Alerian Midstream Energy Dividend UCITS ETF - Dist

Factsheet | Data as of 31 Aug 2023

Investment Objective

The Alerian Midstream Energy Dividend UCITS ETF (MMLP) is a UCITS compliant Exchange Traded Fund domiciled in Ireland. The fund seeks to provide diversified exposure to energy companies involved in the processing, transportation and storage of oil, natural gas and natural gas liquids in the US and Canadian market. The fund tracks a dividend-weighted index based on the liquid, dividend-paying portion of the US and Canadian energy infrastructure market and includes MLPs and C-Corps.

Why MMLP?

Yield Enhancement

MLPs pay no taxes at the entity level so they can pay out more of their cash flow to investors as distributions.

Defensive Energy Exposure

Given the fee-based nature of midstream, cash flows are less sensitive to commodity price volatility compared to other sectors of energy, such as oil and gas producers.

Stable Cash Flows

Midstream companies are largely fee-based, volume-driven businesses that benefit from the growing US and Canadian energy production and rising demand domestically and internationally.

Key Risks

1. Energy infrastructure companies may be subject to specific industry and sector risks such as commodity price fluctuations and decrease in demand for energy during a recession
2. While there is no legislation currently aimed at MLPs, a removal or alteration of MLPs' tax treatment could negatively affect performance
3. The use of swaps as a replication strategy introduces counterparty risk
4. Investors' capital is fully at risk and investors may not get back the amount originally invested
5. Exchange rate fluctuations could have a negative or positive effect on returns
6. The value of equities and equity-related securities can be affected by daily stock and currency market movements
7. Further risks are disclosed in the KIID and Prospectus

2020	-25.78%	0.00%
2019	19.84%	0.00%

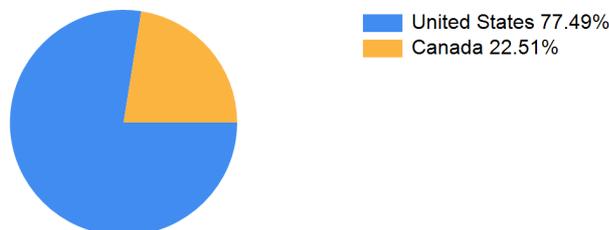

*Index data up to the 26/07/2020. Fund data from 27/07/2020

Performance before inception is based on back tested data. Back testing is the process of evaluating an investment strategy by applying it to historical data to simulate what the performance of that strategy would have been. Back tested data does not represent actual performance and should not be interpreted as an indication of actual or future performance. Past performance for the index is in USD and shown net of fees. Past performance and back tested index performance is not an indicator for future results and should not be the sole factor of consideration when selecting a product. It is provided for illustrative purposes only. Indices cannot be invested in directly. Investors should read the prospectus of the Issuer ("Prospectus") before investing and should refer to the section of the Prospectus entitled 'Risk Factors' for further details of risks associated with an investment in this product. Past performance is not a reliable indicator of future performance. The price of the Products may vary and they do not offer a fixed income.

This document may contain forward looking statements including statements regarding our belief or current expectations with regards to the performance of certain assets classes. Forward looking statements are subject to certain risks, uncertainties and assumptions. There can be no assurance that such statements will be accurate and actual results could differ materially from those anticipated in such statements. Therefore, readers are cautioned not to place undue reliance on these forward-looking statements. The content of this document is for information purposes and for your internal use only, and does not constitute an investment advice, recommendation, investment research or an offer for sale nor a solicitation of an offer to buy any Product or make any investment.

An investment in an exchange traded product is dependent on the performance of the underlying asset class, less costs, but it is not expected to track that performance exactly. The Products involve numerous risks including among others, general market risks relating to underlying adverse price movements in an Index (for ETFs) or underlying asset class and currency, liquidity, operational, legal and regulatory risks. In addition, in relation to Cryptocurrency ETCs, these are highly volatile digital assets and performance is unpredictable.
