Key Risks

- **The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss.**
- The Fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment.
- The Fund will use financial contracts (known as derivatives) to try to reduce the effect of currency fluctuations between the currency of its assets and the currency of the shares. This may not be effective and may prevent the Fund from benefitting from an increase in value of (or expose a Fund to the decrease in value of) a particular currency.
- Bonds are exposed to credit risk and interest rate risk. There is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. If interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment.
