

A Distribution EUR Hedged | Data as at 31.12.2021

Fund objectives and investment policy

The fund aims to deliver an income of 7% per year by investing in equities or equity related securities of Asia-Pacific companies (excluding Japan). This is not guaranteed and could change depending on market conditions.

The fund has environmental and/or social characteristics within the meaning of Article 8 of Regulation (EU) 2019/2088 on Sustainability-related Disclosures in the Financial Services Sector (the "SFDR"). This means that the fund maintains a higher overall sustainability score than its sustainability benchmark based on the investment manager's rating system.

Relevant risks as associated with this Fund are shown overleaf and should be carefully considered before making any investment. For details of the fund's investment policy please refer to the fund's Key Investor Information Document (KIID).

Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

A Distribution EUR Hedged | Data as at 31.12.2021

5 year return of EUR 10.000

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

Risk considerations

Emerging Markets & Frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Maximiser funds: Derivatives are used to generate income (which is paid to investors) and to reduce the volatility of returns but they may also reduce fund performance or erode capital value.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Sustainability Risk Factor: The fund has environmental and/or social characteristics. This means it may have limited exposure to some companies, industries or sectors and may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria. Therefore, the fund may underperform other funds that do not apply similar criteria. The fund may invest in companies that do not reflect the beliefs and values of any particular investor.

Please see the KIID and Prospectus for a full list of risk considerations applicable to this fund.

Proprietary Sustainability Metrics %

Overall Impact

Data as at 31.12.2021

The fund's sustainability benchmark is MSCI AC Pacific ex JP High Dividend Yield

The Schroders Impact score is based on Schroders' proprietary tool, SustainEx™. SustainEx™ provides an estimate of the potential societal or environmental impact that may be created by the companies and other issuers in which the fund is invested. The result is expressed as a notional percentage (positive or negative) of sales of the relevant underlying companies and other issuers. For example, a SustainEx™ score of +2% would mean a company contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales.

We calculate SustainEx™ scores for companies and other issuers in the fund to arrive at the total fund score.

The "Overall Impact" shown is a measure of the fund's estimated impact compared to that of its benchmark, in each case calculated as a relative notional percentage as described above.

The "Impact on People" and "Impact on Planet" measure the fund's estimated underlying benefits and harms, as compared to its benchmark, in each case calculated as a relative notional percentage as described above.

Overall impact is a measure of the fund's impact compared to its benchmark.

Climate dashboard

Carbon Intensity

Tonnes of CO2 per \$mn sales

Fossil Fuel Exposures

Source: MSCI. Carbon Intensity is based on reported scope 1 & 2 emissions. Fossil Fuel Exposure charts for sub-funds that are categorised as Article 8 or Article 9 under SFDR apply a revenue-based exclusion on companies operating in the coal sector. Companies generating more than 10% of their revenue from thermal coal extraction and companies that generate more than 30% of their revenue from coal-fired power are systematically excluded. Some sub-funds apply a more stringent exclusion criterion. Any fund exposure to coal reflects investments in companies whose coal-related revenues are below the accepted threshold. Please refer to the fund sustainability disclosures for more details on exclusions.

Benchmark and corporate action information

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark.

The Benchmark performance is shown in the base currency of the fund. To enable comparison between the performance of this Hedged share class and the Benchmark, and to show the effect of the currency hedge, the equivalent unhedged base currency share class performance is also shown. The equivalent unhedged share class and benchmark will be blank if the inception date is different to the hedged share class inception date. On 28.03.2015, the index changed from MSCI AC Pacific ex Japan Net TR (converted in EUR) to MSCI AC Pacific ex Japan Net TR EUR Hedged. The full track record of the previous benchmark has been removed and replaced with the new one. The fund's performance should be assessed against the income target of 7% per year, and compared against the MSCI AC Pacific ex Japan (Net TR) index and the MSCI AC Pacific ex Japan High Dividend Yield (Net TR) index. The comparator benchmarks are only included for performance comparison purposes and do not have any bearing on how the investment manager invests the fund's assets. The fund's investment universe is expected to overlap materially with the components of the comparator benchmarks. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the comparator benchmarks. The investment manager will invest in companies or sectors not included in the comparator benchmarks. The income target has been selected because the investment manager deploys strategies that aim to deliver the level of income stated in the investment objective. The comparator benchmarks have been selected because the investment manager believes that the benchmarks are a suitable comparison for performance purposes given the fund's investment objective and policy. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund.

Source and ratings information

Source of all performance data, unless otherwise stated: Morningstar, bid to bid, net income reinvested, net of fees.

Schroders' Proprietary tools: Including SustainEx, may not cover all of the fund's holdings from time to time, in which case Schroders may use a range of alternative methods to assess the relevant holding. In addition, certain types of assets (such as cash and certain equivalent securities such as gilts) are treated as neutral and are therefore not considered by our proprietary tools. The SustainEx scores show month-end data. Where a fund maintains a higher overall sustainability score than its sustainability benchmark based on the investment manager's rating system, this means that the fund's weighted average score in SustainEx over the previous six month period will be higher than the benchmark's score in SustainEx over the same period, based on month-end data. Where a fund has different sustainability criteria (for example, it invests a minimum proportion of its assets in sustainable investments or maintains a positive absolute sustainability score), the fund's weighted average score in SustainEx is shown here for information and illustrative purposes only.

Impact scores: These are generated using Schroders' proprietary tool, SustainEx™, which provides an estimate of the potential social or environmental impact that a company or other issuer may create. It does this by using certain metrics with respect to that issuer and quantifying the positive and negative impacts of each of those metrics in economic terms to produce an aggregate measure. Not all of those metrics are represented in the impact scores on 'People' and 'Planet' and how those scores are generated may change over time. It utilises and is reliant on third party data (including third party estimates) as well as Schroders' own modelling assumptions, and the outcome differs from other sustainability tools and measures. Where SustainEx™ relies on data and estimates produced by third parties, Schroders seeks to ensure that such data and estimates are accurate, but Schroders cannot and does not warrant the accuracy, completeness and adequacy of such third party data and estimates. Like any model, SustainEx™ will evolve and develop over time as Schroders continues to assess, refine and add to the metrics and their relative contributions. Generating SustainEx™ scores involves an element of judgment and subjectivity across the different metrics chosen by Schroders, and accordingly Schroders does not accept any liability arising from any inaccuracy or omission in, or the use of or reliance on, SustainEx™ scores. As the model evolves, changes made to how metrics are applied may result in changes to the SustainEx™ score of any issuer and ultimately the overall fund/portfolio score. At the same time, of course, the issuer's SustainEx performance might improve or deteriorate.

MSCI ESG Research rating: Produced by MSCI ESG Research as of the "reporting date". MSCI ESG Research LLC's ("MSCI ESG") Fund Metrics and Ratings (the "Information") provide environmental, social and governance data with respect to underlying securities within more than 31,000 multi-asset class mutual funds and ETFs globally.
