#### Risk Considerations

- Franklin Mutual Global Discovery Fund invests principally in (i) common stock, preferred stock and debt securities of companies of any nation that are available at market prices less than their intrinsic value and; (ii) mid- and large-cap companies.
- The Fund is subject to market risk, equity risk, interest rate securities risk, credit risk, sovereign debt risk, low-rated, unrated
  or non-investment grade securities risk, preferred securities risk, convertible securities risk, restructuring companies risk, foreign
  currency risk, liquidity risk, valuation risk, derivative instruments risk, volatility risk, counterparty risk and securities lending risk.
- Security lending may involve the risk that the borrower may fail to return the securities lent out in a timely manner and the value of the collateral may fall below the value of the securities lent out, which may result in a substantial loss to the Fund.
- The Fund may at its discretion pay dividends out of the capital or out of gross income of the Fund while paying all or part of the Fund's fees and expenses out of the capital of the Fund, which results in effectively paying dividends out of capital. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.
- Investment involves risks which may result in loss of part or entire amount of your investment. Before you decide to invest, you should make sure the intermediary has explained to you that the Fund is suitable to you. Investors should not only base on this marketing material alone to make investment decisions.

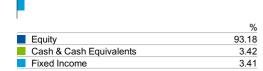

### Summary of Investment Objective

The Fund primarily invests in mid and large-cap companies with a market capitalisation around or greater than 1.5 billion US dollars. To a lesser extent, the Fund may also invest in distressed securities and merger arbitrage situations.
