested in companies that did not cause significant environmental or social harm.
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies.
- The Investment Manager engaged with issuers held in the portfolio and on average aimed to meet or speak with company management once a year. During these meetings sustainability topics were regularly discussed alongside business trends and financial performance.
- During 2023, the Investment Manager conducted 41 dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to climate change which includes building efficiency and emissions and corporate governance including remuneration and independence.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

• How does the reference benchmark differ from a broad market index?

This question is not applicable.

• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Climate Change Equity
Legal Entity Identifier : TA82RIONRIZRTKERSH09

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 63% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall level of avoided emissions than the MSCI All Country World (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's average level of avoided emissions during the reference period, based on quarterly-end data, was higher than the benchmark's overall level of avoided emissions over the same period. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

Avoided emissions are measured by Schroders' proprietary tool that provides an estimate of the future emissions saved indirectly by companies' products and services through the substitution of high carbon activities with lower carbon alternatives. It does this by identifying certain carbon-avoiding activities and industries that if adopted would contribute to reducing economy-wide emissions. Schroders' proprietary tool uses third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. The level of avoided emissions of the Fund is the aggregate avoided emissions of all issuers in the Fund's portfolio covered by Schroders' proprietary tool. Avoided emissions are calculated per million dollars of investment and expressed as tons CO₂e / \$M investment.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Disclaimer: Certain information ©2022 MSCI ESG Research LLC. Reproduced by permission

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's level of avoided emissions for the reference period was 202 tCO₂e/\$M and the benchmark's level of avoided emissions for the reference period was 34 tCO₂e/\$M.

The Investment Manager monitored compliance with the characteristic to maintain a higher overall level of avoided emissions than the MSCI All Country World (Net TR) Index by reference to the average avoided emissions of the Fund compared against the average avoided emissions of the MSCI All Country World (Net TR) Index during the reference period, based on quarter-end data.

The Investment Manager invested 63% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 40% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	63
Jan 2022 - Dec 2022	52

Avoided emissions

This table details the Fund's and benchmark's level of avoided emissions, year on year.

Period	Fund (tCO ₂ e/\$M)	Benchmark (tCO ₂ e/\$M)
Jan 2023 - Dec 2023	202	34
Jan 2022 - Dec 2022	207	10

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

For 2022 the avoided emissions value was calculated as at the end of the reference period. For 2023 and future years the value is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse

• How did the sustainable investments that the financial product partially made not cause

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these

companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors

differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

Schroders exclusions regarding

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

The Fund's exclusions regarding:

- Fossil fuels: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production). The Fund did not invest in companies on the Carbon Underground 200 list or companies with significant exposure to fossil fuels defined as those with 5% or more of their revenues coming from fossil fuel extraction and production.

During the reference period, PAIs were also considered through integration in the investment process.

The Fund considered climate change criteria at the stock level as part of the sustainability assessment in the investment process over the period. This covered greenhouse gas emissions, carbon footprint, greenhouse gas intensity of investment companies: PAI 1,2 & 3.

As part of our analysis, we considered how a firm manages its environmental footprint (including its impact on the climate), as well as its potential exposure to the effects of long-term climate change. While no single climate change metric determined the overall assessment of a company's environmental management score, the Fund evaluated a variety of different metrics – from both internal and external data sources (including a Schroders' proprietary tool) – to determine whether a company was adequately managing its climate and environmental risks.

PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were considered as part of our investment process using data from a Schroders' proprietary tool.

All PAI indicators were monitored via Schroders' PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

During the reference period, we engaged with investee companies within our universe to understand how companies are responding to the challenges climate change may pose to their long-term financial position. In reference to PAI 1, 2, 3 & PAI 4 from Annex 1 Table 2, we are continuing our efforts to encourage companies to set clear emissions reduction targets for all three scopes of emissions and

where targets are already set, to confirm these targets are properly integrated into company remuneration policies.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	34
Corporate Governance	18
Natural Capital and Biodiversity	8
Human Rights	8
Human Capital Management	4
Diversity and Inclusion	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
MICROSOFT CORPORATION COMMON STOCK USD0.0000125	Information Technology	5.27	United States
ALPHABET INCORPORATED CL A NPV	Communication Services	4.42	United States

SSE PLC ORDINARY 50P	Utilities	1.96	United Kingdom

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall level of avoided emissions than the MSCI All Country World (Net TR) Index, and so the Fund's investments that were measured by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's overall level of avoided emissions (whether such individual investment had a high or low level). The percentage in #1 Aligned represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

Avoided emissions are measured by Schroders' proprietary tool that provides an estimate of the future emissions saved indirectly by companies' products and services through the substitution of high carbon activities with lower carbon alternatives. It does this by identifying certain carbon-avoiding activities and industries that if adopted would contribute to reducing economy-wide emissions. Schroders' proprietary tool uses third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The Fund invested 63% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 36% was invested in sustainable investments with an environmental objective and 27% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash and warrants, which was treated as neutral for sustainability purposes.

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	30.99
Industrial	Transportation	2.32
Industrial	Commercial & Professional Services	0.39
Information Technology	Semiconductors & Semiconductor Equipment	9.87
Information Technology	Software & Services	6.77
Information Technology	Technology Hardware & Equipment	6.74
Consumer Discretionary	Consumer Discretionary Distribution & Retail	5.00
Consumer Discretionary	Consumer Durables & Apparel	4.36
Consumer Discretionary	Automobiles & Components	3.52
Utilities	Utilities	7.73
Materials	Materials	4.76
Consumer Staples	Consumer Staples Distribution & Retail	3.28
Consumer Staples	Food, Beverage & Tobacco	1.21
Communication Services	Media & Entertainment	4.42
Financial	Insurance	2.56
Financial	Financial Services	0.74
Real Estate	Equity Real Estate Investment Trusts (REITs)	2.01
Cash	Cash	1.74
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	1.57

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 36%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 27%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash and warrants, which was treated as neutral for sustainability purposes.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the level of avoided emissions of the Fund when selecting the assets held by the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Climate Leaders

Legal Entity Identifier : 549300VTE2QMTP9FYD10

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 X No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invested in companies that have set targets in relation to the decarbonisation of their business consistent with limiting climate change to 1.5°C warming or less under the Paris Agreement.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 4.4% and the benchmark's sustainability score for the reference period was -2.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the MSCI All Country World (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI All Country World (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitored compliance with the characteristic to invest in companies that had set targets in relation to the decarbonisation of their business by reviewing the Fund's investments' specific scope 1 and 2 emissions reduction targets on a periodic basis. The Investment Manager drew information from company sustainability reports, company climate disclosure as reported by the Carbon Disclosure Project (CDP), the Science Based Targets Initiative (SBTi) and other third party data vendors in performing this review.

The Investment Manager invested 62% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 50% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	60

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	4.4	-2.9
Jan 2022 - Dec 2022	3.8	-4.6

Decarbonisation targets consistent with 1.5 degrees warming

Year on year, the Investment Manager monitored compliance with the characteristic to invest in companies that had set targets in relation to the decarbonisation of their business by reviewing the Fund's investments' specific scope 1 and 2 emissions reduction targets on a periodic basis.

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each

sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- **Avoided Emissions:** the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- **Connectivity:** the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- **High Salaries:** the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- **Medicine:** the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- **Water Access:** the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate

Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for

Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included: Schroders exclusions regarding:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

The Fund's exclusions regarding:

- Fossil fuels: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production). The Fund did not invest in any company directly involved in fossil fuels.

During the reference period, PAIs were also considered through the integration of the teams' sustainability assessment in our investment process.

The Fund considered climate change criteria at the stock level as part of the sustainability assessment in the investment process over the period. This covered greenhouse gas emissions, carbon footprint, greenhouse gas intensity of investment companies and energy consumption intensity per high impact climate sector investing in companies without carbon emission reduction initiatives (PAIs 1,2, 3, 6 & PAI 4 from Annex 1 Table 2).

As part of our analysis, we considered how a firm is managing its environmental footprint (including its impact on the climate), as well as how the company plans to reduce its GHG emissions. No single metric determined the overall assessment of a company's climate profile. The Fund evaluated a variety of different metrics – from both internal and external data sources (including Schroders' proprietary tool) – to determine whether a company is adequately managing its climate and environmental risks.

PAI 12 (unadjusted gender pay gap) and PAI 13 (board gender diversity) were considered as part of our good governance framework using data from our internal proprietary tool.

All PAI indicators were monitored via Schroders' PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

During the reference period, we engaged with investee companies within our universe to understand how companies are responding to the challenges climate change may pose to their long-term financial position. In reference to PAI 1, 2, 3, 5, 6 & PAI 4 from Annex 1 Table 2, we are continuing our efforts to encourage companies to set clear emissions reduction targets for all three scopes of emissions, including independent verification, and where targets are already set, to encourage integration of these targets into company remuneration policies.

For example, in reference to PAI 1,2, 3, 5 and 6, we engaged with a company in the healthcare sector to encourage increased procurement of renewable energy for electricity use on premises. We also engaged with the same company on linking climate targets with senior management incentives.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	26
Corporate Governance	18
Human Rights	7
Natural Capital and Biodiversity	6
Human Capital Management	5
Diversity and Inclusion	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
MICROSOFT CORPORATION COMMON STOCK USD0.0000125	Information Technology	4.84	United States
ALPHABET INCORPORATED-CL C NPV	Communication Services	4.14	United States
APPLE INCORPORATED COMMON STOCK NPV	Information Technology	3.41	United States
SCHNEIDER ELECTRIC SE EUR4	Industrial	3.05	United States
MASTERCARD INCORPORATED CLASS A COMMON STOCK USD0.0001	Financial	2.90	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation

• What was the asset allocation?

describes the share of investments in specific assets.

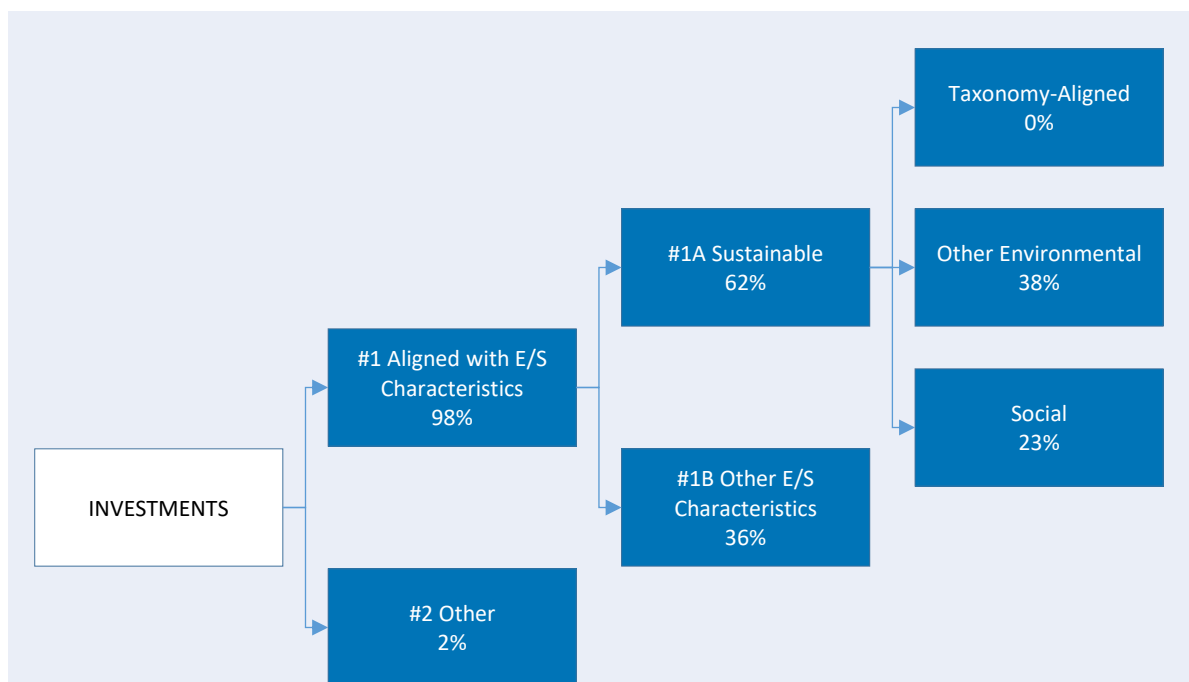

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 62% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 38% was invested in sustainable investments with an environmental objective and 23% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	12.17
Information Technology	Semiconductors & Semiconductor Equipment	7.11
Information Technology	Technology Hardware & Equipment	3.41
Industrial	Capital Goods	14.20
Financial	Banking	7.38
Financial	Financial Services	5.63
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	8.09
Health Care	Health Care Equipment & Services	3.76
Consumer Discretionary	Consumer Durables & Apparel	6.15
Consumer Discretionary	Consumer Discretionary Distribution & Retail	3.46
Consumer Discretionary	Automobiles & Components	1.93
Consumer Staples	Food, Beverage & Tobacco	3.26
Consumer Staples	Household & Personal Products	3.10
Consumer Staples	Consumer Staples Distribution & Retail	1.58
Communication Services	Media & Entertainment	4.60
Communication Services	Consumer Discretionary Distribution & Retail	1.93
Utilities	Utilities	4.49
Materials	Materials	3.20
Real Estate	Equity Real Estate Investment Trusts (REITs)	2.47
Cash	Cash	2.07

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

• **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 38%.

• **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 23%.

• **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager considered the decarbonisation targets set by companies when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Disruption
Legal Entity Identifier : 549300CM155Z70O45B78

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 61% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 4.0% and the benchmark's sustainability score for the reference period was -2.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Donations
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI AC World (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI AC World (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 61% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	61
Aug 2022 - Dec 2022	49

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	4.0	-2.9
Jan 2022 - Dec 2022	1.9	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based

on the monetary value of the sum donated;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain

(suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms'

breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 2, 3, 4, 5, 6 (Greenhouse gas emissions) and PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company’s overall environmental score. These PAIs, amongst others, are embedded within our investment process, informing our view on business risk and long-term growth drivers. PAI 13 (Board gender diversity) was also considered as part of our assessment of good governance, management quality and company strategy.

During the reference period, PAI 6, PAI 4 from Annex 1 Table 2 and PAI 14 from Annex 1 Table 3 (Number of identified cases of severe human rights issues and incidents) were considered relative to industry peers and poor performance issuers on these metrics/ indicators received higher risk scores in our assessment and formed the basis of our engagement activities.

PAIs were also considered post-investment through engagement where the investment manager

engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate commitments and biodiversity targets related to PAIs 6,7 and 8. For example, in reference to PAI 7 (Activities negatively affecting biodiversity-sensitive areas), we engaged with a company in the consumer sector on its contribution to single-use plastic. Over the period, our engagements covered a range of topics and related to PAIs 6, PAI 4 from Annex 1 Table 2 and PAI 14 from Annex 1 Table 3.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	41
Corporate Governance	11
Human Rights	11
Human Capital Management	10
Natural Capital and Biodiversity	8
Diversity and Inclusion	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
MICROSOFT CORPORATION COMMON STOCK USD0.0000125	Information Technology	6.59	United States
ALPHABET INCORPORATED CL A NPV	Communication Services	4.77	United States

SMC CORPORATION NPV	Industrial	1.50	Japan
FIRST SOLAR INCORPORATED COMMON STOCK USD0.001	Information Technology	1.32	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they

contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 61% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 29% was invested in sustainable investments with an environmental objective and 32% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	15.17
Information Technology	Semiconductors & Semiconductor Equipment	13.91
Information Technology	Technology Hardware & Equipment	9.04
Industrial	Capital Goods	11.21
Industrial	Commercial & Professional Services	1.77
Industrial	Transportation	1.28
Consumer Discretionary	Consumer Discretionary Distribution & Retail	6.10
Consumer Discretionary	Automobiles & Components	2.50
Consumer Discretionary	Consumer Durables & Apparel	2.00
Consumer Discretionary	Consumer Services	1.27
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	7.23
Health Care	Health Care Equipment & Services	3.19
Communication Services	Media & Entertainment	8.34
Communication Services	Consumer Discretionary Distribution & Retail	1.30
Financial	Financial Services	5.43
Financial	Banking	1.66
Financial	Insurance	0.17
Energy	Integrated Oil & Gas	2.27
Energy	Oil & Gas Equipment & Services	0.59
Real Estate	Equity Real Estate Investment Trusts (REITs)	1.64
Materials	Materials	1.17
Materials	Industrial Gases	0.22
Cash	Cash	1.32
Consumer Staples	Food, Beverage & Tobacco	0.98
Utilities	Utilities	0.27

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector

classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 29%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 32%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Emerging Market Opportunities
Legal Entity Identifier : JU8KRPJWHOMRDHDKVI22

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 54% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.4% and the benchmark's sustainability score for the reference period was -2.9%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Power Provision

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI Emerging Markets (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI Emerging Markets (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 54% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	54
Aug 2022 - Dec 2022	52

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	0.4	-2.9
Jan 2022 - Dec 2022	0.5	-3.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.
- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of

themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding

Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schroders proprietary tool is the main repository for the team's ESG analysis. Schroders proprietary tools provide a systematic framework for analysing a company's relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company's performance in specific areas.

PAIs 1,2,3,9,13 were specifically considered as part of the Schroders proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data was very limited so it was not widely used within Schroders proprietary tool but monitored instead at the overall portfolio level.

All PAI indicators were monitored via Schroders PAI dashboard. We reviewed the PAI data in the PAI

dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5, 13.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	43
Corporate Governance	15
Natural Capital and Biodiversity	7
Human Rights	6
Human Capital Management	5
Diversity and Inclusion	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	8.99	Taiwan
TENCENT HOLDINGS LIMITED HKD0.00002	Communication Services	6.30	China
SAMSUNG ELECTRONICS COMPANY LIMITED KRW100	Information Technology	5.92	South Korea
HDFC BANK LIMITED INR1	Financial	2.85	India
JD.COM INCORPORATED CLASS A NPV	Consumer Discretionary	2.49	China
FIRSTRAND LIMITED	Financial	2.25	South Africa
AIA GROUP LIMITED USD1	Financial	2.15	Hong Kong
SAMSUNG SDI COMPANY LIMITED KRW5000	Information Technology	2.13	South Korea
ITAU UNIBANCO HOLDING SA PREFERENCE SHARES NPV	Financial	2.10	Brazil
SHOPRITE HOLDINGS LIMITED ZAR0.01134	Consumer Staples	2.06	South Africa
AXIS BANK LIMITED INR2	Financial	1.96	India
CHINA PACIFIC INSURANCE GROUP COMPANY LIMITED H CNY1	Financial	1.95	China
JSC KASPI.KZ GDR-REG S-W/I NPV REGS	Financial	1.81	Kazakhstan
MIDEA GROUP CO LTD-A (CNY)	Consumer Discretionary	1.69	China
BANCO BRADESCO SA PREFERENCE NPV	Financial	1.64	Brazil

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

• What was the asset allocation?

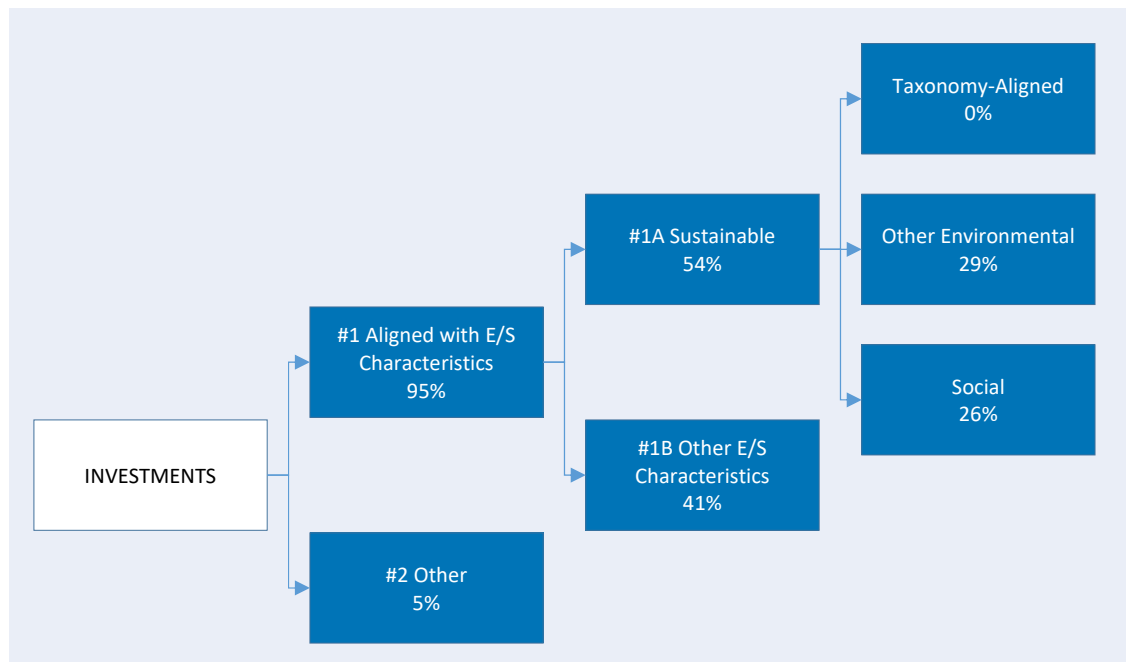

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 95%. The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 54% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 29% was invested in sustainable investments with an environmental objective and 26% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	20.89
Financial	Financial Services	6.46
Financial	Insurance	5.14
Information Technology	Semiconductors & Semiconductor Equipment	11.81
Information Technology	Technology Hardware & Equipment	11.06
Information Technology	Software & Services	0.16
Consumer Discretionary	Consumer Discretionary Distribution & Retail	6.05
Consumer Discretionary	Automobiles & Components	2.86
Consumer Discretionary	Consumer Durables & Apparel	2.40
Consumer Discretionary	Consumer Services	1.34
Communication Services	Media & Entertainment	6.49
Communication Services	Telecommunication Services	0.70
Industrial	Capital Goods	4.83
Industrial	Transportation	1.39
Industrial	Commercial & Professional Services	0.66
Cash	Cash	4.50
Materials	Materials	3.89
Consumer Staples	Consumer Staples Distribution & Retail	2.06
Consumer Staples	Food, Beverage & Tobacco	1.41
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	1.25
Health Care	Health Care Equipment & Services	0.98
Real Estate	Real Estate Management & Development	1.58
Utilities	Utilities	1.06
Energy	Oil & Gas Exploration & Production	0.89
Energy	Oil & Gas Refining & Marketing	0.14

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector

classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 29%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 26%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schrodgers' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schrodgers.com/m/3222ea4ed44a1f2c/original/schrodgers-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Emerging Markets Smaller Companies
Legal Entity Identifier : 549300F4FWZAJKH8YQ10

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets Small Cap (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 4.3% and the benchmark's sustainability score for the reference period was -1.3%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the MSCI Emerging Markets Small Cap (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI Emerging Markets Small Cap (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 62% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	59

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	4.3	-1.3
Jan 2022 - Dec 2022	1.9	-2.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in

which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain

(suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural

capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on

such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schroders proprietary tool is the main repository for the team's ESG analysis. Schroders proprietary tools provide a systematic framework for analysing a company's relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company's performance in specific areas.

PAIs 1,2,3,9,13 were specifically considered as part of the Schroders proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data was very limited so it was not widely used within Schroders proprietary tool but monitored instead at the overall portfolio level.

All PAI indicators were monitored via Schroders PAI dashboard. We reviewed the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5, 13.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	17
Corporate Governance	9
Human Capital Management	3
Natural Capital and Biodiversity	3
Human Rights	2
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
APOLLO HOSPITALS ENTERPRISE LIMITED INR5	Health Care	2.36	India
ECLAT TEXTILE COMPANY LIMITED TWD10	Consumer Discretionary	2.34	Taiwan
INTERNATIONAL CONTAINER TER SER INC PHP1	Industrial	2.19	Philippines
MPHASIS LIMITED INR10 (DEMAT)	Information Technology	2.19	India
CHROMA ATE INCORPORATED TWD10	Information Technology	2.10	Taiwan
NIEN MADE ENTERPRISE COMPANY LIMITED TWD10	Consumer Discretionary	2.04	Taiwan
CLICKS GROUP LIMITED ZAR0.01	Consumer Staples	1.93	South Africa
SINBON ELECTRONICS COMPANY LIMITED TWD10	Information Technology	1.91	Taiwan
GRUPO AEROPORTUARIO DEL PACIFICO SAB DE CV SERIES 'B' NPV	Industrial	1.89	Mexico
SUPREME INDUSTRIES LIMITED INR2	Materials	1.80	India
ALKEM LABORATORIES LTD INR2	Health Care	1.79	India
WONIK IPS COMPANY LIMITED KRW500	Information Technology	1.77	South Korea
MARICO LIMITED INR1	Consumer Staples	1.75	India
HANSOL CHEMICAL COMPANY LIMITED KRW5000	Materials	1.61	South Korea
CREDITACCESS GRAMEEN LTD INR10	Financial	1.55	India

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

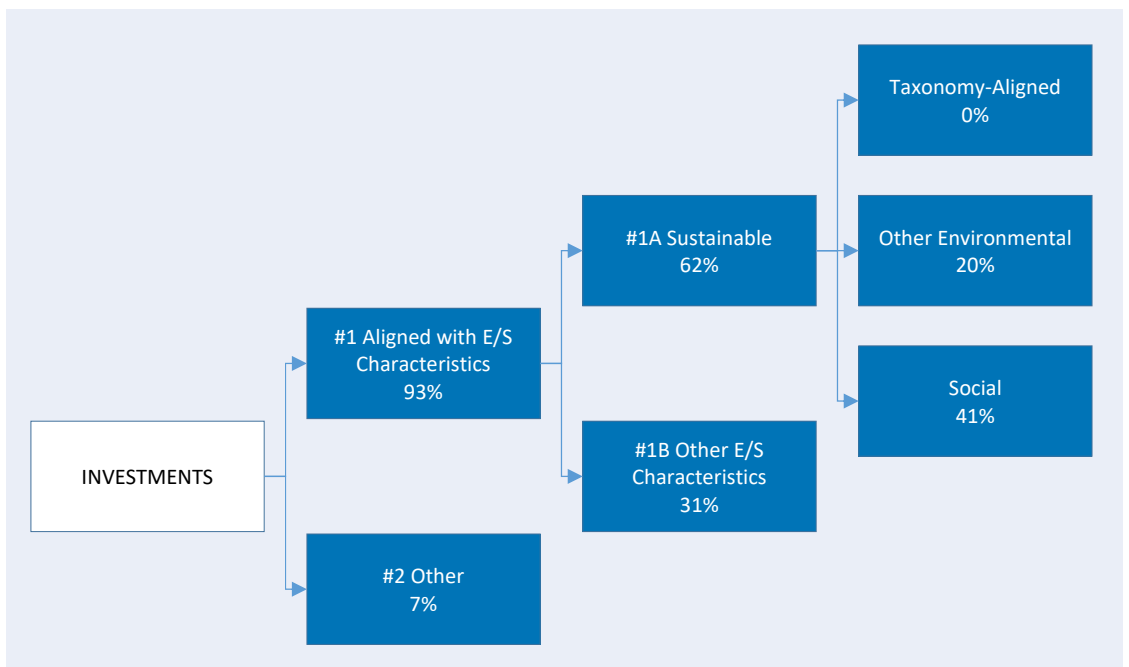

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 93%. The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets Small Cap (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 62% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 20% was invested in sustainable investments with an environmental objective and 41% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	10.44
Information Technology	Technology Hardware & Equipment	6.04
Information Technology	Software & Services	4.22
Industrial	Transportation	7.90
Industrial	Capital Goods	6.13
Industrial	Commercial & Professional Services	2.03
Financial	Banking	8.92
Financial	Financial Services	4.77
Financial	Insurance	0.39
Consumer Discretionary	Consumer Durables & Apparel	7.44
Consumer Discretionary	Consumer Discretionary Distribution & Retail	3.27
Consumer Discretionary	Consumer Services	1.95
Consumer Discretionary	Automobiles & Components	0.70
Consumer Staples	Food, Beverage & Tobacco	4.94
Consumer Staples	Consumer Staples Distribution & Retail	3.20
Consumer Staples	Household & Personal Products	0.88
Health Care	Health Care Equipment & Services	5.84
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	1.84
Materials	Materials	6.41
Real Estate	Real Estate Management & Development	4.34
Cash	Cash	2.87
Utilities	Utilities	2.17
Utilities	Gas Utilities	0.68
Communication Services	Media & Entertainment	1.16
Communication Services	Telecommunication Services	0.85
Energy	Oil & Gas Storage & Transportation	0.39
Energy	Oil & Gas Refining & Marketing	0.21

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 20%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 41%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

• *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable.

• *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

• *How did this financial product perform compared with the broad market index?*

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Energy Transition

Legal Entity Identifier : 549300IS8ME9YA6EM043

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 93%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

Until 30 June 2023 the Fund invested at least 75% of its assets, and from 1 July 2023 at least 90% of its assets in sustainable investments. The Fund invested at least 75% of its assets in companies worldwide that generated at least 50% of their revenue from activities that contributed towards the global transition towards lower-carbon and more sustainable sources of energy, such as lower-carbon energy production, distribution, storage, transport and associated supply chain, material provider and technology companies. The Fund also invested in other companies worldwide that generated a lower percentage of their revenue from these activities where the Investment Manager considered they are playing critical roles in the energy transition. All companies held by the Fund were deemed to be sustainable investments by the Investment Manager.

The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash and warrants used with the aim of managing the Fund more efficiently.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for the Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

• *How did the sustainability indicators perform?*

The Fund invested 93% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager assessed whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure contributed to an environmental objective. At least 75% of issuers generated at least 50% of their revenue from activities that contributed towards the global transition towards lower-carbon and more sustainable sources of energy. The Investment Manager manually added companies that met certain criteria with revenue exposure of below 50% to the Fund's investment universe.

Compliance with the minimum percentage in sustainable investments was monitored daily via the Investment Manager's automated compliance controls.

The Investment Manager used different sustainability indicators to measure the contribution at an investee company level. In particular, the Investment Manager used a quantitative screening tool to identify companies that derive a certain percentage of their revenues from their main activity that is associated with specific energy transition activities: including (1) renewable energy equipment; (2) renewable energy generation; (3) transmission and distribution; (4) batteries, storage and other equipment; (5) hydrogen; (6) electrical equipment and energy; and (7) clean mobility.

Subsequently, the Investment Manager used a number of indicators to derive a sustainability score out of ten for each company. Based on this score, each company was placed within one of the following categories: (1) Best-in-class, (2) Neutral and (3) Laggard. The indicators used to determine the score included but were not limited to metrics such as carbon intensity, board gender diversity and management remuneration. The information was drawn from company management meetings,

publicly available corporate information as well as the Investment Manager's internal proprietary tools. The Investment Manager invested 53% of the portfolio in issuers classified as Best-in-class and 40% of the portfolio in issuers classified as Neutral. These figures were calculated as the average of the reference period based on quarter-end data. The Fund did not invest in any companies classified as laggards during the reference period.

The Fund also applied certain exclusions, including companies deriving direct revenue from fossil fuels, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within the exclusionary criteria.

• **...and compared to previous periods?**

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	93
Jan 2022 - Dec 2022	92

Best-in-class

This table details the percentage of assets invested in Best-in-class and Neutral, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	Best-in-class – 53 Neutral – 40
Jan 2022 - Dec 2022	Best-in-class – 53 Neutral – 39

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portfolio, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights,

child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions. Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portfolio. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving direct revenue from fossil fuels. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

Schroders exclusions regarding

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

The Fund's exclusions regarding:

- Fossil fuels: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production). The Fund did not invest in any company directly involved in fossil fuels.

During the reference period, PAIs were also considered through the integration of the teams' proprietary sustainability assessment as part of the investment process.

The Fund considered climate change criteria in its analysis as part of the 'environmental management' component of the stakeholder analysis. This covered greenhouse gas emissions, avoided emissions, carbon footprint and greenhouse gas intensity of investment companies: PAI 1,2 & 3.

As part of our analysis, we considered how a firm is managing its environmental footprint (including its impact on the climate), as well as its potential exposure to the effects of long-term climate change. While no single climate change metric determined the overall assessment of a company's environmental management score, the Fund evaluated a variety of different metrics – from both internal and external data sources (including a Schroders' proprietary tool) – to determine whether a company is adequately managing its climate and environmental risks.

PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were considered as part of our investment process using data from a Schroders' proprietary tool.

All PAI indicators were monitored via Schroders' PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

During the reference period, we engaged with investee companies within our universe to understand how companies are responding to the challenges climate change may pose to their long-term financial position. In reference to PAI 1, 2, 3 & PAI 4 Annex 1 Table 2, we are continuing our efforts to encourage companies to set clear emissions reduction targets for all three scopes of emissions and where targets are already set, to confirm these targets are properly integrated into company remuneration policies.

Over the period, we also engaged with companies across the Chinese solar supply chain on the topic of labour management and supply chain traceability. Our engagements covered a range of topics most closely related to PAIs 10, 11 & PAI 14 from Annex 1 Table 3.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	17
Corporate Governance	6
Human Rights	3
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers. The investment manager meets with companies on a regular basis to discuss market dynamics, company fundamentals and sustainability issues. Alongside these regular company engagements, where sustainability is usually

discussed but not always the sole reason for contact, the investment manager also undertakes dedicated sustainability engagements in collaboration with the Sustainable Investment Team. These engagements are dedicated solely to ESG issues. The number of engagements in the table above refer to the dedicated sustainability engagements where sustainability issues are either the entire focus of the company meeting or discussed for a significant portion of the meeting.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
VESTAS WIND SYSTEMS DKK0.2	Industrial	5.61	Denmark
JOHNSON MATTHEY PUBLIC LIMITED COMPANY ORDINARY 1.101698P	Materials	3.96	United Kingdom
UMICORE SA NPV	Materials	3.91	Belgium
SOLAREGE TECHNOLOGIES INCORPORATED COMMON STOCK USD0.0001	Information Technology	3.72	United States
EDP RENOVAVEIS SA EUR5	Utilities	3.55	Spain
NEXANS SA EUR1	Industrial	3.35	France
ENPHASE ENERGY INC COMMON STOCK USD0.00001	Information Technology	3.34	United States
XINYI SOLAR HOLDINGS LIMITED HKD0.10	Information Technology	3.26	China
FIRST SOLAR INCORPORATED COMMON STOCK USD0.001	Information Technology	3.24	United States
REDEIA CORP SA	Utilities	3.03	Spain
HYDRO ONE LIMITED COMMON NPV	Utilities	2.91	Canada
SCHNEIDER ELECTRIC SE EUR4	Industrial	2.81	United States
NEOEN SA EUR2	Utilities	2.70	France
SAMSUNG SDI COMPANY LIMITED KRW5000	Information Technology	2.68	South Korea
PLASTIC OMNIUM SA EUR0.06	Consumer Discretionary	2.58	France

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• *What was the asset allocation?*

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in companies worldwide that generated a certain percentage of their revenue (for 75% of the assets of the Fund, at least 50%) from activities that contributed towards the global transition towards lower-carbon sources of energy, such as lower-carbon energy production, distribution, storage, transport and associated supply chain, material provider and technology companies or are playing critical roles in the energy transition.

The Fund invested 93% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. All the sustainable investments had an environmental objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and warrants used with the aim of managing the Fund more efficiently.

• *In which economic sectors were the investments made?*

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	31.77
Industrial	Commercial & Professional Services	0.94
Utilities	Utilities	20.67
Utilities	Financial Services	1.34
Information Technology	Semiconductors & Semiconductor Equipment	16.21
Information Technology	Technology Hardware & Equipment	5.43
Materials	Materials	12.64
Cash	Cash	6.57
Consumer Discretionary	Automobiles & Components	3.58
Consumer Discretionary	Consumer Durables & Apparel	0.85

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

greenhouse gas emission levels corresponding to the best performance.

• **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

All sustainable investments made by the Fund had environmental objectives that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

There were no sustainable investments with a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and warrants used with the aim of managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social

and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to attain the sustainable investment objective of the Fund were the following:

- Until 30 June 2023 the Fund invested at least 75% of its assets, and from 1 July 2023 at least 90% of its assets, in companies that generated a certain percentage of revenue from activities that contributed towards the global transition towards lower-carbon sources of energy.
- The Fund invested in companies that did not cause significant environmental or social harm.
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies.
- The Investment Manager engaged with issuers held in the portfolio and on average aimed to meet or speak with company management once every six months. During these meetings sustainability topics were regularly discussed alongside business trends and financial performance.
- During 2023 the Investment Manager conducted 27 dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to climate change, human rights and corporate governance.
- In addition, the Investment Manager worked on a mass engagement project during the reference period which encouraged companies within the portfolio and the wider investible universe to set net zero emissions transition plans. This project will continue into the next reference period.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

• How does the reference benchmark differ from a broad market index?

This question is not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This question is not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name : Schroder ISF Global Smaller Companies

Legal Entity Identifier : EENRPPPON8BRF9XDB514

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the S&P Developed Small Cap (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2023 to 31 December 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.0% and the benchmark's sustainability score for the reference period was -0.2%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- High Salaries
- Medicine
- Sanitation
- Water Access

The Investment Manager monitored compliance with the characteristic to maintain a higher overall

sustainability score than the S&P Developed Small Cap (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the S&P Developed Small Cap (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 62% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	58

Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2023 - Dec 2023	2.0	-0.2
Jan 2022 - Dec 2022	1.1	-0.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such

products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue;

- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. Until July 2023, the Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to the list during this period.

- From July 2023, the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain

(suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.

- The Fund also applied certain other exclusions.

- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, until July 2023 the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders may have applied certain exceptions to this list.

From July 2023 the Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' 'global norms' breach list covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural

capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Until July 2023, we used a list of companies that were deemed to violate the UN Global Compact (UNGC) Principles, as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is a UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

From July 2023, companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on

such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the investment process, Schroders' proprietary tool were used which incorporates several PAIs as a component of its scoring methodology. Schroders' proprietary model which generates a single overall score and individual component scores that reflect the positive and negative social and environmental impacts of a company. For example, in assessing an issuer's overall environmental score, factors related to PAIs 1, 2, and 3 were included in the SustainEx score. Our fundamental research has also played an important role in considering PAIs, from analysing company reports to meeting with management. For example, corporate governance structures and practises have been assessed as part of our fundamental research, related to PAIs 12 and 13.

All PAI indicators were monitored via Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the investment manager

engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on their plans around and disclosure of net zero targets which relates to PAIs 1, 2 and 3. For example, we engaged with a holding to encourage them to align their targets to 1.5 degrees and to use the SBTi initiative. The company subsequently updated us they had submitted their SBTi submission. Other topics discussed with investee companies included board gender diversity, related to PAI 13. For example, as part of a broader engagement with a holding around improvements to governance structures and practises, we encouraged the company to increase the gender diversity of their board.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	37
Corporate Governance	34
Human Capital Management	7
Diversity and Inclusion	5
Natural Capital and Biodiversity	5
Human Rights	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2023 to 31 Dec 2023**

Largest Investments	Sector	% Assets	Country
ICU MEDICAL INCORPORATED COMMON STOCK USD0.10	Health Care	1.56	United States
LIVERAMP HOLDINGS INCORPORATED COMMON STOCK USD0.10	Information Technology	1.50	United States
MASIMO CORPORATION COMMON STOCK USD0.001	Health Care	1.48	United States
ASSURANT INCORPORATED COMMON STOCK USD0.01	Financial	1.37	United States
RENTOKIL INITIAL ADS EACH REPRESENT 5 ORD	Industrial	1.36	United Kingdom
KEMPER CORPORATION COMMON STOCK USD0.10	Financial	1.26	United States
BWX TECHNOLOGIES INCORPORATED COMMON STOCK USD0.01	Industrial	1.16	United States
HEXCEL CORPORATION COMMON STOCK NPV	Industrial	1.14	United States
STERICYCLE INCORPORATED COMMON STOCK USD0.01	Industrial	1.12	United States
BALCHEM CORPORATION COMMON STOCK USD0.0667	Materials	1.11	United States
KIRBY CORPORATION COMMON STOCK USD0.10	Industrial	1.08	United States
ASGN INCORPORATED COMMON STOCK USD0.01	Industrial	1.08	United States
PRIMORIS SERVICES CORPORATION COMMON STOCK USD0.0001	Industrial	1.07	United States
ALBANY INTERNATIONAL CORPORATION CLASS 'A' COMMON STOCK USD0.001	Industrial	1.05	United States
ARAMARK COMMON STOCK USD0.01	Consumer Discretionary	1.05	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

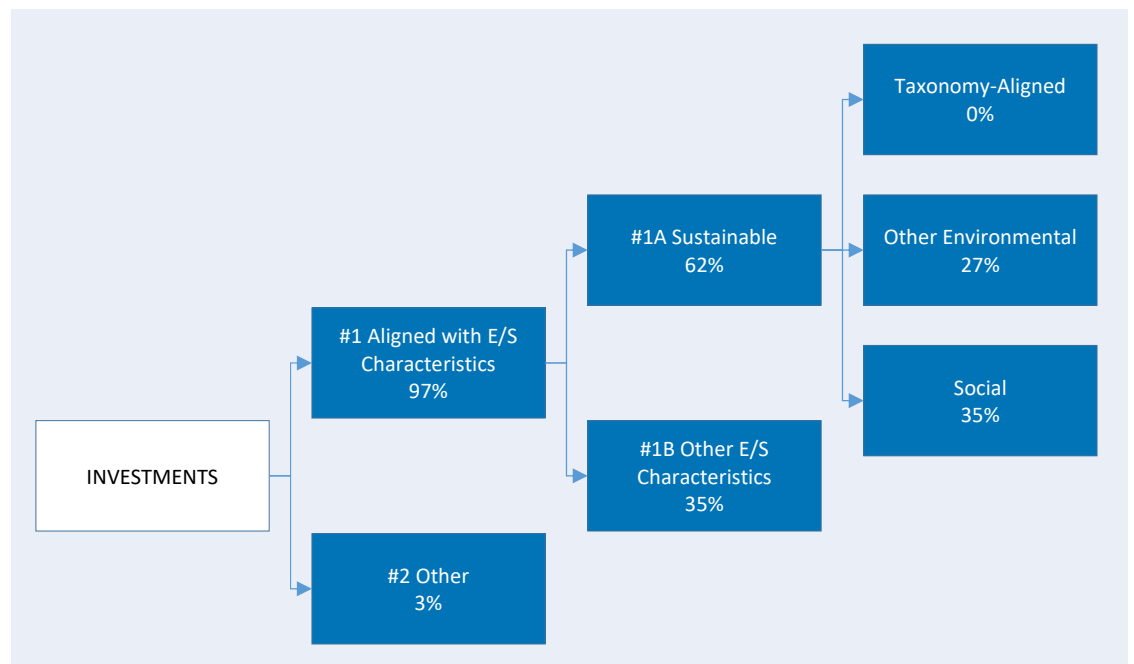

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a higher overall sustainability score than the S&P Developed Small Cap (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of assets that

was invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 62% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 27% was invested in sustainable investments with an environmental objective and 35% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	15.33
Industrial	Commercial & Professional Services	7.69
Industrial	Transportation	1.30
Information Technology	Software & Services	6.58
Information Technology	Technology Hardware & Equipment	5.56
Information Technology	Semiconductors & Semiconductor Equipment	3.16
Health Care	Health Care Equipment & Services	9.33
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	5.73
Health Care	Financial Services	0.22
Financial	Insurance	4.96
Financial	Financial Services	4.24
Financial	Banking	3.01
Consumer Discretionary	Consumer Durables & Apparel	3.65
Consumer Discretionary	Consumer Discretionary Distribution & Retail	3.31
Consumer Discretionary	Automobiles & Components	2.29
Consumer Discretionary	Consumer Services	1.35
Materials	Materials	6.23
Consumer Staples	Food, Beverage & Tobacco	2.39
Consumer Staples	Consumer Staples Distribution & Retail	1.75
Real Estate	Equity Real Estate Investment Trusts (REITs)	2.54
Real Estate	Real Estate Management & Development	1.11
Communication Services	Media & Entertainment	2.76
Cash	Cash	2.46
Energy	Oil & Gas Exploration & Production	1.00
Energy	Oil & Gas Equipment & Services	0.52
Energy	Oil & Gas Refining & Marketing	0.45
Utilities	Gas Utilities	0.87
Utilities	Utilities	0.21

The list above represents the average of the Fund's holdings at each quarter-end during the reference

period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

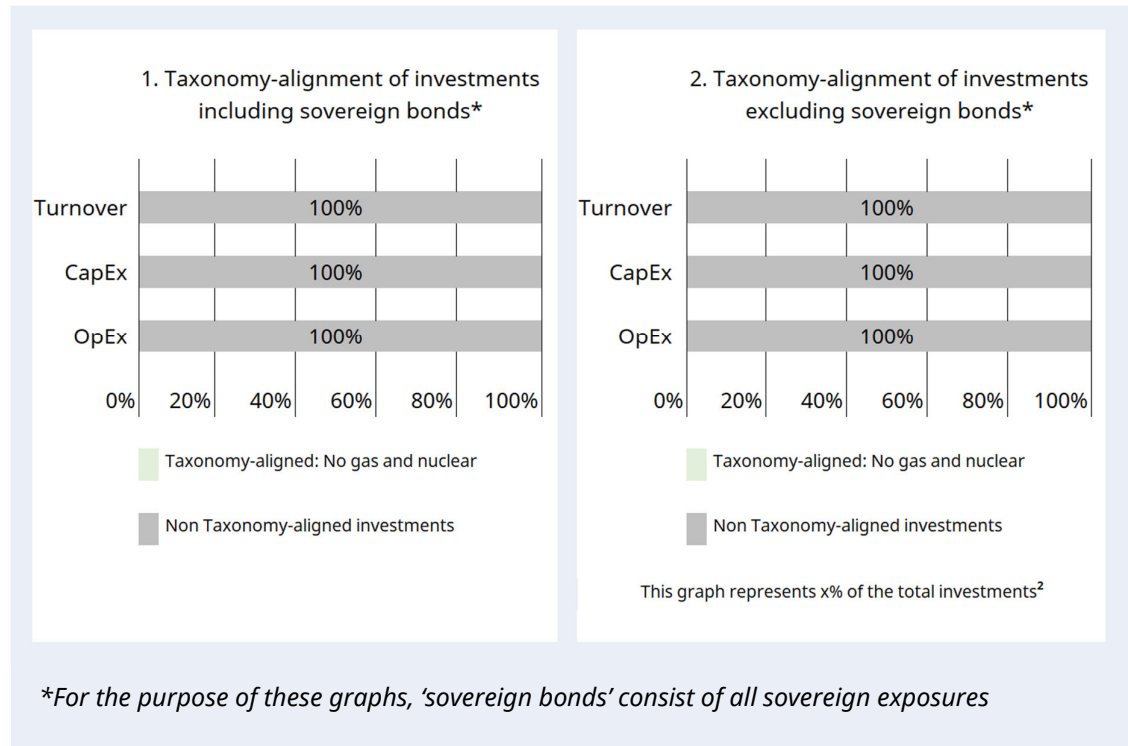

- **turnover** reflecting the share of revenue from green activities of investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities
