

# Allianz Flexi Asia Bond

Allianz Global Investors Fund  
AT

- The Fund is exposed to significant risks of investment/general market, country and region, interest rate, creditworthiness/credit rating/downgrading, default, valuation, sovereign debt, emerging market, RMB debt securities, currency (such as exchange controls, in particular RMB), and the adverse impact on RMB share classes due to currency depreciation.
- The Fund is also exposed to risks relating to securities lending transactions, repurchase agreements and reverse repurchase agreements.
- The Fund may invest in high-yield (non-investment grade and unrated) investments and convertible bonds which may subject to higher risks, such as volatility, loss of principal and interest, creditworthiness and downgrading, default, interest rate, general market and liquidity risks and therefore may adversely impact the net asset value of the Fund. Convertibles will be exposed to prepayment risk, equity movement and greater volatility than straight bond investments.
- The Fund may invest the assets in interest-bearing securities issued or guaranteed by a non-investment grade sovereign issuer (e.g. Philippines) and is subject to higher risks of liquidity, credit, concentration and default of the sovereign issuer as well as greater volatility and higher risk profile that may result in significant losses to the investors.
- The Fund may invest in financial derivative instruments ("FDI") which may expose to higher leverage, counterparty, liquidity, valuation, volatility, market and over the counter transaction risks. The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.
- This investment may involve risks that could result in loss of part or entire amount of investors' investment.
- In making investment decisions, investors should not rely solely on this material.
- **Note:** Dividend payments may, at the sole discretion of the Investment Manager, be made out of the Fund's capital or effectively out of the Fund's capital which represents a return or withdrawal of part of the amount investors originally invested and/or capital gains attributable to the original investment. This may result in an immediate decrease in the NAV per share and the capital of the Fund available for investment in the future and capital growth may be reduced, in particular for hedged share classes for which the distribution amount and NAV of any hedged share classes (HSC) may be adversely affected by differences in the interests rates of the reference currency of the HSC and the base currency of the Fund.

## Investment Objective

The Fund aims at long-term capital growth and income by investing in debt securities of Asian bond markets denominated in EUR, USD, GBP, JPY, AUD, NZD or any Asian currency.

Number of Holdings	234
Base Currency	USD
Subscription Fee (Sales Charge)	Up to 5%
Management Fee (All-in-Fee <sup>3</sup> )	1.50% p.a.
Total Expense Ratio <sup>4</sup>	1.54%
Unit NAV	USD 12.19
Inception Date	03/07/2012
Dividend Frequency	N/A
ISIN Code	LU0745992494
Bloomberg Ticker	AFAATUS LX

Opportunities <sup>5</sup>

Above-average yield potential of emerging-market bonds, capital gains opportunities on declining market yields
Investments in high-yielding bonds may enhance return potential
Currency gains against investor currency possible
Broad diversification across numerous securities
Potential additional returns from single security analysis and active management

Risks <sup>5</sup>

The volatility of the Fund unit price may be strongly increased. Considerably higher risk of volatility and capital loss than with high-grade government bonds
Exposure to high-yielding bonds increases risk of volatility and losses
Currency losses against investor currency possible
Limited participation in the potential of securities
No guarantee of the success of single security analysis and active management

Source: All fund data quoted are Allianz Global Investors/IDS GmbH/Morningstar, as at 31/03/2021, unless stated otherwise.

Fund performance is calculated on NAV to NAV basis in denominated currency of the respective share class with gross dividends re-invested.

- 1) The average credit quality methodology excludes non-rated investments and includes cash.
- 2) The Fund Size quoted includes all share classes of the Fund.
- 3) The All-in-Fee includes the expenses previously called management and administration fees.
- 4) Total Expense Ratio (TER): Total cost (except transaction costs) charged to the Fund during the last financial year (as at 30/09/2020) expressed as a ratio of the Fund's average NAV. For share classes that have been incepted for less than one year as at close of the last financial year (please refer to the Inception Date in the Fund Details table), the TER will be annualised. For share classes incepted after the close of the last financial year, the TER will be reflected as N/A.
- 5) The investment opportunities described herein are for reference only but not guaranteed and are not indicative of future performance. The risks described herein are not meant to be exhaustive, please refer to the offering documents for details of risk factors.

Information herein is based on sources we believe to be accurate and reliable as at the date it was made. We reserve the right to revise any information herein at any time without notice. No offer or solicitation to buy or sell securities and no investment advice or recommendation is made herein. In making investment decisions, investors should not rely solely on this material but should seek independent professional advice.

Investing in fixed income instruments (if applicable) may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including short positions with respect to fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemptions. Investment involves risks, in particular, risks associated with investment in emerging and less developed markets. Past performance is not indicative of future performance. Investors should read the offering documents for further details, including the risk factors, before investing. This material and website have not been reviewed by the Securities and Futures Commission of Hong Kong. Issued by Allianz Global Investors Asia Pacific Limited.
