

## Important Notes:

- Investment involves risks and BOCIP China Value Fund (the "Sub-Fund") may not be suitable for everyone. Past performance is not indicative of future performance. The Sub-Fund is subject to market and exchange rate fluctuations and to the risks inherent in all investments. Price of Units and the income (if any) generated from the Sub-Fund may go down as well as up. Investors could face no returns and/or suffer significant loss related to the investments. There is no guarantee in respect of repayment of principal.
- The key risks to which the Sub-Fund is subject to include: general investment risk, value stock risk, emerging market/People's Republic of China ("PRC") market risk, single country and concentration risk, equity market risk, risk associated with high volatility of the equity market in Mainland China, risk associated with regulatory/exchanges requirements/policies of the equity market in Mainland China, risks relating to investment in exchange traded funds ("ETFs"), investment in equity linked instruments ("ELIs"), risks associated with Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect (collectively "Shanghai and Shenzhen Connect"), PRC tax risk, currency hedged class risk, foreign exchange and RMB currency and conversion risks, risk in relation to distribution, cross-class liability risk, potential conflicts of interest and derivative instruments risk.
- Investing in emerging markets, such as the PRC, may involve increased risks and special considerations not typically associated with investment in more developed markets.
- The relevant rules and regulations on Shanghai and Shenzhen Connect are subject to change which may have potential retrospective effect. Each of Shanghai and Shenzhen Connect is subject to a set of Daily Quota, which does not belong to the Sub-Fund and can only be utilized on a first-come-first serve basis. Where a suspension in the trading through the programme is effected, the Sub-Fund's ability to invest in A shares or access the PRC market through the programme will be adversely affected. In such event, the Sub-Fund's ability to achieve its investment objective could be negatively affected.
- As the Sub-Fund may invest in A Shares through ELIs, the Sub-Fund is therefore exposed to the risks relating to investment in ELIs:
  - Credit risk: If any one of the ELIs issuers fails to perform its obligations under the ELIs, the Sub-Fund may suffer losses potentially equal to the full value of the instrument issued by the relevant issuer. Any loss would result in the reduction in the Net Asset Value of the Sub-Fund and impair the ability of the Sub-Fund to achieve its investment objective.
  - Illiquidity risk: There may not be an active market for those ELIs which are not listed or quoted on a market. Even if the ELIs are quoted, there is no assurance that there will be an active market for them. Therefore investment in ELIs can be highly illiquid.
  - Qualified foreign institutional investors ("QFII") risk: The Sub-Fund's exposure to the PRC market via ELIs depends on the ability of the QFII to buy and sell A Shares. The availability of QFII investment quota and any restrictions or any changes in the QFII laws and regulations may adversely affect the issuance of ELIs and impair the ability of the Sub-Fund to achieve its investment objective.
- The Sub-Fund is subject to PRC tax risk. There are risks and uncertainties associated with the current PRC tax laws, regulations and practice in respect of capital gains realised via Shanghai and Shenzhen Connect or ELIs on the Sub-Fund's investments in the PRC. Any future changes in the taxation policies in respect of QFIIs or the Sub-Fund's investment in A shares in the PRC will impact on the Sub-Fund's returns. It is possible that any future announcement by the PRC tax authority may subject the Sub-Fund to unforeseen tax obligations, which may have retrospective effect.
- The Manager will normally make distributions out of net income received or receivable. However, in the event that the net income is insufficient to pay the distributions that it declares, the Manager may also, in its absolute discretion, determine that distributions be paid out of capital, or the Manager may, in its discretion, pay distributions out of the gross income while charging/paying all or part of the fees and expenses to/out of capital, resulting in an increase in distributable income for the payment of distributions and therefore, the Sub-Fund may effectively pay distributions out of capital. This may reduce the capital available for investment in future and may constrain capital growth.
- Investors should be aware that in circumstances where distributions are paid out of capital or effectively out of capital, this amounts to a return or withdrawal of part of the amount investors originally invested or from any capital gains attributable to that original investment. Any distributions involving payment of distributions out of capital or payment of distributions effectively out of capital (as the case may be) may result in an immediate decrease in the Net Asset Value per Unit of the relevant class.
- The Manager will declare an indicative per annum distribution rate for the relevant class of Units at the beginning of each calendar year. As a whole, distributions paid in that year shall be no less than the indicative per annum distribution rate, any change of such rate will require no less than one (1) month's prior notice to Unitholders. The indicative per annum distribution rate each year may vary and may go up and down. The Manager has the sole and absolute discretion to determine or vary the frequency and dates for distributions.
- Please refer to the offering document of the Sub-Fund for further details including investment objectives and policies, charges and expenses, and risk factors (especially for the parts relating to the Shanghai and Shenzhen Connect, ELIs and QFII), before making any investment decision.

## BOCIP Asset Management Investment Funds

## BOCIP CHINA VALUE FUND

### INVESTMENT OBJECTIVES AND POLICIES

The BOCIP China Value Fund seeks to achieve long term capital growth by investing primarily in securities issued by or linked to companies which activities and business are closely related to the economy of the PRC.

The Manager will consider investment opportunities in all market capitalization ranges. The Manager would place particular emphasis on and will invest at least 70% of its non-cash assets in securities that are, in its opinion, with attractive values and investment in such securities will achieve the investment objectives of the Sub-Fund. Stock selection is based on "intrinsic valuation matrix" which seeks to identify companies with growth potentials, good fundamentals and/or attractive valuations. Fundamental factors may include business strategy, management strength and financial position. The Sub-Fund will mainly invest in Hong Kong-listed stocks, H shares, shares of red-chip companies (directly and/or indirectly through investments in SFC authorised collective investment schemes ("CISs") (including CISs managed by the Manager)) and/or ETFs listed on the Stock Exchange of Hong Kong Limited ("SEHK") (including ETFs managed by the Manager). The Sub-Fund may also invest (a) up to 20% of its Net Asset Value in A shares (i) directly through the Shanghai-Hong Kong Stock Connect and/or Shenzhen-Hong Kong Stock Connect; and/or (ii) indirectly through investment in ELIs (which may take the form of notes, contracts or other structures) issued by institutions or their affiliates with QFII status in the PRC, ETFs listed on the SEHK (including ETFs managed by the Manager) and/or SFC authorised CISs (including CISs managed by the Manager); and/or (b) up to 15% of its Net Asset Value in B shares listed on the stock exchanges in Mainland China. The aggregate exposure to the A shares and B shares market will not exceed 20% of the Sub-Fund's Net Asset Value.

◆ The Sub-Fund is approved as "Eligible Collective Investment Scheme" under "Capital Investment Entrant Scheme" ("CIES") of Hong Kong Special Administrative Region ("HKSAR"). The HKSAR Government has announced that the CIES has been suspended with effect from 15 January 2015 until further notice. The Immigration Department of HKSAR ("Immigration Department") will continue to process applications received on or before 14 January 2015, whether already approved (including approval-in-principle and formal approval) or still being processed. For further details and the related Frequently Asked Questions, please visit the website of the Immigration Department at [http://www.immd.gov.hk/eng/services/visas/capital\\_investment\\_entrant\\_scheme.html](http://www.immd.gov.hk/eng/services/visas/capital_investment_entrant_scheme.html).

## MANAGER'S COMMENT<sup>##</sup>

### On Market

China's third quarter GDP grew 4.9% over last year, versus the 3.2% growth in the second quarter. The economic recovery trend could also be seen from the continuously strong export and industrial production figures. On the other hand, import growth surged to 13.2% in September from -2.1% in August while retail sales growth increased to 3.3% from 0.5%. Domestic tourism revenues during the National Day Golden Week recovered to 69.9% of last year's level, which marked great improvement from the Dragon Boat Festival and the Labour Day holiday. Moreover, the daily retail sales during the golden week increased 4.9%. Domestic consumption is joining the external demands in lifting the economy. The market now eyes on the proposals of the 14th Five-Year Plan being accessed in late October. It should show how Beijing plans to deal with the deteriorating Sino-US relation and the global economic downturn.

Major mainland equity indices staged a rebound after the National Day Golden Week, but just closed slightly higher or flattish by end October. The rally of "new infrastructure" and renewable energy related sectors, revived investor interests on the traditional banking and insurance sectors, and positive macro releases were the major uplifts during most of the month. But the upward momentum was largely discounted by month-end after another round of overseas sell-offs triggered by renewed lock-down measures, anticipation of the 19th CPC's fifth plenary session as well as the upcoming presidential election in U.S. The relatively tech-savvy ChiNext Index posted a 3.1% gain in October and outperformed large-cap dominant mainland peers like Shanghai Composite Index, which only edged 0.2% higher for the month. Hang Seng H-share Index gained 3.8% in October, mainly led by the advance of several Communication Services, Consumption Discretionary, and Financial Services related heavyweights.

### On Portfolio

The Sub-Fund registered a positive return in October. The surging cases of COVID-19 in Europe and in the US, and the uncertainty in the US presidential election have continued to suppress investors' risk appetite. Revisions and earnings surprise were the key return drivers in the month. Overall, we saw volatility of both onshore and offshore markets staying at relatively lower levels during the period. Looking ahead, the elevated geopolitical tensions and the resurgence of COVID-19 in major economies will remain our major concerns in the quarter. In any case, prudent stock selection and dynamic cash management will continue to be the core strategy of the Sub-Fund.

The value of the investment products managed by BOCI-Prudential Asset Management Limited represents 0.0% of the Sub-Fund's fund size.

<sup>##</sup> The manager's comment above solely reflects the opinion, view and interpretation of the fund managers as of the date of issuance of this document. Investors should not solely rely on such information to make any investment decision.

<sup>ΔΔ</sup> Past performance is not indicative of future performance. Price of Units and the income (if any) generated from the relevant class of Units of the Sub-Fund may go down as well as up. Fund performance is calculated in the currency of the relevant class of Units of the Sub-Fund on a NAV-to-NAV basis with gross distribution reinvested. The data for "Standard Deviation" and "Morningstar Overall Rating<sup>™†</sup>" will not be shown for classes of Units of the Sub-Fund with less than 3-year history. "Standard Deviation", a risk measurement, is based on the monthly return of the relevant class of Units of the Sub-Fund over the past 3 years in the currency of the relevant class of units.

<sup>Δ</sup> The calendar year performance for 2015 of Class A – RMB Hedged Currency Class Units corresponds to the period since inception (30 October 2015) to end of 2015, while the calendar year performance for 2016 of Class A – RMB Units corresponds to the period since inception (23 February 2016) to end of 2016.

<sup>†</sup> With effect from 17 December 2018, sector classification methodology for the Sub-Fund has been updated slightly. Accordingly, the sector allocation has been restructured and the sector named "Telecom" has been replaced by "Communication Services".

<sup>††</sup> "Net Liquidity" was formerly named as "Cash & Deposit".

<sup>Δ</sup> The Manager intends to declare distributions to Unitholders on a quarterly basis, by the end of March, June, September and December respectively. The Manager has the sole and absolute discretion to determine or vary the frequency and dates for distributions. Please refer to the Manager's website for the compositions of the distributions of the relevant class of Units (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital). Investors should note that the distribution amount and/or rate of a particular class of Units may be more than or less than such amount and/or rate of the other class(es) of Units due to various factors, including but not limited to short-term interest rate differentials. Furthermore, the compositions of the distributions of a particular class of Units (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) may not be the same as that of the other class(es) of Units.

<sup>Δ</sup> As of the respective Record Date, there were no Unitholders of the Class A – RMB Units of the Sub-Fund. Therefore, no distribution history is available.

<sup>\*</sup> The Manager may increase the rate of management fee, up to a specified permitted maximum, by giving Unitholders at least three months' prior notice.

<sup>Δ</sup> For switching into a different class (denominated in a different currency) of Class A Units relating to the same Sub-Fund or switching into Class A Units of another Sub-Fund which is not a Money Market Sub-Fund.

<sup>ΔΔ</sup> For switching into units of a Money Market Sub-Fund.

<sup>††</sup> 12 Months Highest/Lowest NAV per Unit was calculated by reference to the NAV per Unit on each month's last dealing day.

<sup>♦</sup> Risk levels are categorized into low, low to medium, medium, medium to high and high. The risk levels are determined by BOCI-Prudential Asset Management Limited based on the investment mix of each Sub-Fund and/or its underlying investments, and represent only the views of BOCI-Prudential Asset Management Limited in respect of the relevant Sub-Fund. Such risk levels are for reference only and should not be regarded as investment advice. You should not rely on the risk levels only when making any investment decision. The risk level is determined based on data as at 31 December 2019 and will be reviewed and (if appropriate) updated at least annually without prior notice, taking into account the prevailing market circumstances. If you are in doubt about the information of risk level, you should seek independent financial and professional advice.
