The date of production of this KID is **27 February 2024**.

What is this product?

Type: Mutual fund (UCITS)

Term: Recommended minimum holding period: 1 years

Objective: The fund is a money market fund, with an average duration of maximum one year. The fund's assets will be invested in negotiable instruments and money market instruments, primarily issued by governments, mortgage institutions and corporations with a high credit rating, as well as deposited into account with a credit institution.

The investments will be made in securities with a credit rating no lower than the equivalent of Standard & Poor's credit rating K1 or BBB. The Fund may invest in derivative instruments as a part of the investment policy. The assets shall be denominated in SEK.

The aim of the fund is to offer a stable return at a low level of risk.

The fund is actively managed. Deviations from its benchmark can vary over time, please read more in the fund's information brochure or its annual report for historical variations. Investments are to be made on an objective basis taking account of developments in fixed income markets, the fund's risk limits and the manager's risk assessment of issuers permitted by the investment strategy. The fund is using certain sustainability criterias. Please, read more on our website or in the fund's information brochure for a complete information regarding our sustainable investments.

We compare the fund's performance with the benchmark HMTS (Handelsbanken Markets Sweden All Treasury Bills). The fund does not distribute dividends.

Intended Retail Investor: This fund may be appropriate for investors who plan to retain their investment for at least one year and who understands that the value of the fund can increase as well as decrease and it is not for certain that the invested amount can be recovered. There are no prior knowledge of financial markets nor experience of mutual funds necessary to be able to invest in the fund.

Depository: Skandinaviska Enskilda Banken AB.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 1 year(s). This product has no maturity date.

We have classified this product as 1 out of 7. This is the lowest risk class, which entails the lowest risk of both increases and decreases in unit value.

The risk indicator illustrates how much the fund's value has fluctuated over the past ten years.

Category 1 (lower risk) does not mean that a fund is risk-free. A fund may move along the scale over time, to both the right and the left. This is because the indicator is based on historical data,

which are no guarantee of future risks/rewards. Even if the fund is in the lowest risk class you can lose money, as no investments are entirely risk free.

Risks not covered by the risk indicator

Operational risks: Delays and errors in processes, political and official decisions and so on may negatively impact the fund.

Liquidity risk: occurs if a part of the funds assets are difficult to sell at a certain point of time or at a reasonable price.

Impact of financial techniques: Derivative instruments may be used for investment purposes, which may increase the fund's risk levels.

Credit risk: The risk of loss if the issuer of a fixed-income security is unable to make coupon payments or repay the principal on maturity.

What are the risks and what could I get in return?

Performance Scenarios

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The unfavourable, moderate and favourable scenarios show the worst, the average and the best result for the product during the last 10 years. The financial markets may develop quite differently in the future.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

Recommended Holding Period: 1 years

Investment = SEK 100,000

Scenarios		1 year
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress scenario	What you might get back after costs Average return each year, %	SEK 98,030 -1.97%
Unfavourable scenario	What you might get back after costs Average return each year, %	SEK 98,710 -1.29%
Moderate scenario	What you might get back after costs Average return each year, %	SEK 99,800 -0.20%
Favourable scenario	What you might get back after costs Average return each year, %	SEK 104,030 4.03%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

What happens if AMF Fonder AB is unable to pay out?

According to regulations, the fund's assets must be kept by a custodian. In the event that the fund company goes bankrupt, the management of the fund is taken over by the custodian. There is no other compensation or guarantee scheme for investors in the fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for different holding periods given the moderate scenario. The figures assume you invest SEK 100,000. The figures are estimates and may change in the future. You should note that these costs are paid by the Company whereas the return that you may receive will depend on the Company's share price performance. There is no direct link between the Company's share price and the costs that it pays.

Costs over time

	1 year
Total costs	SEK 120
Annual cost impact*	0.12% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -0.1% before costs and -0.2% after costs.

Composition of costs (the amounts in SEK are based on an investment of 100.000 SEK)

One-off costs		1 year
Entry costs	We do not charge any entry costs when you acquire your investment, but the distributor may.	SEK 0
Exit costs	We do not charge any exit costs when you dispose of your investment, but the distributor may.	SEK 0
Ongoing costs		
Management fees and other administrative or operating costs	0.100 percent of the value of your investment per year. This is an estimate based on actual costs over the last year.	SEK 100
Transaction costs	0.020 percent of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	SEK 20
Incidental costs		
Performance fees	There is no performance fee for this product.	SEK 0

How long should I hold it and can I take money out early?
