Fund overview

Objective: The investment objective of the Fund is to offer returns in line with money market rates and to preserve the value of the investment. The performance of the Sub-fund is measured against the Sterling Overnight Index Average (SONIA) Rate (the benchmark). The Aviva Investors Sterling Government Liquidity Fund is a Short-Term Low-Volatility Net Asset Value (LVNAV) Money Market Fund.

Investments: The Sub-Fund invests in extremely low risk Sterling cash deposits and cash like instruments issued by the UK government or organisations backed by the UK government. Such instruments could include overnight deposits with the Debt Management Office, treasury bills, UK government debt securities, reverse repo and deposits.

Strategy: The Sub-Fund is actively managed. The Investment Manager uses credit and interest rate analysis to assemble a highly liquid portfolio of securities while seeking to maximise yields. The weighted average maturity of the fund's investments will not exceed 60 days. The investment manager intends, where possible, to manage the Fund according to its classification as a short-term money market fund and the restrictions imposed by the rating agency, in order to maintain an overall credit rating of Aaa (the rating has been solicited by the Investment Manager).

Full details of the Fund's Objective & Investment Policy are available on our website and prospectus.

For further information on Sustainability Risk please refer to the Sustainable Finance Disclosure section

Risk measurement (As at 24th Dec 2024)

The indicator is based on historical data and may not be a reliable indication of the future risk profile. The category shown may change over time. The lowest category does not mean 'risk free'.

Performance

| | Cumulative (%) | | | | | Annualised (%) | | |
|------------------|----------------|------|------|------|------|----------------|------|-----------------|
| | 1M | 3M | 6M | YTD | 1Y | 3Y | 5Y | Since inception |
| Fund | 0.39 | 1.18 | 2.44 | 5.03 | 5.03 | 3.52 | 2.09 | 0.88 |
| Benchmark | 0.41 | 1.23 | 2.55 | 5.27 | 5.27 | 3.81 | 2.29 | 0.99 |

Past performance is not a guide to future performance.

Performance basis: Month end returns, Mid to mid, net income reinvested, net of ongoing charges and fees, in the share class currency and net of tax payable by the fund. The figures do not include the effect of any exit or entry charge.

Sustainable Finance Disclosure

Sustainability Risk indicators are considered alongside a range of financial and non-financial research, with no specific limits imposed, therefore the Investment Manager retains discretion over which investments are selected. Where practicable, the Investment Manager also seeks to apply the Baseline ESG Exclusions when selecting investments.

This product does not have a sustainable investment objective and the investment manager will consider the adverse impacts of an investment to the extent they are financially material. *For further information please refer to the prospectus and our website.*

Fund risks

Investment Risk & Currency Risk

The value of investments and the income from them will change over time. The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.

Money Market Securities Risk

The Fund invests in money market instruments such as short term bank debt, the market prices/value of which can rise as well as fall on a daily basis. Their values are affected by changes in interest rates, inflation and any decline in creditworthiness of the issuer.

This is not a guaranteed investment, an investment in a Money Market Fund is different from an investment in deposits and can fluctuate in price meaning you may not get back the original amount you invested. This investment does not rely on external support for guaranteeing liquidity or stabilising the NAV per unit or share. The risk of loss of the principal is to be borne by the investor.

Sustainability Risk

The level of sustainability risk may fluctuate depending on which investment opportunities the Investment Manager identifies. This means that the fund is exposed to Sustainability Risk which may impact the value of investments over the long term.

Full information on risks applicable to the Fund are in the Prospectus and the Key Investor Information Document (KIID).

Glossary

Annualised performance

An annualised total return is the geometric average amount of money earned by an investment each year over a given time period.

Credit Rating

Independent ratings agencies assign different ratings to bonds depending on the bond issuers' financial strength and their outlook as well as their ability to pay interest on time and meet all of their liabilities. We use appropriate industry recognised ratings as detailed in source notes.

Daily yield

Gross (before expenses) daily dividends annualised as a percentage of total net assets.

Entry fee

A one-off charge may be taken from your money before it is invested. The charge is usually a percentage of the amount invested and is additional to the price paid for the units/shares. The entry charge is deducted from the investment before units/shares are bought and is also known as the "initial charge".

Exit charge

A one-off charge levied on redemption of units/shares before the proceeds of your investment are paid out. This is also known as a "redemption charge".

Management Fee

The management fee is fixed rate charge to cover the costs of managing the investments of the fund. It accrues daily based on a percentage of the fund's net asset value and deducted from the fund's assets.

NAV

NAV is typically an End Of Day valuation using close of market prices to value the individual securities with the portfolio or fund, rolling up to a total portfolio or fund level.

Ongoing charge

The ongoing charge figure represents the costs you can expect to pay annually based on last year's expenses. The ongoing charges figure is made up of various elements such as the fund management fee, professional fees, audit fees and custody fees. Performance fees (if payable) are not included in this figure.

Performance fee

The percentage of any outperformance of the hurdle rate and/or benchmark that will be taken as a performance fee.

Total net assets

The total assets of a fund minus its liabilities.

Volatility (%)

A measure of the fund's dispersion of returns. A higher volatility implies that a fund's return is spread over a larger range of values whilst a lower volatility implies that a fund's return is spread over a smaller range of values.

Weighted average life

The asset-weighted remaining time until the securities in the portfolio reach their final maturity date in days.

Weighted average maturity

The asset-weighted remaining time until the securities in the portfolio reach their next interest rate reset date, in days.

Important information

THIS IS A MARKETING COMMUNICATION

The source for all performance, portfolio and fund breakdown data is Morningstar unless indicated otherwise. For share classes that have not yet completed 5 years, the cumulative performance chart will start from the first full month. All data is as at the date of the Factsheet, unless indicated otherwise.
