Potential Risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. The Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks. Investments in less developed financial markets may expose the Fund to increased operational, legal and political risk.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

The product's investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus (or relevant offering document), which should be read carefully before investing.

ESG Portfolio Summary

This fund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088). It applies the CSAM Sustainable Investing Policy (www.credit-suisse.com/esg) by replicating an ESG benchmark index to attain the desired ESG characteristics.

Exclusion of controversial weapons*

Credit Suisse Index Funds and Exchange Traded Funds will no longer invest in companies which are involved in the development or production of nuclear, biological, and chemical warfare agents, anti-personnel mines and cluster bombs. Hence we position ourselves in line with the exclusion list from the Swiss Association for Responsible Investments (SVVK - ASIR). The tracking quality of our index funds remains broadly unchanged by these exclusions.

Glossary

Use of income	Indicates whether the fund distributes or reinvests the dividends received from underlying securities (Accumulating)
Accumulating	Indicates a regular reinvestment of the dividends received in the portfolio itself
Ongoing Charges	The calculation of the ongoing charge is based on the Committee of European Securities Regulators/10-674 Directive. For a maximum of 12 months from December 31, 2020, the ongoing charges figure is based on estimated expenses. From December 2021, the ongoing charges figure is based on last year's expenses for the year ending December 2021. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment undertaking
ESG Score	ESG Score which is provided by MSCI ESG, is measured on a scale from 0 (very poor) to 10 (very good). The Overall ESG Quality Score does not correspond directly to the presented underlying Environment, Social and Governance Pillar scores. The Pillar scores are derived on an absolute basis, while the Overall ESG Quality Score is adjusted to reflect the industry-specific level of ESG risk exposure. Since Pillar scores are absolute, and Overall scores are relative, the first cannot be averaged to derive the latter
GICS	Global Industry Classification Standard
ESG Rating	Company ESG Rating, which is provided by MSCI ESG, is measured on a scale from AAA (highest rating) to CCC (lowest rating). The rating is based on the underlying company's exposure to industry specific ESG risks and their ability to mitigate those risks relative to their peers. The overall portfolio rating is calculated on an industry relative basis while the underlying individual E, S and G ratings are absolute. Hence, the overall rating cannot be seen as an average of the individual E, S and G ratings. Please note that the benchmark used in this ESG analysis is the traditional (non-ESG) index
ESG Rating momentum	The ESG Rating momentum describes the change in the ESG rating during the last 12 months. Strong upward respectively strong downward means that the rating has improved/deteriorated by at least two notches. Upward respectively downward means that the rating has improved/deteriorate by one notch. Stable means that the rating has remained unchanged
ESG controversy flag	ESG Controversies Flag is designed to provide timely and consistent assessments of ESG controversies involving publicly traded companies and fixed income issuers. A controversy case is typically a one-off event such as an environmental oil spill, an accident, or allegations such as safety issues in a production facility. The color indicator, which spans from red to green, indicates the most severe involvement (red) to the least involved (green) in any controversies
Carbon intensity	Carbon Intensities compares the weighted average emissions intensity per million \$ sales (broken down by GICS sector) between the portfolio and the benchmark. It also displays the active weight in the GICS sector

Disclaimer*

Swinging Single Pricing	For more details, please refer to the relevant chapter "Net Asset Value" of the fund's prospectus
Exclusions of controversial weapon	For more information on the applied norms-based exclusions please refer to: www.svk-asir.ch © In the absence of suitable and/or liquid equity index futures on ESG indices, the Sub-Fund / Fund may use equity index futures, which refer to traditional indices (non-ESG) in order to reduce various risks, for efficient portfolio management and as a way to gain or reduce market exposure
Applied ESG Characteristics	For further information on the methodology applied to assess the ESG characteristics of the investments, please refer to www.msci.com/our-solutions/esg-investing/
SRRI	The calculation of the risk indicator is based on the Committee of European Securities Regulators/10-673 Directive. The risk indicator is based on historic and partly simulated data; it cannot be used to predict future developments. The classification of the Fund may change in future and does not represent a guarantee. A classification into category 1 is no risk-free investment either.
