Introduction

The Baring Global Umbrella Fund (the "Trust") is a unit trust managed by Baring International Fund Managers (Ireland) Limited (the "Managers"). The Trust was established pursuant to a trust deed dated 21 June, 1993 (as supplemented or amended from time to time) (the "Trust Deed") made between the Managers and Northern Trust Fiduciary Services (Ireland) Limited as trustee (the "Trustee") and authorised by the Financial Regulator pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2003, (as amended). The Trust received UCITS III status on 20 December 2006. It has been authorised by the Securities and Futures Commission in Hong Kong.

The Trust is organised in the form of an umbrella fund. The Trust Deed provides that the Trust may offer separate classes of Unit each representing interest in a Fund comprised of a distinct portfolio of investments. A separate trust fund (a "Fund") is maintained for each series of Units and is invested in accordance with the investment objective applicable to such Fund to date. Each Fund may create more than one class of Units in relation to a Fund and these separate classes of Units may be denominated in different currencies. A Unit represents a beneficial interest in the Trust (a "Unit").

Units are available in the following Funds and denominations:-

Fund	Functional Currency	Unit Denominations	Fund Launch Date
Baring Eastern Europe Fund	US\$	US\$ and €	September 1996
Baring Global Equity Fund	US\$	US\$ and €	June 1999

Independent Auditors' Report to the Unitholders of The Baring Global Umbrella Fund(the "Trust")

We have audited the Trust's financial statements for the year ended 30 April 2008 which comprise the Balance Sheet, the Profit and Loss Account, the Statement of Changes in Net Assets Attributable to holders of Redeemable Participating units, the Portfolio Statements and the related notes. These financial statements have been prepared under the accounting policies set out therein.

Respective Responsibilities of the Managers and the Auditors

The Managers' responsibilities for preparing the Annual Report and the financial statements in accordance with applicable Irish law and the accounting standards issued by the Accounting Standards Board and published by the Institute of Chartered Accountants in Ireland (Generally Accepted Accounting Practice in Ireland) are set out in the Statement of Managers' Responsibilities.

Our responsibility is to audit the financial statements in accordance with relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland). This report, including the opinion, has been prepared for and only for the Trust's unitholders as a body and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

We report to you our opinion as to whether the financial statements give a true and fair view in accordance with Generally Accepted Accounting Practice in Ireland, and are properly prepared in accordance with Irish statute comprising the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2003 (as amended) and the Hong Kong Code on Unit Trusts and Mutual Funds. We state whether we have obtained all the information and explanations we consider necessary for the purposes of our audit, and whether the financial statements are in agreement with the books of account. We also report to you our opinion as to:

- whether the Trust has kept proper books of account; and
- whether the Managers' report is consistent with the financial statements.

We also report to you if, in our opinion any information specified by law regarding Managers' transactions is not disclosed and where practical, include such information in our report.

We read the other information contained in the Annual Report, and consider whether it is consistent with the audited financial statements. We consider the implications for our report if we become aware of any apparent misstatements or material inconsistencies with the financial statements. Our responsibilities do not extend to any other information.

Basis of Audit Opinion

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgements made by the Managers in the preparation of the financial statements, and of whether the accounting policies are appropriate to the Trust's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

Independent Auditors' Report to the Unitholders of the Baring Global Umbrella Fund(the "Trust") (continued)

Opinion

In our opinion the financial statements give a true and fair view in accordance with Generally Accepted Accounting Practice in Ireland, of the state of the Trust's affairs at 30 April 2008 and of its results for the year then ended; and have been properly prepared in accordance with the requirements of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2003 (as amended) and Hong Kong Code on Unit Trusts and Mutual Funds.

We have obtained all the information and explanations we consider necessary for the purposes of our audit. In our opinion proper books of account have been kept by the Trust. The Trust's financial statements are in agreement with the books of account.

In our opinion the information given in the report of the Managers is consistent with the financial statements.

PricewaterhouseCoopers

Chartered Accountants & Registered Auditors

Dublin 31 July 2008

Statement of Managers' Responsibilities

The Managers are required by the European Communities (Undertakings for Collective Investment in Transferable Securities Regulations), 2003 (as amended) (the "UCITS Regulations") to prepare financial statements for each financial year. These financial statements must be prepared in accordance with generally accepted accounting principles to give a true and fair view of the state of affairs of the Trust at the year end and of the results and movements for the year then ended. In preparing these financial statements, the Managers

- · select and consistently applies suitable accounting policies
- make judgements and estimates that are reasonable and prudent; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Trust will continue in operation.

The financial statements must comply with the disclosure requirements of the UCITS Regulations, (as amended). The Managers are responsible for keeping proper books of account which disclose with reasonable accuracy at any time the financial position of the Trust and to enable them to ensure that the financial statements comply with the Trust Deed and the UCITS Regulations, (as amended) and the provisions of the Hong Kong Code on Units Trusts and Mutual Funds. The Managers are also responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Report of the Trustee to the Unitholders for the year ended 30 April 2008

We have enquired into the conduct of the Managers in respect of the Baring Global Umbrella Fund ('the Trust') for the year ended 30 April 2008, in our capacity as Trustee to the Trust.

This report including the opinion has been prepared for and solely for the unitholders in the Trust as a body, in accordance with the Financial Regulator's UCITS Notice 4 and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Trustee

Our duties and responsibilities are outlined in the Financial Regulator's UCITS Notice 4. One of those duties is to enquire into the conduct of the Trust in each annual accounting period and report thereon to the unitholders.

Our report shall state whether, in our opinion, the Trust has been managed in that period in accordance with the provisions of the Trust's Trust Deed and the UCITS Regulations. It is the overall responsibility of the Managers to comply with these provisions. If the Managers have not so complied, we as Trustee must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Trustee Opinion

The Trustee conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in UCITS Notice 4 and to ensure that, in all material respects, the Trust has been managed, (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations and (ii) otherwise in accordance with the Trust's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, The Baring Global Umbrella Fund has been managed during the year, in all material respects:

- in accordance with the limitations imposed on the investment and borrowing powers of the Managers and Trustee by the Trust Deed and by the European Communities (Undertakings for Collective Investment in Transferable Securities)
 Regulations 2003, as amended, ('the Regulations'); and
- (ii) otherwise in accordance with the provisions of the Trust Deed and the Regulations.

Northern Trust Fiduciary Services (Ireland) Limited, George's Court, 54-62 Townsend Street, Dublin 2

Source: Baring Asset Management Limited. Percentage performance to 30 April 2008, on a bid-to-bid basis with net income reinvested in US dollar terms. The figures are different where there has been a distribution paid on a Fund. The second table shows the return which includes the distribution and the first table shows the difference in the actual prices on the dates stated.

Note: All references to a specific index are for comparative purposes only

Past performance is not a guide to future performance. The value of an investment can fall as well as rise and investors may not get back the amount originally invested.

Investment Objective and Policy

The investment objective of the Baring Eastern Europe Fund is to achieve long-term capital appreciation through investment in a diversified portfolio of securities of issuers located in or with a significant exposure to the emerging markets of Europe. The policy of the manager is to invest principally in equities and securities listed or traded on recognised exchanges and markets in emerging European countries. Please refer to the prospectus for the full Investment Objective and Policy.

How We Manage the Fund

At Baring Asset Management, we believe that a sound research process is the starting point of any successful investment approach. In our view, it is most effective to analyse both companies and countries, with the goal of investing in the most attractive companies in the most attractive countries.

Our research focuses on "Growth at a Reasonable Price", on sensitivity to currency movements, and other external factors; on the soundness or otherwise of government policy (in the case of a country), or business plan (in the case of a company); and last but not least, on the level of valuation. This research gives rise to an assessment of the fundamental drivers of return, and to this we add a subjective judgement as to the level of return we expect from each asset in which we might invest. We also check that these rankings are consistent with the broader thematic developments we expect as a firm. These rankings then allow us to construct a disciplined and relatively concentrated portfolio of our most attractive companies.

The Managers, Baring International Fund Managers (Ireland) Limited, have appointed Baring Asset Management Limited ("BAML") as the Investment Manager of the Baring Eastern Europe Fund.

Risk Profile

The Baring Eastern Europe Fund is invested primarily in equities listed in the Eastern European region. As such, the Fund is exposed to the volatility that can characterise equity share prices from time to time. These countries are emerging equity markets and, as a result, the Fund can be exposed to economic, political and other risks associated with holding equities in developing markets.

Returns from overseas equity markets can also be subject to fluctuations in exchange rates, which can have the effect of eroding or enhancing the value of the investment returns for investors. Please refer to the Prospectus for the full risk profile.

Key Changes Since the Last Report

From 1 May 2008 the fund's comparative index will change to the MSCI Emerging Europe 10/40 index. The stock weightings in the new index are a better match to the permitted stock limits in collective investment vehicles such as the Baring Emerging Europe Fund and, as such, it is felt to be a much more appropriate benchmark.

Strategy and Performance

During the twelve months to 30 April 2008 the Baring Eastern Europe Fund delivered a positive return, marginally behind the comparative index, with the year being characterised by high volatility. Emerging Europe, in common with the rest of the world, was affected by the possibility of the US economy heading into recession, which outweighed the strong investment case within the region.

Our stock selection in the Russian market was the highest positive contributor to performance during the period. The best performance was concentrated in materials stocks, where Chinese demand continues to be the main driver. Our decision to favour these stocks proved successful. The oil and gas sector, which has a high representation in the Russian equity index, did not perform as well in relative terms. As we had anticipated, Hungary and Turkey were the worst performers and our relative lack of exposure to both countries helped the performance of the Fund.

Several individual stocks contributed positively to the relative return of the portfolio across all markets during the period. The largest contributors included the Kazakh iron ore and coal producer ENRC, Russian steel stocks Mechel and Evraz Group, and Czech electricity producer CEZ. TPSA, the Polish telecoms group, rose sharply over the year and our lack of exposure to the company detracted from relative performance.

Review of the Market

The collapse of the US housing market and the consequent effect on the world's financial systems was the largest feature of global equity markets during the period under review, and one which the Eastern European markets could not withstand. The slowdown in the US property market led to a sharp rise in the number of defaults in the sub-prime area of the US mortgage market and led to a major financial crisis, with many banks being forced to declare huge losses due to their exposure to that market. As the losses mounted, confidence fell and a liquidity crisis in global markets ensued. Investors became increasingly unwilling to hold assets seen as risky and sold much of their equity exposure, causing sharp falls in share markets. From last August central banks took action in order to prevent a complete breakdown of the financial system, including multiple interest rate cuts by the US Federal Reserve. This action went some way to easing investor concerns but could not compensate for the share price falls seen in August and January. The crisis inevitably affected the Emerging European Equity Markets.

The Russian equity market continued its robust performance. Russia is a major exporter of oil and gas and other industrial metals and therefore took full advantage of the increase in prices and demand from China and other Emerging economies. The Russian economy remains robust and the successful election result contributed to increasing political stability. In Central Europe both the Czech Republic and Poland performed well, with the Czech Republic being helped by the strength of its economy. Poland also benefited from the continued good health of the economy, although the market suffered in 2008 as some mutual funds reduced their holdings. In the second half of the period equities were weaker in Turkey, as was the Turkish currency, as risk aversion increased across the world and local political and economic concerns came to the fore. Hungary was the worst performing market in Central Europe. The country still suffers from a large current account and budget deficit and this is having an adverse effect on the equity market.

Market Outlook

The effect of the global credit crunch and possible recession in the US economy is still unfolding. We believe this will be the case for some time, and expect volatility to remain a feature in the markets of Eastern Europe. However, we believe the investment case for Emerging Europe and particularly Russia, where we have made the majority of our investments, remains strong. Russia is one of the main beneficiaries of growth of emerging economies, especially China, due to its extensive resource base. Growth in the region, especially in Russia and central Europe, is also driven by infrastructure spend. Furthermore, with the possible exception of Turkey and to a lesser extent Hungary, the region does not depend on international liquidity to fund its economic growth. The defensive nature of the expected high growth in the economies of the region should, we believe, provide support to the investment case for the region.

We expect Russia's economic growth to be sustained at 7% this year, driven by the export of commodities. Russia is a major exporter of oil and gas and other industrial metals, and therefore takes full advantage of the increase in prices and demand from China and other Emerging economies. Infrastructure spending is likely to continue as capacity utilisation rates in Russia are high. Rising income levels, wages, and increasing retail credit point to a high potential for consumption growth. We believe all this should bode well for the coming year, with continued growth in revenues and profits. In Central Europe, especially Poland, we expect further investments to be made in an attempt to encourage convergence with Western Europe. The combination of a relatively debt-free consumer and a highly educated but cheap labour force should support the region. We expect the Polish economy to grow at an attractive rate relative to the rest of the world. However, in Turkey it is now apparent that inflation is ahead of expectations and that the anticipated interest rate cuts for 2008 are unlikely to materialise.

It should be noted that there are a number of possible features that could result in heightened volatility. These features include inflation, a problem being faced globally and in the region as food and energy prices rise, political events, such as political instability in Turkey, and a global event that affected the broader equity markets, such as the sub-prime crisis. If any of these factors were to materialise, there would probably be a short-term negative effect on our portfolio. However, we believe the Fund is well placed to take advantage of the opportunities offered by the region, including vast resources, consumers that have not built up high levels of debt, superior economic growth and attractive share price valuations.

Source: Baring Asset Management Limited. Percentage performance to 30 April 2008, bid-to-bid basis with net income reinvested in US dollar terms. The figures are different where there has been a distribution paid on a Fund. The second table shows the return which includes the distribution and the first table shows the difference in the actual prices on the dates stated.

Note: All references to a specific index are for comparative purposes only

Past performance is not a guide to future performance. The value of an investment can fall as well as rise and investors may not get back the amount originally invested.

Investment Objective and Policy

The investment objective of the Baring Global Equity Fund is to achieve long-term capital growth by investing in equities listed or traded on a wide range of international markets. The policy of the manager is to seek to enhance total return by taking overweight positions in markets which he considers to be relatively more attractive than the index. Please refer to the prospectus for the full Investment Objective and Policy.

How We Manage the Fund

The Baring Global Equity Fund is a 60 to 120 stock portfolio of small, medium and large-sized companies. We draw our global investment ideas from our network of stock analysts who are situated in our regional offices. We also draw on the expertise of our Strategic Policy Group in allocating our investments by region and by industry sector.

We combine "top-down" country allocation and "bottom-up" stock selection in an integrated framework in order to capture both sets of investment drivers. We believe that "top-down" country analysis is crucial as developments at a national level often outweigh stock-specific factors, although company fundamentals are always a key starting point in our analysis.

We combine growth and valuation disciplines to identify "Growth at a Reasonable Price" when investing in global equity markets. Through our teams of dedicated analysts we conduct considerable primary research in order to identify the best opportunities.

The Managers, Baring International Fund Managers (Ireland) Limited, have appointed Baring Asset Management Limited ("BAML") as the Investment Manager of the Baring Global Equity Fund.

Risk Profile

The Baring Global Equity Fund is broadly invested across global equity markets and this includes the emerging equity markets of Latin America, Eastern Europe and Asia. Therefore, the Fund can be exposed to economic, political and other risks associated with holding equities in developing markets, as well as the volatility which can characterise company share prices from time-to-time.

Key Changes since the Last Report

There were no major changes over the review period.

Strategy and Performance

The Baring Global Equity Fund was a strong performer over the twelve-month review period. The Fund produced a positive return and beat its comparative index by a healthy margin. The investment strategy did not change markedly over the review period; the Fund retained an emphasis on the Materials sector and avoided Financials. At a geographical level, emerging markets and the Pacific region were favoured, whilst we were cautious in relation to the US equity market.

At the sector level, the greatest contributors to performance came from Materials, Healthcare and a lack of exposure to Financials. In the Materials sector, the bias towards metals and mining and agricultural chemicals proved profitable. Although the Healthcare sector itself underperformed, the Fund's stock selection bias, in favour of biotechnology, healthcare providers and services, rather than large pharmaceutical companies, made a positive contribution to performance.

The avoidance of Financials in the developed world also proved beneficial over the review period. The strongest performers from our holdings in Financials, were selected Hong Kong property companies and Middle Eastern banks.

The decision to increase exposure to the Consumer Staples sectors was correct, although negative stock selection detracted from performance in this area. The largest single detractor during the review period came from the Fund's overweight position in Japan. This was compounded by disappointing stock selection.

Review of the Market

The sub-prime crisis dominated global markets during the review period. Growing evidence of the deterioration in the US property market had by the summer of 2007 prompted a rout in the market for financial instruments linked to mortgages and the like. In turn, this caused huge strain across large parts of the financial landscape as banks struggled to deal with frozen credit markets and collapsing asset values. The strongest returns over the period were provided by the developing markets, for example in Asia, where rapid economic growth and rising commodity prices supported markets.

Market Outlook

Looking ahead, we see bifurcation (a splitting into two) in the global economic outlook. Although not immune to a US led slowdown, demand in emerging markets and the Pacific region appears to be more sustainable than in the West. We can see reasons why the fundamentals underpinning emerging market demand should continue to hold up. The economic positions of the US, UK and (in some regions) the European consumer will probably come under further pressure as housing and inflation concerns, driven by rising food & energy prices, continue to impact upon them.

This suggests that our preference for investment in the emerging markets and the Pacific region and the Materials and Energy sectors will continue. However, we are aware that markets have a tendency to become over-stretched and over-owned. We will maintain our active process of trimming securities in areas where we have earned strong positive returns and will seek out securities offering good growth prospects for fair market valuations in all regions of the world.

Source: Baring Asset Management Limited. Percentage performance to 30 April 2008, bid-to-bid basis with net income reinvested in US dollar terms. The figures are different where there has been a distribution paid on a Fund. The second table shows the return which includes the distribution and the first table shows the difference in the actual prices on the dates stated.

Note: All references to a specific index are for comparative purposes only

Past performance is not a guide to future performance. The value of an investment can fall as well as rise and investors may not get back the amount originally invested.

Investment Objective and Policy

The investment objective of the Baring Global Resources Fund is to achieve long-term capital appreciation through investment in a diversified portfolio of the securities of commodity producers, being companies engaged in the extraction, production, processing and/or trading of commodities e.g. oil, gold, aluminium, coffee and sugar. The policy of the manager will be to identify world-wide commodities experiencing, or expected to experience, strong demand growth and select appropriate companies for analysis and possible investment. Please refer to the prospectus for the full Investment Objective and Policy.

How We Manage the Fund

Currently, the Baring Global Resources Fund is invested in a range of companies involved in the extraction, production, processing and/or trading of commodities. Our investment philosophy is focused on securing out performance from shares in companies which operate in these areas and which we believe have the potential to deliver better than expected earnings growth. This usually leads us to resource-related companies operating in emerging markets, which tend to be less efficient, rather than companies in the more developed markets.

When investing, we take a view on the likely direction of the companies associated with the global commodity markets and combine "top-down" country allocation and "bottom-up" stock selection in an integrated framework in order to capture both sets of investment drivers. We believe that "top-down" country analysis is crucial as developments at a national level often outweigh company-specific factors, although company fundamentals are always a key starting point in our analysis.

Further to this, we combine growth and valuation disciplines to identify "Growth at a Reasonable Price". Through our teams of dedicated analysts locally based in our offices in Hong Kong, Tokyo and Boston, as well as London, we conduct considerable primary research in order to identify the best commodity-related companies we believe offer the best prospects for better than expected earnings growth.

The Managers, Baring International Fund Managers (Ireland) Limited, have appointed Baring Asset Management Limited ("BAML") as the Investment Manager of the Baring Global Resources Fund.

.

Risk Profile

The Baring Global Resources Fund is invested primarily in commodity-related companies which are traded on developed and emerging stock markets such as Latin America, Asia excluding Japan, Eastern Europe and the Middle-East and Africa, and as such is exposed to the volatility that can characterise equity share prices from time-to-time. As many of the companies we invest in are either listed or operate in emerging equity markets, the Fund can be exposed to economic, political and other risks associated with holding equities in developing markets. In addition to this, they tend to be highly sensitive to the global economic cycle.

Key Changes Since the Last Report

There are no major changes to report.

Strategy and Performance

The Baring Global Resources Fund delivered a positive absolute return and outpaced the MSCI All Country Energy and Materials Index for the period under review.

Our strategy remained broadly unchanged over the period under review and the Fund retained its emphasis on base and precious metals as well as the soft commodity sectors, whilst retaining a reduced exposure relative to the comparative index to the Energy and Chemical sectors. That was not because we were negative on the prospects for the energy market, particularly in the face of the strong rally in the oil price over the period under review, but rather we believed that energy sector companies would lag behind those in the Basic Materials sector given the rising cost of finding and replacing their reserves.

With metals prices performing strongly over the last 12 months, the emphasis on the Materials sector relative to the comparative index and strong stock selection within the sector added significantly to both the absolute and relative performance of the Fund. Although the oil price performance was also robust, the underweight exposure to the Energy sector had little significant impact on performance since this area of the market did not perform particularly well. However, stock selection within the sector was very strong, driven by the Fund's exposure to emerging market oil companies and selected exploration & production companies. Our holdings in the soft commodities sector also added value with our holdings in the agro-chemicals sub-sector, in particular, one of the strongest performing areas in the Fund. This strong performance more than offset the small negative return seen in our precious metals holdings, which was driven by the continued weakness in our uranium sector holdings following a sharp fall in the uranium price over the period, although the Fund's exposure to both gold and platinum added to relative performance.

Review of the Market

Global equity markets experienced a rise in volatility over the review period. This was largely due to the turmoil within credit markets, which led to large write-downs of assets from within the Financial sector, principally by global investment banks. In response, the Federal Reserve aggressively cut interest rates over the period in order to boost the faltering US economy and to assist financial institutions, by attempting to improve liquidity within credit markets. Falling interest rates and a struggling economy caused the US dollar to weaken, which in turn has been a supportive factor for commodity prices.

With physical commodities performing strongly, the related equity asset class moved sharply higher. Demand for commodities has remained firm underpinned by the continuing theme of the industrialisation of Asia. Supply of resources has also been under pressure from weather and power issues in key supplier countries such as Australia, South Africa and Chile. Resource equities, like the broader market, however, have experienced bouts of sharp profit taking as investors experienced bouts of risk aversion in light of the apparent deterioration in the US economy and fears regarding its impact on the wider global economy. In our view, investors are undervaluing resource related equities as they remain highly sceptical of the sustainability of high commodity prices in the face of a downturn in the economic outlook for developed countries. However, the demand from Emerging economies and China in particular, remain very robust.

Review of the Market (continued)

In terms of the commodities themselves, the oil price broke through and closed substantially above the US\$100/bbl barrier and gold broke US\$1000/oz as investors moved to protect themselves against global inflationary pressures and a weak US dollar. Elsewhere, Brazilian miner CVRD negotiated 65% and 71% increases in their annual iron ore products with steel mills. Additionally, annual coal contracts were settled in early April, with metallurgical coal settlements at over 200% and thermal coal securing price increases of 120%. Copper performed strongly over the review period as Chinese buyers re-entered the market, which led to a sharp decline in metal exchange inventories. Platinum also advanced significantly, reaching new highs of US\$2200/oz, on the back of power issues in South Africa curtailing supply.

Market Outlook

Despite ongoing concern surrounding the health of developed economies leading to a significant increase in volatility, we remain positive on the outlook for global commodities. Ongoing demand from China and other emerging economies, continued supply disruptions and relatively low levels of inventories have propelled most commodity prices higher and have forced analysts to raise their expectations for earnings.

In terms of sector allocation, we believe that the macroeconomic picture continues to support our increased emphasis on the base metals sector, albeit selectively in those metals with the best fundamentals such as bulk commodities (iron ore, coal) through a combination of single commodity and diversified mining stocks. Analysts remain significantly below current pricing levels in most of their forecasts, which should lead to upgrades over the course of 2008. The Fund has a reduced exposure to the Energy sector relative to the comparative index. Despite the rally in the oil price, which has been supported by investors seeking a hedge to both inflation and currency worries, we could see oil prices weaken in the next quarter given both rising product inventories, particularly in gasoline, and the potential for some reduction in the very large speculative interest. However, we do also recognise that the costs of finding and producing oil are rising significantly for national and international oil companies, which lifts the floor price for oil and leads to prices settling at higher than previously anticipated levels. As a result, we are looking to slightly augment the Fund's exposure to this sector. We maintain our belief that oil service companies will remain core to our holdings in the sector, albeit recognising that this sector exhibits a high level of volatility on a quarter by quarter basis. We continue to favour exploration and production companies on very company specific stories and will continue to monitor this sector. Elsewhere, we remain overweight precious metals mainly through a combination of gold and platinum group metals. We believe that the gold price should remain supported by ongoing concerns surrounding the health of the US economy, worries about the global financial system and inflation and currency concerns. The fundamental outlook for platinum producers remains very strong on the back of restricted power supplies in South Africa, where 80% of the world metal is mined, and strong demand from car manufacturers.

Although we are forecasting further volatility in both the commodity and equity markets, we reiterate our positive view on the sector for 2008 and beyond.

Source: Baring Asset Management Limited. Percentage performance to 30 April 2008, bid-to-bid basis with net income reinvested in US dollar terms. The figures are different where there has been a distribution paid on a Fund. The second table shows the return which includes the distribution and the first table shows the difference in the actual prices on the dates stated.

Note: All references to a specific index are for comparative purposes only

Past performance is not a guide to future performance. The value of an investment can fall as well as rise and investors may not get back the amount originally invested.

Investment Objective and Policy

The investment objective of the Baring Global Select Fund is to achieve long-term capital growth by investing in equities listed or traded on a wide range of international markets. The policy of the manager is to seek to enhance total return by taking positions in markets and economic sectors which the manager believes have relatively superior earnings growth prospects. Please refer to the prospectus for the full Investment Objective and Policy.

How We Manage the Fund

The Baring Global Select Fund is comprised of 40 to 50 of our Global Sector and Regional Research Teams' best ideas from all around the world. We draw our global investment ideas from our network of stock analysts who are situated in our regional offices. We also draw on the expertise of our Strategic Policy Group in allocating our investments by region and by industry sector. The Managers, Baring International Fund Managers (Ireland) Limited, have appointed Baring Asset Management Limited ("BAML") as the Investment Manager of the Baring Global Select Fund

Risk Profile

The Baring Global Select Fund is invested across global equity markets and this includes the emerging equity markets of Latin America, Eastern Europe and Asia. Therefore, the Fund can be exposed to economic, political and other risks associated with holding equities in developing markets, as well as the volatility which can characterise company share prices from time to time. In addition, the approach we take to managing the Fund and keeping the number of holdings at a reasonably focused size means that the Trust may prove more volatile in performance than more broadly-based equity funds.

Returns from overseas equity markets can also be subject to fluctuations in exchange rates, which can have the effect of eroding or enhancing the value of the investment returns for investors. Please refer to the Prospectus for the full risk profile.

Key Changes Since the Last Report

Since April 2008 the Baring Global Select Fund has been managed by Tim Scholefield. Tim is our Head of Equities and responsible for our global equity team. He has 20 years of investment experience.

Strategy and Performance

During the twelve months to 30 April 2008 the Baring Global Select Fund delivered a strongly positive performance, both in absolute terms and relative to the comparative index. The main cause of the good performance was our decision to avoid stocks that were at all related to the US housing market. Instead we preferred to have an emphasis on what we believed were compellingly valued growth stocks in commodity and Asian consumer-related sectors. We preferred the Energy, Materials and Telecoms sectors in the Pacific and other emerging markets. The performance of some financial companies in China and the Middle East was also beneficial to performance. We enjoyed strong performance from our investments in China, particularly in sectors such as property development, telecommunications and energy.

Review of the Market

The crisis in the US sub-prime mortgage market dominated global markets during the review period. Growing evidence of the deterioration in the US property market led to a collapse in the market for financial instruments linked to mortgages, leading to an almost complete breakdown in the financial system as banks were forced to reveal huge losses due to collapsing asset values. Western banks became unwilling to lend to each other or to businesses, leading to a severe slowdown in credit activity and a sell-off in global equity markets. Our strategy was, and remains, to avoid this area of the market, and the Fund benefited accordingly. The strongest returns over the period were provided by the developing markets, for example in Asia, where rapid economic growth and rising commodity prices supported equity markets.

Market Outlook

The outlook for global equities is one of contrasts. While we expect the developing economies to experience strong economic growth and hence attractive equity returns, prospects for much of the developing world are less positive. In particular, we expect financial companies in the United States and Europe to struggle as the effects of the sub-prime crisis continue to weigh heavily. Similarly, the outlook for consumption in the developed world is poor; with many consumers being faced with high levels of debt, falling property prices and rising inflation. Hence, it will be important to be selective. We will continue to favour emerging economies and sectors such as Materials and Energy, where strong global demand and constrained supply provide a supportive environment for investment.

Source: Baring Asset Management Limited. Percentage performance to 30 April 2008, bid-to-bid basis with net income reinvested in US dollar terms. The figures are different where there has been a distribution paid on a Fund. The second table shows the return which includes the distribution and the first table shows the difference in the actual prices on the dates stated.

Note: There is no appropriate index against which to compare this Fund.

Past performance is not a guide to future performance. The value of an investment can fall as well as rise and investors may not get back the amount originally invested.

Investment Objective and Policy

The primary investment objective of the managers for the Baring High Yield Bond Fund is to produce a high level of current yield in US dollar terms, commensurate with an acceptable level of risk. Any capital appreciation will be incidental. The policy of the managers is to invest in a combination of debt and loan securities (including credit linked securities) of corporations and governments (including any agency of government or central bank) of any member state of the Organisation for Economic Co-operation and Development and of any developing or emerging markets. Please refer to the prospectus for the full Investment Objective and Policy.

How We Manage the Fund

The Baring High Yield Bond Fund is invested in emerging market debt and corporate bonds including high yield bonds. When investing the Fund's assets, we take a view on what the likely market background will be for bonds over the medium-term, for example whether interest rates or inflation are likely to rise or fall. We run economic scenarios to help us to ascertain what the likely market outcome will be, and then we position our portfolios so that, in our view, they are well placed to perform in a range of market conditions. The overall duration, or interest-rate sensitivity, of the Fund will fluctuate as our expectations for economic developments change, relative to the market.

The Managers, Baring International Fund Managers (Ireland) Limited, have appointed Baring Asset Management Limited ("BAML") as the Investment Manager of the Baring High Yield Bond Fund.

Risk Profile

The Baring High Yield Bond Fund is invested in emerging market debt and corporate bonds including high yield bonds issued by companies with low credit ratings. As such, the Fund can be exposed to economic, political and other risks associated with holding bonds in developing markets and to the fact that these markets tend to be highly sensitive to the global economic cycle.

'Though corporate bonds are subject to many of the same risk factors as sovereign issued bonds in terms of their exposure to changes in inflation expectations, interest rate expectations and market risk premiums, they carry more credit risk. In other words there is a greater risk of non-payment of both the interest payments due on the bond and the initial capital. They are also less liquid and have higher price volatility than sovereign issued debt. Further to this, as this is a Fund invested in worldwide bond markets, currency exchange fluctuations can have an effect on the performance of the Fund's investments. Although we endeavour to produce a high level of yield in the Fund, this is not guaranteed.

Key Changes Since the Last Report

There are no changes to report.

Strategy and Performance

The Fund returned -0.4% in what was a very difficult and volatile review period. Clearly, while we were disappointed the Fund did not deliver a positive return over the period we did adopt a defensive strategy which successfully protected the Fund from much of the adverse volatility. We remained defensively positioned throughout the year, adding only a little interest rate sensitivity (duration) in June 2007 when we increased the portfolio's sensitivity to European government bonds and Hungarian government bonds as value improved in these markets. This defensive duration position helped protect the Fund's performance, as the fall out from the sub-prime housing market in the US looked to be affecting the wider global economy, squeezing the previously plentiful liquidity and leading to a global government bond rally in the summer months. We later reduced duration in mid September by taking profits on our long dated French government bonds.

We initially increased our US dollar denominated emerging market corporate bonds by adding Russian coal producer Raspadskaya, South African retailer Edcon and Russian oil company Lukoil issues to the Fund throughout May and June 2007. However, we sold two holdings in Kazakh banks in October: Kazkommertsbank and Bank Turanalem. Given their need for short-term financing and their dependency on external markets, we became more negative on these names as the external environment continued to deteriorate. We took profits on Norilsk Nickel, a Russian mining and metals company, and sold our holding in commodity chemicals companies Ineos and Basell as the prospects of downgrades had increased. In their place we added Kroger and Delhaize, both US food retail companies as well as South African food retailer Foodcorp. Early in 2008 we became more cautious in our high yield outlook and reduced the size of our exposure to selective individual high yield issues allocating into the safety of US Treasuries. Additionally, we sold Edcon in January on concerns surrounding disruptions to the South African energy sector and paper products manufacturer M-Real due to rising liquidity concerns for the company. The timing of these trades successfully helped to limit the damage to the Fund from the subsequent sell-off in the high yield market. Furthermore our allocation to US Treasuries also boosted absolute returns, as safe-haven instruments outperformed riskier assets.

We reduced emerging market US-dollar denominated debt in favour of emerging market local debt at the start of the period under review. We took profits in Brazil, Panama and Colombia US dollar denominated debt in May 2007. Yields available in this asset class no longer provided the opportunity for substantive gains, indeed, this asset class was the poorest performer this year, returning 4.7%. Conversely, emerging market local debt returned 14.7% for the year, (JP Morgan EM Global Diversified Index) and as a result our increased allocation proved beneficial.

Towards the end of 2007, we increased exposure to single-A rated financials at very attractive spread levels and added to our Collateralised Loan Obligation exposure (a debt security back by a pool of commercial loans), the latter of which was particularly badly hit by the latest round of risk aversion. Both offered highly attractive entry points for assets we remain fundamentally positive on in the long term. In addition, we continued to add to our investment grade financials positioning at the end of the period, opportunistically utilising weakness in the market.

Review of the Market

Government bond markets have been strongly driven by sub-prime stories, subsequent write downs by financial institutions and the potential consequences on economic growth and earnings figures. As a result, government bonds rallied whilst credit and equity markets performed poorly in comparison. The end of the reporting period saw investor confidence return and riskier markets bounce back.

Review of the Market (continued)

The review period started quietly. US consumers were apparently not affected by declining house prices and the job market remained strong. However, as time continued, markets began to be driven by the recessionary risks in the US and concern about the impact this would have on global markets. From the summer of 2007, the US Federal Reserve (Fed) cut their funds rate seven times from 5.25% to 2.00% in an attempt to bolster the deteriorating economy. The most recent round of interest rate cuts occurred in April as the Fed once again cut rates on 30 April by 0.25% to 2%. Room for manoeuvre for further interest rate cuts was also seen as limited given the recent measures on inflation. On the back of deteriorating global dynamics and the ensuing flight to quality bid, US Treasuries performed well overall. Despite the initial rise in US bond yields, overall this asset class performed well with 10 year yields falling from 4.6% in April 2007 to 3.7% in April 2008.

US high yield bonds underperformed US Treasuries for the year under review. The period started with a continued trend of stability in corporate spreads, enabling credit to outperform government securities on a duration-adjusted basis. This period of calm was however relatively short lived. By June 2007, nervousness became apparent in risky markets as participants reconsidered their risk tolerances. Negative news from the US, regarding housing and sub-prime mortgage lending, came to the forefront. Initially the market's reaction was fairly muted, however, by the end of the summer, corporate spreads had established a deteriorating trend led by the banking, brokerage and non-bank financial sectors. Although returns were positive in Q3 2007, this was entirely due to a rally in the underlying government markets. The remainder of 2007 and the first quarter in 2008 saw corporate valuations again deteriorate in a more wide-ranging sell-off as investors shed risk assets. The fragile conditions in financial markets were exacerbated by the threat of negative rating actions amongst the monoline bond insurers (an insurance company that insures payments on securities) and the spectre of significant amounts of risk being sold into the market as structured credit vehicles were de-leveraged and unwound. A bounce back in high yield credit markets occurred in April 2008 with a monthly return not seen for over five years. Emerging market debt also suffered from high volatility, although it outperformed both the high yield and investment grade corporate bond market over the period under review. Emerging market debt performed well at the beginning of the period benefiting from continued global growth. By June, the concern that sub prime mortgage market woes in the US would have a knock on effect on high risk assets which would cause general weakness in the emerging markets by curtailing investment in these countries and restraining global growth had a negative impact on this asset class. The year to date (2008) has seen emerging market debt performing strongly again, demonstrating the resilience of the asset class in the face of continued negative economic newsflow.

Market Outlook

Corporate bond markets are now looking attractive relative to government markets. Although a continued period of volatility is to be expected, much is discounted in the valuations attached to investment grade corporate debt. We do however see further downside in the speculative grade high yield arena as, almost inevitably, default rates will rise this year as a natural reaction to the more difficult conditions that companies face in financing and refinancing maturing obligations. Government markets also remain vulnerable to a rise in the general level of inflation.

The value in emerging markets remains in the local currency area. US dollar denominated debt, even after the recent spread widening, is still on tight valuations and are not as compelling. We have been long-term proponents of the local currency emerging debt story and remain positive on the prospects for the continued secular re-rating of the asset class.

Source: Baring Asset Management Limited. Percentage performance to 30 April 2008, bid-to-bid basis with net income reinvested in Sterling terms. The figures are different where there has been a distribution paid on a Fund. The second table shows the return which includes the distribution and the first table shows the difference in the actual prices on the dates stated.

Note: All references to a specific index are for comparative purposes only

Past performance is not a guide to future performance. The value of an investment can fall as well as rise and investors may not get back the amount originally invested.

Investment Objective and Policy

The investment objective of the Baring (Sterling) World Bond Fund is to achieve an attractive level of income together with the potential for long-term growth in the value of its assets in Sterling terms. The investment policy will be to invest world-wide in securities bearing fixed or variable rate income and, where appropriate, convertible bonds. Please refer to the prospectus for the full Investment Objective and Policy.

How We Manage the Fund

We seek investment return by investing in government bond markets where yields are likely to fall and avoiding those that are thought to be expensive. The overall duration, or interest-rate sensitivity, of the Fund will fluctuate as our expectations for economic developments, relative to the market, change. We will also look to add value through foreign exchange management, identifying those markets where currencies are attractive, for example due to sound economic fundamentals or rising interest rates.

The Managers, Baring International Fund Managers (Ireland) Limited, have appointed Baring Asset Management Limited ("BAML") as the Investment Manager of the Baring (Sterling) World Bond Fund.

Risk Profile

The majority of the Fund's holdings will usually be in bonds issued by governments rather than individual companies. These bonds are not deemed as risky as corporate bonds, as they are backed by the full resources of the government issuing them. However, as this is a portfolio invested in the global bond markets, currency exchange fluctuations can have an effect on the performance of the Fund's investments.

Key Changes Since the Last Report

We have experienced low demand for the Baring (Sterling) World Bond Fund in recent years and have therefore decided to suspend news subscriptions to the Fund with a view to closing it in July.

Strategy and Performance

The Fund performed well over the 12 month period to 30 April 2008 and delivered a strong positive performance overall which exceeded that of its composite comparative index. Both the bond investment strategy and the currency exposure of the Fund proved successful during the period. Over the May to June period, whilst investors were relatively confident that the global economy would continue to grow at a rapid pace, the yield on government bonds rose in all the major economies and so we progressively increased our exposure to UK and Australia government bonds. In terms of currency exposure we were negative on the US dollar and Sterling for most of 2007, preferring to be overweight the yen, Swiss franc and Scandinavian currencies.

As the problems in the US sub-prime mortgage market intensified, triggering turbulence in global credit markets, investors became seriously risk averse and this led them to seek the perceived safe haven of government bonds and currencies from countries with large current account surpluses. The yen and Swiss franc appreciated strongly over the second half of 2007 and early 2008 whilst currencies such as the US dollar and Sterling depreciated. However, by early 2008, we moved the Fund to a net short position, reducing its exposure to UK gilts and Australian bonds. At the same time, we moved to a neutral stance on Sterling and to favour the US dollar.

Review of the Market

During the early part of the period under review markets tended to ignore the growing weakness in the US housing market and central banks tended to raise interest rates in order to contain growing inflationary pressures from both domestic demand and commodities. However, as credit conditions deteriorated and the financial system faced a systemic crisis, the US Federal Reserve Board aggressively cut interest rates through 2007 to early 2008. Similarly the Bank of England has eased monetary policy, whilst interest rates in Europe and Japan have remained on hold.

In response to the anticipated slow down in economic activity and an easing of inflationary pressures, government bond yields declined significantly through to March 2008 and currencies such as the yen, Swiss franc and Euro appreciated significantly against the US dollar and Sterling.

Market Outlook

We have become more concerned about the outlook for government bond markets as the decline in yields already reflects the expectation of higher interest rates and reduction of inflationary pressure. In our opinion, there is a growing risk that a period of slow economic growth in the developed economies may be accompanied by persistent upward pressure on prices, which would need to be controlled by higher interest rates and a sharp rise in government bond yields. As a result, the Fund is now defensively positioned in expectation that yields will rise rather than fall in the UK, US and Japan.

In terms of currency markets, the US dollar already reflects a considerable amount of bad news and in our view is offering value against European currencies. Similarly, after the recent weakness of Sterling, we have moved the Fund to a neutral position. Financial markets have discounted the view that European and Asian economies can continue to grow independent of the US economy. However, we believe such a view could change if there is evidence that economic activity outside the US has started to slow or if global inflation remains at its current high level.

Source: Baring Asset Management Limited. Percentage performance to 30 April 2008, bid-to-bid basis with net income reinvested in US dollar terms. The figures are different where there has been a distribution paid on a Fund. The second table shows the return which includes the distribution and the first table shows the difference in the actual prices on the dates stated.

Note: All references to a specific index are for comparative purposes only

Past performance is not a guide to future performance. The value of an investment can fall as well as rise and investors may not get back the amount originally invested.

Investment Objective and Policy

The investment objective of the Fund is to maximise total return in US dollars. The policy of the manager is under normal circumstances to invest at least 70% of the Fund's assets in a diversified portfolio of investment grade US dollar denominated bonds bearing fixed or variable rate income. Please refer to the prospectus for the full Investment Objective and Policy.

How We Manage the Fund

We seek investment return by investing in government bond markets where yields are likely to fall and avoiding those that are thought to be expensive. The overall duration, or interest-rate sensitivity, of the Fund will fluctuate as our expectations for economic developments, relative to the market, change. We will also look to add value through foreign exchange management, identifying those markets where currencies are attractive, for example due to sound economic fundamentals or rising interest rates. We invest the Fund in a range of fixed income investments including government bonds, corporate bonds and mortgage-backed securities.

The Managers, Baring International Fund Managers (Ireland) Limited, have appointed Baring Asset Management Limited ("BAML") as the Investment Manager of the Baring US Plus Bond Fund.

Risk Profile

The majority of the Fund's holdings will usually be in bonds issued by governments rather than individual companies. These bonds are not deemed as risky as corporate bonds, as they are backed by the full resources of the government issuing them. However, as this is a portfolio invested in the world-wide bond markets, currency fluctuations can have an effect on the performance of the Fund's investments.

Key Changes Since the Last Report

There are no major changes to report.

Strategy and Performance

The Fund produced a positive return and marginally outperformed its comparative index.

There was a sharp rise in US Treasury bond yields at the beginning of the reporting period, with ten year yields reaching a peak of 5.3% in mid June. We took advantage of this by increasing duration in the US, as the rise in Treasury yields provided an attractive investment opportunity. By July, market sentiment had changed and US Treasuries staged an impressive rally, with ten year yields falling from 5.1% to 4.8% by the end of the month. Heightened risk aversion saw the US equity market experience some of the worst losses since September 2002, helping the upward momentum of government bond prices. In reaction, we reduced duration at the end of July, taking profits on our US bond position. We further reduced duration at the beginning of 2008. On the back of the impressive rally of US Treasuries, we took profits on a US Treasury note due to mature in 2016, investing the proceeds into US cash instruments.

We increased our allocation to high grade corporate financial issues out of US Treasuries. The first tranche was bought in November as investment grade US credit spreads over US Treasuries had widened, providing attractive value. We added to this position through to the end of March 2008 as spreads continued to widen with financials leading the way. This position began to work in April, as investor confidence returned and US corporate spreads over equivalent maturity US Treasuries tightened from 3.0% to 2.6%.

We reduced our allocation to UK bond markets, firstly in July and then again in September by reducing our holding of a Gilt maturing in 2016. UK Gilts, like other government bond markets, benefited from heightened risk aversion with the plight of the UK mortgage bank Northern Rock and its application for emergency funding from the Bank of England. Shortly after, bonds sold off, in reaction to the surprise 0.5% cut in US interest rates and improving global economic sentiment. In February 2008, we opened a position in the UK bond market through the purchase of a strip bond maturing in 2016 on a currency hedged basis.

Within our allocation of Emerging market debt, we reduced hard currency bonds in favour of local currency debt, taking profits on the Colombia Euro denominated issue in favour of Polish zloty government bonds early in the reporting period. We believe the yields available in the hard currency asset class no longer provide the opportunity for substantial gains.

The Fund had no exposure to securities backed by sub-prime mortgages, which fared poorly.

Review of the Market

Government bond markets have been driven by sub-prime stories, write downs by financial institutions and the potential consequences on economic growth and earnings figures. As a result, government bonds rallied whilst credit and equities have performed poorly in comparison. The end of the reporting period saw investor confidence return and riskier markets bounce back.

The period started quietly. However, markets began to be driven by recessionary fears in the US and concerns as to the extent this would likely affect global markets. From the summer of 2007, the US Federal Reserve (Fed) cut the Fed Funds rate seven times from 5.25% to 2.00% in an attempt to bolster the economy. On the back of deteriorating global dynamics and the ensuing flight to quality, US Treasuries performed well overall.

The period started with a continued trend of stability in corporate spreads, enabling credit to outperform government securities. However, by June 2007, nervousness had increased. Negative news, regarding US housing and sub-prime mortgage lending, came to the forefront. Initially the market's reaction was fairly muted, however, by the end of the summer, corporate spreads had started to widen led by the banking, brokerage and non-bank financial sectors. Volatility continued for the rest of 2007 and into 2008 before a bounce back in credit markets occurred in April 2008. Investors seeking value, coupled with improving sentiment in reaction to increasing help from the Fed, buoyed the credit markets.

Emerging market debt also suffered from high volatility, although it outperformed the investment grade corporate bond market over the review period.

Market Outlook

Risks to the global economy appear to be increasing with the slowdown in the US affecting growth prospects in other major economies. Volatility, particularly in higher risk markets, remains high and confidence is fragile. The Fed appears firmly committed to cutting interest rates where necessary and has also injected considerable funding into the intra-bank liquidity markets. With inflationary pressures on the rise, however, US interest rates may move higher later this year.

Credit risk and slower economic activity are the markets' major concerns. Global interest rates are already very low, but credit, particularly financials are cheap, so any improvement in sentiment or fundamentals could provoke a meaningful rally.

Managers' Statement

The financial statem	ents were	approved	by the	Board	of	Directors	of	the	Managers,	Baring	International	Fund	Managers
(Ireland) Limited on 3	1 July 200	08 and signe	ed on it	s behalf	by	7 .							

Anthony Cooney Mark Thorne Directors

1. Principal Accounting Policies

The principal accounting policies applied in the preparation of these financial statements under Irish GAAP are set out below.

Basis of preparation

The Baring Global Umbrella Fund (the "Trust") has been authorised by the Financial Regulator as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2003 (as amended), the Trust Deed and the provisions of the Hong Kong Code on Unit Trusts and Mutual Funds, supplemented or consolidated from time to time. Accounting standards generally accepted in Ireland in preparing financial statements giving a true and fair view are those published by the Institute of Chartered Accountants in Ireland and issued by the Accounting Standards Board ("ASB").

The format and certain wordings of the financial statements have been adapted from those contained in the FRS 3 "Reporting Financial Performance" so that, in the opinion of the Managers, they more appropriately reflect the nature of the Trust's business as an investment fund.

The Trust has availed of the exemption available to open-ended investment funds under FRS 1 not to prepare a cash flow statement.

Gains and losses arose solely from continuing operations. There were no gains or losses other than those dealt with in the Profit and Loss account.

Adoption of new accounting standard

The Trust adopted Financial Reporting Standard No. 29: "Financial Instruments: Disclosures" ("FRS 29") during the year. FRS 29 replaces the disclosure requirements of FRS 25: "Financial Instruments: Disclosure and Presentation", and is effective for accounting periods commencing on or after 1 January, 2007.

Historical cost convention

The financial statements have been prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities, including derivative financial instruments held at fair value through profit or loss.

Foreign exchange translation

(a) Functional and presentation currency

Items included in financial statements of the sub-funds (the "Funds") of The Baring Global Umbrella Fund, are measured using the currency of the primary economic environment in which it operates ('the functional currency'). The functional currency of the Funds is the US dollar, which reflects the fact that the majority of the participating redeemable units have been subscribed in US dollars, except for Baring (Sterling) World Bond Fund where the majority of the participating units have been subscribed in Sterling and the functional currency is Sterling. The presentation currency is US dollars, except for the Baring (Sterling) World Bond Fund where the presentation currency is Sterling.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Profit and Loss Account.

Proceeds from subscriptions and amounts paid on redemption of redeemable preference Units are translated at average exchange rates, which approximate the rates prevailing at the dates of the transactions.

1. Principal Accounting Policies (continued)

Financial assets and liabilities at fair value through profit or loss

(a) Classification

The Funds classify their investments in securities, as financial assets or financial liabilities at fair value through profit or loss.

Financial assets or financial liabilities held for trading are those acquired or incurred principally for the purposes of selling or repurchasing in the short term. Financial assets and financial liabilities designated at fair value through profit or loss at inception are those that are managed and their performance evaluated on a fair value basis in accordance with the Fund's documented investment strategy. The Funds' policy is for the Investment Manager and the Board of Directors of the Managers to evaluate the information about these financial assets on a fair value basis together with other related financial information. These financial assets are expected to be realised within 12 months of the Balance Sheet date.

(b) Recognition/derecognition

Regular-way purchases and sales of investments are recognised on the trade date – the date on which the Fund commits to purchase or sell the investment. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Fund has transferred substantially all risks and rewards of ownership.

(c) Measurement

Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed in the Profit and Loss Account. Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities at fair value through profit or loss' category are presented in the Profit and Loss Account in the period in which they arise. Interest income from financial assets at fair value through profit or loss is recognised in the Profit and Loss Account within interest income using the effective interest method. Dividend income from financial assets at fair value through profit or loss is recognised in the Profit and Loss Account within dividend income when the Funds' right to receive payments is established. Financial instruments were valued at 12 noon Dublin time on 30 April 2008 in accordance with the Trust Prospectus.

(d) Fair value estimation

The fair value of financial instruments traded in active markets (such as publicly traded securities) is based on quoted market prices at the Balance Sheet date. The quoted market price used for financial assets held by the Fund is the current bid price; the appropriate quoted market price for financial liabilities is the current asking price. When the Fund holds derivatives with offsetting market risks, it uses midmarket prices as a basis for establishing fair values for the offsetting risk positions and applies this bid or asking price to the net open position, as appropriate.

The fair value of financial instruments that are not traded in an active market (for example, over-the counter derivatives) is determined by using valuation techniques. The Fund uses a variety of methods and makes assumptions that are based on market conditions existing at each Balance Sheet date. Valuation techniques used include the use of comparable recent arm's length transactions, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants.

Income from investments

Interest income and expense are recognised in the Profit and Loss Account for all debt instruments using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating the interest income or interest expense over the relevant period.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts throughout the expected life of the financial instrument, or a shorter period where appropriate, to the net carrying amount of the financial asset or financial liability.

1. Principal Accounting Policies (continued)

Income from investments (continued)

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, interest income is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

Dividends are credited to the Profit and Loss Account on the dates on which the relevant securities are listed as "ex-dividend". Dividend income is shown gross of any withholding taxes, which is disclosed separately in the Profit and Loss Account, and net of any tax credits.

Cash and other liquid assets will be valued at their face value together with interest accrued, where applicable.

Receivables

Receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Receivables are recognised initially at fair value plus transaction costs that are directly attributable to their acquisition origination. They are subsequently measured at amortised cost using the effective interest method, less provision for impairment.

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

Forward Foreign Currency Transactions

Forward Foreign Currency Transactions ("FFCTs") are measured at fair value based on the closing prices of the FFCTs contract rates on the relevant foreign exchange market on a daily basis. Realised and unrealised gains and/or losses are reported in the Profit and Loss Account.

Redeemable Participating Units

Redeemable participating units are redeemable at the Unitholder's option and are classified as financial liabilities.

The participating unit can be put back to the Trust at any time for cash equal to a proportionate unit of the Trust's net asset value. The participating unit is carried at the redemption amount that is payable at the Balance Sheet date if the Unitholder exercised their right to put the unit back to the Trust.

In accordance with the provisions of the Trust Deed, listed investments and investments with prices quoted in over the counter markets or by market makers are stated at the last traded price on the valuation day for the purpose of determining net asset value per unit for subscriptions and redemptions and for various fee calculations. However, as stated above the accounting policy of the Trust for the purpose of compliance with FRS 26 and for reporting purposes, is to value its investments at the relevant bid market prices, where available, on the Balance Sheet date. As at 30 April 2008, the difference between the valuation stated in the financial statements for investments and the valuation methodology indicated in the Trust Deed, results in a decrease in value of investments, this difference is disclosed on the face of each Fund's Balance Sheet.

Net assets attributable to holders of redeemable participating units represent a liability in the Balance Sheet, carried at the redemption amount that would be payable at the Balance Sheet date if the Unitholder exercised the right to redeem the unit to the Fund. Consequently, the differences described above adjust the carrying amount of the net assets attributable to redeemable unitholders and are recognised in the Profit & Loss Account.

The cumulative differences are included as "Adjustments from bid market prices to last traded market prices" on the Balance Sheet.

Operating Expenses

The Trust is responsible for all normal operating expenses including audit fees, stamp and other duties and charges incurred on the acquisition and realisation of investments. The Managers meet all other expenses incurred by it in connection with its services.

1. Principal Accounting Policies (continued)

Distributions

Note 4 discloses all distributions declared and paid during the year. Distributions may be declared from net income and net fair value gains on financial assets. Unitholders should note that all distributions below US\$100/£50/€100 are automatically reinvested. The distribution on these units is recognised in the Profit and Loss Account as finance costs on an ex date basis.

Stocklending

The Trust has entered into a stocklending arrangement with Northern Trust Company from 26 October 2005. All income received from stocklending is reported in the Profit and Loss Account on an accruals basis. A summary of the Trust's stocklending activity during the year is disclosed in Note 12.

Net Income Equalisation

Net income equalisation is accrued net income included in the price of units purchased and redeemed during the accounting year. The subscription price of Units is deemed to include an equalisation payment calculated by reference to the net accrued income of the relevant Fund and the first distribution in respect of any Unit will include a payment of income usually equal to the amount of such equalisation payment. The redemption price of each Unit will also include an equalisation payment in respect of the net accrued income of the relevant Fund up to the date of redemption. Net income equalisation is accounted for as a finance cost in the Profit and Loss Account.

2. Fees And Other Expenses

Management Fees

The Managers currently make a charge in respect of each Fund at the following percentage rate per annum of the value of the net assets of the Fund:-

Baring Eastern Europe Fund	1.50%	Baring Global Select Fund	1.50%
Baring Global Equity Fund	1.50%	Baring (Sterling) World Bond Fund	1.00%
Baring Global Resources Fund	1.50%	Baring US Plus Bond Fund (All Classes)	0.75%

Baring High Yield Bond Fund (All Classes) 1.00%

The management charge is payable monthly in arrears and is calculated by reference to the value of the net assets of each Fund as at each day as at which the value of the net assets of the relevant Fund is calculated. The foregoing charges may be increased up to the relevant amount specified in the Prospectus on giving not less than three months notice to unitholders. The management fees have not changed from the previous period.

Where the Net Asset Value of any Fund includes interests in any investment fund managed by a subsidiary of the parent company (a "Barings Fund") the fee payable to the Managers relating to the holding will be reduced by the percentage rate (if any) charged to the Barings Fund for comparable management services.

Administration Fees

The Administrator currently makes a charge in respect of each Fund at the rate of 0.45% per annum of the net asset value of each Fund calculated by reference to the daily calculation of asset values and subject to a monthly minimum fee of £2,500, with the exception of the Baring US Plus Bond Fund, where the fee is at a rate of 0.30% of the net asset value. With respect to the Baring High Yield Bond Fund Hedge Classes, the Administrator is entitled to charge an additional £500 per month. Such fees are paid monthly in arrears and are also payable out of the assets of the Trust. The rates have not changed during the year.

Trustee Fees

The Trustee is entitled under the Trust Deed to receive out of the assets of the Trust a fee at the rate of 0.025% per annum of the value of the net assets of each Fund and subject to monthly minimum fee of £500, payable monthly in arrears, with the exception of the Baring Global Equity Fund, the Baring Leading Sectors Fund, the Baring (Sterling) World Bond Fund and the Baring US Plus Bond Fund, which are subject to a monthly minimum fee of £750 payable monthly in arrears. With respect to the Baring High Yield Bond Fund Hedge Classes the Trustee is entitled to an additional £250 per month. The Trustee is also entitled to be reimbursed all fees and charges of custodians and sub-custodians appointed by it and all other expenses incurred by it. The rates have not changed during the year.

2. Fees And Other Expenses (continued)

Other Expenses

The Trustee pays out of the assets of the Trust the above fees and expenses, stamp duties, taxes, brokerage or other expenses of acquiring and disposing of investments, the fees and expenses of the auditors, listing fees and legal expenses of the Managers. The costs of printing and distributing reports, accounts and any prospectus, publishing prices and any costs incurred as a result of a change in law or the introduction of any new law (including any costs incurred as a result of compliance with any code relating to unit trusts, whether or not having the force of law) are also paid out of the assets of the Trust.

Expenses are charged to the Fund in respect of which they are incurred or, where an expense is not considered by the Trustee to be attributable to any one Fund, the expense will normally be allocated by the Trustee to all Funds pro rata to the value of the net assets of the relevant Funds.

Trailer fees and Reimbursements

Please see information for Investors in Switzerland on page 89.

3. Related Party Disclosures

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

(a) Management fee

The Fund is managed by Baring Asset Management Limited (the 'Investment Manager'), an investment management company incorporated in London on 6 April 1994. The Investment Manager is part of the Baring Asset Management group and is a wholly owned subsidiary of MassMutual. Under the terms of the management agreement dated 29 October 2004, the Fund appointed Baring Asset Management (Asia) Limited as Investment Manager to provide management and advisory services to the Fund, due to reorganisation within Baring Asset Management Limited the management agreement was transferred to Baring Asset Management Limited on 20 December 2006. The management fee rates on the Fund classes are disclosed in Note 3. The outstanding amounts payable as at the period end for Management fees are as disclosed on each Fund's Balance Sheet. Richard Bellis, Ian Pascal and Paul Savage are connected to the Managers, through employment with the Managers and its subsidiaries.

(b) Trustee fee

The Fund has engaged the services of Northern Trust Fiduciary Services (Ireland) Limited to provide custodian services for a fee. The Trustee shall be entitled to receive out of the assets of each Fund a total fee of 0.025% of the net assets of that Fund (plus VAT, if any). Such fees shall accrue and be calculated on each Dealing Day and be payable monthly in arrears. Trustee is also entitled to be repaid out of the assets of the Trust all of its reasonable out-of-pocket expenses incurred on behalf of the Trust which includes legal fees, couriers' fees and telecommunication costs and expenses. The outstanding amounts payable as at the period end for Trustee fees are as disclosed on each Fund's Balance Sheet.

(c) Administration fee

The Fund has engaged the services of Northern Trust International Fund Administration Services (Ireland) Limited to provide administration services for a fee. The administration fee on the Fund classes is disclosed in Note 3. Such fees shall accrue and be calculated on each Dealing Day and be payable monthly in arrears. The Administrator is also entitled to be repaid out of the assets of the Trust all of its reasonable out-of-pocket expenses incurred on behalf of the Trust which includes legal fees, couriers' fees and telecommunication costs and expenses. The outstanding amounts payable as at the period end for Administration fee are as disclosed on each Fund's Balance sheet. Anthony Cooney is a director of the Administrator.

3. Related Party Disclosures (continued)

(d) Legal fee

Mark Thorne is a partner of the Legal Advisor and a director of the Managers. The fees paid to Dillon Eustace during the year amounted to US\$18,107 (2007:US\$39,787)

(e) Stocklending income

Northern Trust Company entered into an agreement with the Trust on 26 October 2005 to provide a stocklending service in order for the Trust to generate additional income. All stocklending income earned during the year is disclosed in Note 12.

4. Distributions

The table below provides a breakdown of distributions declared during the year.

The following two Funds have monthly distribution classes:

Baring High Yield Bond Fund Baring US Plus Bond Fund

The following Funds have quarterly distribution classes paid not later than 28 February, 31 May, 31 August and 30 November each year:

Baring High Yield Bond Fund Baring US Plus Bond Fund

The Baring (Sterling) World Bond Fund distributes on a six monthly basis, distributions are paid not later than 31 May and 30 November each year.

The following Funds may have annual distributions paid not later than 30 June in each year:

Baring Eastern Europe Fund Baring Global Equity Fund

Baring Global Resources Fund Baring High Yield Bond Fund - Euro Hedged Class

Baring Global Select Fund

9. Financial Risk Management

Strategy in Using Financial Instruments

The sub-Funds of the Trust, hereafter the "Funds" are exposed to a variety of financial risks in pursuing its stated investment objective and policy. These risks include but are not limited to credit risk, liquidity risk and market risk (which in turn includes currency risk, interest rate risk and price risk). The Funds takes exposure to certain of these risks to generate investment returns on its portfolio, although these risks can also potentially result in a reduction in the Funds' net assets. The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on the Funds' performance where it can do so while still managing the investments of the Funds in a way that is consistent with the Funds' investment objective and policy.

9. Financial Risk Management (Continued)

The investment objective of the Funds is disclosed in the Investment Manager reports. The risks, and the measures adopted by the Fund for managing these risks, are detailed below.

The main risks arising from the Trust's financial instruments are market, foreign currency, interest rate, credit and liquidity risk. The Managers review and agree policies for managing each of these risks and they are summarized below. These policies have remained substantially unchanged since the beginning of the period to which these Financial Statements relate.

(a) Market price risk

Market price risk is defined in FRS 29 as the risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices.

The Baring Global Resources Fund, the Eastern Europe Fund, the Global Equity Fund and the Global Select Fund consist principally of equity instruments, the US Plus Bond Fund, the Sterling (World) Bond Fund and the High Yield Bond Fund consist principally of bond instruments. The values of these instruments are determined by market forces and there is accordingly a risk that market prices can change in a way that is adverse to the Funds' performance. The Funds have adopted a number of investment restrictions which are set out in the Trust's Prospectus which limit the exposure of the Funds to adverse changes in the price of any individual financial asset. In accordance with the Funds' policy, the Investment Manager monitors the Funds' positions on a daily basis and reports regularly to the Board of Directors of the Managers, which reviews the information on the Funds' overall market exposures provided by the Investment Manager at its periodic meetings.

The Investment Manager uses three techniques to help in the risk management process, monitoring of compliance and quantitative limits, prevention of limit breaches and trade monitoring. These techniques allow the Investment Manager to ensure that the Funds remain in compliance with the restriction in the Prospectus and the UCITS rules by which the Funds are governed.

In addition, the Investment Manager manages the exposure of the portfolio to the risk of adverse changes in the general level of market prices through adhering to its formal risk management process, which includes the use of systems and technology to monitor overall market and position risk on a daily basis.

The maximum risk arising from an investment is determined by the fair value of the financial instruments.

The overall market exposures and concentration of risk can be seen on the Portfolio Statement and Balance Sheet of each Fund. The Fund's market price risk is affected by two main components: changes in market prices and currency exchange rates. FRS 29 requires a sensitivity analysis showing how the net asset value of the Funds would be affected by changes in each of these factors.

Currency exchange rate movements are dealt with under the relevant headings below. Changes in market prices primarily affect the fair value of the Funds' exposures to securities, related derivatives and other instruments.

For the purposes of compliance with FRS 29 assuming that the securities held on the below portfolios as at 30 April 2008 remain unchanged, a simultaneous increase or decrease in the comparative index which is found in the Investment Manager's reports of each Fund by 10% might be expected to increase or decrease net assets attributable to participating unitholders by: (see table below).

Some limitations of sensitivity analysis are;

Baring US Plus Bond Fund

• the methodology is based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;

10.00

30/04/2007

- the market price risk information is a relative estimate of risk rather than a precise and accurate number;
- · the market price information represents a hypothetical outcome and is not intended to be predictive; and
- future market conditions could vary significantly from those experienced in the past.

(b) Foreign currency risk

Currency risk is defined in FRS 29 as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Funds are exposed to currency risk as assets and liabilities of the Fundmay be denominated in a currency other than the functional currency of the Funds, which is the US dollar.

The fluctuations in the rate of exchange between the currency in which the asset or liability is denominated and the functional currency could result in an appreciation or depreciation in the fair value of those assets and liabilities. The Investment Manager may attempt to mitigate this risk by using financial derivative instruments.

In accordance with the funds' policy, the Investment Manager monitors the funds currency exposures on a daily basis and reports regularly to the Board of Directors of the Managers, which reviews the information provided by the Investment Manager on any significant exposures at its periodic meetings.

The Investment Manager used Forward Foreign Currency Contracts on all Funds as a tool and technique to hedge these Funds currency exposure.

Notes to the Financial Statements

9. Financial Risk Management (continued)

(c) Interest Rate Risk

Interest rate risk is defined in FRS 29 as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Except for the Baring High Yield Bond Fund, the Sterling (World) Bond Fund and the US Plus Bond Fund, the majority of the other Funds financial assets and liabilities are non-interest bearing and any excess cash and cash equivalents are invested at short-term market interest rates. As a result, the Funds are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

The Baring High Yield Bond Fund, the Sterling (World) Bond Fund and the US Plus Bond Fund, have interest-bearing financial assets and liabilities. As a result, the Fund's are subject to the risk of potentially adverse movements in the prevailing levels of market interest rates. The Investment Manager may from time to time enter into contracts on behalf of the Funds that seek to mitigate the effects of these movements.

In accordance with the Fund's policy, the Investment Manager monitors the Funds interest rate exposures on a daily basis and reports regularly to the Managers, which reviews the information provided by the Investment Manager on significant exposures at its periodic meetings. The Investment Manager has systems in place to review the interest rate risk through modified duration calculations.

At 30 April 2008 and 30 April 2007, Baring (Sterling) World Bond Fund interest rate exposures were as follows:

At 30 April 2008, should market interest rates across all currencies and all maturities have fallen or increased by 50 basis points, with all other variables held constant, this would have increased net assets attributable to holders of redeemable participating units of the Baring US Plus Bond Fund by approximately US\$891,830 and on a per unit basis US\$0.38 (2007: US\$1,120,767 and on a per unit basis US\$0.34)., the Sterling (World) Bond Fund by approximately £25,459 and on a per share basis £0.02 (2007: £103,982 and on a per unit basis £0.04), and the High Yield Bond Fund by approximately US\$6,612,849 and on a per unit basis US\$0.29 (2007: US\$7,686,237 and on a per unit basis US\$0.24).

(d) Liquidity Risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities as they fall due.

The Funds are exposed to daily cash redemptions of units however, the Managers are entitled, with the approval of the Trustee, to limit the number of Units of any class realised on any Dealing Day to 10% of the total number of Units of that class in issue. There are also a number of circumstances when the Managers may, with the approval of the Trustee, suspend temporarily the right of Unitholders to require the realisation of Units of any class and/or may delay the payment of any monies in respect of any such realisation.

The Funds invests the majority of their assets in securities and other instruments that are traded on an active market and which are considered to be liquid as they can be readily disposed of in the event that cash needs to be raised to meet redemptions or to pay expenses.

In accordance with the Funds' policy, the Investment Manager monitors the Funds' liquidity on a daily basis and reports regularly to the Board of Directors of the Managers, which reviews the information provided by the Investment Manager on significant exposures at its periodic meetings. The Fund has an agreed temporary overdraft facility with its Trustee to allow for temporary timing/ matching differences on trades and subscriptions and redemptions. There were no drawdowns on this facility as at 30 April 2008.

At 30 April, 2008 and 30 April, 2007, the Funds' financial liabilities, as disclosed on the Balance Sheet, were all due within one month.

9. Financial Risk Management (continued)

(e) Credit Risk

The Baring Global Resources Fund, the Eastern Europe Fund, the Global Equity Fund and the Global Select Fund consist principally of equity instruments and are not exposed to credit risk from these positions. The US Plus Bond Fund, the Sterling (World) Bond Fund and the High Yield Bond Fund consist of bonds and are exposed to credit risk.

However, the Funds will be exposed to a credit risk on parties with whom it trades and will bear the risk of settlement default. All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation. The Funds are exposed to credit risk on cash and investment balances held with the Trustee. The Investment Manager reviews concentrations of credit risk on a fortnightly basis. All exposures to counterparty credit risk are monitored by the BAM Counterparty Credit Committee and are subject to BAM's Counterparty Credit Policy (CCP). BAM requires a minimum credit rating of Dunn and Bradstreet 3, but also actively avoids exposure to entities having an S&P rating of less than AA-, even where the D&B rating is 3 or better. Adherence to the Policy is very rigidly enforced. Any changes to ratings which cause divergence from Policy are acted on immediately without exception. Application for IPOs for example is subject to the credit rating of the entity to whose balance sheet the application will expose the investing fund. Where no satisfactory rating is applied, BAM insists that monies are paid into a ring-fenced 'Client Money' account hence avoiding exposure not permitted by the CCP.

The Fund minimises concentrations of credit risk by undertaking transactions with a large number of regulated counterparties on recognised and reputable exchanges.

Credit risk arising from receivables relating to unsettled trades is considered small due to the short settlement period involved. The maximum exposure related to unsettled trades equals the amounts shown on the Balance Sheet. There was no past due or impaired assets as of 30 April 2008. (2007: \$Nil)

At 30 April 2008 and 30 April 2007, the Baring High Yield Bond Fund exposure to credit risk was as follows:

Portfolio by rating category		
Rating	30/04/2008	30/04/2007
AAA/AA	7.8%	7.5%
A	41.1%	21.8%

9. Financial Risk Management (continued)

At 30 April 2008 and 30 April 2007, the Baring US Plus Bond Fund exposure to credit risk was as follows:

Portfolio by rating category		
Rating	30/04/2008	30/04/2007
AAA/AA	66.5%	84.9%
A	33.5%	0%
BBB	0%	5.3%
BB	0%	9.8%
В	0%	0%
Not Rated	0%	0%
	100%	100%

The Trustee on the Funds, Northern Trust Fiduciary Services (Ireland) Limited which is part of the Northern Trust Company has a rating of (AA)., which was rated by Standard & Poor's.

The net assets (market value of investments, cash and receivables/payables relating to securities) exposed to credit risk at year end amounted to

Fund	30/04/2008 £	30/04/2007 £
Baring (Sterling) World Bond Fund	£1,160,952	£3,562,797
	US\$	US\$
Baring High Yield Bond Fund	US\$252,708,467	US\$374,292,958
Baring Global Resources Fund	US\$1,394,055,226	US\$354,106,283
Baring Eastern European Fund	US\$3,744,581,574	US\$2,661,596,314
Baring Global Equity	US\$11,910,669	US\$11,611,670
Baring Global Select Fund	US\$42,769,358	US\$15,737,615
Baring US Plus Bond Fund	US\$23,287,351	US\$31,632,381

10. Financial Derivative Instruments

The following Funds used Efficient Portfolio Management techniques during the year:

Baring High Yield Bond Fund and Baring US Plus Bond Fund - currency hedging using forward contracts and interest hedging using future contracts was carried on during the year.

The Baring (Sterling) World Bond Fund was active in using forward foreign exchange contracts to reduce risk and transaction costs through the creation of "synthetic bonds". This occurred where the Fund was positive on a country's bond market but negative on their currency and concurrently elsewhere, negative on another country's bond market yet positive on their currency. In addition, forward foreign currency contracts were used for hedging purposes.

11. Taxation

Under current law and practice the Trust qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to unitholders or any encashment, redemption, cancellation or transfer of units. No Irish tax will arise on the Trust in respect of chargeable events in respect of:

- (a) a unitholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Trust; and
- (b) certain exempted Irish tax resident unitholders who have provided the Trustee with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Trust may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Trust or its unitholders.

12. Stocklending

A summary of the activity is detailed below:

	Aggregate value of securities on		Net Income from stocklending received during the	Net stocklending income receivable
Fund	loan at 30/04/2008 US\$	held at 30/04/2008 US\$	year US\$	30/04/2008 US\$

13. Statement of Portfolio Movements

A statement of changes in the composition of the investment portfolio will be issued to unitholders, free of charge, on request. Unitholders resident in Germany may, if they so wish, obtain a copy of the breakdown from the German Paying and Information Agent

14. Changes in Directors of the Managers

William Collins resigned from the Board of Directors of the Managers on 3 August 2007. Richard Bellis was appointed on 14 August 2007.

15. Financial Assets at Fair Value through Profit or Loss

As part of the EU Fair Value Regulations, a note has to be disclosed in the Financial Statements where a Fund has a mixture of security types, breaking out the security types and their gain or loss. The table below applies only to the Baring High Yield Bond Fund, Baring (Sterling) World Bond Fund and Baring US Plus Bond Fund as they hold bond and forward contracts, the other Funds in the Umbrella only hold equity type securities.

		Realised and unrealised		Realised and unrealised

	32,859,611	507,858	40,931,205	775,606

16. Subsequent Events

There have been no events subsequent to the year end, which, in the opinion of the Directors of the Managers, may have had an impact on the financial statements for the year ended 30 April 2008, except for the closure of the Sterling (World) Bond Fund effective from 18 July 2008 and the distributions declared on the 2 May 2008, see note 4 for appropriate details.

17. Approval of Financial Statements

The financial statements were approved by the Board of Directors of the Managers on 31 July 2008.

Information For Investors in Switzerland - Unaudited

The Managers have appointed ING Bank (Switzerland) Limited, 30, avenue de Frontenex, CH-1211 Geneva 6, Switzerland, as representative and paying agent for Switzerland. For Units distributed in Switzerland, the performance place is at ING Bank (Switzerland) Limited's address. Investors can obtain, free of charge, the Prospectus, the Simplified Prospectus (both also available for potential investors), the last annual and interim reports as well as copies of the Trust Deed and amendments to the Trust Deed if any, in German, and a list of the purchases and sales made on behalf of the Fund from the representative at the above address. Official publications for the Fund are made in the AGEFI and the Swiss Official Trade Gazette. Unit prices (Net Asset Value with the words "commissions not included") are published daily in the AGEFI.

Following a Guideline from the Swiss Funds Association (the "SFA") dated 16 May 2008; the Managers are supplying performance data in conformity with the said Guideline. This data can be found below and under each of the fund reports on pages 6, 15, 23, 31, 38, 47 and 54. Further, the Managers are further required to provide the below additional information on performance.

There is no appropriate benchmark for the Funds. Any reference to an index is for comparison purposes only. The following comparative indices are used as in the Managers' opinion and in the light of the investment policy of the relevant Fund, they are the most appropriate selection for comparison.

Baring Eastern Europe Fund

The FTSE Eastern Europe Index is not a published index. It is customised by FTSE specifically for Barings. The index is a free float-adjusted market cap index consisting of stocks from the Czech Republic, Hungary, Poland and Russia.

Baring Global Equity Fund

The MSCI World Index is a free float-adjusted market capitalisation index that is designed to measure global developed market equity performance of 23 developed market country indices.

Baring Global Resources Fund

The MSCI All Countries Materials & Energy Index is a free float-adjusted market capitalisation index that is designed to measure the performance of companies in the material and energy sectors in developed and emerging market countries.

Baring High Yield Bond Fund

There is no appropriate index against which to compare the Baring High Yield Bond Fund. This is because the Fund is an absolute return product which is not managed relative to an index. Performance objectives are: 1) to produce a high level of current yield at an acceptable level of risk; 2) to outperform intermediate US Treasuries 2% net of fees; and 3) to produce a positive absolute return.

Baring Global Select Fund

The MSCI World Index is a free float-adjusted market capitalisation index that is designed to measure global developed market equity performance of 23 developed market country indices.

Baring (Sterling) World Bond Fund

The FTSE All Stocks Index represents 98-99% of the UK market capitalisation. FTSE All-Share is the aggregation of the FTSE 100, FTSE 250 and FTSE Small Cap Indices. The Citigroup World Government Index (WGBI) is a market-capitalisation—weighted index that tracks the performance of the 21 government bond markets of Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Japan, the Netherlands, Norway, Poland, Portugal, Spain, Sweden, Switzerland, the UK and the US. The ratio changed from 60%:40% on 1 September 2006.

Information For Investors in Switzerland – (continued)

<u>Past performance is no indication of current or future performance</u>. The value of an investment can fall as well as rise as a result of market fluctuations and investors may not get back the amount originally invested. <u>The performance data does not take account of the commissions and costs incurred on the issue and redemption of units.</u>

Investors should contact the Swiss representative at the above address should they require additional information e.g. on performance including the composition of the relevant indices where applicable.

Total Expense Ratio

Pursuant to a Guideline from the Swiss Funds Association (SFA) dated 16 May 2008, the Funds are required to publish a Total Expense Ratio (TER) for the period ended 30.04.2008.

The Total Expense Ratio for each Fund for the last twelve month period ended 30 April 2008 is as follows:

Name of Fund	30/04/2008 TER in %	Name of Fund	30/04/2008 TER in %
Baring Eastern Europe Fund	1.99	Baring Global Select Fund	2.06
Baring Global Equity Fund	2.29	Baring (Sterling) World Bond Fund	2.52
Baring Global Resources Fund	2.01	Baring US Plus Bond Fund	1.28
Baring High Yield Bond Fund	1.54		

Comparative 30 April 2007

Name of Fund	30/04/2007 TER in %	Name of Fund	30/04/2007 TER in %
Baring Eastern Europe Fund	2.05	Baring Global Select Fund	2.21
Baring Global Equity Fund	2.17	Baring (Sterling) World Bond Fund	1.69
Baring Global Resources Fund	2.04	Baring US Plus Bond Fund	1.13
Baring High Yield Bond Fund	1.53		

This information was established by the Managers, Baring International fund Managers (Ireland) Limited based on the data contained in the Profit & Loss Account for the financial twelve months ended 30 April 2008 (Fund management fees, administration fees, trustee fees, taxes and duties, all other commissions and expenses appearing as per the breakdown of the Profit & Loss Account and not already included in any of the foregoing categories).

Information For Investors in Switzerland – (continued)

Portfolio Turnover Rate

The Portfolio Turnover Rate (PTR) has been established in conformity with a Guideline from the Swiss Funds Association (SFA) of 16 May 2008, using the last twelve-month period ended 30.04.08 as the reference period.

The Portfolio Turnover numbers for each Fund for the twelve-month period ended 30 April 2008 are as follows:

Name of Fund	30/04/2008 PTR in %	Name of Fund	30/04/2008 PTR in %
Baring Eastern Europe Fund	38.16	Baring Global Select Fund	77.86
Baring Global Equity Fund	108.63	Baring (Sterling) World Bond Fund	290.95
Baring Global Resources Fund	27.87	Baring US Plus Bond Fund	719.22
Baring High Yield Bond Fund	82.44		

Comparative 30 April 2007

Name of Fund	30/04/2007 PTR in %	Name of Fund	30/04/2007 PTR in %
Baring Eastern Europe Fund	(73.23)	Baring Global Select Fund	82.93
Baring Global Equity Fund	159.11	Baring (Sterling) World Bond Fund	168.80
Baring Global Resources Fund	(106.94)	Baring US Plus Bond Fund	649.67
Baring High Yield Bond Fund	50.52		

Trailer Fees and Reimbursements

Trailer fees (Bestandespflegekommissionen) may only be paid to the sales agents/partners indicated below:

- Authorised sales agents (distributors) within the meaning of Article 19, Para 1, KSG:
- Sales agents (distributors) exempted from the authorisation requirement, within the meaning of Article 19, Para 4, KAG:
- · Sales partners who place fund units exclusively with institutional investors with professional treasury facilities and/or
- Sales partners who place fund units with their clients exclusively on the basis of a written commission-based asset management mandate.

Reimbursements (Ruckvergutungen) may only be paid to the institutional investors detailed below who from a commercial perspective are holding the fund units for third parties.

- Life insurance companies (in respect of fund units held for the account of insured persons or to cover obligations towards insured persons):
- · Pension funds and other retirement provision institutions (in respect of fund units held for the account of beneficiaries)
- Investment foundations (in respect of fund units held for the account of in-house funds)
- · Swiss fund management companies (in respect of fund units held for the account of the funds managed)
- Foreign fund management companies and providers (in respect of fund units held for the account of managed funds and investing unitholders): and/or
- Investment companies (in respect of the investment of the company assets)

European Union Taxation of Savings Income Directive (Unaudited)

On 3 June 2003 the European Commission published a new directive regarding the taxation of savings income ('the Directive'). From 1 July 2005 Member States are required to provide to the tax authorities of another Member State details of payments of interest (which may include distributions and realisation payments by collective investment funds) or other similar income paid by a person within its jurisdiction to an individual resident in that other Member State, subject to the right of certain Member States to opt instead for a withholding tax system in relation to such payments.

Accordingly, the Trustee, Administrator, paying agent or such other entity considered a "paying agent" (for the purposes of the Directive a "paying agent" is the economic operator who pays interest to or secures the payment of interest for the immediate benefit of the beneficial owner) for the purposes of the Directive may be required to disclose details of or withhold tax on distributions and/or realisation payments by the Unit Trust to Unitholders who are individuals or residual entities (located in another EU Member State) to the taxation authority in the home jurisdiction of the paying agent who will pass such details or tax to the Member State where the investor resides. Investors should note that Switzerland and the EU have entered into a bilateral agreement, effective from 1 July 2005, which introduces measures equivalent to the EU Tax Savings Directive in Switzerland. Generally these measures require tax to be withheld on interest payment made by paying agents to EU residents.

As Ireland has opted for exchange of information rather than a withholding tax system, since the Directive becomes effective, the principle consequence for Unitholders will be that details of relevant savings income will be disclosed to the EU member states in which Unitholders are resident. The Directive has been enacted into Irish legislation and the reporting of any relevant payments of interest made by the Unit Trusts, together with various specified information relating to recipients who are individuals or residual entities resident in EU states other than Ireland, applied from 1 July 2005.

Fund	Disclosure of distribution to the tax authorities of the underlying Unitholder (see below) (15% rule)	Disclosure of redemption proceeds to the tax authorities of the underlying Unitholder (see below) (40% rule)
Baring High Yield Bond Fund	√	√
Baring (Sterling) World Bond Fund	✓	✓
Baring US Plus Bond Fund	✓	✓

The above is in accordance with the Irish regulations as at 30 April 2008. As the above Funds have more than 40% of their assets invested in certain types of interest bearing securities (which includes bank deposits), both distributions and redemption proceeds will be reportable under the Directive.

All other Funds within the umbrella are deemed to be out of scope of the Directive and the above rules will therefore not apply to these Funds. This is because at 30 April 2008 less than 15% of their assets were invested in interest bearing securities.

The information regarding which funds fall within or outside the scope of the Directive under Irish regulations will be applicable at least until the next set of audited accounts are published.

Information For Investors In Germany (Unaudited)

The full and the simplified prospectus, a list of portfolio changes, the trust deed, the annual and the semi-annual reports are available free of charge in hard copy at the German Paying and Information Agents office. The Net Asset Value per Unit, the issue and redemption prices as well as any notices to Unitholders may be obtained at the German Paying and Information Agent on each bank business day in Frankfurt am Main, Germany. All information available to Trust Unitholders at the main office is also available through the German Paying and Information Agents office.

Special Risks Resulting From New Tax Publication Requirements in Germany

Foreign investment companies must provide documentation to the German fiscal authorities upon request, e.g. in order to verify the accuracy of the published tax information. The basis upon which such figures are calculated is open to interpretation and it cannot be guaranteed that the German fiscal authorities will accept the investment companies' calculation methodology in every material respect. In addition, if it transpires that these publications are incorrect, any subsequent correction will, as a general rule, not have retrospective effect and will, as a general rule, only take effect during the current financial year. Consequently, the correction may positively or negatively affect the investors who receive a distribution or an attribution of deemed income distributions in the current year.

Market Timing (Unaudited)

Repeatedly purchasing and selling Units in the Funds in response to short-term market fluctuations – known as 'market timing' – can disrupt the Manager's investment strategy and increase the Funds' expenses to the prejudice of all Unitholders. The Funds are not intended for market timing or excessive trading. To deter these activities, the Managers may refuse to accept an application for Units from persons that they reasonably believe are engaged in market timing or are otherwise excessive or potentially disruptive to the Funds.

The Managers reserve the right to redeem Units from a Unitholder, on the basis of the circumstances of the Unitholder concerned, or if it has reasonable grounds to believe that the Unitholders are engaging in any activity which might result in the Fund or its Unitholders as a whole suffering any legal, regulatory, reputational or other material disadvantage which the Fund or its Unitholders as a whole might not otherwise have suffered.

UK Distributor Status (Unaudited)

The Managers intend to apply to the Board of Inland Revenue to have The Baring Global Umbrella Fund certified as distributing funds for the purposes of Chapter V of Part XVII of the UK Income and Companies Taxes Act 1998 in respect of the current and all subsequent accounting periods.

The Baring Global Umbrella Fund has been certified as a distributing fund for the year ended 30 April 2007.

An application for the year ended 30 April 2008 has been submitted to the Inland Revenue and is still being processed.

Bank Austria Creditanstalt AG
