Important note to Hong Kong investors

- This is a sub-fund of AXA World Funds which is a Luxembourg based open-ended investment company with several separate sub-funds (individually the "Sub-Fund" and collectively the "Sub-Funds") each with different investment objectives and risks profile.
- The Sub-Fund seeks long-term growth of your investment, in EUR, from an actively managed listed equity, equity-related securities and derivatives portfolio by investing at least two thirds of net assets in transferable securities issued by companies engaged in the real estate sector. As such, the Sub-Fund is exposed to the risks associated with concentrating its investment in real estate securities and Real estate companies and Real Investment Trusts (REITs).
- The Sub-Fund invests in securities issued or listed in different countries which may expose to movements of foreign exchange rates, changes in relevant laws or restrictions, changes in exchange control regulations or price volatility.
- The Sub-Fund may focus investing in certain companies, sectors, countries or geographical regions, or ratings which may be more susceptible to economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory risks.
- The Sub-Fund is subject to equity, investment in small or micro-capitalisation universe, emerging markets, currency and foreign exchange risks.
- This Sub-Fund may use derivative instruments and may subject the investor to additional risks including counterparty, volatility, valuation, leverage, liquidity, and over-the-counter transaction risks.
- For the Distribution Shares, investors should be aware that dividends may be paid directly or effectively out of the Sub-Funds' capital at the Management Company's discretion. This may result in an immediate decrease in the net asset value per share of the Distribution Shares. Payment of distribution out of the Sub-Funds' capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment, which may further decrease the net asset value per share and may also reduce the capital available for the Sub-Funds for future investment and capital growth.
- Investors should not make investment decision on the basis of this document alone. The offering documents of the Fund should be read for further details including risk factors.

ESG metrics definitions

The ESG absolute rating is based on a proprietary scoring methodology. If the Sub-Fund has one tree (5 trees), it means that it is in the lowest (highest) ESG absolute rating category.

For more information on the methodology, please visit <https://www.axa-im.com/responsible-investing>.

ESG relative rating is calculated as the difference between the ESG absolute rating of the portfolio and the ESG absolute rating of its benchmark. If ESG Relative rating is positive (negative), this means that the portfolio has a higher (lower) ESG absolute rating than the benchmark.

CO2 relative intensity is calculated as the difference between the CO2 intensity of the fund (expressed in tCO2/M€ Revenues) and the one of the benchmark. If CO2 Relative intensity is green, it means that the intensity of the portfolio is lower than that of the benchmark. If CO2 Relative intensity is orange, it means that the intensity of the portfolio is higher than that of the benchmark. If CO2 Relative intensity is yellow, it means that the intensity of the portfolio is similar than that of the benchmark.

ESG indicators are for informational purposes only.

The Sub-Fund portfolio has neither statutory nor contractual ESG objectives.
