IMPORTANT NOTE:

- Threadneedle (Lux) - Pan European Small Cap Opportunities (the "Fund") principally invests in the equity securities of Smaller Companies domiciled in continental Europe and the UK, or with significant Continental European or UK operations.
- In respect of dividend paying share classes, distributions may at the discretion of the Directors be paid out of capital or effectively out of capital (i.e. paying dividends out of gross income while charging all or part of their fees and expenses out of capital) of the share classes. Any such distributions may result in an immediate reduction of the net asset value per share.
- The Fund focuses on investing in a single geographical area is subject to higher risks of concentration than Funds following a more diversified policy.
- Investors should aware that the prices of small cap stocks tend to be more volatile, and sometimes less liquid and harder to value than large cap stocks.
- The investment decision is yours but you should not invest unless the intermediary which sells you the Fund has advised you that the Fund is suitable for you and has explained why, including how investment in the Fund will be consistent with your investment objectives.
- Investors should not base their investment decision on this document alone and must refer to the Prospectus of each Fund prior to investing.

Investment Objective & Policy

The Fund aims to increase the value of your investment over the long term. It looks to outperform the EMIX Smaller European Companies Index after the deduction of charges. The Fund invests at least two-thirds of its assets in shares of smaller companies in Europe, including the UK, or companies that have significant operations there. The smaller companies that the Fund invests in will typically be companies smaller in size than the top 300 companies in the FTSE World Europe Index. The Fund may also invest in asset classes and instruments different from those stated above. The Fund permanently invests a minimum of 75% of its assets in European Economic Area equities, and is therefore PEA (Plan d'Epargne en Actions) eligible in France. The Fund is actively managed in reference to the EMIX Smaller European Companies Index. The index is broadly representative of the companies in which the Fund invests, and provides a suitable target benchmark against which Fund performance will be measured and evaluated over time. The fund manager has discretion to select investments with weightings different to the index, and that are not in the index, and the Fund may display significant divergence from the index. Deviations from the index, including guidelines on the level of risk relative to the index, will be considered as part of the fund manager's risk monitoring process, to ensure the overall level of risk is broadly consistent with the index. In line with its active management strategy, there may be significant deviation from the index.

HKD/USD based investors are exposed to currency fluctuations where funds are denominated in currencies other than HKD/USD. Past performance is not a guide to future performance. The performance data does not take account of the commissions and costs incurred on the issue and redemption of units. The value of investments and any income is not guaranteed and can go down as well as up and may be affected by exchange rate fluctuations. This means that an investor may not get back the amount invested. Index returns assume reinvestment of dividends and capital gains and unlike fund returns do not reflect fees or expenses. The index is unmanaged and cannot be invested directly. All returns assume income is reinvested for a local taxpayer, bid to bid performance (which means performance does not include the effect of any initial charges). The Share Class currency, unless indicated as a Hedged Share Class, is a translated price using exchange rates at the official valuation point of the fund. This is intended as a way to access a Share Class in your chosen currency and does not reduce your overall exposure to foreign currency. The fund currency indicates the highest currency exposure of the fund unless the currency breakdown is detailed in the Weightings % table on page 2.
