

Aberdeen Standard SICAV I - Asian Local Currency Short Term Bond Fund

A Acc USD

31 January 2021

Important Information

- The Fund invests in local Asian currency denominated Debt and Debt Related Securities having a maturity of up to five years issued by governments, supranational institutions or government-related bodies that are domiciled in Asian countries.
- The Fund invests in emerging markets which tend to be more volatile and is subject to higher political, regulatory, credit and liquidity risks.
- The Fund may invest in financial derivative instruments and enter into currency forward contracts for hedging and/or investment purposes. Trading in currency forward contracts is substantially unregulated.
- The currency exposure of the Fund may be altered, solely through the use of derivative contracts. Performance may be strongly influenced by movements in currency rates.
- The Fund's underlying investments are subject to interest rate risk and credit risk. Interest rate fluctuations affect the capital value of investments. Credit risk reflects the ability of a bond issuer to meet its obligations.
- The Fund's net derivative exposure may be up to 50% of the Fund's net asset value and subject to counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk.
- The Fund may enter into securities lending transactions that may involve the risk that the borrower may fail to return the securities lent out in a timely manner and the value of the collateral may fall below the value of the securities lent out.
- Investment in this Fund may involve a high degree of risk and may not be suitable for all investors. It is possible that the entire value of the Investment could be lost.
- Investors are responsible for their investment decisions and should ensure that the intermediary has advised on Funds suitability and consistency with their investment objective. If in doubt, please seek independent financial and professional advice.
- Investors should not invest in this Fund based solely on this document and should read the relevant offering documents (particularly the investment policies and risk factors) for more details before investing.

Objective

To achieve long-term total return by investing at least two-thirds of the Fund's assets in local Asian currency denominated debt and debt-related securities having a maturity of up to five years issued by governments, supranational institutions or government-related bodies that are domiciled in Asian countries.

Please note the risk analytics figures are calculated on gross returns whereas the performance figures are based on net asset value (NAV) returns. In addition, the risk analytics figures lag the performance figures by one month. It should be noted that the figures provided regarding risk would be adjusted if fund fees and expenses were included.[^] 3 and 5 year annualised. Beta is a measure of the volatility of a portfolio in comparison to a benchmark index. Fund volatility measures historical volatility. Information ratio measures the portfolio returns beyond the returns of a benchmark, usually an index, compared to the volatility of those returns. R-squared measures the percentage of a fund or security's movements that can be explained by movements in a benchmark index. Sharpe ratio measures risk-adjusted performance. Tracking error measures the divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark.
