Invesco Managed Investment Series (the "Company")

Report of the Authorised Corporate Director (the "Manager")

The Company

The Invesco Managed Investment Series is an open-ended investment company with variable capital ("ICVC"), incorporated in England and Wales on 8 May 2003 under registered number IC229.

The Company is a "UK UCITS Scheme" and an "Umbrella Company" (under the OEIC Regulations) and therefore new Funds may be formed by the Manager, subject to regulatory approval. Any changes to Funds or share classes will be included in an updated Prospectus.

The Company is a Financial Conduct Authority ("FCA") authorised scheme complying with the FCA's Collective Investment Schemes sourcebook.

Terms used in this report shall have the same meaning as defined in the Prospectus.

At 31 May 2023, the Company consisted of three Funds:

Invesco Managed Growth Fund (UK)
Invesco Managed Income Fund (UK)
Invesco Money Fund (UK)

Accounting Periods

| | |
|-------------------------|-------------|
| Annual accounting date | 31 May |
| Interim accounting date | 30 November |

Invesco Managed Growth Fund (UK)

Distribution paid annually on 31 July.

Invesco Managed Income Fund (UK)

Distribution paid quarterly on 31 October, 31 January, 30 April and 31 July.

Invesco Money Fund (UK)

Income accumulated monthly.

Should expenses and taxation exceed revenue in a distribution period for a share class, no distribution will be payable for that class.

Securities Financing Transactions Regulation (Unaudited)

SFTR, as implemented into UK law requires the Manager to provide investors with information on the use of securities financing transactions (SFTs) and total return swaps (TRS) by the Company in all interim and annual reports for the Company.

During the year from 1 June 2022 to 31 May 2023, none of the Funds entered into any SFTs and/or TRS. Should this change in the future, the interim and annual reports for the Company will disclose all required information on the use of SFTs and TRS by the Company.

Please refer to the Prospectus for further details on SFTs and TRS.

Invesco Money Fund (UK) Z Accumulation share class closed

Effective 23 June 2022 shareholders in the Invesco Money Fund (UK) Z Accumulation shares had their holding converted to the equivalent Accumulation shares (No Trail). The Z Accumulation shares were terminated on 23 June 2022.

Remuneration Policy (Unaudited)

On 18 March 2016, Invesco Fund Managers Limited (the "Manager") adopted a remuneration policy consistent with the principles outlined in the European Securities and Markets Authority ("ESMA") Guidelines, on sound remuneration policies under the UCITS Directive (the "Remuneration Policy").

The policy was revised in 2022, to include specificities for some Invesco EU regulated Management Companies. The Manager was not impacted by the changes.

The purpose of the Remuneration Policy is to ensure the remuneration of the staff of the Manager is consistent with and promotes sound and effective risk management, does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Manager and of the UK UCITS Schemes it manages and does not impair the Manager's compliance with its duty to act in the best interests of the UK UCITS Schemes it manages. The Remuneration Policy is available within the Corporate Policies section of our website (www.invesco.com/uk). Paper copies of the Remuneration Policy can also be obtained for free from the registered office of the Manager, Invesco Fund Managers Limited, Perpetual Park, Perpetual Park Drive, Henley-on-Thames, Oxfordshire, RG9 1HH, UK upon request.

The Remuneration Policy is reviewed annually by the Compliance, Human Resources and Risk Management functions, who recommend any adjustments to ensure continued alignment of the policy with sound risk management. The board of directors of the Manager are responsible for the oversight of remuneration and for ensuring adherence to this policy through the Human Resources function.

The Internal Audit function conducts regular testing of administration of the Remuneration Policy to assess its ongoing compliance with the Invesco group's remuneration policies and procedures.

The Manager does not employ any direct staff. The aggregate total remuneration of Invesco staff involved in UK UCITS related activities of the Manager in respect of performance year (1 January 2022 to 31 December 2022) is £49.51m of which £30.39m is fixed remuneration and £19.12m is variable remuneration. The number of beneficiaries apportioned to UK UCITS activities is 255.

The Manager has identified individuals considered to have a material impact on the risk profile of the Manager or the UK UCITS Schemes it manages ("Identified Staff"), who include board members of the Manager, senior management, heads of control functions, other risk takers and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers. Identified Staff of the Manager are employed by Invesco.

Invesco Managed Investment Series (the "Company")

Report of the Authorised Corporate Director (the "Manager")

Remuneration Policy (Unaudited) continued

The aggregate total remuneration paid to the Identified Staff of the Manager for UK UCITS related activities for the performance year (1 January 2022 to 31 December 2022) is £14.91m of which £3.62m is paid to Senior Management and £11.29m is paid to other Identified Staff. Please note that remuneration for UK UCITS Schemes Identified Staff includes remuneration for staff employed by delegates.

Managing the risks presented by the Russia-Ukraine conflict

Financial markets have been impacted since February 2022, due primarily to geopolitical tensions arising from Russia's incursion into Ukraine and the impact of a subsequent range of sanctions, regulations and other measures which impaired normal trading in Russian securities. On 28 February 2022, Invesco Fund Managers Limited suspended the purchase of all Russian securities in its funds. As at 31 May 2023, no Funds held any Russian securities. The Directors will continue to review the situation in order to navigate through this period of heightened uncertainty.

Silicon Valley Bank, Signature Bank and Credit Suisse

Following the closure of Silicon Valley Bank ("SVB"), the possession of Signature Bank and the recent economic turmoil involving Credit Suisse, the Manager has assessed the impact on the net asset value of the Funds as immaterial.

As at 31 May 2023, none of the Funds were invested in SVB, Signature Bank or Credit Suisse.

Task Force on Climate-related Financial Disclosures ("TCFD") Portfolio Reports

For each Fund, we publish a Task Force on Climate-related Financial Disclosures ("TCFD") Portfolio Report which provides detailed climate-related information on the Fund. You can access these reports directly on our website via the following link: www.invesco.com/uk/icvctcf. These reports, in conjunction with our group-level TCFD report https://www.invesco.com/content/dam/invesco/emea/en/pdf/2022_IVZ_Global_TCFD_Report.pdf, provide a detailed overview of our approach to climate-related governance, strategy and risk management as well as metrics and targets. We encourage all investors in the Funds to review these reports to gain a deeper understanding of our commitment to managing climate-related risks and opportunities.

Risk Profile

Shareholders should be aware of the risks inherent in investing in securities and other financial instruments. Financial markets can be vulnerable to unpredictable price movements and are affected by a number of factors, both political and economic.

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Over time, inflation may erode the value of investments.

The Invesco Managed Income Fund (UK) and Invesco Money Fund (UK)'s performance may be adversely affected by variations in interest rates.

As one of the key objectives of the Invesco Managed Income Fund (UK) is to provide income, the ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth. The underlying investments of the Invesco Managed Growth Fund (UK) and the Invesco Managed Income Fund (UK) may contain emerging market, smaller company and concentrated funds, for which investors should be prepared to accept a higher degree of risk than for a fund with a broader investment mandate.

Although the Invesco Managed Growth Fund (UK) invests mainly in established markets, it can invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

The Invesco Money Fund (UK) invests in fixed income securities. Fixed income securities may not always make interest and other payments nor is the solvency of the issuers guaranteed. Market conditions, such as a decrease in market liquidity, may mean that the Fund may not be able to sell those securities at their true value. These risks increase where the Fund invests in high yield or lower credit quality bonds.

The Invesco Money Fund (UK) is, since 21 January 2019, a standard variable net asset value ("NAV") money market fund in compliance with Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds.

Invesco Managed Investment Series (the "Company")

Report of the Authorised Corporate Director (the "Manager")

Risk Profile continued

Investing in the Invesco Money Fund (UK) is not the same as making a deposit in a bank account; variable NAV means the value of the shares in the Fund (the "NAV per share") can go up and down depending on how the underlying assets of the Fund perform. The Fund does not rely on any external support for guaranteeing its liquidity or stabilising the NAV per share. Your investment is not guaranteed and you may not get back the full amount invested. Fixed income securities to which the Invesco Money Fund (UK) is exposed are open to credit risk which may result in issuers not always making interest and/or other payments nor is the solvency of the issuers guaranteed.

As the Invesco Money Fund (UK) typically has a concentrated number of holdings, it may carry a higher degree of risk than a fund which invests in a broader range of holdings or takes smaller positions in a relatively large number of holdings.

The Funds may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Funds. The Manager, however, will ensure that the use of derivatives within the Funds does not materially alter the overall risk profile of the Funds.

A more detailed description of risk factors that apply to these Funds is set out in the Prospectus.

Value Assessment (Unaudited)

The Manager conducted an assessment of value for each Fund. The assessment of value report will be made available to investors annually in a composite report for all the funds in Invesco's ICVC range on our website <https://www.invesco.com/uk/en/global-footer/corporate-policies.html>. The latest Value Assessment as at 31 December 2022 was published in May 2023.

Holdings in other Funds of the Company

As at 31 May 2023, no Funds held shares in any other Fund of the Company.

Liability

The Company is structured by having different Funds. The assets and liabilities of each Fund are segregated in accordance with the law of England and Wales. As a consequence the assets of a Fund will not be available to meet the liabilities of another Fund within the Company.

The Shareholders are not liable for the debts of the Company.

ISA Eligibility

All the Company's Funds qualify for stocks and shares ISA investment. None of the Funds qualify for cash ISA investment.

Certification of the Annual Report by the Manager

In accordance with the requirements of the Open-Ended Investment Companies Regulations 2001, we hereby certify these financial statements on behalf of the Directors of Invesco Fund Managers Limited.

Risk and Reward Profiles

for the year 1 June 2022 to 31 May 2023

Invesco Managed Growth Fund (UK)

A share class in risk category 1 indicates its price has experienced very low rises and falls historically.

A share class in risk category 2 indicates its price has experienced minor rises and falls historically.

A share class in risk category 3 indicates its price has experienced very moderate rises and falls historically.

Invesco Managed Income Fund (UK)

A share class in risk category 4 indicates its price has experienced moderate rises and falls historically.

A share class in risk category 5 indicates its price has experienced significant rises and falls historically.

Invesco Money Fund (UK)

A share class in risk category 6 indicates its price has experienced very significant rises and falls historically.

A share class in risk category 7 indicates its price has experienced major rises and falls historically.

The risk categories shown are not a measure of capital losses or gains, but of how significant the rises and falls in the share class prices have been historically. For example a share class whose price has experienced significant rises and falls will be in a higher risk category, whereas a share class whose price has experienced less significant rises and falls will be in a lower risk category. As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile. Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

For more information on our Funds' risk and reward profiles, please refer to the most up to date relevant Fund and share class specific Key Investor Information Documents ("KIIDs"), which are available at www.invesco.com/uk or by contacting us.

Invesco Managed Investment Series (the “Company”)

Notes applicable to the financial statements of all Funds

1 Accounting Policies

a) **Basis of preparation**

The financial statements have been prepared on a going concern basis, under the historical cost convention as modified by the revaluation of certain financial assets and liabilities held at fair value through profit and loss. The financial statements have also been prepared in accordance with the United Kingdom Generally Accepted Accounting Practice (“UK GAAP”), as defined within the UK Financial Reporting Standard (“FRS 102”) and the Statement of Recommended Practice ‘Financial Statements of UK Authorised Funds’ (the “SORP”), issued by the Investment Management Association (now known as the Investment Association) in May 2014 and updated in June 2017, the COLL and the Company’s Instrument of Incorporation and Prospectus.

b) **Recognition of revenue**

- i) Distributions and accumulations receivable on the underlying collective investment schemes are recognised as revenue when the shares are quoted ex-dividend. The Manager rebates an amount equivalent to the ongoing charge suffered on this Fund’s share in the underlying collective investment schemes. Each rebate is paid to either the capital or revenue element of the Fund depending on whether the fee of the underlying Fund is charged to capital or revenue. The Invesco Managed Growth Fund (UK) excludes equalisation and the Invesco Managed Income Fund (UK) includes equalisation from distributions and accumulations receivable.
- ii) Dividends on quoted ordinary shares, collective investment schemes and preference shares are recognised when the securities are quoted ex-dividend. Where such securities are not quoted, dividends are recognised when they are declared.
- iii) Interest on bank balances and deposits is recognised on an accruals basis.
- iv) Revenue arising on debt securities is accreted or amortised over the life of such securities and recognised at a consistent rate over the life of the instrument (effective yield accounting). Future cash flows on all debt securities are considered when calculating revenue on an effective yield basis and where purchase costs are considered to reflect incurred credit losses, such losses are taken into account so that interest is recognised at a reasonably expected commercial rate. Accrued interest purchased and sold on interest-bearing securities is excluded from the capital cost of these securities and dealt with as part of the revenue of the Company.
- v) All revenue is recognised at a gross amount that includes any withholding taxes but excludes any other taxes, such as attributable tax credits.
- vi) US REIT dividend revenue is accounted for partly as revenue and partly as capital, depending on the underlying REIT distribution. All REIT dividend revenue is recognised on an accruals basis.

c) **Stock dividends**

Ordinary stock dividends are recognised wholly as revenue and are based on the market value of the shares on the dates they are quoted ex-dividend. Where an enhancement is offered, the amount by which the market value of the shares on the date they are quoted ex-dividend exceeds the cash dividend is taken to capital.

d) **Special dividends and share buy-backs**

The underlying circumstances behind both special dividends and the proceeds from share buybacks are reviewed on a case by case basis in determining whether the amount is capital or revenue in nature. Amounts recognised as revenue will form part of the Fund’s distribution. Any tax treatment thereon will follow the accounting treatment of the principal amount.

e) **Expenses**

All expenses, except for those relating to the purchase and sale of investments are charged initially against revenue and are accounted for on an accruals basis.

f) **Revenue allocation to share classes**

Revenue is allocated each day pro rata to the capital value of assets attributable to each class and taxation is computed by reference to the net revenue after expenses and tax attributable to each class.

g) **Measurement basis**

The measurement basis used in preparing the financial statements is fair value for investments and historical cost for all other assets and liabilities.

h) **Basis of valuation of investments**

- i) Invesco Money Fund (UK) – All investments have been valued on the last business day of the year at bid market value net of any accrued revenue, at close of business. Where there is no price source from an active market for an investment, the Manager will assess any information available from internal and external sources in order to arrive at an estimated fair value. The fair value is established by using measures of value such as the price of recent transactions, earnings multiple and net assets. The Manager of the Company also makes judgements and estimates based on their knowledge of recent investment performance, historical experience and other assumptions that are considered reasonable under the circumstances. The estimates and the

Invesco Managed Investment Series (the “Company”)

Notes applicable to the financial statements of all Funds

1 Accounting Policies continued

- h) Basis of valuation of investments** continued
assumptions used are under continuous review by the Manager with particular attention paid to the carrying value of the investments. Over-the-counter derivative contracts shall be valued on the basis of unrealised gain or loss on the contract using current settlement price. When settlement price is not used, the over-the-counter derivative contracts will be valued at their fair value in accordance with the method of valuation (as used on a consistent basis) as shall have been agreed between the Manager and the Depositary.
- ii)** Invesco Managed Growth Fund (UK) and Invesco Managed Income Fund (UK) – All investments, other than those listed on a recognised stock exchange, have been valued on the last business day of the year at the quoted price. Investments listed on a recognised stock exchange have been valued in accordance with h(i) above.
- i) Exchange rates**
Assets and liabilities in foreign currencies are translated into Sterling at the exchange rates ruling at close of business on the last business day of the year. Revenue items denominated in foreign currencies are translated into Sterling at the exchange rates ruling at the times of the transactions. Foreign exchange gains and losses arising from translation are included in the Statement of Total Return and are included in net capital gains/(losses) on investments.
- j) Taxation and deferred taxation**
Provision is made for corporation tax at the current rate on the excess of taxable revenue over allowable expenses. Corporation tax is charged at 20% of the revenue liable to corporation tax less expenses. Provision is made on all material timing differences arising from the different treatment of items for accounting and tax purposes. A deferred tax asset is recognised only to the extent that there will be taxable profits in the future against which the asset can be offset. Overseas capital gains tax is accounted for on an accruals basis.
- k) Efficient portfolio management**
Where appropriate, certain permitted transactions such as derivatives or forward currency transactions are used for efficient portfolio management. Where such transactions are used to protect or enhance revenue, the revenue and expenses derived therefrom are included in ‘Revenue’ or ‘Interest payable and similar charges’ in the Statement of Total Return. Where such transactions are used to protect or enhance capital, the gains and losses derived therefrom are included in ‘Net capital gains/losses’ in the Statement of Total Return. Any positions on such transactions open at the period end are reflected in the Balance Sheet at their marked to market value.
- l) Dilution adjustment**
The need to apply a dilution adjustment will depend on the volume of sales (where they are issued) or redemptions (where they are cancelled) of shares. The Manager may apply a dilution adjustment on the issue and redemption of such shares if, in its opinion, the existing Shareholders (for sales) or remaining Shareholders (for redemptions) might otherwise be adversely affected, and if applying a dilution adjustment, so far as practicable, is fair to all Shareholders and potential Shareholders. In particular, the dilution adjustment may be applied in the following circumstances for all Funds in the Invesco Managed Investment Series:
- where over a dealing period a Fund has experienced a large level of net issues or redemptions relative to its size. For these purposes a large level of net dealing is defined as 1% or more of the net asset value of the Fund in question (as calculated at the last valuation point); or
 - where the Manager considers it necessary to protect the interests of the Shareholders of the Company.
- On the occasions that the dilution adjustment is not applied there may be an adverse impact on the total assets of the Fund which may otherwise constrain the future growth of the Fund in question.
- Please refer to Appendix 6 of the Prospectus which shows the size of typical dilution adjustments by Fund and an indication of the frequency of application of such adjustments.

2 Distribution Policies

The Funds will distribute all revenue disclosed in the annual financial statements (less expenses and taxation). The ordinary element of stock dividends is treated as revenue and forms part of the Fund's distribution. Should expenses and taxation exceed revenue for a share class, there will be no distribution for that share class and the shortfall will be met from capital. All Fund accumulations and distributions are paid as dividend distributions except for Invesco Money Fund (UK), which pays an interest distribution.

Notes applicable to the financial statements of all Funds

2 Distribution Policies continued

In calculating the amount to be distributed, the following Funds allocate the Manager's ongoing charge to capital, thereby increasing the amount available for distribution:

Invesco Managed Income Fund (UK)

Distributions which have remained unclaimed by Shareholders for more than six years are credited to the capital property of the Fund.

Marginal tax relief is not taken into account when determining the distribution.

3 Shareholders' Funds

The Manager's entry charge and Fund Management Fee ("FMF") are as follows:

Each share class has the same rights on a winding up of the Company.

4 Generic Risk Factors

In pursuing their investment objectives, the Funds of the Company hold a number of financial instruments that may comprise securities and other investments, cash balances and debtors and creditors that arise directly from their operations. Political and economic events in the major economies of the world, such as the United States, Japan and the European Union, will influence stock and securities markets worldwide.

The main risks from the Funds' holding of financial instruments are set out below together with the Manager's policy for managing these risks.

Counterparty risk

The Funds may enter into derivatives transactions or place cash in bank deposit accounts, which would expose the Funds to the credit of its counterparties and their ability to satisfy the terms of such contracts. In the event of a bankruptcy or insolvency of a counterparty, the Funds could experience delays in liquidating positions and significant losses, including declines in the value of investments during the year in which the Funds seek to enforce its rights, inability to realise any gains on their investments during such year and fees and expenses incurred in enforcing their rights.

In order to mitigate this risk, the Funds conduct trades through reputable counterparties. A diligent process to select and approve a new counterparty, as well as monitoring existing counterparties, is in place. During the approval process, various verifications are performed such as assessing the counterparty's operational capabilities as well as their credit quality. On an ongoing basis, market analysis is reviewed by the firm's

Invesco Managed Investment Series (the "Company")

Notes applicable to the financial statements of all Funds

4 Generic Risk Factors continued

Counterparty risk continued

trading and credit research teams in order to detect warning signs of a counterparty default. If the firm believes high risk of default exists, the counterparty is removed with immediate effect from the approved counterparty list.

Custody risk

The assets owned by each Fund are held on trust for the Fund by a custodian that is also regulated by the Financial Conduct Authority. The Financial Conduct Authority requires that the custodian ensures that there is legal separation of non-cash assets held under custody and that records are maintained that clearly identify the nature and amount of all assets under custody, the ownership of each asset and where the documents of title to that asset are located. In case of a potential bankruptcy of the custodian, cash positions in the Fund are not protected and there may be a delay in regaining full control of the non-cash assets.

Currency exchange risk

The Funds' assets may be invested in securities denominated in currencies other than Sterling. As a result, changes in exchange rates may adversely affect the value of any investment, which will have a related effect on the price of shares.

Currency exchange risk may be mitigated by hedging the exposure through the use of forward currency contracts.

Exchange traded funds risk

An investment by the Funds in Exchange Traded Funds ("ETFs") generally presents the same primary risks as an investment in a collective investment fund. In addition, an ETF may be subject to the following: (1) a discount of the ETF's shares to its net asset value; (2) failure to develop an active trading market for the ETF's shares; (3) the listing exchange halting trading of the ETF's shares; (4) failure of the ETF's shares to track the referenced index; and (5) holding troubled securities in the referenced index. ETFs may involve duplication of management fees and certain other expenses, as the Funds indirectly bears its proportionate share of any expenses paid by the ETFs in which it invests. Further, certain of the ETFs in which the Funds may invest are leveraged. The more the Funds invest in such leveraged ETFs, the more this leverage will magnify any losses on those investments.

Interest rate risk

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise. Conversely, bond prices generally rise as interest rates fall. Specific bonds differ in their sensitivity to changes in interest rates depending on their individual characteristics. One measure of this sensitivity is called duration. The longer the duration of a particular bond, the greater its price sensitivity is to interest rate. Similarly, a longer duration portfolio of securities has greater price sensitivity. Falling interest rates may also prompt some issuers to refinance existing debt, which could affect the Fund's performance.

Investing in Collective Investment Schemes

Where a Fund invests across a range of funds with a view of diversifying risk and potential return, each of these underlying funds may have specific risks. Examples include: emerging markets funds, smaller company funds and concentrated funds. Details of these specific risks are included as follows:

- Emerging market funds: Investments in emerging markets may be more volatile than investments in more developed markets. Some of these markets may have relatively unstable governments, economies based on only a few industries and securities markets that trade only a limited number of securities. Many emerging markets do not have well developed regulatory systems and disclosure standards may be less stringent than those of developed markets. The risks of expropriation, nationalisation and social, political and economic instability are greater in emerging markets than in more developed markets.
- Smaller company funds: Funds investing in smaller companies invest in transferable securities which may be less liquid than the securities of larger companies, as a result of inadequate trading volume or restrictions of trading. Securities in smaller companies may possess greater potential for capital appreciation, but also involve risks, such as limited product lines, markets and financial or managerial resources and trading in such securities may be subject to more abrupt price movements than trading in the securities of larger companies.
- Concentrated funds: some Funds may have concentrated portfolios (holding a limited number of investments and/or large positions in relatively small number of stocks). If one or more of those investments decline or are otherwise adversely affected, it may have a more pronounced effect on the Fund's net asset value than if a larger number of investments were held or if the Fund had fewer larger positions. Accordingly they may carry a higher degree of risk and NAV volatility than a Fund which invests in a broad range of companies and/or does not take large positions in a relatively small number of stocks.

Invesco Managed Investment Series (the “Company”)

Notes applicable to the financial statements of all Funds

4 Generic Risk Factors continued

Investing in Financial Derivative Instruments

There are certain investment risks which apply in relation to the use of derivatives. Derivatives may be used to provide protection for an investment or as a cheaper or more liquid alternative for an investment. However, should the Manager's expectations in employing such techniques and instruments be incorrect, a Fund may suffer a substantial loss, having an adverse effect on the net asset value of shares. Such instruments may cause greater fluctuations of the net asset value of the Fund concerned. Transactions in derivatives are used in the Funds for both efficient portfolio management and investment purposes. Derivatives exposure is managed within the investment limits set by the Manager to ensure that the use of derivatives does not materially alter the overall risk profile of a Fund.

Issuer risk

The Funds are subject to the risk that issuers of bonds or other fixed income securities do not make payments on such securities. A lowering of the credit rating of the issuer of a bond or of the bond itself may cause volatility in the price or reduce the security's liquidity, making it more difficult to sell.

Liquidity risk

The Funds may be affected by a decrease in market liquidity for the securities in which they invest, which may mean that the Funds may not be able to sell some securities at a fair price in a timely manner. In order to mitigate this risk, a substantial proportion of the Funds' assets consist of readily realisable assets.

Furthermore, Invesco monitors liquidity risk for each portfolio against its required minimum liquidity threshold. This includes holding a high enough proportion of assets that can be liquidated quickly and with a limited impact on price, also depending on its actual or hypothetical redemption profile, investment strategy, regulatory framework or contractual obligations. This is done by implementing a monitoring framework focused on Liquidation Size and Liquidation Cost.

Liquidity results are monitored at Fund level on a daily basis including against internally defined limits.

Market price risk

The Funds are exposed to the risks normally associated with investment in stocks and shares such as general economic conditions, market events or the performance of underlying stocks. As such the prices of and the income generated by the Funds' securities may go down as well as up and an investor may not get back the full amount invested.

Adhering to investment guidelines and avoiding excessive exposure to one particular issuer can mitigate market risk.

Taking charges from capital

Where the investment objective of a Fund is to treat the generation of income as a higher priority than capital growth, or the generation of income and capital growth have equal priority, all or part of the ongoing charge as well as other fees and expenses of the Fund may be taken from capital instead of income. The Funds take such fees and expenses from capital in order to manage the level of income paid and/or available to Shareholders. This may result in capital erosion or may constrain capital growth.

Calculation methods of the Risk Exposure

Following the assessment of the investment policy of each Fund of the Company, Invesco Fund Managers Limited has decided to use Value at Risk (“VaR”) for the assessment of the global exposure of each Fund.

Value-at-Risk (“VaR”) is a statistical measurement. It intends to measure the maximum potential loss at a given confidence level (probability) over a specific time period under normal market conditions. All of the positions within the portfolio are taken into account for the VaR calculation, not just derivatives.

Absolute and Relative VaR are calculated daily using a VaR risk model based on a two years historical simulation methodology. This method for calculating VaR contains no standard distribution assumption and assumes that history repeats itself.

Under the relative VaR approach, the VaR of the Fund is compared to that of a benchmark or reference portfolio. With this approach, the choice of benchmark is important and hence the Manager will choose a leverage free benchmark with similar risks to the Fund.

The calculation standards used for the VaR model are in compliance with the provisions in box 15 of ESMA Guidelines on Risk Measurement and the calculation of Global Exposure and Counterparty Risk for UCITS (Ref: 10-788) (“ESMA Guidelines”).

The Absolute VaR of a UK UCITS cannot be greater than 20% of its NAV. The Relative VaR of a UK UCITS cannot be more than two times the VaR of the reference portfolio. Invesco Fund Managers Limited monitors that the $(\text{VaR of the UK UCITS Scheme}) / (2 * \text{VaR of the reference portfolio})$ is not greater than 100%.

4 Generic Risk Factors continued

Calculation methods of the Risk Exposure continued

The calculation of the Absolute and Relative VaR is carried out in accordance with the following parameters:

- one-tailed confidence interval of 99%;
- holding period equivalent to one month (i.e. 20 business days);
- effective observation period (history) of risk factors of two years;
- daily calculation.

In line with box 25 of ESMA Guidelines, as the Funds use the VaR approach to monitor the global exposure, Invesco Fund Managers Limited calculates the leverage for each Fund on a daily basis, as the sum of the absolute value of the notional of the derivatives used. With respect to financial derivative instruments which do not have a notional value attached to them, the calculation of the value is based upon the market value of the equivalent position of the underlying asset that is attached to the financial derivative instrument and applied consistently and appropriately.

The average level of leverage figures provided below does not take into account any netting and hedging arrangements that the Funds may have in place at any time even though these netting and hedging arrangements are used for risk reduction purpose.

The table below details the VaR approach for each Fund and, for those Funds utilising the relative VaR methodology, it details the reference portfolio. The table also details the minimum, maximum and average daily VaR utilisation that occurred during the one year period ending 31 May 2023, as well as the daily average level of leverage for each Fund during the one year period ending 31 May 2023.

Invesco Managed Growth Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco Managed Growth Fund (UK)

The Fund aims to achieve long-term (5 years plus) capital growth. The Fund invests at least 80% of its assets in collective investment schemes (including funds managed by the Invesco group) which invest in a broad range of assets including shares or other equity related securities and corporate and government debt securities (including investment grade, non-investment grade and unrated). In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including shares of companies), money market instruments, other collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for efficient portfolio management purposes only, to reduce risk, reduce costs and/or generate additional capital or income. The Fund invests in collective investment schemes (including funds managed by the Invesco group) which may use derivatives for investment purposes and/or for efficient portfolio management. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 31 May 2023.

Investment report for the year

Strategy, review and outlook

The Fund returned 1.6% over the year ending 31 May 2023. This placed the Fund in the first quartile of its peer group, the IA Flexible Investment Sector, which returned an average of -1.0%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

It was a volatile period for global equities, with growing recession concerns and fears of a renewed banking crisis in the US and Europe ultimately being superseded by upward moves in the early part of 2023. Markets were led higher by the technology focused areas in particular, as Artificial Intelligence (AI) excitement buoyed the sector. It was a challenging period for global bond markets too as central banks globally increased interest rates several times to stem inflation. In late September 2022, bond yields spiked in reaction to the UK government's unfunded mini budget. More recently, the collapse of US Silicon Valley Bank and Credit Suisse's forced merger with UBS triggered market turbulence. In both cases, central banks acted swiftly and effectively in restoring market confidence.

Equity exposure to the US proved most favourable for the Fund over the period, largely driven by strong performance from a number of large technology focused stocks. Elsewhere there was good contribution to returns from European exposures while Japan was also a positive source. Exposure to small cap equities proved weakest for returns - both global and in particular UK smaller companies detracted the most.

Looking forward within equities, one of our key concerns had been the corporate earnings outlook, with bottom-up corporate earnings expectations seemingly out of kilter with top-down expectations, which leaves scope for downward earnings revisions. However, the increased evidence of economic resilience and the fact that we are likely close to the peak in interest rates means future profits are likely to stabilise, or even improve. Some markets outside the US do look like they offer good value in our opinion, and technical factors remain supportive.

Notes to the financial statements

| 6 Taxation | 01.6.22 to 31.5.23 £'000 | 01.6.21 to 31.5.22 £'000 |
|-------------------|---|---|
|-------------------|---|---|

a) Analysis of charge/(credit) for the year

| | | |
|------------------------------|-----|-------|
| Deferred tax charge/(credit) | 118 | (148) |
| Total tax charge/(credit) | 118 | (148) |

There is no corporation tax charge for the year (2022 - Nil).

b) Factors affecting the tax charge/(credit) for the year

The tax assessed for the year is lower (2022 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The factors are explained below:

| | 01.6.22 to 31.5.23 £'000 | 01.6.21 to 31.5.22 £'000 |
|-------------------------------------|---|---|
| Net revenue before taxation | 7,167 | 3,424 |
| Corporation tax at 20% (2022 - 20%) | 1,433 | 685 |
| Effects of: | | |
| Capitalised income subject to tax | 115 | 74 |
| Movement in unrecognised tax losses | (318) | (297) |
| Revenue not subject to tax | (1,112) | (610) |
| Total tax charge/(credit) | 118 | (148) |

Authorised investment companies with variable capital are exempt from tax on capital gains in the UK. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

At the year end the Fund had surplus management expenses of £150,000 (2022 - £2,328,000). There is evidence that taxable profits may arise in the future, therefore the Fund has recognised £30,000 (2022 - £148,000) of the potential deferred tax asset. Consequently the Fund has an unrecognised deferred tax asset carried forward of £nil (2022 - £317,000).

Amounts due at the end of the accounting year for Fund Management Fees of £697,000 (2022 - £542,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

Although the Fund spreads its investment across a range of Invesco funds in order to diversify risk, it may invest part of its assets in funds which bear specific risks. Examples include: emerging market funds, smaller company funds and concentrated funds. Full details of these specific risks are included in the full Prospectus. In order to avoid double charging, shares will be purchased at a price which excludes the normal entry (sales) charge.

Although the Fund invests mainly in established markets, it can invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 4 of the notes applicable to the financial statements of all Funds on pages 08 to 12.

a) Counterparty risk

The Fund had zero positive counterparty exposure to OTC derivatives at the balance sheet date (2022 - Nil). The counterparty OTC exposure is the positive exposure of cleared and non-cleared OTC derivatives, including FX forwards, to the different counterparties used by the portfolio, measured on a marked-to-market basis net of applicable legally enforceable netting and collateral.

| Total transaction costs as a % of average net assets | | 0.01% | | 0.00% | |

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.01% (2022 - 0.01%).

Group 1: shares purchased prior to 1 June 2022

Group 2: shares purchased on or after 1 June 2022

Equalisation applies only to shares purchased during the distribution period ("Group 2"). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Managed Income Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco Managed Income Fund (UK)

The Fund aims to achieve long-term (5 years plus) income and capital growth. The Fund invests at least 80% of its assets in collective investment schemes (including funds managed by the Invesco group) which invest in a broad range of assets including shares or other equity related securities and corporate and government debt securities (including investment grade, non-investment grade and unrated). In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including shares of companies), money market instruments, other collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for efficient portfolio management purposes only, to reduce risk, reduce costs and/or generate additional capital or income. The Fund invests in collective investment schemes (including funds managed by the Invesco group) which may use derivatives for investment purposes and/or for efficient portfolio management. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 31 May 2023.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 34 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 34 is based on the close of business bid price.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Investment report for the year

Strategy, review and outlook

The Fund returned 1.1% in the year ending 31 May 2023. This placed it in the first quartile of its peer group, the IA Mixed Investment 40-85% Shares Sector, which returned -1.7%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

The Invesco Managed Income Fund (UK) adopts a fund-of-funds approach, allocating capital across equity and bond markets by investing in underlying Funds managed primarily by the Henley Investment Centre's fund management teams. The Fund adopts a twin return approach (capital growth and income), but does tend to have a bias towards investments with higher income potential. Top-down asset allocation and underlying Fund performance are both drivers of returns.

It was a volatile period for global equities, with growing recession concerns and fears of a renewed banking crisis in the US and Europe ultimately being superseded by upward moves in the early part of 2023. Markets were led higher by the technology focused areas in particular, as Artificial Intelligence (AI) excitement buoyed the sector. It was a challenging period for global bond markets too as central banks globally increased interest rates several times to stem inflation. In late September 2022, bond yields spiked in reaction to the UK government's unfunded mini budget. More recently, the collapse of US Silicon Valley Bank and Credit Suisse's forced merger with UBS triggered market turbulence. In both cases, central banks acted swiftly and effectively in restoring market confidence.

Equity exposure to the US proved most favourable for the Fund over the period, largely driven by strong performance from a number of large technology focused stocks. Elsewhere there was good contribution to returns from European exposures too while UK small cap equities proved weakest for returns. Fund exposure to bonds, both credit and high yield also weighed on returns.

Within equities, one of our key concerns had been the corporate earnings outlook, with bottom-up corporate earnings expectations seemingly out of kilter with top-down expectations, which leaves scope for downward earnings revisions. However, the increased evidence of economic resilience and the fact that we are likely close to the peak in interest rates means future profits are likely to stabilise, or even improve. Some markets outside the US do look like they offer good value in our opinion, and technical factors remain supportive.

Our view of fixed income remains constructive as yields in developed and emerging market sovereign bonds, investment grade credit, and high yield credit offer good relative value compared to other asset classes. US government bonds arguably are good value given the Fed are closer to a peak in interest rates, but we are mindful of the lower yield a Sterling-hedged investor receives. High yield credit and emerging market debt offers, in some cases, double-digit level yields – close to multi-decade highs.

Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 08, which we also refer to as the ongoing charge in our Key Investor Information Documents ("KIIDs") and our literature.

|-------------------|---|---|

a) Analysis of charge for the year

| | | |
|------------------|-----|-----|
| Corporation tax | 274 | 183 |
| Total tax charge | 274 | 183 |

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2022 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The factors are explained below:

| | 01.6.22 to 31.5.23 £'000 | 01.6.21 to 31.5.22 £'000 |
|-------------------------------------|---|---|
| Net revenue before taxation | 3,516 | 2,618 |
| Corporation tax at 20% (2022 - 20%) | 703 | 524 |
| Effects of: | | |
| Capitalised income subject to tax | 82 | 110 |
| Revenue not subject to tax | (511) | (451) |
| Total tax charge | 274 | 183 |

Authorised investment companies with variable capital are exempt from tax on capital gains in the UK. Therefore any capital return is not included in the above reconciliation.

Notes to the financial statements

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2022 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 8 of the notes applicable to the financial statements of all Funds on page 13. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year of £44,879,000 (2022 - £52,980,000) and amounts paid in respect of purchases in the accounting year of £32,701,000 (2022 - £34,848,000) are included within the figures disclosed in note 14. Amounts received in respect of dividends in the accounting year is £4,413,000 (2022 - £3,562,000). Amounts receivable at the end of the accounting year in respect of sales of Nil (2022 - £299,000) are included within the figure disclosed in note 8. Management fee rebates are disclosed in notes 2 and 3. Amounts due at the end of the accounting year for Fund Management Fees of £182,000 (2022 - £199,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

Although the Fund spreads its investment across a range of Invesco funds in order to diversify risk, it may invest part of its assets in funds which bear specific risks. Examples include: emerging market funds, smaller company funds and concentrated funds. Full details of these specific risks are included in the full Prospectus. In order to avoid double charging, shares will be purchased at a price which excludes the normal entry (sales) charge.

As one of the key objectives of the Fund is to provide income, the Manager's ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.

The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 4 of the notes applicable to the financial statements of all Funds on pages 08 to 12.

a) Counterparty risk

The Fund had zero positive counterparty exposure to OTC derivatives at the balance sheet date (2022 - Nil). The counterparty OTC exposure is the positive exposure of cleared and non-cleared OTC derivatives, including FX forwards, to the different counterparties used by the portfolio, measured on a marked-to-market basis net of applicable legally enforceable netting and collateral.

b) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

| | Assets £'000 | Liabilities £'000 |
|---------------------------------|-----------------|----------------------|
| 31.5.23 | | |
| Level 1: Quoted prices | 19,884 | - |
| Level 2: Observable market data | 139,933 | - |
| Level 3: Unobservable data | - | - |
| | 159,817 | - |
| 31.5.22 | | |

| Level 2: Observable market data | 157,118 | - |
| Level 3: Unobservable data | - | - |
| | 174,285 | - |

All financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 relate to daily priced open-ended funds. These instruments are valued at their fair value as at noon of the last business day prior to the Fund's year end.

| Derivative transaction costs | | - | | - | |
| Total transaction costs | | 2 | | - | |
| Total transaction costs as a % of average net assets | | 0.00% | | 0.00% | |

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.00% (2022 - 0.00%).

Group 1: shares purchased prior to 1 March 2023
Group 2: shares purchased on or after 1 March 2023

Equalisation applies only to shares purchased during the distribution period ("Group 2"). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Money Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco Money Fund (UK)

The Fund aims to achieve a return combined with maintenance of capital. The Fund invests at least 80% of its assets in Sterling-denominated money market instruments (including qualifying short-term debt securities) as well as deposits. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities and permitted investments and transactions. The Fund may use derivatives for efficient portfolio management purposes only, to reduce risk, reduce costs and/or generate additional capital or income.

The objectives currently shown within these financial statements are those objectives that were in place as at 31 May 2023.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 53 for Accumulation shares (No Trail) as the figure above is based on the quoted 12pm price and the figure shown on page 53 is based on the close of business bid price. UK Bank Base Rate¹ data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Investment report for the year

Strategy, review and outlook

The Fund returned 2.5% in the year ending 31 May 2023.

Past performance is not a guide to future returns.

In response to curb soaring inflation the Bank of England (BoE) raised interest rates on eight separate occasions during the review period, increasing the UK Bank Base Rate from 1.0% to 4.5%. The latest BoE forecasts did not attempt to push back against expectations that there were more rises in the cost of borrowing to come, even if it tips the UK economy into recession.

In a further move to tackle rising consumer prices, the BoE announced it would start actively selling the £80 billion of UK government bonds bought under its quantitative easing scheme used since the 2008 financial crisis to support the economy. The central bank reduces its holdings through a mix of outright sales and not reinvesting the proceeds of maturing gilts.

Against this backdrop, UK gilts came under pressure, particularly the two-year note which is more sensitive to short-term moves in monetary policy. Over the year, the yield on the short-dated government bond increased from 1.59% to 4.34%. The yield on the 10-year gilt also rose significantly, up from 2.10% to 4.18%.

Market volatility in UK assets spiked in September following the announcement of the biggest programme of UK tax cuts in more than 50 years. The unfunded measures forced pension funds into a fire sale of assets, including gilts, to meet margin calls, thus putting fresh pressure on prices and triggering further margins calls. To restore market confidence, the BoE intervened by committing to buying long-dated gilts and prevent a spill-over into UK credit and households. The action prompted the largest single day rally in the gilt market ever and provided support to sterling which had previously fallen to a record low against the US dollar. Gilt issuance for the 2023/24 financial year is expected to increase significantly from 2022/23.

For the 12-month period, UK gilts returned -16.72% in sterling terms. Government bond markets in the US and Europe also displayed weakness but to a lesser degree with US treasuries and German bunds returning -2.46% and -7.08% respectively (in local currency terms).

The Fund has positions in government, quasi-government and corporate bonds. To limit the exposure to interest rate risk and credit risk (the likelihood of an issuer defaulting), these bonds are both short-dated and of high quality. The Fund also has an allocation to floating rate notes. The interest rates on these bonds reset at regular intervals and so can mitigate the effect of rising interest rates on Fund performance.

¹ Effective 23 June 2022 shareholders in the Invesco Money Fund (UK) Z Accumulation shares had their holding converted to the equivalent Accumulation shares (No Trail). The Z Accumulation shares were terminated on 23 June 2022.

² Effective 1 February 2022, the Fund Management Fee for the Accumulation shares (No Trail) reduced from 0.40% to 0.15%.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 08, which we also refer to as the ongoing charge in our Key Investor Information Documents ("KIIDs") and our literature.

a) Analysis of charge for the year

| | | |
|------------------|---|---|
| Overseas tax | - | - |
| Total tax charge | - | - |

There is no corporation tax charge for the year (2022 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2022 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The factors are explained below:

| | 01.6.22 to 31.5.23 £'000 | 01.6.21 to 31.5.22 £'000 |
|---------------------------------------|---|---|
| Net revenue before taxation | 2,904 | 213 |
| Corporation tax at 20% (2022 - 20%) | 581 | 43 |
| Effects of: | | |
| Tax deductible interest distributions | (581) | (43) |
| Total tax charge | - | - |

Authorised investment companies with variable capital are exempt from tax on capital gains in the UK. Therefore any capital return is not included in the above reconciliation.

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2022 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 8 of the notes applicable to the financial statements of all Funds on page 13. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £15,000 (2022 - £20,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in bonds and other fixed income securities that are subject to the risk that issuers do not make payments on such securities. The solvency of organisations with whom the Fund invests cannot be guaranteed and any difficulty may adversely affect the Fund's performance. The Fund may be adversely affected by a decrease in market liquidity which may impair the Fund's ability to acquire or to dispose of securities at their intrinsic value.

The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

Although the Fund does not actively pursue a concentrated portfolio, it may have a concentrated number of holdings on occasions. Accordingly, the Fund may carry a higher degree of risk than a Fund which invests in a broader range of holdings or takes smaller positions in a relatively large number of holdings.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 4 of the notes applicable to the financial statements of all Funds on pages 08 to 12.

a) Counterparty risk

The Fund had zero positive counterparty exposure to OTC derivatives at the balance sheet date (2022 - Nil). The counterparty OTC exposure is the positive exposure of cleared and non-cleared OTC derivatives, including FX forwards, to the different counterparties used by the portfolio, measured on a marked-to-market basis net of applicable legally enforceable netting and collateral.

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

| | Assets £'000 | Liabilities £'000 |
|---------------------------------|-----------------|----------------------|
| 31.5.23 | | |
| Level 1: Quoted prices | 56,252 | - |
| Level 2: Observable market data | 57,116 | - |
| Level 3: Unobservable data | - | - |
| | 113,368 | - |
| 31.5.22 | | |

| Level 2: Observable market data | 67,135 | - |
| Level 3: Unobservable data | - | - |
| | 140,789 | - |

All financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor.

| Total transaction costs as a % of average net assets | | 0.00% | | 0.00% | |

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.02% (2022 - 0.00%).

Equalisation applies only to shares purchased during the distribution period ("Group 2"). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Z Accumulation shares were terminated on 23 June 2022.

Regulatory statements

Statement of the Manager's Responsibilities

The Collective Investment Schemes sourcebook (“COLL”) requires the Manager to prepare financial statements for each annual accounting period which give a true and fair view of the financial position of the Company as at the end of the year and of the net revenue or expense and the net capital gains or losses on the scheme property of the Company for the year then ended. In preparing the financial statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation for the foreseeable future;
- comply with the disclosure requirements of the Statement of Recommended Practice relating to Financial Statements of Authorised Funds;
- follow applicable accounting standards; and
- keep proper accounting records which enable it to demonstrate that the financial statements as prepared comply with the above requirements.

The Manager is responsible for the management of the Company in accordance with the Prospectus and the OEIC Regulations.

The Manager is responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Statement of Depositary's Responsibilities

The Depositary is responsible for the safekeeping of all the property of the Company which is entrusted to it and ensuring proper registration of tangible moveable property, and for the collection of income arising from all such scheme property. It is the duty of the Depositary to take reasonable care to ensure that the Company is managed and operated by the Manager in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook (“the Sourcebook”), the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228) (the “OEIC Regulations”), the Company's Instrument of Incorporation, and the Prospectus, as appropriate, concerning: the pricing of and dealing in Shares in the Company; the application of income of the Company; and the investment portfolio and borrowing activities of the Company.

Depositary's Report to Shareholders

Having carried out procedures and enquiries considered duly necessary to discharge our responsibilities as Depositary of the Company, based on information and explanations provided to us, we believe that, in all material respects, the Company, acting through the Manager:

- (i) has carried out the issue, sale, redemption and cancellation and calculation of the price of the Company's shares and the application of the Company's income in accordance with the Sourcebook, and where applicable, the OEIC regulations, the Company's Instrument of Incorporation, and the Prospectus;
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company; and
- (iii) has otherwise, ensured the proper operation of the Company.

Independent auditors' report to the Shareholders of Invesco Managed Investment Series

Report on the audit of the financial statements

Opinion

In our opinion, the financial statements of Invesco Managed Investment Series (the "Company"):

- give a true and fair view of the financial position of the Company and each of the sub-funds as at 31 May 2023 and of the net revenue and the net capital losses on the scheme property of the Company and each of the sub-funds for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", and applicable law), the Statement of Recommended Practice for UK Authorised Funds, the Collective Investment Schemes sourcebook and the Instrument of Incorporation.

Invesco Managed Investment Series is an Open Ended Investment Company ('OEIC') with three sub-funds. The financial statements of the Company comprise the financial statements of each of the sub-funds. We have audited the financial statements, included within the Annual Report Including Long Form Financial Statements (the "Annual Report"), which comprise: the Balance Sheets as at 31 May 2023; the Statements of Total Return and the Statements of Change in Net Assets Attributable to Shareholders for the year then ended; the Distribution tables; the notes applicable to the financial statements of all Funds, which include a description of the significant accounting policies; and the notes to the financial statements for each Fund.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's or any sub-funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the Authorised Corporate Director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's or any sub-funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the Authorised Corporate Director with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The Authorised Corporate Director is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Based on our work undertaken in the course of the audit, the Collective Investment Schemes sourcebook requires us also to report certain opinions as described below.

Authorised Corporate Director's Report

In our opinion, the information given in the Authorised Corporate Director's Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Responsibilities for the financial statements and the audit

Responsibilities of the Authorised Corporate Director for the financial statements

As explained more fully in the Statement of the Manager’s Responsibilities, the Authorised Corporate Director is responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The Authorised Corporate Director is also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Authorised Corporate Director is responsible for assessing the Company’s and each of the sub-fund’s ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the Authorised Corporate Director either intends to wind up or terminate the Company or individual sub-fund, or has no realistic alternative but to do so.

Auditors’ responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors’ report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the Company/industry, we identified that the principal risks of non-compliance with laws and regulations related to breaches of the Collective Investment Schemes sourcebook, and we considered the extent to which non-compliance might have a material effect on the financial statements, in particular those parts of the sourcebook which may directly impact on the determination of amounts and disclosures in the financial statements. We evaluated management’s incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to posting inappropriate journal entries to increase revenue or to increase the net asset value of the Company or the sub-funds. Audit procedures performed included:

- Discussions with the Authorised Corporate Director, including consideration of known or suspected instances of non-compliance with laws and regulation and fraud;
- Reviewing relevant meeting minutes, including those of the Authorised Corporate Director’s board of directors;
- Identifying and testing journal entries, specifically any journals posted as part of the financial year end close process; and
- Designing audit procedures to incorporate unpredictability around the nature, timing or extent of our testing.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council’s website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors’ report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company’s Shareholders as a body in accordance with paragraph 4.5.12 of the Collective Investment Schemes sourcebook as required by paragraph 67(2) of the Open-Ended Investment Companies Regulations 2001 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Opinion on matter required by the Collective Investment Schemes sourcebook

In our opinion, we have obtained all the information and explanations we consider necessary for the purposes of the audit.

Collective Investment Schemes sourcebook exception reporting

Under the Collective Investment Schemes sourcebook we are also required to report to you if, in our opinion:

- proper accounting records have not been kept; or
- the financial statements are not in agreement with the accounting records.

We have no exceptions to report arising from this responsibility.
