KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a sub-fund of an umbrella unit trust constituted in Singapore. The Sub-Fund aims to provide you with returns through medium-term capital appreciation by investing in fixed income securities and money market instruments.
- Distributions (if any) may be declared in our absolute discretion and may reduce the Sub-Fund's NAV.

Refer to the "Basic Information" section and Annex 1 (A and E) of the Prospectus for further information on features of the product.

Investment Strategy

- The Sub-Fund will invest in Singapore Dollar and foreign currency denominated fixed income securities, of up to 5 years tenure, and money market instruments.
- The foreign currency denominated fixed income securities will be fully hedged back to the Singapore Dollar except for a 1% frictional currency limit (to account for possible deviations from a 100% hedge), and will have investment-grade credit ratings of at least BBB- by Standard and Poor's or Baa3 by Moody's (or their respective equivalents). The investments are to be made after analysing historic and expected interest rate movements.
- The Sub-Fund may also invest in FDIs for the purposes of hedging and/or EPM (namely, managing risks) without leveraging the portfolio.

Refer to Annex 1 (B) of the Prospectus for further information on the investment strategy of the product.
