

# Man Stockmarket Managed Fund

Monthly summary report: 28 March 2024

Reporting Class: CL A -> CL C (10/10/2012)

## Investment Policy

### Investment Objective

The Fund seeks to provide capital growth over the long term (over 5 year rolling periods) by investing at least 70% of its assets in a range of investment funds which are operated, managed or advised by Man Fund Management UK Limited or any of its associates. Eligible investment funds are selected by considering their return potential, diversification benefits, volatility and their relative performance on a risk adjusted basis

### Type of Assets

The Fund may have direct exposure or indirect exposure to a diverse range of asset classes, including equities, corporate bonds, convertible bonds, convertible preference shares, asset backed securities, cash, cash-like instruments and warrants, money market instruments, deposits, immovable property, and commodities.

### Benchmark Degree of Freedom

The Fund is actively managed. The Investment Association's Flexible Investment sector (a sector of funds grouped based on having broadly similar characteristics) is a comparator benchmark. The IA sector is considered to provide an appropriate comparison for performance

purposes given the Fund's investment objective and policy. The Investment Association's Flexible Investment sector is not used as a target for the Fund's performance, nor is it considered to constrain the composition of the Fund's portfolio.

**Please refer to the Fund's Prospectus /Offering documents for additional details regarding the Investment policy.**

## Fund Risks

The value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested. Prior to investing in the Fund investors should carefully consider the risks associated with investing, whether the Fund suits their investment requirements and whether they have sufficient resources to bear any losses which may result from an investment in the Fund. **Investors should only invest if they understand the terms on which the Fund is offered. Investors should consider the risks detailed in the risk glossary and where appropriate seek professional advice before investing.**

Monthly return<sup>1</sup>: 3.71%

YTD return<sup>1</sup>: 7.06%

Dealing Terms

Valuation Frequency	Daily
Dealing Frequency	Daily
Subscription	Before 12:00 (London) on dealing day
Redemption	Before 12:00 (London) on dealing day
Management Company	Man Fund Management UK Limited

<sup>1</sup> Please note all performance statistics and charts are based on the lead reporting shareclass. Performance data is shown net of fees with income reinvested, and does not take into account sales and redemption charges where such costs are applicable. Returns are calculated net of management fees and any applicable performance fees. Other share classes may charge higher fees. Performance is represented by the lead unbundled class Man Stockmarket Managed Fund Professional Acc from 11/10/2012 and by the bundled class Man Stockmarket Managed Fund Retail Acc prior to 10/10/2012 in accordance to the Retail Distribution Review (RDR) track record extension

<sup>2</sup> Fund Size represents the combined AUM of all share-classes in the Portfolio.

<sup>3</sup> Awards and/or ratings are for information purposes only and should not be construed as an endorsement of any Man Group company nor or of their products or services. Please refer to the websites of the sponsors/issuers for information regarding the criteria on which the awards/ratings are determined. © 2024 Morningstar UK Ltd. All rights reserved. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. Morningstar Overall Rating is for the Man Stockmarket Managed Fund Professional Acc C share class only; other classes may have different performance characteristics. Out of 434 GBP Flexible Allocation funds.

<sup>4</sup> Sharpe ratio is calculated using a risk-free rate in the appropriate currency over the period analysed. Where an investment has underperformed the risk-free rate, the Sharpe ratio will be negative. Because the Sharpe ratio is an absolute measure of risk-adjusted return, negative Sharpe ratios are not shown as they can be misleading.

<sup>5</sup> The organisations and/or financial instruments mentioned are for reference purposes only. The content of this material should not be construed as a recommendation for their purchase or sale.

<sup>6</sup> Please note, the top 10 equity holdings is calculated based on decomposed fund positions.

<sup>7</sup> The share class in blue in the table is the reporting share class for the Fund and may be closed to new subscriptions.

<sup>8</sup> Ongoing Charges Figure ("OCF"): A variable charge payable over a year, normally based on expenses to the Fund as of the previous accounting year. It excludes Performance Fees (if applicable) but includes the Management Fee.

<sup>9</sup> Performance Fee (up to): The payment made to an Investment Manager if certain performance levels are achieved (often over and above any levels set out in the investment objective) within a set time period.

## Risk Glossary

Prior to investing in the Fund investors should carefully consider the risks associated with investing, whether the Fund suits their investment requirements and whether they have sufficient resources to bear any losses which may result from an investment in the Fund. Investors should only invest if they understand the terms on which the Fund is offered. Investors should consider the following risks and where appropriate seek professional advice before investing:

**Investment Objective Risk** - There is no guarantee that the Fund will achieve its investment objective.

**Market Risk** - The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets. Therefore, the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.

**Counterparty Risk** - The Fund will be exposed to credit risk on counterparties with which it trades in relation to on-exchange traded instruments such as futures and options and where applicable, 'over-the-counter' ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded the same protections that may apply to participants trading instruments on an organised exchange.

**Currency Risk** - The value of investments designated in another currency may rise and fall due to exchange rate fluctuations. Adverse movements in currency exchange rates may result in a decrease in return and a loss of capital. It may not be possible or practicable to successfully hedge against the currency risk exposure in all circumstances.

**Liquidity Risk** - The Fund may make investments or hold trading positions in markets that are volatile and which may become illiquid. Timely and cost efficient sale of trading positions can be impaired by decreased trading volume and/or increased price volatility.

**Financial Derivatives Instruments** - The Fund will invest financial derivative instruments ("FDI") (instruments whose prices are dependent on one or more underlying asset) to achieve its investment objective. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The extensive use of FDI may significantly multiply the gains or losses.

**Leverage Risk** - The Fund's use of FDI may result in increased leverage which may lead to significant losses.

## Glossary

**Active share** - is a measure of the percentage of stock holdings in a manager's portfolio that differ from the reference index.

**Annualised Return** - An annualised total return is an average amount of money earned by an investment each year over a given time period. It is calculated to show what an investor would earn over a period of time if the annual return was compounded.

**Annualised Volatility** - Volatility is the rate and extent at which the price of a portfolio, security or index, moves up and down. If the price swings up and down with large movements, it has high volatility. If the price moves more slowly and to a lesser extent, it has lower volatility. It is used as a measure of the riskiness of an investment. Annualised volatility is an average annual amount of volatility over a given time period.

**Beta** - A measure of how sensitive an investment portfolio is to market movements. The sign of the beta (+/-) indicates whether, on average, the portfolio's returns move in line with (+), or in the opposite direction (-), to the market. The market has a beta of 1. If the portfolio has a beta of less (more) than 1, it means that the security is theoretically less (more) volatile than the market.

**Comparator Benchmark** - An index or similar factor against which a fund manager invites investors to compare a fund's performance.

**Constraining Benchmark** - An index or similar factor that fund managers use to limit or constrain how they construct a fund's portfolio. By the default this is also a comparator benchmark.

**Correlation** - A measure of the interdependence or strength of the relationship between two investments. A correlation of 1 means that the two investments are perfectly synchronised, -1 implies that they move in symmetrically opposite directions and 0 means no relationship between them.

**Entry Charge** - The entry charge shown is a maximum figure and in some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.

**Exposure** - This refers to the part of a portfolio that is subject to the price movements of a specific security, sector, market or economic variable. It is typically expressed as a percentage of the total portfolio, e.g. the portfolio has 10% exposure to the mining sector.

**Futures** - Derivative financial contracts that obligate parties to buy or sell an asset at a predetermined future date and price.

**Information Ratio** - A ratio of portfolio returns above the excess returns of a benchmark (usually an index) to the volatility of those returns. The ratio measures a portfolio manager's ability to generate excess returns relative to a benchmark. Volatility is measured using tracking error.

**Leverage** - When referring to a company, leverage is the level of a company's debt in relation to its assets. A company with significantly more debt than capital is considered to be leveraged. It can also refer to a fund that borrows money or uses derivatives to magnify an investment position.

**NAV** - The Net Asset Value (NAV) represents the value per share. It is calculated by dividing the total net asset value of the fund (the value of the fund's assets less its liabilities) by the number of shares outstanding.

**Ongoing Charge Figure (OCF)** - The OCF is estimated and based on expenses and may vary from year to year. It includes management fees but excludes performance fees (where applicable) and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund. The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

**Options** - Financial contracts that offer the right, but not the obligation, to buy or sell an asset at a given price on or before a given date in the future.

**Performance Fee** - The payment made to an Investment Manager if certain performance levels are achieved (often over and above any levels set out in the investment objective) within a set time period. Please refer to the fund's prospectus for a complete description.

**Position Concentration** - The proportion of a portfolio's net asset value represented by the largest (e.g. 5/10/20) positions.

**Redemption Fee** - This is the maximum that might be taken out of your money before the proceeds of your investment are paid out.

**Sector (i)** - A sector is an area of the economy in which businesses share the same or a related product or service. It can also be thought of as an industry or market that shares common operating characteristics. Dividing an economy into different pieces allows for more in-depth analysis of the economy as a whole.

**Sector (ii)** - A peer group of funds which have a similar investment objective or invest in the same type of assets. These are organised by independent companies such as the Investment Management Association in the UK. The average performance of a sector is often used to compare with the performance of an individual fund in the sector.

**Share Class** - Type of fund shares held by investors in a fund (share classes differ by levels of charge and/or by other features such as hedging against currency risk). Each has a different level of charges and minimum investment.

**Sharpe Ratio** - The Sharpe Ratio is a measure for calculating risk-adjusted return, and has become the industry standard for such calculations. The Sharpe Ratio is the average return earned in excess of the risk-free rate per unit of volatility or total risk. The higher the ratio the better, with a number greater than 1 usually considered good, a number greater than 2 considered very good and a ratio of 3 or higher considered excellent. As it is an absolute measure of risk-adjusted return, negative Sharpe Ratios can be misleading and are therefore shown as N/A.

**Target Benchmark** - An index or similar factor that is part of a target a fund manager has set for a fund's performance to match or exceed (including anything used for performance fee calculation). By default this is also a comparator.

**Tracking Error** - Tracking error is a measure of the divergence between a portfolio's returns and the benchmark or index against which it is managed.

**UCITS** - Stands for Undertakings for Collective Investments in Transferable Securities. This is the European regulatory framework for an investment vehicle that can be marketed across the European Union and is designed to enhance protections for Retail Investors.

**YTD** - Year-to-date.

## Important information

The fund is a sub-fund of Man Managed Fund ICVC, an investment company with variable capital domiciled in the United Kingdom and registered with The Financial Conduct Authority. Full details of the Fund objectives, investment policy and risks are located in the Prospectus which is available with the Key Investor Information Document (KIID) and the Report and Accounts of the NURS in English. The Fund's documentation is available free of charge from the local information/paying agent, from authorised distributors and from [www.man.com/documents](http://www.man.com/documents).

The value of an investment and any income derived from it can go down as well as up and investors may not get back their original amount invested. Alternative investments can involve significant additional risks.
