

## FUND FACTSHEET

# SEEYOND VOLATILITY STRATEGY

JUNE 2021

SHARE CLASS: H-R/A (SGD)

### FUND HIGHLIGHTS

- Invests primarily in listed instruments which offer direct exposure to volatility.
- Employs an active approach to volatility indexation by exploiting the behaviour of volatility as an asset class and may offer investors an uncorrelated source of performance.
- Seeks to deliver significant alpha during market shocks while generating long term growth over a full investment cycle.

### ILLUSTRATIVE GROWTH OF 10,000 (SGD)

### CALENDAR YEAR RETURNS %

	Fund %	Fund with Max.Sales Charges %
<b>TOTAL RETURNS</b>

	Fund %
<b>ANNUALISED PERFORMANCE (Quarter end)</b>	
3 years	2.70
5 years	-3.83
Since inception	-3.55

Performance figures of Seeyond Equity Volatility Strategies are derived from the historical performance of Seeyond Volatilité Actions, a fund which merged with Seeyond Equity Volatility Strategies on November 05, 2013.

The performance indicated for the fund before its inception, for the period from march 01, 2012 to November 05, 2013 is based on the historic performance of Seeyond Volatilité Actions, FCP collective investment fund under French law, registered with AMF, the financial market authority, and managed by the same management company using the same investment process. This performance has been adjusted to show the various charges applicable to the fund as accurately as possible.

PERFORMANCE DATA SHOWN REPRESENTS PAST PERFORMANCE AND IS NOT A GUARANTEE OF FUTURE RESULTS. Some recent performance may be lower or higher. As the value of the capital and the returns change over time (notably due to currency fluctuations), the repurchase price of the shares can be higher or lower than their initial price. The performance indicated is based on the NAV (net asset value) of the share class, and is net of all charges applying to the fund but does not account for sale commissions, taxation or paying agent fees, and assumes that dividends if any are reinvested. Taking such fees or commissions into account would lower the returns. The performance of other share classes would be higher or lower based on the differences between the fees and the entry charges. In the periods where certain share classes are not subscribed or not yet created (inactive share classes), performance is calculated based on the actual performance of an active share class of the fund whose characteristics are considered by the management company as being closest to the inactive share class concerned, after adjusting it for the differences between the total expense ratios (TER), and converting any net asset value of the active share class in the currency in which the inactive share class is listed. The performance given for the inactive share class is the result of a calculation provided for information.

Please read the important information given in the additional notes on pages 3 of this document.

### RISK & REWARD PROFILE

Lower risk Higher risk  
Typically lower rewards Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The category of the synthetic risk-return indicator is based on historical data. Due to its investment policy, the sub-fund is mainly exposed to the following risks:

- Capital loss risk
- Equities risk
- Discretionary management risk

For more information, please refer to the section detailing specific risks at the end of this document.

### MANAGEMENT

Management Company  
NATIXIS INVESTMENT MANAGERS INTERNATIONAL  
Investment Manager  
SEEYOND

Seeyond, an affiliate of Natixis Investment Managers, specializes in active quantitative portfolio management. By adding active oversight to disciplined quantitative investment processes, Seeyond's investment strategies seek to optimally reward risk within three core expertise: equity strategies, multi-asset strategies, volatility & overlay strategies. The strategies leverage strong proprietary quantitative skills and long-term market experience.

Headquarters	Paris
Founded	2012

Assets Under Management (Billion)	€ 8.9 (31/03/2021)
-----------------------------------	-----------------------

### Portfolio Managers

Simon Aninat : began investment career in 2005; joined Ostrum AM in 2011; graduated from ENSIMAG.

Joran Chalal : began investment career in 2016; joined Seeyond in 2019; graduated from Paris Dauphine University and holds a Master's degree in Computer Sciences and Mathematics for Finance and a Bachelor's degree from Pierre et Marie Curie University (Paris, France) in Mathematics and Computer Science

Due to active management, portfolio characteristics are subject to change. References to specific securities or industries should not be considered a recommendation.

### Calculation of performance during periods of share class inactivity (if applicable)

For periods when certain share classes were unsubscribed or not yet created (the "inactive share classes"), performance is imputed using the actual performance of the fund's active share class which has been determined by the management company as having the closest characteristics to such inactive share class and adjusting it based on the difference in TERs and, where applicable, converting the net asset value of the active share class into the currency of quotation of the inactive share class. The quoted performance for such inactive share class is the result of an indicative calculation.

### Illustrative Growth of 10,000

The graph compares the growth of 10,000 in a fund with that of an index. The total returns are not adjusted to reflect sales charges or the effects of taxation, but are adjusted to reflect actual ongoing fund expenses, and assume reinvestment of dividends and capital gains. If adjusted, sales charges would reduce the performance quoted. The index is an unmanaged portfolio of specified securities and cannot be invested in directly. The index does not reflect any initial or ongoing expenses. A fund's portfolio may differ significantly from the securities in the index. The index is chosen by the fund manager.

### Risk Measures

The risk and reward indicator is shown as a scale of 1 to 7 representing the levels of risk and rewards in increasing order that enables you to assess the potential performance of a fund compared to the risk it represents. The general calculation method of this regulatory indicator is based on the annualized past volatility of the fund, calculated from weekly returns over a five-year period. This indicator is monitored regularly and may vary. The SRRI level indicated in this document is the level in force on the date the document was drawn up.

### Special Risk Considerations

The specific risks involved in investing in the Sub-fund are the following risks:

- loss of capital
- geographic and portfolio concentration
- derivative financial instruments
- counterparty
- equity
- volatility
- model
- exchange rate

The Global Exposure Risk is managed using the absolute Value-at-Risk approach (VaR approach). The VaR approach measures the maximum potential loss at a given confidence level (probability level) over a specific time period, under normal market conditions. The absolute VaR for the Sub-fund cannot exceed 20% of its net asset value in a confidence interval of 99% for a 1-month holding period (20 available working days). The Sub-fund's expected level of leverage is 7. However, it is likely to access higher levels of leverage under the following circumstances: i) low market volatility and/or ii) high market liquidity. The leverage effect is calculated as the sum of the notional values of the derivatives used. A complete description of these risks is given in the chapter entitled "Main Risks" in the prospectus. This chapter also describes the other risks involved in investing in the Sub-fund.

### Reference Index

The Sub-Fund is actively managed. The Sub-Fund is not managed with reference to any Reference Index.

### Portfolio Statistics

#### Volatility

Extent of change of a security or stock, fund, market or index over a given period. High volatility is indicative of a significant change in the share price, and therefore the risk associated with the security is high.

#### Information ratio

Indicator of the outperformance of the manager (with respect to the benchmark), given the additional risk taken by the manager with respect to the same index (fund's tracking error). The higher the value, the better the fund.

#### Tracking error

Measurement of the relative risk taken by a fund with respect to its benchmark.

#### Sharpe ratio

Outperformance indicator of a product with respect to a risk-free rate, given the risk accepted (product volatility). The higher the value, the better the fund.

#### Alpha

A fund's outperformance relative to its benchmark, expressed as a percentage. It is an indicator of the manager's ability to create value, excluding market effects. Thus, the higher the alpha, the better the fund's performance relative to its benchmark.

#### Beta

Measurement of a fund's sensitivity to market movements (as represented by its benchmark). A beta of over 1 indicates that the fund amplifies movements in its reference market on both the upside and downside. Conversely, a beta of under 1 means that the fund tends to react less than its reference market.

### Morningstar Rating and Category

© 2021 Morningstar. All Rights Reserved. The information, data, analyses and opinions ("Information") contained herein (1) include Morningstar's confidential and proprietary information (2) may not be copied or redistributed, (3) do not constitute investment advice (4) are provided solely for informational purposes (5) are not warranted to be complete, accurate or timely and (6) are drawn from fund data published on various dates. The information is provided to you at your own risk. Morningstar is not responsible for any trading decisions, damages or other losses related to the Information or its use. Please verify all of the Information before using it and don't make any investment decision except upon the advice of a professional financial adviser. Past performance is no guarantee of future results. The value and income derived from investments can go up or down. The Morningstar rating applies to funds having at least 3 years of history. It takes into account subscription fee, the yield without risk and the standard deviation to calculate for every fund its ratio MRAR (Morningstar Risk Adjust Return). Funds are then classified in decreasing order by MRAR: first 10 per cent receive 5 stars, the following 22.5 % 4 stars, the following 35 % 3 stars, following 22.5 % 2 stars, the last 10 % receive 1 star. Funds are classified within 180 European categories.

Natixis Investment Managers International - a portfolio management company authorized by the Autorité des Marchés Financiers (French Financial Markets Authority - AMF) under no. GP 90-009, and a public limited company (société anonyme) registered in the Paris Trade and Companies Register under no. 329 450 738. Registered office: 43 avenue Pierre Mendès France, 75013 Paris.

#### Additional Notes

The Fund has been recognized under the Securities and Futures Act, Chapter 289 of Singapore, and Natixis Investment Managers Singapore Limited is appointed as its Singapore Representative and agent for service of process. Past performance of the Fund or managers, and any economic and market trends or forecast, are not necessarily indicative of the future or likely performance of the Fund or the manager. The value of investments and the income accruing, if any, may go up or down and investors may lose the full amount invested. Investors investing in funds denominated in non-local currency should be aware of the risk of exchange fluctuations that may cause a loss of principal. Investments in the Fund involve risk, which are fully described in the prospectus. The Fund may use derivatives for hedging and/or investment purposes. The net asset value of the Fund may be subject to volatility as a result of its investment policy and/or use of financial derivative instruments. Investors should consider the Fund's investment objective, risks, charges, expenses and read the prospectus and Product Highlights Sheet carefully and discuss with their financial adviser to determine if the investment is appropriate for them before investing. However if an investor chooses not to seek advice from a financial adviser, he/she should consider whether the product is suitable for him/her. The Prospectus is available for collection from Natixis Investment Managers Singapore Limited at 5 Shenton Way, #22-05 UIC Building, Singapore 068808 or any appointed Singapore distributor. This document is provided by Natixis Investment Managers Singapore Limited (company registration no. 199801044D).

This document is published for information and general circulation only and it does not constitute an offer to anyone or a solicitation by anyone to subscribe for shares of the Fund as it does not have any regard to the specific investment objectives, financial situation and the particular needs of any specific person who may receive this document. Nothing in the document should be construed as advice or a recommendation to buy or sell shares. This advertisement has not been reviewed by the Monetary Authority of Singapore.
