What is the product?

This is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier ("CSSF").

Investment Objectives

To achieve long-term total return by investing at least two-thirds of the Fund's assets in equities and equity-related securities of:

- 1) companies with their registered office in Australia or New Zealand; and/or
- 2) companies which have the preponderance of their business activities in Australia or New Zealand; and/or
- 3) holding companies that have the preponderance of their assets in companies with their registered office in Australia or New Zealand.

Strategy

The Fund may use derivatives for the purpose of hedging but will not use financial derivative instruments for investment purposes.

The Fund is actively managed. The Fund aims to outperform the Australian Stock Exchange All Ordinaries Index (AUD) benchmark before charges. The benchmark is also used as a reference point for portfolio construction and as a basis for setting risk constraints.

The Australian Stock Exchange All Ordinaries Index (AUD) represents over three quarters of the Australian share market and contains approximately 500 companies. However, this benchmark has a high allocation to large companies with the top 100 companies representing most of the index value.

In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark or invest in securities which are not included in the benchmark. The Fund will normally invest in a concentrated number of companies which will typically be components of the index.

The investments of the Fund may sometimes deviate significantly from the components of and their respective weightings in the benchmark but Fund and benchmark performance will sometimes be influenced by some similar exposures to the small number of very large companies in the benchmark. Consequently, the Fund's performance profile may not deviate significantly from that of the benchmark over some time periods but could also deviate significantly over the longer term. Due to the active nature of the management process, the Fund's performance profile may deviate significantly from that of the benchmark over the longer term.

Use of derivatives/investment in derivatives

The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.

What are the key risks?

Investment involves risks. Please refer to the offering document of Aberdeen Standard SICAV I for details including the risk factors.

1. Equity risk

- The value of the Fund that invests in equity and equity-related securities will be affected by economic, political, market, and issuer specific changes. Such changes may adversely affect securities, regardless of company specific performance.

2. Concentration risk

- The Fund invests in a specific regional market sector (i.e. Australia or New Zealand) and such is likely to be more volatile than a more widely invested fund.
- Lack of liquidity may adversely affect the value or ease of disposal of assets.

3. Risk of using financial derivative instruments

- Risks associated with financial derivative instruments include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a financial derivative instrument can result in a loss significantly greater than the amount invested in the financial derivative instrument by the Fund. Exposure to financial derivative instrument may lead to a high risk of significant loss by the Fund.

4. Exchange rates risk

- The Fund may invest in securities denominated in a number of different currencies other than the base currency in which the Fund is denominated. Changes in foreign currency exchange rates may adversely affect the value of the Fund's investments and the income thereon.

5. Risk of Foreign Account Tax Compliance Act ("FATCA")

- The Fund will attempt to satisfy any obligations imposed on it to avoid the imposition of FATCA withholding tax. However, no assurance can be given that the Fund will be able to satisfy these obligations. If the Fund becomes subject to a withholding tax as a result of the FATCA regime, the value of the shares held by the shareholders may suffer material losses.

6. General risk

- The value of shares and the income from them can go down as well as up and you may not get back the amount invested.

How has the fund performed?

% Returns

■ Fund (Net)
■ Benchmark

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year-end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the Class A Acc AUD increased or decreased in value during the calendar year being shown. Performance data has been calculated in AUD including ongoing charges and excluding subscription fee and redemption fee you might have to pay (if any).
- The Investment Manager views Class A Acc AUD being the most appropriate representative share class as this share class is opened for investment by Hong Kong retail investors and broadly indicative of the Fund's performance characteristics.
- The benchmark is Australian Stock Exchange All Ordinaries Index (AUD).
- Fund launch date: 04/1988
- Class A Acc AUD launch date: 04/1988

策略

本基金可為對沖目的而使用衍生工具，但不會為投資目的而使用金融衍生工具。

本基金為主動型管理。本基金旨在跑贏基準澳洲證交所所有普通股指數（澳元）（未扣除費用）。基準亦用作構建投資組合的參考點，及作為設置風險限制的基準。

澳洲證交所所有普通股指數（澳元）代表超過四分之三的澳洲股市，約有 500 家公司。但此基準對大型公司的配置比重較高，其前 100 家公司代表大部分指數價值。

為實現其目標，本基金將持有權重偏離基準的股票或投資未納入基準的證券。本基金一般會投資於少數公司，而有關公司通常為指數成份股。

本基金的投資可能會顯著偏離基準的成份股及其各自的權重，但本基金及基準的表現有時將受到基準中少數超大型公司的部分類似持倉所影響。因此，在某些時期內，本基金的表現狀況可能不會顯著偏離基準，但從長遠來看，亦可能會顯著偏離基準。由於管理過程的主動性，從長遠來看，本基金的表現可能會顯著偏離基準。

使用衍生工具／衍生工具投資

本基金的衍生工具風險承擔淨額最多可達本基金資產淨值的 50%。

- 與金融衍生工具有關的風險包括對手方/信貸風險、流動性風險、估值風險、波動性風險及場外交易風險。金融衍生工具的槓桿元素/組成部分可導致產生遠高於本基金投資於金融衍生工具的金額的損失。投資金融衍生工具可導致本基金產生重大損失的高風險。
