| Parties Involved | |
|--|---|
| WHO ARE YOU INVESTING WITH? The Managers are Fullerton Fund Management Company Ltd. The Trustee is HSBC Institutional Trust Services (Singapore) Limited. The Custodian is The Hongkong and Shanghai Banking Corporation Limited. | Refer to the "The Managers" and "The Trustee and Custodian" sections of the Prospectus for further information on their roles and responsibilities, and what happens if they become insolvent. |
| KEY RISKS | |
| WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the product and its distributions may rise or fall. These risk factors may cause you to lose some or all of your investment (including initial principal investment). | Refer to the "Risks" section and Annex 1 (H) of the Prospectus for further information on risks of the product. |
| Market and Credit Risks | |
| You are exposed to the risk of interest rate fluctuations. Generally, the price of fixed income securities rises when interest rate falls and vice versa. The longer the term of a fixed income instrument, the more sensitive it will be to interest rate fluctuations. You are exposed to credit risk. The issuer of securities, counterparties and custodians to transactions may default on their obligations. You are exposed to currency risk. Changes in currencies and exchange control regulations may affect your investment. Changes in foreign exchange rates, which may not be fully hedged, may affect the Sub-Fund's income. Hedging will not eliminate all the risk of loss due to currency fluctuations. Classes which are not expressed in the Sub-Fund's base currency are also subject to exchange rate fluctuations between the class and base currencies. For Class D (US\$-Hedged), we intend to hedge the class currency of US\$ against the base currency of S\$ but this may not be fully hedged. You are exposed to political, regulatory and legal risks. The Sub-Fund may be affected by international political developments, changes in government and taxation policies, restrictions on foreign investment and currency repatriation, and other developments in the laws and regulations of countries in which it may invest. | |
| Liquidity Risks | |
| The Sub-Fund is not listed and you can redeem only on Dealing Days through us or the appointed agents or distributors. The size of the Sub-Fund's portfolio may make it less easy for the Sub-Fund to buy or sell securities in the Singapore fixed income markets. | |
| Product-Specific Risks | |
| You are exposed to derivatives risk. The Sub-Fund may use FDIs. It may be negatively impacted if the FDIs do not work as anticipated. It may suffer greater losses than if FDIs are not used. FDIs are exposed to counterparty, regulatory and other risks. | |
