What is this product?

Type: Jupiter UK Dynamic Equity Fund (the "Fund") is a sub-fund of Jupiter Asset Management Series PLC, incorporated in Ireland.

Term: The Fund has no maturity date. The Management Company is not entitled to terminate the Fund unilaterally.

Objective: Capital growth by investing in shares (i.e. equities) and similar investments of companies that are principally outside the FTSE 100 Index at the time of investment.

Policy: In seeking to achieve its investment objective, the Fund will aim to deliver a return, net of fees, greater than that of the FTSE 250 ex Investment Trust Index over rolling 3 year periods.

The Fund principally gains investment exposure to UK company shares and similar investments.

The Fund will hold a long position (benefit from buying an asset with the aim of selling it later at a higher price to secure a profit) in an investment it favours, and short (benefit from the sale of an asset with the aim of buying it later at a lower price to secure a profit) an investment it does not favour. The Fund will adopt a structurally long position at all times.

The Fund will typically invest in the shares of fewer than 60 companies.

The Fund uses derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment), with the aim of generating returns and reducing the overall costs and/or risks of the Fund.

The Fund may invest up to 10% in unlisted companies.

The Fund typically has long and short positions through the use of derivatives, which may result in the Fund being leveraged. Leverage magnifies the exposure of the Fund to greater than the underlying investments. In such situations, returns may rise or fall more than they would have done otherwise, reflecting such additional exposure.

The Fund is actively managed. Portfolio construction is driven by research into a company's future prospects in the context of the economic environment to identify attractively priced investment opportunities. The Index is a broad representation of the Fund's investment universe. Although a large proportion of the Fund's investments may be components of the Index, the Fund has the ability to deviate significantly from the Index.

Treatment of income: income from investments, net of expenses, will be paid to shareholders.

Dealing: you can buy and sell shares on business days where retail banks are open for business in Dublin and London (excluding Saturdays, Sundays and public holidays).

Intended retail investor: The type of investor for whom the Fund is intended may include retail investors with no financial industry experience. Investors should be aware that a capital loss of some or all of the amount invested may occur. An investment in a particular Fund should be considered in the context of an investor's overall investment portfolio.

The Fund's assets are held with its depositary, Citi Depositary Services Ireland Designated Activity Company.

Further information about the Company, copies of its prospectus, annual and half-yearly reports may be obtained, for the entire Company, free of charge (the prospectus is available in English and other required languages) from the administrator, Citibank Europe plc, at 1 North Wall Quay, Dublin 1 Ireland or visit www.jupiteram.com.

The latest share prices are available from the administrator during normal business hours and will be published daily at www.jupiteram.com.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 5 out of 7 which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level. Poor market conditions will likely impact the probability of experiencing material losses on your investment.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other key material risks not captured by the risk indicator that could potentially impact the Fund are disclosed in the Prospectus and Supplement.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section 'what happens if we are unable to pay you'). The indicator shown above does not consider this protection.

Performance Scenarios

What you will get from this Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		£10000	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return if you exit before 5 years. You could lose some or all of your investment.		
Stress	What you might get back after costs	£500	£850
	Average return each year	-95.00%	-38.92%
Unfavourable	What you might get back after costs	£6660	£6500
	Average return each year	-33.40%	-8.25%
Moderate	What you might get back after costs	£10700	£15190
	Average return each year	7.00%	8.72%
Favourable	What you might get back after costs	£16340	£19730
	Average return each year	63.40%	14.56%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between 2021 and 2023.

Moderate scenario: This type of scenario occurred for an investment between 2015 and 2020.

Favourable scenario: This type of scenario occurred for an investment between 2016 and 2021.

What happens if Jupiter Asset Management (Europe) Limited is unable to pay out?

There is no compensation scheme or guarantee scheme in the event that the Company (or any other party including the Management Company) is unable to pay out.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario

- 10,000.00 GBP is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	£262	£1917
Annual cost impact (*)	2.6%	2.6% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.3 % before costs and 8.7 % after costs.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	£0
Exit costs	We do not charge an exit fee for this product.	£0

Incidental costs taken under specific conditions		
Performance fees (and carried interest)	The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	£108

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

The Fund's shares are designed to be held over the long term and may not be suitable as short-term investments. There is no guarantee that any appreciation in the value of the Fund's investments will occur and investors may not get back the full value of their investments. The value of the shares and the income derived from them (if any) may go down as well as up.
